AGENDA
BOARD OF SUPERVISORS
SONOMA COUNTY
575 ADMINISTRATION DRIVE, ROOM 102A
SANTA ROSA, CA 95403

TUESDAY **AUGUST 14, 2018** **8:30 A.M.**

(The regular afternoon session commences at 1:30 p.m.)

Susan Gorin	First District	Sheryl Bratton	County Administrator
David Rabbitt	Second District	Bruce Goldstein	County Counsel
Shirlee Zane	Third District		
James Gore	Fourth District		
Lynda Hopkins	Fifth District		

This is a simultaneous meeting of the Board of Supervisors of Sonoma County, the Board of Directors of the Sonoma County Water Agency, the Board of Commissioners of the Community Development Commission, the Board of Directors of the Sonoma County Agricultural Preservation and Open Space District, the Sonoma County Public Finance Authority, and as the governing board of all special districts having business on the agenda to be heard this date. Each of the foregoing entities is a separate and distinct legal entity.

The Board welcomes you to attend its meetings which are regularly scheduled each Tuesday at 8:30 a.m. Your interest is encouraged and appreciated.

AGENDAS AND MATERIALS: Agendas and most supporting materials are available on the Board's website at http://www.sonoma-county.org/board/. Due to legal, copyright, privacy or policy considerations, not all materials are posted online. Materials that are not posted are available for public inspection between 8:00 a.m. and 5:00 p.m., Monday through Friday, at 575 Administration Drive, Room 100A, Santa Rosa, CA.

SUPPLEMENTAL MATERIALS: Materials related to an item on this agenda submitted to the Board after distribution of the agenda packet are available for public inspection in the Board of Supervisors office at 575 Administration Drive, Room 100A, Santa Rosa, CA, during normal business hours.

DISABLED ACCOMMODATION: If you have a disability which requires an accommodation, an alternative format, or requires another person to assist you while attending this meeting, please contact the Clerk of the Board at (707) 565-2241 or bos@sonoma-county.org as soon as possible to ensure arrangements for accommodation.

Public Transit Access to the County Administration Center:
Sonoma County Transit: Rt. 20, 30, 44, 48, 60, 62
Santa Rosa CityBus: Rt. 14
Golden Gate Transit: Rt. 80
For transit information call (707) 576-RIDE or 1-800-345-RIDE or visit or http://www.sctransit.com/

APPROVAL OF THE CONSENT CALENDAR

The Consent Calendar includes routine financial and administrative actions that are usually approved by a single majority vote. There will be no discussion on these items prior to voting on the motion unless Board Members request specific items be discussed and/or removed from the Consent Calendar. There will an opportunity for the public to comment on the consent calendar prior to it being voted upon.

PUBLIC COMMENT

Any member of the public may address the Board on a matter listed on the agenda. Commenters are requested to fill out a Speaker Card and to come forward to the podium when recognized by the Board Chair. Please state your name and limit your comments to the agenda item under discussion. Available time for comments is determined by the Board Chair based on agenda scheduling demands and total number of speakers.

8:30 A.M. CALL TO ORDER
PLEDGE OF ALLEGIANCE

I. APPROVAL OF THE AGENDA

(Items may be added or withdrawn from the agenda consistent with State law)

Santa Rosa, CA 95403

Agenda Item Number: 1
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors, Sonoma County Water Agency, and Sonoma Valley County Sanitation District
Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s):	Sonoma County Water Agency and Sonoma Valley County Sanitation District
Staff Name and Phone Number:	**Supervisorial District(s):**
Kevin Booker 521-1865	First and Second
Title:	North Bay Water Reuse Authority – Amended Professional Service Agreement

Recommended Actions:

Authorize Water Agency's General Manager or designee to execute the Third Amended Agreement for Engineering, Environmental, and Public Outreach Services for North Bay Water Reuse Authority with Brown and Caldwell to provide engineering, environmental, and public outreach services for North Bay Water Reuse Authority increasing the amount by $176,103, expanding the scope of work to include fiscal year 2018/2019 tasks, and extending the agreement term by one year for a new not-to-exceed agreement total of $3,495,756 (Water Agency share: $22,996; Sonoma Valley Sanitation District share: $20,405) and end date of October 31, 2019. The North Bay Water Reuse Program (Program) is a model for maximizing the benefits of limited water resources and providing a reliable water source for the region.

Executive Summary:

The North Bay Water Reuse Program (Program) is a model for maximizing the benefits of limited water resources in the West. By partnering on the local level, agencies and elected officials have developed a solution to meet broad constituent needs under the umbrella of a comprehensive regional program. Under this amended agreement, Brown and Caldwell will continue to provide project management; provide engineering analysis, environmental evaluation, financial capabilities analysis, and identification of funding sources; prepare and administer grant funding applications; coordinate and prepare materials for public outreach and communication efforts; and provide Phase 1 support services through fiscal year 2018/19. This agreement is being amended: to allow completion of the environmental evaluation and financial capabilities analysis; continue public outreach efforts; and assist the Program in applying for future grant funding opportunity by the Bureau of Reclamation.

Discussion:

Prior Board Actions:

11/14/2017	Concurrent action for Board authorization for Chairs of the Water Agency and District to sign the Fourth Amended MOU, authorization of Water Agency's General Manager or designee to execute an amended agreement with Brown and Caldwell to provide engineering, environmental, and public outreach services, and authorization of expenditure of District funds for the District's portion of costs for the above amended agreement with Brown and Caldwell.
9/12/2017	North Bay Water Reuse Authority Phase II Grant Administration
9/27/2016	North Bay Water Reuse Program Sonoma Valley County Sanitation District Treatment Plant Pumping and Piping Upgrades – Contract Award
5/21/2016	North Bay Water Reuse Program Sonoma Valley County Sanitation District Fifth Street East Recycled Water Pipeline – Contract Award and Cooperative Agreement.

Strategic Plan Alignment Goal 1: Economic and Environmental Stewardship.

The Program will provide an alternative source of water for agricultural irrigation in Sonoma County.

Waste Water Treatment and Water Reuse, Goal 1: Improve operational reliability of wastewater treatment and water reuse systems.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	176,103		
Additional Appropriation Requested			
Total Expenditures	**176,103**		
Funding Sources			
General Fund/WA GF			
State/Federal			
Fees/Other NBWRA Trust	176,103		
Use of Fund Balance

CF/71-700-21 Brown & Caldwell (Agree for Engineering, Environmental, and Public Outreach Services for North Bay Water Reuse Authority FY 2014/2015 through 2016/2017) TW 12/13-132 (ID 4646)

DRAFT Third Amended Agreement for Engineering, Environmental, and Public Outreach Services for North Bay Water Reuse Authority (FY 2014/2015, FY 2015/2016, FY 2016/2017, FY 2017/2018, and FY 2018/2019)

This third amended agreement ("Third Amended Agreement" or "Agreement") is by and between **Sonoma County Water Agency**, a body corporate and politic of the State of California "Water Agency"), on behalf of the North Bay Water Reuse Authority (hereinafter "Authority"), and **Brown and Caldwell**, a California corporation ("Consultant"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Article 6 (Term of Agreement).

R E C I T A L S

A. Consultant represents that it is a duly qualified and licensed firm experienced in engineering, environmental, public outreach, and related services.

B. Water Agency, as approved by its Board of Directors, entered into a Memorandum of Understanding (MOU) establishing the Authority with Las Gallinas Valley Sanitary District, Napa Sanitation District, Novato Sanitary District, and Sonoma Valley County Sanitation District, effective August 2005, and amended in January 2008.

C. North Marin Water District and County of Napa became signatories under the Second Amended MOU, effective November 2010.

D. Marin Municipal Water District and City of Petaluma became signatories under the Third Amended MOU, effective May 2013.

E. City of American Canyon joined the Authority in March 2017.

F. The Fourth Amended MOU was approved by Authority Board on August 28, 2017, and became effective on November 15, 2017.

G. Together with the Authority, Water Agency wishes to expand the beneficial use of recycled water in the North Bay region under the North Bay Water Reuse Program (Program), thereby promoting the conservation of limited surface water and groundwater resources.

H. Section 12 of the Fourth Amended MOU designates Water Agency to act as the Administrative Agency for the purpose of carrying out the provisions of the Fourth Amended MOU.

I. Section 12.a. of the Fourth Amended MOU provides that the Administrative Agency for the benefit of the Authority and its members shall award, execute in its own name, and administer such contracts on behalf of the Authority as authorized by the Authority's Board of Directors.

J. The Authority Board of Directors reviewed and accepted the scope of work and budget for an agreement for engineering, environmental, and public outreach services for the Authority at its May 19, 2014, meeting. On September 6, 2014, Water Agency entered into this Agreement with Consultant as the Administrative Agency under the Third Amended MOU on behalf of Authority members who had executed the Third Amended MOU.

K. This First Amended Agreement modified Exhibit A (Scope of Work) to remove $49,000 from the triple bottom line analysis to add the new extended seasonal storage analysis, transfer $25,000 from Phase 2 grant applications to workshops, and transfer $25,000 from triple bottom line analysis to public involvement for a total decrease of $24,000 in the Agreement amount for a new total of $2,998,379.

L. The First Amended Agreement also extended the term of the Agreement by six months to December 31, 2017.

M. The Second Amended Agreement expanded some tasks and decreased others; increased the Agreement amount by $321,274, accordingly; and extended the term end date for a new total Agreement amount of $3,319,653 and term end date of October 30, 2018.

N. This Third Amendment Agreement expands Tasks 1, 3, and 5 for a total increase of $176,103 for FY 18/19; and extends the term by one year to October 30, 2019.

O. This Third Amended Agreement supersedes all previous agreements and amendments between the parties.

In consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

A G R E E M E N T

1. RECITALS

1.1. The above recitals are true and correct.

2. LIST OF EXHIBITS

2.1. The following exhibits are attached hereto and incorporated herein:

Remit invoices to: Susan Bookmyer and Administrative Contact Same address as above or Email: susan.bookmyer@scwa.ca.gov and Jake.Spaulding@scwa.ca.gov	**Remit payments to:** Brown and Caldwell PO Box 45208 San Francisco, CA 94145-0208

3.3. *Performance Standard and Standard of Care:* Consultant hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with the requirements of applicable federal, state and local laws, it being understood that acceptance of Consultant's work by Water Agency shall not operate as a waiver or release. Water Agency has relied upon the professional ability and training of Consultant as a material inducement to enter into this Agreement. Consultant hereby agrees that its work will be performed and its operations conducted in accordance with the standards of a reasonable professional having specialized knowledge and expertise in the services provided under this Agreement. If Water Agency determines that any of Consultant's work is not in accordance with such level of competency and standard of care, Water Agency, in its sole discretion, shall have the right to do any or all of the following: (a) require Consultant to meet with Water Agency to review the quality of the work and resolve matters of concern; (b) require Consultant to repeat the work at no additional charge until it is satisfactory; (c) terminate this

Agreement pursuant to the provisions of Article 7 (Termination); or (d) pursue any and all other remedies at law or in equity.

3.4. *Assigned Personnel:*

a. Consultant shall assign only competent personnel to perform work hereunder. In the event that at any time Water Agency, in its sole discretion, desires the removal of any person or persons assigned by Consultant to perform work hereunder, Consultant shall remove such person or persons immediately upon receiving written notice from Water Agency.

b. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by Water Agency to be key personnel whose services were a material inducement to Water Agency to enter into this Agreement, and without whose services Water Agency would not have entered into this Agreement. Consultant shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of Water Agency.

c. With respect to performance under this Agreement, Consultant shall employ the following key personnel and Consultant's subconsultants:

Company	***Key Personnel Name and Title***
Brown & Caldwell	Michael Savage, Vice President
Mark Millan dba Data Instincts	Mark Millan, Principal
Bryant and Associates	Ginger Bryant
Environmental Science Associates	Jim O'Toole, Vice President Leslie Moulton, Senior Vice President

d. In the event that any of Consultant's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness, or other factors outside of Consultant's control, Consultant shall be responsible for timely provision of adequately qualified replacements.

4. ASSIGNMENT AND DELEGATION

4.1. *Consent:* Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

4.2. *Subcontracts:*

a. Consultant shall perform a competitive selection process that includes DBE outreach, pursuant to Exhibit I.

b. Notwithstanding the foregoing paragraph 4.1, Consultant may enter into subcontracts with the subconsultants specifically identified herein:

Subconsultant Company Name	***DBE (Yes/No)***
Virginia Bryant dba Bryant & Associates	No

Subconsultant Company Name	***DBE (Yes/No)***
Mark Millan dba Data Instincts	No
Environmental Science Associates	No
Kennedy/Jenks Consultants	No
Geotechnical Consultants, Inc.	Yes

c. If no subconsultants are listed, then no subconsultants will be utilized in the performance of the work specified in this Agreement.

d. If any subconsultant listed above is a DBE, the subconsultant cannot be removed from work on this Agreement without written permission of Water Agency.

4.3. *Change of Subcontractors or Subconsultants:* If, after execution of the Agreement, parties agree that subconsultants not listed in Paragraph 4.2 will be utilized, Consultant may enter into subcontracts with subconsultants to perform other specific duties pursuant to the provisions of this Paragraph 4.3. The following provisions apply to any subcontract entered into by Consultant other than those listed in Paragraph 4.2 above:

a. Consultant shall perform a competitive selection process that includes DBE outreach, pursuant to Exhibit I.

b. Water Agency's Board of Directors must approve the selection of any subconsultant if the amount payable to subconsultant under the Agreement exceeds $25,000. In connection with such approval, Consultant shall provide Water Agency with copies of the responses to Consultant's competitive selection process solicitation to subconsultants, the names of key personnel who will be performing work under the agreement, and an explanation of Consultant's reasons for choosing the recommended subconsultant based upon the criteria in the solicitation.

c. If any subconsultant hired under this paragraph 4.3 is a DBE, the subconsultant cannot be removed from work on this Agreement without written permission of Water Agency.

d. All agreements with subconsultants shall (a) contain indemnity requirements in favor of Water Agency in substantially the same form as that contained in Section 8, (b) contain language that the subconsultant may be terminated with or without cause upon reasonable written notice, and (c) prohibit the assignment or delegation of work under the agreement to any third party.

4.4. *Summary of Subconsultants' Work:* Consultant shall provide Water Agency with a monthly summary of all work performed by all subconsultants during the preceding month. Such summary shall identify the individuals performing work on behalf of subconsultants and the total amount paid to subconsultant, broken down by the tasks listed in the Scope of Work.

5. PAYMENT

5.1. *Total Costs.* Total costs under this Agreement shall not exceed $3,495,756 (Water Agency's share shall not exceed $373,135).

5.2. *Method of Payment.* For all services and incidental costs required hereunder, Consultant shall be paid in accordance with the following terms:

a. Rates: Consultant shall be paid in accordance with the rates set forth in Exhibit B. Any mark-up shall be included in billed rates.

b. Reimbursement by Other Authority Members: Reimbursement for Consultant's hourly rate, subconsultant costs, and reasonable and necessary expenses will be shared among members of the Authority as provided for in Section 14 of the Fourth Amended MOU and approved by Authority Board on August 28, 2017. Water Agency will pay its proportionate share of costs under this Agreement. Water Agency will invoice remaining members of the Authority for their proportionate share of costs under this Agreement and will reimburse Consultant from Water Agency funds and from funds received from Authority members in accordance with the cost share provisions of Section 14 of the Fourth Amended MOU approved by Authority Board on August 28, 2017, or a subsequent amended MOU. Upon conclusion or termination of this Agreement in accordance with Section 7 below, any unused funds received from the remaining members of the Authority will be reimbursed to each member. Consultant understands and agrees to Water Agency's proportionate share of amounts owed to Consultant as outlined in Exhibit C, Allocation of Costs. Consultant agrees that payment of the non-Water Agency share of amounts owed to Consultant hereunder is contingent upon Water Agency's receipt of funds for such payment from other Authority members, and that Water Agency shall have no liability for payment of the share of other Authority members.

5.3. *Invoices:* Consultant shall submit its bills in arrears on a monthly basis, based on work completed for the period, in a form approved by Water Agency's Project Manager. The bills shall show or include:

a. Consultant name

b. Name of Agreement

c. Water Agency's Project-Activity Codes as follows:

   i. Phase 1: N0003D034

   ii. Phase 2:

      a) Tasks 1 and 5: N0002D049
      b) Task 2: N0004D049
      c) Tasks 3 and 4: N0005D049

d. Task performed with an itemized description of services rendered by date

e. Time in quarter hours devoted to the task

f. Hourly rate or rates of the persons performing the task

g. Summary of work performed by subconsultants, as described in Paragraph 4.4

5.4. *Cost Tracking:* Consultant has provided an estimated breakdown of costs, included in Exhibit D (Estimated Breakdown of Costs). Exhibit D will only be used as a tool to monitor progress of work and the project budget. Actual payment will be made as specified in Paragraph 5.2 above.

5.5. *Funding:*

a. Funding for this Agreement is as follows:

Current Fiscal Year	*Budgeted Appropriation*
2014/2015	$897,963
Subsequent Fiscal Years	*Planned Appropriation*
2015/2016	$987,634
2016/2017	$1,257,442
2017/2018	$176,614
2018/2019	$176,103

b. Availability of Funding in Subsequent Fiscal Years:

i. Water Agency's performance under this Agreement in subsequent years is contingent upon appropriation of funds by Water Agency's Board of Directors. Water Agency shall have no liability under this Agreement if sufficient funds are not appropriated in subsequent fiscal years by Water Agency's Board of Directors for the purpose of this Agreement.

ii. If funding for this Agreement for any fiscal year is reduced or eliminated by Water Agency's Board of Directors, Water Agency shall have the option to either terminate this Agreement in accordance with Article 7 (Termination) or offer an amendment to Consultant to reflect the reduced amount.

iii. If funding for this Agreement for any fiscal year is reduced or eliminated by Authority's Board of Directors, Authority, through the Administrative Agency, shall have the option to either terminate this Agreement in accordance with Article 7 (Termination) or offer an amendment to Consultant to reflect the reduced amount.

6. TERM OF AGREEMENT

6.1. The term of this Agreement shall be from July 1, 2014 ("Effective Date") to October 30, 2019, unless terminated earlier in accordance with the provisions of Article 7 (Termination).

7. TERMINATION

7.1. *Termination Without Cause:* Notwithstanding any other provision of this Agreement, at any time and without cause, Water Agency shall have the right, in its sole discretion, to terminate this Agreement by giving 5 days written notice to Consultant.

7.2. *Termination for Cause:* Notwithstanding any other provision of this Agreement, should Consultant fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, Water Agency may immediately terminate this Agreement by giving Consultant written notice of such termination, stating the reason for termination.

7.3. *Delivery of Work Product and Final Payment Upon Termination:* In the event of termination, Consultant, within 14 days following the date of termination, shall deliver to Water Agency all materials and work product subject to Paragraph 13.9 and shall submit to Water Agency an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

7.4. *Payment Upon Termination:* Upon termination of this Agreement by Water Agency, Consultant shall be entitled to receive as full payment for all services satisfactorily rendered and expenses incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Consultant bear to the total services otherwise required to be performed for such total payment; provided, however, that if services are to be paid on a per-hour or per-day basis, then Consultant shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to termination times the applicable hourly or daily rate; and further provided, however, that if Water Agency terminates the Agreement for cause pursuant to Paragraph 7.2, Water Agency shall deduct from such amounts the amount of damage, if any, sustained by Water Agency by virtue of the breach of the Agreement by Consultant.

7.5. *Authority to Terminate:* Water Agency's right to terminate may be exercised by Water Agency's General Manager.

8. INDEMNIFICATION

8.1. Consultant agrees to accept responsibility for loss or damage to any person or entity, including Water Agency, the Authority, and members of the Authority ("Indemnitees"), and to defend, indemnify, hold harmless, and release Indemnitees, their officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Consultant, that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant or its agents,

employees, contractors, subcontractors, or invitees hereunder, whether or not there is concurrent negligence on Indemnitees' part, but, to the extent required by law, excluding liability due to Indemnitees' conduct. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Consultant or its agents, employees, contractors, subcontractors, or invitees under workers' compensation acts, disability benefits acts, or other employee benefit acts. This indemnity provision survives the Agreement.

9. INSURANCE

9.1. With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in Exhibit E.

10. PROSECUTION OF WORK

10.1. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Consultant's performance of this Agreement shall be extended by a number of days equal to the number of days Consultant has been delayed.

11. EXTRA OR CHANGED WORK

11.1. Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes, which do not increase the amount paid under the Agreement, and which do not significantly change the scope of work or significantly lengthen time schedules may be executed by the Water Agency's General Manager in a form approved by County Counsel. The parties expressly recognize that Water Agency personnel are without authorization to order all other extra or changed work or waive Agreement requirements. Failure of Consultant to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Consultant shall be entitled to no compensation whatsoever for the performance of such work. Consultant further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of Water Agency.

12. CONTENT ONLINE ACCESSIBILITY

12.1. *Accessibility:* Water Agency policy requires that all documents that may be published to the Web meet accessibility standards to the greatest extent possible, and utilizing available existing technologies.

12.2. *Standards:* All consultants responsible for preparing content intended for use or publication on a Water Agency/County-managed or Water Agency/County-funded web site must comply with applicable federal accessibility standards established by 36 C.F.R. Part 1194, pursuant to Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794(d)), and Water Agency's Web Site Accessibility Policy located at http://webstandards.sonoma-county.org.

12.3. *Certification:* With each final receivable intended for public distribution (report, presentations posted to the Internet, public outreach materials), Consultant shall include a descriptive summary describing how all deliverable documents were assessed for accessibility (e.g. Microsoft Word accessibility check; Adobe Acrobat accessibility check, or other commonly accepted compliance check).

12.4. *Alternate Format:* When it is strictly impossible due to the unavailability of technologies required to produce an accessible document, Consultant shall identify the anticipated accessibility deficiency prior to commencement of any work to produce such deliverables. Consultant agrees to cooperate with Water Agency staff in the development of alternate document formats to maximize the facilitative features of the impacted document(s); e.g., embedding the document with alt-tags that describe complex data/tables.

12.5. *Noncompliant Materials; Obligation to Cure:* Remediation of any materials that do not comply with Water Agency's Web Site Accessibility Policy shall be the responsibility of Consultant. If Water Agency, in its sole and absolute discretion, determines that any deliverable intended for use or publication on any Water Agency/County-managed or Water Agency/County-funded Web site does not comply with Water Agency Accessibility Standards, Water Agency will promptly inform Consultant in writing. Upon such notice, Consultant shall, without charge to Water Agency, repair or replace the non-compliant materials within such period of time as specified by Water Agency in writing. If the required repair or replacement is not completed within the time specified, Water Agency shall have the right to do any or all of the following, without prejudice to Water Agency's right to pursue any and all other remedies at law or in equity:

a. Cancel any delivery or task order

b. Terminate this Agreement pursuant to the provisions of Article 7 (Termination); and/or

c. In the case of custom Information and Communication Technology (ICT) developed by Consultant for Water Agency, Water Agency may have any necessary changes or repairs performed by itself or by another contractor. In such event, Consultant shall be liable for all expenses incurred by Water Agency in connection with such changes or repairs.

12.6. *Water Agency's Rights Reserved:* Notwithstanding the foregoing, Water Agency may accept deliverables that are not strictly compliant with Water Agency Accessibility Standards if Water Agency, in its sole and absolute discretion,

determines that acceptance of such products or services is in Water Agency's best interest.

13. REPRESENTATIONS OF CONSULTANT

13.1. *Status of Consultant:* The parties intend that Consultant, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Consultant is not to be considered an agent or employee of Water Agency, the Authority, or any members of the Authority and is not entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits Water Agency, the Authority, or any members of the Authority provide their employees. In the event Water Agency exercises its right to terminate this Agreement pursuant to Article 7 (Termination), Consultant expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

13.2. *No Suspension or Debarment:* Consultant and Consultant's subcontractors, consultants, and other agents warrant that they are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Consultant and Consultant's subcontractors, consultants, and other agents also warrant that they are not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration.

a. Consultant shall complete Exhibit G.

b. Consultant's subcontractors, consultants, and other agents shall each complete a separate Exhibit H. Make additional copies of Exhibit H, as needed.

13.3. *Taxes:* Consultant agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Consultant agrees to indemnify and hold Indemnitees harmless from any liability which it may incur to the United States or to the State of California or to any other public entity as a consequence of Consultant's failure to pay, when due, all such taxes and obligations. In case Water Agency is audited for compliance regarding any withholding or other applicable taxes, Consultant agrees to furnish Water Agency with proof of payment of taxes on these earnings.

13.4. *Records Maintenance:* Consultant and Consultant's subcontractors, consultants, and other agents shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to Water Agency and the Authority for inspection at any reasonable time.

Consultant shall maintain such records for a period of four (4) years following completion of work hereunder.

13.5. *Conflict of Interest:* Consultant covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Consultant further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if required by law or requested to do so by Water Agency, Consultant shall submit a completed Fair Political Practices Commission Statement of Economic Interests (Form 700) with Water Agency within 30 calendar days after the Effective Date of this Agreement and each year thereafter during the term of this Agreement, or as required by state law.

13.6. *Statutory Compliance/Living Wage Ordinance:* Consultant agrees to comply, and to ensure compliance by its subconsultants or subcontractors, with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Consultant expressly acknowledges and agrees that this Agreement may be subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

13.7. *Nondiscrimination:* Consultant shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

13.8. *Assignment of Rights:* Consultant assigns to Water Agency and the Authority all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Consultant in connection with this Agreement. Consultant agrees to take such actions as are necessary to protect the rights assigned to Water Agency and the Authority in this Agreement, and to refrain from taking any action which would impair those rights. Consultant's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as Water Agency may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written

permission of Water Agency. Consultant shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of Water Agency.

13.9. *Ownership and Disclosure of Work Product:* All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Consultant or Consultant's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of Water Agency. Water Agency shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Consultant shall promptly deliver to Water Agency all such documents, which have not already been provided to Water Agency in such form or format as Water Agency deems appropriate. Such documents shall be and will remain the property of Water Agency without restriction or limitation. Consultant may retain copies of the above described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of Water Agency.

14. PREVAILING WAGES

14.1. *General:* Consultant shall pay to any worker on the job for whom state or federal prevailing wages have been established, including but not limited to geotechnical work, an amount equal to or more than the general prevailing rate of per diem wages for (1) work of a similar character in the locality in which the work is performed and (2) legal holiday and overtime work in said locality. The per diem wages shall be an amount equal to or more than the stipulated rates contained in a schedule that has been ascertained and determined by the Director of the State Department of Industrial Relations, U.S. Department of Labor, and Water Agency to be the general prevailing rate of per diem wages for each craft or type of workman or mechanic needed to execute this Agreement. Consultant shall also cause copies of these determinations of the prevailing rate of per diem wages to be posted at each site work is being performed, in addition to all other job site notices prescribed by regulation. Copies of the prevailing wage rates of per diem wages are on file at Water Agency and will be made available to any person upon request. Copies of state wage rates are also available at www.dir.ca.gov/labor_law.html. Copies of federal wage rates are available at Wage Determinations OnLine.gov: www.wdol.gov.

14.2. *Compliance Monitoring and Registration*: This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations. Consultant shall furnish and shall require all subcontractors and subconsultants to furnish the records specified in Labor Code section 1776 (e.g. electronic certified payroll records) directly to the Labor Commissioner in a format prescribed by the Labor Commissioner at least monthly. Consultant and all subcontractors performing work that requires payment of prevailing wages shall

be registered and qualified to perform public work pursuant to Labor Code section 1725.5 as a condition to engage in the performance of any services under this Agreement.

14.3. *Subcontracts:* Consultant shall insert in every subcontract or other arrangement which Consultant may make for performance of such work or labor on work provided for in the Agreement, the foregoing subparagraph 14.1.

14.4. *Compliance with Law:* Consultant stipulates that it shall comply with all applicable wage and hour laws, including without limitation Labor Code Sections 1725.5, 1775, 1776, 1777.5, 1813, and 1815 and California Code of Regulations, Title 8, Section 16000, et seq.

15. DEMAND FOR ASSURANCE

15.1. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article 15 limits Water Agency's right to terminate this Agreement pursuant to Article 7 (Termination).

16. METHOD AND PLACE OF GIVING NOTICE, SUBMITTING BILLS, AND MAKING PAYMENTS

16.1. *Method of Delivery:* All notices, bills, and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail, courier service, or electronic means. Notices, bills, and payments shall be addressed as specified in Paragraph 3.2.

16.2. *Receipt:* When a notice, bill, or payment is given by a generally recognized overnight courier service, the notice, bill, or payment shall be deemed received on the next business day. When a copy of a notice, bill, or payment is sent by electronic means, the notice, bill, or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill, or payment is deposited in the U.S. mail and postmarked on the date of the electronic transmission (for a payment, on or before the due date), (2) the sender has a

written confirmation of the electronic transmission, and (3) the electronic transmission is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills, and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this Article 16.

17. MISCELLANEOUS PROVISIONS

17.1. *No Bottled Water:* In accordance with Water Agency Board of Directors Resolution No. 09-0920, dated September 29, 2009, no Water Agency funding shall be used to purchase single-serving, disposable water bottles for use in Water Agency facilities or at Water Agency-sponsored events. This restriction shall not apply when potable water is not available.

17.2. *No Waiver of Breach:* The waiver by Water Agency of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or promise or any subsequent breach of the same or any other term or promise contained in this Agreement.

17.3. *Construction:* To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Consultant and Water Agency acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Consultant and Water Agency acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

17.4. *Consent:* Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

17.5. *Applicable Law and Forum:* This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or in the forum nearest to the City of Santa Rosa, in the County of Sonoma.

17.6. *Captions:* The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

17.7. *Merger:* This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

17.8. *Survival of Terms:* All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

17.9. *Time of Essence:* Time is and shall be of the essence of this Agreement and every provision hereof.

Exhibit A

Scope of Work

1. COMMENCEMENT OF WORK

1.1. Consultant is authorized to proceed immediately with the performance of this Agreement upon the Effective Date of this Agreement.

2. TASKS

Submit 7 electronic copies in PDF format (on CD) and 7 hard copies of each final deliverable to Water Agency.

2.1. Task 1: Management

a. Workshops/Authority Board of Directors (Board)/Technical Advisory Committee (TAC) Meetings

i. FY 2014/2015 through FY 2016/2017:
   a) Attend up to 9 workshops with Board and TAC
   b) Attend up to 6 Board and TAC meetings and 12 TAC-only meetings that do not coincide with workshops
   c) Attend up to six TAC-only meetings by conference call

ii. FY 2015/2016 and FY 2016/2017: Attend 6 meetings in person with Authority Board President and 6 conference calls or web meetings

iii. FY 2016/2017: Develop multiple scenarios for cost allocations to the member agencies and produce spreadsheets and presentations on cost allocation for Board meetings and workshops

iv. FY 2017/2018: Attend up to 4 Board of Directors meetings

v. FY 2018/2019 Attend up to 4 meetings

vi. Prepare agendas, presentation materials, and handouts for workshops
   a) First Draft: Prepare the Consultant's components of agendas, materials, and handouts in draft form and submit to Water Agency Project Manager for review and approval in accordance with the dates listed for this task.
   b) Subsequent Draft(s): If Water Agency Project Manager requests revisions, revise and resubmit Consultant's components for Water Agency approval.
   c) Final: Following Water Agency Project Manager approval and prior to Water Agency's acceptance of work under this Agreement, submit the final approved Consultant's components of agendas, materials, and handouts to Water Agency.

b. Public Involvement

i. FY 2014/2015 through FY 2016/2017: Support Program Public Outreach and Communication Needs

a) Review project-related studies, documents, customer guidelines, and messages prior to release and make suggestions and recommendations.
b) In coordination with project team, review existing communications material for each geographic area of existing and new Authority member agencies to ascertain the best informational approach in meeting the needs of these constituents, potential customers, special interests, and potentially affected stakeholders.
c) Develop and prepare outreach materials to be used by Authority to help maintain the identity and brand of the Authority and reinforce the value of water reuse to the communities being served.
d) Prepare press releases, opinion pieces, message points and other media-related responses to press inquiries and guide project team on media-related matters.
e) Manage and maintain consistent graphic look and feel of Authority outreach materials including, but not limited to, fact sheets, PowerPoint presentations, Web page content, YouTube videos, new practices and/or guidelines, letters, social media, e-mail broadcasts and exhibits.
f) Update message points, fact sheets and Web site to reflect completion of Phase 1 projects and introduction of Phase 2 studies, plans and activities.
g) Manage incoming telephone inquiries from media, potential customers, key stakeholders, and special interest groups of the project areas. Maintain dedicated project phone line.
h) Manage permission-based email broadcasts, customer and community group lists, and distribution of messages.
i) Maintain external Web content, news articles, document postings, Authority member listings, and mapping.
j) Coordinate printing and mailing services.

ii. FY 2017/2018 through FY 2018/2019: Support Program Public Outreach and Communication Needs
a) Review project-related studies, documents, and messages prior to release and make suggestions and recommendations.
b) In coordination with project team, review existing communications material for each geographic area of existing Authority member agencies to ascertain the best informational approach in meeting the needs of constituents, potential customers, special interests, and potentially affected stakeholders.
c) Prepare press releases, opinion pieces, message points and other media-related responses to press inquiries and guide project team on media-related matters.
d) Manage Authority outreach materials including, but not limited to, fact sheets, PowerPoint presentations, Web page content, YouTube

videos, letters, e-mail broadcasts and exhibits, as may be needed to reflect introduction of Phase 2 studies, plans and activities.

e) Manage incoming telephone inquiries from media, potential customers, key stakeholders, and special interest groups of the project areas. Maintain dedicated project phone.

f) Manage permission-based email broadcast lists and distribution of messages.

g) Coordinate printing and mailing services.

iii. Assist and Support Authority Efforts

a) FY 2014/2015 through FY 2016/2017:

(i) Provide guidance and support to Authority staff to identify and communicate with potential customers and partners.

(ii) Maintain contact management information and database.

b) FY 2014/2015 through FY 2018/2019:

(i) Attend meetings and Program workshops, and participate in conference calls conducted by the project team.

(ii) Prepare and provide guidance for public meetings and technical workshops.

iv. FY 2014/2015 through FY 2016/2017: Stakeholder Relations - Public Meetings and Workshops

a) Work with other recycled water generators in the Authority region and with agricultural interests to develop and participate in public outreach efforts including, but not limited to:

i) Help identify potential customers, key stakeholders, and special interest groups and their representatives in the Authority region, including local governments, sanitation and water districts, agricultural industry, the environmental community, local business community, and non-governmental organizations that may have an interest in the Program.

ii) Provide outreach to stakeholders and provide Program-related information, the content and status of legislation, the potential benefits of the Program, and stakeholder issues of concern related to the Program.

iii) Support project team efforts for information gathering and sharing regarding potential customers, stakeholders and special interest groups. Plan, prepare, and assist in facilitating meetings with stakeholder groups. Assist and provide guidance in resolving stakeholder issues of concern. Provide follow-up reporting to public workshop participants and report on outcomes of public meetings and workshops to the TAC and Board to keep participants informed.

v. FY 2014/2015 through FY 2018/2019: Federal Appropriations/Grant Support

a) Provide support to the Authority's Legislative Development Services consultant and Authority member agency staff.
b) Help the Authority's Legislative Development Services consultant prepare materials to support the pursuit of necessary authorizations and funding.
c) Assist with project-related tours of project areas for prospective customers; special interest groups; and local, state, and federal funding interests.

vi. FY 2014/2015 through FY 2017/2018: Support of Environmental Review Process and Feasibility Studies
a) Help environmental review team communicate the environmental review process to potentially affected public, stakeholders and government officials as required by CEQA and NEPA.
b) Provide technical and communications support in posting and update key meeting dates and environmental reports to the Authority Web site.
c) Produce collateral materials and PowerPoint presentations for public meetings, and public fact sheets and notifications.
d) Help develop list of stakeholders specific to the EIR/EIS.
e) Assist and provide guidance in preparing outreach materials and presentations that respond to questions and concerns highlighting Program activities and projects.

c. FY 2014/2015 through FY 2018/2019: Administration
i. Prepare a workplan identifying the schedule and purposes of the workshops. Link the tasks associated with the development of the project deliverables to the workshop topics.
ii. Monthly Reports:
a) Prepare and provide copies of monthly reports to Water Agency's Project Manager, Authority's Program Manager, and Water Agency's Administrative Contact.
b) Monthly reports shall include the following:
i) A detailed list of work performed
ii) Dates and subject of meetings conducted, meeting attendees, and summary of meeting results
iii) A detailed list of work planned for the coming month
iv) Other information as appropriate or as requested by Water Agency's Project Manager

d. Task 1 Deliverables

Deliverable	Due Date
Draft workshop agendas	Within 10 calendar days prior to each workshop
Final workshop agendas	Within 5 calendar days prior to each workshop

Deliverable	Due Date
Draft presentation materials and handouts	Within 10 calendar days prior to each workshop
Final presentation materials and handouts	Within 5 calendar days prior to each workshop
Draft public outreach materials	Within 10 calendar days prior to release
Final public outreach materials	Within 5 calendar days prior to release
Monthly reports	15th day of each month

2.2. Task 2: Title XVI Feasibility Study

a. Prepare report in accordance with U.S. Bureau of Reclamation's (Reclamation) "Reclamation Manual Directives and Standards WTR 11-01." Address the 35 projects in the Feasibility Study at feasibility-level analysis.

b. Introductory Information

i. Summarize basic information regarding the Program, participating agencies, and the study area, based on previous reports developed during the Phase 1 and Phase 2 efforts to date and updated with available new information.

c. Statement of Problems and Needs

i. Develop a description of the study area's key water resource management problems and needs for which water reclamation and reuse may provide a solution. Provide projections through 2035 as provided in the 2010 urban water management plans. Leverage information provided in other studies to inform development of the water supply picture in the study area.

ii. Describe the following in the Statement of Problems and Needs:

a) Problem and Need for a Water Reclamation and Reuse Project

i) Prepare a broad view of the study area's water resources, including challenges such as growing population, dry year surface water supply restrictions, limited groundwater resources, and increasingly stringent wastewater discharge requirements, and present the overall hydrologic water balance for the study area.

b) Current and Projected Water Supplies

i) Describe and quantify current and projected water supplies for the study area including surface water, groundwater and recycled water that is currently available or being planned, other than the Program. Include total amounts of generated wastewater developed in the Scoping Study in the description of water supplies. Include other alternative water supply sources, such as grey water, captured stormwater, and desalinated water in the description. Express water supply availability for average, dry,

and wet climate years. Describe seasonal variation in water supplies.

ii) Summarize plans for new water supply facilities. Use the planned supply facilities presented in the urban water suppliers' urban water management plans as an information source, supplemented by direct input from the agencies participating in the feasibility study.

c) Current and Projected Water Demands

i) Present current and projected water demands through 2035 based on the 2010 UWMPs. Define the water use by the type (e.g., municipal, environmental, agricultural, etc.) and the timing and location of use. Define existing water use in terms of both annual use and monthly use. Gather information to describe and characterize the water users, their water use, and water quality requirements, including population and irrigated acres.

ii) Use demand projections developed by the urban water suppliers in their 2010 UWMPs and supplement with new analysis to reflect updated growth and unit water use conditions and to address the smaller communities' water demands.

iii) Present agricultural and landscaping demands using the irrigation water needs analysis presented in the 2008 Feasibility Study Report and updated to reflect new information. Review potential new recycled water users for their volume, proximity to available supply, water quality requirements, and elevation differences between supplies and demands based on input from the participating agencies.

d) Water Quality Concerns for the Current and Projected Water Supply

i) Present water quality issues with the water supply and wastewater water quality, including constituents in the groundwater supplies and in local brackish water.

ii) Use the water quality supply impacts in the 2010 UWMPs as one of the information sources.

e) Current and Projected Wastewater and Disposal Options other than the Proposed Title XVI project, and Plans and Project Costs for New Wastewater Facilities

i) Describe current and projected wastewater quantity and disposal options. Derive the current and future quantity of wastewater from Section 4 of the Scoping Study Report. Express wastewater quantity on an annual and monthly basis. Describe the wastewater disposal locations and the quantity discharged for each wastewater facility. Describe plans for expanded or new wastewater facilities, including projected costs.

d. Water Reclamation and Reuse Opportunities

i. Following one meeting with each participating agency, summarize projects from Sections 3 and 5 of the Scoping Report into a format suitable to meet the requirements specified in WTR 11-01 listed below:
   a) Description of uses for recycled water.
   b) Description of the water market available to use recycled water to be produced.
   c) Discussion of considerations that may prevent implementing water reuse program.
   d) Identification of water and wastewater agencies that have jurisdiction in the potential service area or over the sources of reclaimed water.
   e) Description of potential sources of water to be reclaimed, including stormwater and impaired surface and ground waters.
   f) Description and location of source water facilities.
   g) Description of current water reuse.
   h) Summary of currently used water reclamation and reuse technologies, and opportunities for developing improved technologies.

e. Analysis of Alternatives and Feasibility Study Report
   i. Include the following data, as required by WTR 11-01 for the analysis and selection of alternatives, in the Feasibility Study Report.
      a) Non-federal Funding Future Actions
         i) Identify actions participating agencies might take if no federal funding is provided.
         ii) Contact each participating agency to develop a program-wide description of local efforts in the absence of funding.
      b) Program Objectives
         i) Use the Program objectives and subobjectives from the Phase 2 Scoping Study as the basis for ranking objectives.
         ii) Develop appropriate performance metrics for each subobjective. Use the performance metrics to evaluate how well an objective is being achieved, either quantitatively or qualitatively. Score the alternatives against the Program Objectives in quantitative or qualitative terms to provide insight to the participating agencies in selecting a proposed program.
      c) Alternatives Considered
         i) Based on the projects identified in Sections 3 and 5 of the Scoping Study, formulate three alternatives to meet the Program objectives. Perform a reconnaissance-level analysis on these alternatives, and apply the Program Objectives to support participating agencies' selection of the proposed program in Task 2.2.e.i.d) (Proposed Program Description). The following subtasks will be conducted to develop information and costs of three alternative projects including the "no project" alternative:

- Alternative Formulation. The individual projects identified in Scoping Study were the potential means for accomplishing the objectives and subobjectives. Formulate the conceptual alternatives to meet objectives and to develop an equitable benefit to participating agencies.
- Layout of Alternatives. Develop project layouts of the pipeline routes and locations of the treatment, wells, storage, pumping facilities, and environmental projects using the available GIS database developed and used in Phase 1 studies and in the Phase 2 Scoping Study.
- Cost Estimates. Prepare estimated costs including, but not limited to, capital, annual operation maintenance, replacement, and life-cycle costs. Develop the estimates at a reconnaissance level. Identify the total project cost, life-cycle cost, and corresponding cost of the project water produced expressed in dollars per million gallons, or dollars per acre-foot.

d) Proposed Program Description
   i) Layout of Alternative. Develop project layouts of the pipeline routes and locations of the treatment, storage, well, environmental projects, and pumping facilities using the available GIS database used in Phase 1 and in the Phase 2 Scoping Studies. After proposed routes are defined, conduct a visual survey to review proposed right-of-way locations and to identify issues that might impact environmental constraints.
   ii) Geotechnical Review. Perform a geotechnical analysis that addresses existing geologic and geotechnical conditions, in a regional and project-specific context, for the proposed infrastructure. Focus the analysis on the proposed pipelines, treatment plants, pump stations, and storage facilities. Describe topography, stratigraphy, faulting, and seismicity. Evaluate site geologic features and existing conditions that could potentially pose engineering challenges or hazards for the proposed recycled water facilities and their operation including, but not limited to, ground shaking, fault rupture, liquefaction, settlement, lateral spreading, lurching and expansive soil. Identify hard bedrock, difficult excavation, and oversized material along pipeline alignments traversing hillside areas. Identify shallow groundwater at stream crossings and along the Bay margin project sites. Use information from the 2006/2008 Geologic Conditions and Geotechnical Constraints Technical Memorandum of the Phase 1 Feasibility Study, and expand the study geographically to include the Petaluma service area and to focus on new project alignments. Summarize results in an appendix to the feasibility study.

iii) Hydraulic Analysis. Evaluate the hydraulics of the proposed distribution system to determine the hydraulic grade line under anticipated peak demand month flows. Use modeling software to determine the pipeline sizes, pump station capacities and locations, system storage capacities and locations, and other facility improvements. Add previously developed data from GIS, including but not limited to, pipeline alignments, land use parcel information, and digital elevation model data collected during prior Program phases, to the system model. Develop land use nodes that aggregate local land uses (and their associated water use patterns and quantities) into specific nodes located along the pipeline routes. Determine land use node elevations by referencing the land use node locations to the U.S. Geological Survey digital elevation model. Model peak period flow data and seasonal influent flow variations to identify which existing and new storage basins might be filled or depleted to adequately serve customer demands. Summarize results in an appendix to the Feasibility Study.

iv) Cost Estimates. Include capital, annual operation and maintenance, replacement, and life-cycle costs in the cost estimates. Develop estimates as required for feasibility studies in Reclamation Manual Directives and Standards, Cost Estimating (FAC 09-01). Derive pipeline lengths from the GIS database. Derive pipe diameters from the hydraulic analysis. Update Phase 1 cost estimating approaches to reflect the experience and insights gained during implementation of Phase 1 facilities. Summarize results in an appendix to the Feasibility Study.

v) Discharge requirements. Identify a description of anticipated waste-stream discharge treatment and disposal water quality for the requirements for the proposed program.

vi) Alternative Measures or Technologies. Identify and summarize alternative measures or technologies available for water supply options (water reclamation, stormwater, and groundwater), distribution, and use for the proposed program.

e) Economic Analysis

i) Prepare a life-cycle cost analysis to determine the most cost-effective of the three alternatives that calculates annual capital costs of implementing alternatives over a 50-year period of analysis using the current real discount rate and adding annual operations and maintenance costs.

ii) Prepare an economic analysis to evaluate the economic benefits of the proposed alternative relative to the No Action Alternative using other water supply options. Calculate water supply benefits of the proposed alternative using the avoided costs from the non-recycled water alternative most likely to be implemented in the

absence of the project. Discuss environmental and other indirect benefits qualitatively.

iii) Prepare a non-quantifiable benefits analysis that documents and describe qualitatively as complete as possible the difficult-to-quantify benefits, such as drought tolerant water supply, reduced water importation, and other social or environmental benefits. Incorporate these qualitative benefits as part of the justification for a Title XVI project in conjunction with the comparison of project costs.

f) Extended Seasonal Storage Analysis

i) Operations Studies

- Conduct operations studies of supply and demand information provided by Authority members to determine storage volume requirements with varying distributions systems and levels of demands served.
- Identify the design flow rates for conveyance of recycled water to the storage facility.
- Identify the volume of storage to be evaluated for each of the 16 reservoir configurations.
- Address both current summer storage options and future winter storage options at Petaluma and Napa Sanitation District.
- Estimate wet year water demands address summer storage requirements to prevent discharge during May through October for Petaluma.

ii) Layouts

- Develop 16 reservoir layouts based on Google Earth and available USGS or other available elevation data.
- Provide a conceptual schematic layout with the reservoir footprint shown on an aerial photograph of the site.
- Identify anticipated appurtenant facilities at the site and conveyance facility requirements (pump stations and pipelines) in the vicinity of each reservoir.

iii) Identification of Available Geotechnical Data

- Review available geotechnical data for known issues such as faults, locations, high groundwater, and soils data. Available data includes the *Geologic Conditions and Geotechnical Constraints Technical Memorandum* of the North San Pablo Bay Restoration and Reuse Project 2008 including the following maps:
  - Geotechnical Constraint Map
  - Project Geology Map
- Review currently available applicable site specific geological studies.

iv) Preliminary Environmental Assessment
- Provide an overview of anticipated potential environmental effects from the proposed storage sites. Address the following topics at a reconnaissance level to identify issues that might impact project implementation:
  - Potentially significant impacts
  - Potentially significant environmental effects
  - Status of required environmental compliance measures
  - Potential effects on historic properties
- Review preliminary reservoir footprints to identify potential fatal flaws or areas to be avoided, if possible.

v) Estimate of Feasibility Level Costs
- Develop estimate capital costs as required for feasibility studies in Reclamation Manual Directives and Standards, Cost Estimating (FAC 09-01).

vi) Other Key Decision Information
- Discuss and summarize key issues from meetings with Authority members that affect the Authority member's decisions. Information to be provided by the Member Agencies could include the following:
  - Value of the land site: loss of revenues if land were to be used for purposes other than storage.
  - Ownership of the land: Authority member-owned versus estimated current cost to purchase.
  - Institutional issues: such as coordination with other agencies and status of existing leases.
  - Capacity versus cost preferences: based on the results of Task 2.2e.i.f)v) (Estimate of Feasibility Level Costs), each Authority member will indicate an upper or lower limit on the size of reservoir they would be willing to construct under different funding scenarios (i.e., Title XVI or other funding mechanisms).
  - End-user needs: where water is going and how it compliments existing infrastructure
  - Operational constraints: associated with delivering water to specific end-users
  - Authority member specific information and input will be provided, if available:
    - Napa Sanitation District will provide available information, including cost estimates, for the options to raise the pond levees by 3 and 5 feet.
    - City of Petaluma will provide any geotechnical or regulatory information or analysis that has been performed or considered related to raising the oxidation pond levees.

- Novato Sanitary District will provide available information regarding the storage sites
- Sonoma Valley County Sanitation District will provide information about the existing R3 reservoir, desired increase in capacity and available parcels for expansion.
- Sonoma Valley County Sanitation District will provide information about the concept for development of a new storage on the Manzoni property including desired capacity, available parcels for expansion, and the concept for a potential public-private-partnership.

vii) Evaluation of Options

- For each Authority member, create a summary matrix highlighting the costs, environmental issues, and other issues key decision issues, for each storage option.
- Conduct one conference call or meeting with each Authority member to discuss the matrix.
- Discuss Authority member options and alternative approaches to addressing storage needs.
- Storage options selected by the Member Agency may be a single storage site or multiple storage sites with one site to be included in the Title XVI program and other sites to be constructed later under alternative funding.
- Incorporate items from discussion, findings, and recommendations in a summary of all meetings.

viii) Storage Project Fact Sheets

- Produce a fact sheet for each option that includes the map, layout on aerial photo base, summary of operations studies, table of assumptions, identified environmental issues, identified geotechnical concerns, limitations, and costs.
- Present up to 16 draft fact sheets at the TAC meeting for discussion and comment.
- Provide revised fact sheets to each Authority Memo for use in their decision making.
- Integrate information into the Feasibility Study Report.

g) Proposed Program Selection

i) Following Task 2.2e.i.c) (Alternatives Considered), evaluate, compare, and score the two alternatives and "no project" alternative, against the Program objectives, subobjectives, and performance metrics. Incorporate the activities of Task 2.2e.i.e) (Economic Analysis) to provide scoring under the “Cost-Effectiveness” subobjective. Summarize the preliminary scoring for review and comment by the TAC. During a workshop, provide insight and receive comment and direction that will guide selection of the proposed program. Use the scoring for

objectives, subobjectives and metrics of success to give the participating agencies' Board and TAC insights to reach decisions and select a preferred program.

h) Environmental Considerations and Potential Effects
   i) Provide an overview of anticipated potential environmental effects from the Proposed Program. Discuss anticipated regulatory requirements and compliance measures. Focus analysis on the selected program. Address the following topics required by WTR 11-01 at a reconnaissance level:
      - Potentially significant impacts
      - Potentially significant environmental effects
      - Status of required environmental compliance measures
      - Measures necessary to comply with NEPA and other laws
      - Water supply and water quality
      - Public involvement
      - Potential effects on historic properties

i) Legal and Institutional Requirements
   i) Describe the Program's institutional framework, interactions with other agencies, legal requirements, effects on the environment, study area economy, and water rights. Specific topics to be addressed include:
      - Water rights issues
      - Legal and institutional issues
      - Multi-jurisdictional or interagency agreements
      - Permitting procedures
      - Current and projected wastewater discharge requirements
      - Rights to wastewater

j) Financial Capability of Sponsor
   i) Describe the financial status of the participating agencies and potential ways the participating agencies may fund and repay their respective share of costs. Provide sufficient information for Reclamation to determine that the participating agencies are likely to demonstrate financial capability if the project moves to construction. Address the following information:
      - Proposed schedule for project implementation
      - Willingness of the non-federal project sponsor to pay for its share of capital costs and the full operation, maintenance, and replacement costs
      - A plan for funding the proposed water reclamation and reuse project's construction, operation, maintenance and replacement costs, including an analysis of how the non-federal project sponsor will pay construction and annual operation, maintenance and replacement costs

- Description of all federal and non-federal sources of funding and any restrictions on such sources

k) Research Needs
   i) Develop and summarize potential research needs identified during the Phase 2 study.

f. Feasibility Study Report:
   i. Contents: Prepare a report of study results that includes the following:
      a) Table of Contents
      b) Sections as required by WTR 11-01 including:
         i) Introductory Information
         ii) Statement of Problems and Needs
         iii) Water Reclamation and Reuse Opportunities
         iv) Description of Alternatives
         v) Economic Analysis
         vi) Selection of the Proposed Title XVI Project
         vii) Environmental Considerations and Potential Effects
         viii) Legal and Institutional Requirements
         ix) Financial Capability of Sponsor
         x) Research Needs
      c) Appendices
         i) Hydraulic Studies
         ii) Geologic Conditions and Geotechnical Constraints
         iii) Basis for Feasibility Construction Cost Estimate
      d) A detailed description of the work performed, including methodology, literature reviewed, and individuals and agencies contacted
      e) A map of Phase 2 Project Boundary illustrating participating agencies
      f) Other information to support the study
   ii. First Draft: Prepare each section of the study in draft form and submit to participating agencies for review and approval in accordance with the dates listed for this task. Each participating agency will return 1 copy of each draft study section to Consultant with comments in writing.
   iii. Second Draft: If any participating agency requests revisions, revise the appropriate draft study section and resubmit an electronic copy of the study sections to each participating agency for approval.
   iv. Final: Following the participating agencies' approval and prior to the participating agencies' acceptance of work under this Agreement, submit one final Feasibility Study Report, complete with all sections and appendices, to each participating agency.

g. FY 2018/2019
   i. Maintain and update project technical files
   ii. Maintain technical information on the SharePoint site
   iii. Update project descriptions and costs as agencies revise project packaging as requested by agencies

iv. Provide support and responses to technical issues associated with environmental review, permitting, and funding

h. Task 2 Deliverables

Deliverable	Due Date
Feasibility Study Report sections	To be determined.
Draft of complete Feasibility Study Report, including appendices	To be determined.
Final Feasibility Study Report, including appendices to participating agencies	To be determined.
FY 18/19 Technical Support	To be determined

2.3. Task 3: Environmental Evaluation

a. Environmental Constraints Analysis

i. Review how the proposed alternatives will affect water supply and water quality from a regional perspective, summarize public involvement, and include review of potential effects to historical properties. Summarize major environmental issues for the individual alternatives and help identify recommend alternatives to be carried over to design and project environmental review.

ii. Confirm that a Supplemental EIR/EIS is the appropriate environmental compliance document under CEQA and NEPA based on the findings of Task 2 (Title XVI Feasibility Study) and Task 3a. (Environmental Constraints Analysis).

b. Environmental Compliance - NEPA/CEQA

i. Notice of Intent/Preparation and Scoping:

a) Prepare and release a combined Notice of Intent (NOI) and Notice of Preparation (NOP) to describe the proposed project and request public comments.

b) Send the NOI/NOP to regulatory agencies, landowners and interested parties, and post in the Federal Register.

c) Conduct three public scoping meetings based on project geography to provide an opportunity for input into the scope of the environmental analysis and alternatives to be examined.

d) When the public review process is complete, prepare a scoping report that summarizes the comments received and identifies key issues for analysis.

i) First Draft: Prepare scoping report in draft form and submit to the participating agencies for review and approval in accordance with the dates listed for this task.

ii) Second Draft: If any participating agency request revisions, revise and resubmit to all participating agencies for approval.

iii) Final: Following participating agencies' approval and prior to participating agencies' acceptance of work under this Agreement, submit the final approved scoping report to participating agencies.

ii. Administrative Draft 1 Supplemental EIS/EIR: Prepare an Administrative Draft 1 Supplemental EIS/EIR that includes these sections:

a) Introduction and Project Description:

i) Develop introduction and project description sections that meet the legal requirements of CEQA/NEPA, provide the context of the Phase 2 Program, provide the appropriate level of detail for the Supplemental EIR/EIS, establish the foundation for the impact analysis in the Supplemental EIR/EIS, and rely on project descriptions provided by the feasibility study.

ii) Include project need and purpose statements, Program objectives, and a description of the proposed components that will be analyzed at a project and Program level.

iii) Establish NEPA and CEQA lead agencies, and describe each component/type of improvement in sufficient detail to determine the nature and scale of environmental impacts associated with the components

iv) Include a description of long-term operations associated with the project and project components, and identify discretionary approvals needed for the proposed projects and the agencies that would be expected to use the EIR to support issuance of those approvals.

b) Geology and Soils:

i) Summarize regional reports on geologic conditions within the service area.

ii) Conduct site visits.

iii) Identify special problems, such as potential liquefaction and shrink/swell, and describe proposed grading and methods to handle differential settlement.

iv) Describe erosion hazards, setting, and regulatory framework.

v) Identify potential geotechnical impacts and level of significance.

vi) Recommend mitigation measures to reduce impacts.

c) Surface Water Resources:

i) Conduct an analysis to identify impacts to surface waters associated with constructing individual facilities and identify flood hazard zones using FEMA maps, describing the extent and general character of hydrological conditions in the local watershed, assessing existing runoff conditions and character of surface water features, evaluating the impact of facility construction and grading on surface runoff and changes in drainage patterns, discussing the effectiveness of any existing site drainage plan, discussing the quality of current and potential stormwater runoff,

and identifying mitigation measures for stormwater quality protection for incorporation into the Storm Water Pollution Prevention Plan (SWPPP).

d) Groundwater Resources:
   i) Review USGS, General Plan and other available data on groundwater conditions within groundwater basins within the project service area, and summarize the current condition of groundwater basins in terms of overdraft conditions and water quality issues.
   ii) Characterize pumpage for municipal and agricultural uses.
   iii) Examine impacts to groundwater levels and secondary effects to groundwater quality associated with regional reuse.
   iv) Identify existing ground water management programs in development.
   v) Identify additional management strategies, as appropriate.
e) Water Quality:
   i) Summarize the relevant regulatory framework.
   ii) Describe ambient water quality of the receiving waters
   iii) Describe the effects of reduced discharge at individual outfall locations relative to biologic conditions in the vicinity of individual outfalls.
   iv) Identify issues related to shallow water seasonal discharges.
   v) Summarize load estimates for pollutants of concern.
   vi) Assess the extent of salinity changes and potential to permanently affect habitat conditions at receiving water locations.
   vii) Determine potential impacts and level of significance.
   viii) Identify mitigation measures, if possible, to reduce impacts.
f) Biological Resources:
   i) Based on a data search of special status plants and wildlife that may occur in the service area, conduct an analysis to identify which special-status species have the potential to occur on site and are likely to be impacted.
   ii) Present the regulatory environment for biological resources, including federal, state, and local ordinances.
   iii) Identify scope and intensity of temporary and permanent impacts to habitats and special-status species, including indirect causes such as modified salinity.
   iv) Identify thresholds for significance and determine if potential impacts meet the significance levels.
   v) Identify mitigation measures based on regulatory guidelines and policies.
g) Fisheries:
   i) Review species composition, seasonal patterns, life stages, and habitat functions that could be affected by facility construction and changes in effluent discharge volumes.

ii) Identify, as appropriate, potential impacts to abundance and variability in geographic distribution of aquatic species and occurrence of species protected under state and federal Endangered Species Acts and species of special concern.
iii) Evaluate potential impacts of proposed project operations and construction, including suspended sediments, changes in current flows, changes in water quality with respect to salinity, dissolved oxygen and potential exposure to contaminants.
iv) Identify mitigation measures based on regulatory guidelines and policies.

h) Land Use:
i) Discuss existing land uses in the study area; applicable plans, policies and objectives of local, regional and state public agencies having jurisdiction over the project; project consistency with plans, policies and CEQA guidelines; compatibility with surrounding uses; facility impacts to prime agricultural lands or lands of statewide importance; potential project and cumulative significance of permanent conversion of agricultural lands; the project's long-term contribution to agricultural preservation by improving supply reliability; and measures to mitigate identified impacts.

i) Cultural Resources:
i) Summarize contact with the Northwest Information Center of the California Historical Resources Information System at Sonoma State University regarding a records search of proposed facilities.
ii) Incorporate findings of the site reconnaissance; describe the regulatory framework, cultural setting and known resources; determine potential impacts and level of significance; and identify mitigation measures as appropriate.

j) Noise:
i) Describe the existing noise environment.
ii) Discuss relevant noise policies, regulations, and standards, and noise levels likely to be generated during construction activities and the potential for construction to adversely affect adjacent land uses or violate noise control ordinances.
iii) Describe typical noise generated by the project and potential for noise to adversely affect adjacent uses and compare to consistency with noise compatibility guidelines.
iv) Identify practical, feasible noise impact mitigation measures.

k) Air Quality:
i) Perform an analysis of the study area, which is within the San Francisco Bay Area Basin, which is in "nonattainment" status for state standards for ozone and particulate matter.
ii) Focus on the temporary effects of construction traffic.

iii) Describe federal, state, and local regulatory agencies and the Bay Area Air Quality Management District's (BAAQMD)'s CEQA guidelines.
iv) Discuss current air quality in the project area and emissions likely to be generated during construction.
v) Evaluate potential for construction dust to cause local violations of particulate standards.
vi) Discuss types of emission related to vehicle traffic.
vii) Review conformity with federal air standards and greenhouse gas emissions.
viii) Identify practical, feasible mitigation measures for air quality impacts identified for the project.

l) Traffic:
i) Review and summarize available city, county, and state traffic information for local roads, highways, and freeways.
ii) Describe the circulation setting.
iii) Identify bicycle, pedestrian, and transit corridors.
iv) Determine level of service and significance criteria for study area roadways and intersections.
v) Determine project trip generation, distribution, and assignment.
vi) Perform roadway and intersection analysis.
vii) Determine temporary daily construction impacts during weekday AM and PM peak hour.
viii) Evaluate effects on pedestrian, bicycle, and transit facilities.
ix) Discuss site circulation and access.
x) Identify mitigation measures prioritized in terms of safety and level of service.

m) Hazardous Materials:
i) Summarize applicable federal, state, and local hazardous waste regulations.
ii) Review and summarize available databases to identify known areas of hazardous material contamination that could affect proposed facilities.
iii) Review available soil testing reports at existing facilities.
iv) Identify and discuss known contamination of soil and groundwater.
v) Discuss and evaluate impacts on general public health and safety and potential exposure to workers and waste disposal handlers.
vi) Prepare setting.
vii) Determine impacts, level of significance, and mitigation measures to reduce potential health and safety impacts to less-than-significant levels.

n) Aesthetics:

i) Describe important elements of the visual quality in the regional and local area surrounding the project site and the site itself, including any publicly accessible scenic vistas.
ii) Qualitatively discuss the visual impacts of the project.
iii) Identify potential sources of intrusive glare and night lighting.
iv) Identify mitigation measures that would reduce any significant visual impacts of the proposed project.

o) Socioeconomic Impacts:
i) Review socioeconomic data within the project area and identify potential socioeconomic impacts related to project implementation, including potential impacts to recycled water users, vineyard operations, agricultural workers, and construction workers.

p) Economic Justice:
i) Review census track data regarding per capita income within areas of the proposed project.
ii) Review whether project implementation would disproportionately affect disadvantaged areas or communities.

q) Growth Inducement:
i) Incorporate the analysis conducted in the Phase 1 EIR by reference
ii) Update additional geographic areas not previously included, such as the City of Petaluma.
iii) Update any changes to General Plan or ABAG projections, agricultural trends, and incorporate any relevant updated General Plan EIRs and associated findings.
iv) Discuss the potential for regional reuse to contribute to regional growth beyond the adopted General Plans, or to change anticipated agricultural land use patterns or practices.

r) Alternatives:
i) Review a range of Alternatives to meet both CEQA and NEPA requirements, including:
- Alternatives to the Project. Include review of alternatives to meeting long-term water demands within the region through reuse including, but are not limited to, increased reliance on surface water supplies, such as the Russian River, Napa River and imported water supplies; increased reliance on groundwater supplies; and implementation of pilot or regional desalination.
- Alternatives of the Project. Include a review of up to three alternatives identified in the Feasibility Study. Summarize analysis provided in the EIR/EIS for each of these alternatives and review their ability to meet the project objectives, including their ability to reduce or minimize environmental impacts.

iii. Administrative Draft 2 Supplemental EIS/EIR:
   a) First Draft: Following review of the Administrative Draft 1 Supplemental EIS/EIR by Reclamation and participating agencies, prepare an Administrative Draft 2 Supplemental EIS/EIR and submit to participating agencies and Reclamation for review and approval in accordance with the dates listed for this task. Facilitate review and comment through a series of individual meeting with the participating agencies and Reclamation, as appropriate.
   b) Second Draft: If any participating agency, or Reclamation, requests revisions, revise and resubmit to all participating agencies and Reclamation for approval.
   c) Final Draft: Following participating agencies' and Reclamation's approval, and prior to acceptance of work under this Agreement, prepare a screencheck draft for final review and approval by Water Agency's Project Manager before preparing the Public Draft Supplemental EIR/EIS.

iv. Public Draft Supplemental EIS/EIR:
   a) Following review by Reclamation and participating agencies, prepare a Public Draft Supplemental EIS/EIR for circulation.
   b) Prepare a list of regulatory agencies, landowners, and interested parties, and distribute Notice of Availability and Notice of Completion to said regulatory agencies, landowners, and interested parties.
   c) Send Notice of Availability to property owners adjacent to proposed facilities using participating agency-provided addresses that Public Draft Supplemental EIS/EIR is available for review. Include the web address for download of the document and instructions for obtaining a hard copy in the Notice of Availability.
   d) Print up to 50 hard copy documents (and up to 50 CDs) for distribution to participating agencies, as requested.
   e) In coordination with Reclamation, file the Notice of Availability in the Federal Register.

v. Public Meetings:
   a) Coordinate with the Authority Program Manager and Water Agency Project Manager to schedule three public meetings, one within each County, to receive public comments.
   b) Prepare one draft and one final PowerPoint presentations for the public meetings that summarize the proposed project and identify impacts and mitigation measures.

vi. Final Supplemental EIS/EIR:
   a) No more than 300 hours shall be expended on this subtask 2.3.b.vi.
   b) Prepare written responses to comments received and corresponding revisions to the text of the Public Draft Supplemental EIR/EIS.
   c) After responding to one round of comments, prepare a screencheck draft EIR/EIS.

d) After addressing remaining comments, circulate the Final EIR/EIS and file with the Federal Register, in coordination with Reclamation.

vii. Certification Materials:
   a) Following completion of the Final Supplemental EIR/EIS, in coordination with Water Agency Project Manager, prepare a single set of certification materials to support participating agencies' approvals.
   b) Include Project Description, Findings of Fact, Statement of Overriding Consideration, and Mitigation Monitoring and Reporting Program.
   c) Attend certification hearings for each participating agency.

viii. Permitting and Regulatory Process:
   a) No more than 625 hours shall be expended on this subtask 2.3.b.viii.
   b) Prepare documents (Biological Assessment and Cultural Resources Report) to support Reclamation's consultation with United States Fish and Wildlife Service (USFWS) and the State Historical Preservation Office (SHPO) to meet Section 7 of the Endangered Species Act and Section 106 of the National Historical Preservation Act requirements.
   c) Prepare a draft and final Biological Assessment to support Reclamation's consultation with USFWS and National Marine Fisheries Service under Section 7 of the Endangered Species Act.
      i) First Draft: Prepare the Biological Assessment in draft form and submit to the participating agencies for review and approval in accordance with the dates listed for this task.
      ii) Second Draft: If any participating agency request revisions, revise and resubmit to all participating agencies for approval.
      iii) Final: Following participating agencies' approval and prior to participating agencies' acceptance of work under this Agreement, submit the final approved Biological Assessment to participating agencies.
   d) Establish the Area of Potential Effect (APE) for proposed facilities and prepare a Cultural Resources Survey Report to support Reclamation's consultation with SHPO under Section 106 of the National Historical Preservation Act.
      i) First Draft: Prepare the Cultural Resources Survey Report in draft form and submit to the participating agencies for review and approval in accordance with the dates listed for this task.
      ii) Second Draft: If any participating agency request revisions, revise and resubmit to all participating agencies for approval.
      iii) Final: Following participating agencies' approval and prior to participating agencies' acceptance of work under this Agreement, submit the final approved Cultural Resources Survey Report to participating agencies.

ix. Record of Decision:

a) Following completion of the Final EIR/EIS and federal consultations, prepare draft and final Record of Decision for Reclamation's review and processing.
   i) First Draft: Prepare the Record of Decision in draft form and submit to the participating agencies for review and approval in accordance with the dates listed for this task.
   ii) Second Draft: If any participating agency request revisions, revise and resubmit to all participating agencies for approval.
   iii) Final: Following participating agencies' approval and prior to participating agencies' acceptance of work under this Agreement, submit the final approved Record of Decision to participating agencies.

c. Revise the EIR/EIS and Permitting to Address New Criteria

   i. Complete a full EIR/EIS rather than a supplemental EIR/EIS

   ii. Comply with new Interior Order 3355 regarding page restrictions

   iii. Expanded Reclamation review and tracking requirements

   iv. 508 Document formatting

d. Task 3 Deliverables

Deliverable	Due Date
Notice of Intent and Notice of Preparation	To be determined.
Draft Scoping Report	To be determined.
Final Scoping Report	To be determined.
Administrative Draft 1 EIR/EIS	To be determined.
Administrative Draft 2 EIR/EIS	To be determined.
Public Draft EIR/EIS	To be determined.
Public Meetings: PowerPoint Presentation	To be determined.
Final EIR/EIS	To be determined.
Draft Certification Materials	To be determined.
Final Certification Materials	To be determined.
Documents for Reclamation consultation on Section 7 of the Endangered Species Act and Section 106 of the National Historical Preservation Act	To be determined.
Draft Biological Assessment	To be determined.
Final Biological Assessment	To be determined.
Draft Cultural Resources Survey Report	To be determined.
Final Cultural Resources Survey Report	To be determined.
Draft Record of Decision	To be determined.

2.4. Task 4: Financial Capabilities Determination

a. After the Feasibility Study and Record of Decision are complete, prepare a Financial Capabilities Report.

b. Update and expand upon information provided in the Feasibility Report.

i. Update participating agencies financial statement data to enable Reclamation reviewers to compare Project investment costs to existing capital assets, Project operation costs to current operation costs, and annual Project revenue requirements to existing revenues.

ii. Update Project cost allocation to reflect the current cost estimate, which defines the federal and non-federal shares for each of the participating agencies.

iii. Collect information on the non-federal financing plan and status from each participating agency, and extending to local water supply agencies if they are participating in Project financing. Include details and documentation both for funding of the non-federal share of construction (e.g., loans, grants, bonds) and for any required annual debt service and annual Project operations costs (e.g., user fees and tax assessments) in the plans.

iv. Coordinate with Reclamation and meet with Reclamation staff, if needed, to better understand review requirements.

v. Financial Capability Report:
   a) Submit a draft Financial Capability Report to participating agencies for their review.
   b) If requested, schedule meetings with participating agencies to discuss comments.
   c) After making revisions based on participating agencies' review, submit the Financial Capability Report to Reclamation.
   d) Prepare responses to Reclamation questions and comments, and revise the Financial Capability Report as necessary.

c. Task 4 Deliverables

Deliverable	Due Date
Draft Financial Capability Report	To be determined.
Final Financial Capability Report	To be determined.

2.5. Task 5: Phase 2 Funding Sources Identification, and Grant Funding Application Preparation and Administration

a. Study Grant Funding Application Preparation and Administration

i. Prepare two Phase 2 WaterSMART Annual Study Grant Applications (grant applications) to address the requirements of the study grant programs as specified in Reclamation's guidance documents.

ii. Prepare one draft of each grant application and send to the participating agencies and Water Agency for review and comment. Revise each grant application to incorporate comments. Respond to questions and comments provided by Reclamation staff.

iii. Coordinate grant administration and reporting with Water Agency.

iv. Prepare Phase 2 WaterSMART Bi-Annual Reports for the duration of this Agreement.

a) First Draft: Prepare each Bi-Annual Report in draft form and submit to Water Agency for review and approval in accordance with the date listed for this task. Water Agency will return 1 copy of each draft Bi-Annual Report to Consultant with comments or approval in writing.
b) Second Draft: If Water Agency requests revisions, revise and resubmit one copy of the revised Bi-Annual Report(s) for Water Agency approval.
c) Final: Following Water Agency approval and prior to Water Agency's acceptance of work under this Agreement, submit each final approved Bi-Annual Report to Water Agency in accordance with the date listed for this task.

b. Implementation Grant Funding Application Preparation and Administration

i. First Draft: Prepare three Phase 2 WaterSMART Implementation Grant Applications to address the requirements of the grant programs as specified in Reclamation's guidance documents in draft form and submit to Water Agency for review and approval in accordance with the date listed for this task. Water Agency will return 1 copy of each draft to Consultant with comments or approval in writing.
a) Second Draft: If Water Agency requests revisions, revise and resubmit one copy of each application for Water Agency approval.
b) Final: Following Water Agency approval and prior to Water Agency's acceptance of work under this Agreement, submit each final approved application to Water Agency in accordance with the date listed for this task.

ii. Coordinate grant administration and reporting with Water Agency.

iii. Provide input to the Water Agency for its preparation of Phase 2 WaterSMART Bi-Annual Reports for the duration of this Agreement.

c. Task 5 Deliverables

Deliverable	Due Date
Phase 2 Draft Grant Applications	To be determined.
Phase 2 Final Grant Applications	To be determined.
Phase 2 Draft WaterSMART Bi-Annual Reports	To be determined.
Phase 2 Final WaterSMART Bi-Annual Reports	To be determined.
Phase 2 Draft WaterSMART Grant Applications	To be determined.
Phase 2 Final WaterSMART Grant Applications	To be determined.

2.6. Task 6: Authority Phase 1 Services

a. Program Support and Coordination

i. Maintain Phase 1 Project schedule, track funding, and provide updates to TAC based on information provided by the Authority members for their projects.

ii. Track funding and provide quarterly Phase 1 update that includes project schedule and funding received to date.

iii. Assist Water Agency in responding to information requests for data not requiring additional calculations, such as project schedules, project photos, and volumes of water recycled.

iv. Attend regular meetings or conference calls with Water Agency and other Authority members and review related documents, as necessary, from Authority's consultants to provide consistency with other elements of the Program.

b. State Grant Support

i. Provide as-needed support to address technical and process questions from state funding agencies; prepare technical summaries for briefing documents needed; and revise, reformat, or adjust project description and budget information to meet data requests for Authority Program activities.

ii. Attend meetings or conference calls with Water Agency and Authority members' staff, and state funding agency staff as requested by Water Agency's Project Manager.

iii. Coordinate with the grant/funding application process of Water Agency staff, Authority members, and other consultants, including participating in conference calls or meetings with Water Agency and state funding agency staff.

iv. Gather and compile information from Authority member agencies to complete the funding applications and submit to the Water Agency for review.

c. Federal Grant Support

i. Based on information provided by the affected participating agencies, prepare two Phase 1 Construction grant applications to address the requirements of the Construction grant programs as specified in Reclamation's guidance documents that include, but are not limited to, required items in the Construction grant applications including the assurances, technical proposal, permits and approvals, funding plan, letters of commitment, resolution, and project budget.

a) Submit grant applications to the participating Authority member agencies and Water Agency's Administrative Contact for review and comment in accordance with the date listed for this task.

b) Provide one revision of each grant application to incorporate comments and resubmit one copy of each revised grant application for Water Agency approval.

c) Following Water Agency approval and prior to Water Agency's acceptance of work under this Agreement, submit each final approved grant application to Water Agency in accordance with the date listed for this task.

d) Respond to questions and comments provided by Reclamation staff.

d. Task 6 Deliverables

Deliverable	Due Date
Phase 1 updates	To be determined.
Draft state applications	To be determined.
Final state applications	To be determined.
Draft federal applications)	To be determined.
Final federal applications	To be determined.

2.7 Optional Task 7: Additional Services

a. Do not proceed with this task unless requested in writing by Water Agency's Project Manager.

b. Perform additional services as requested by Water Agency. The additional services will be agreed to by Consultant and Water Agency and described in writing by Water Agency.

c. Task 7 Deliverables

Deliverable	Due Date
To be determined	To be determined

Exhibit B

Schedule of Costs

PERSONNEL			
Engineering	**Technical/Scientific**	**Administrative**	**Hourly Rate**
		Office/Support Services I	$62
Drafter Trainee	Field Service Technician I	Word Processor I Office/Support Services II	$79
Assistant Drafter	Field Service Technician II	Word Processor II Office/Support Services III	$86
Drafter Engineering Aide Inspection Aide	Field Service Technician III	Accountant I Word Processor III Office/Support Services IV	$101

Exhibit E

Insurance Requirements

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

Water Agency reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. INSURANCE

1.1. Workers Compensation and Employers Liability Insurance

a. Required if Consultant has employees.

b. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.

c. Employers Liability with limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.

d. Required Evidence of Insurance: Certificate of Insurance

e. If Consultant currently has no employees, Consultant agrees to obtain the above-specified Workers Compensation and Employers' Liability insurance should any employees be engaged during the term of this Agreement or any extensions of the term.

1.2. General Liability Insurance

a. Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office form CG 00 01.

b. Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, Water Agency requires and shall be entitled to coverage for the higher limits maintained by Consultant.

c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by Water Agency. Consultant is responsible for any deductible or self-insured retention and shall fund it upon Water

Agency's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the Water Agency.

d. Sonoma County Water Agency, its officers, agents, and employees, shall be additional insured(s) for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in Insurance Services Office form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between Water Agency and Consultant and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. Required Evidence of Insurance:

   i. Copy of the additional insured endorsement or policy language granting additional insured status, and

   ii. Certificate of Insurance.

1.3. Automobile Liability Insurance

a. Minimum Limits: $1,000,000 combined single limit per accident.

b. Insurance shall apply to all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall apply to hired and non-owned autos.

d. Required Evidence of Insurance: Certificate of Insurance.

1.4. Professional Liability/Errors and Omissions Insurance

a. Minimum Limit: $1,000,000 per claim.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by Water Agency.

c. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

d. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement

insurance with a retroactive date no later than the commencement of the work under this Agreement.

e. Required Evidence of Coverage:
   i. Certificate of Insurance.

1.5. Contractors Pollution Liability Insurance

a. Minimum Limits: $1,000,000 per pollution Incident; $1,000,000 Aggregate. If Consultant maintains higher limits than the specified minimum limits, Water Agency requires and shall be entitled to coverage for the higher limits maintained by Consultant.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by Water Agency. Consultant is responsible for any deductible or self-insured retention and shall fund it upon Water Agency's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the Water Agency.

c. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of work.

d. Coverage shall be continued for one (1) year after completion of the work. If the insurance is on a Claims-Made basis, the continuation coverage may be provided by: (a) renewal of the existing policy; (b) an extended reporting period endorsement; or (c) replacement insurance with a retroactive date no later than the commencement of the work.

e. Prior to Consultant, or any of Consultant's subconsultants, conducting subsurface work (boring, drilling, or similar), Sonoma County Water Agency, its officers, agents, and employees, shall be additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement. The foregoing shall continue to be additional insureds for one (1) year after completion of the work.

f. Required Evidence of Coverage:
   i. Copy of the additional insured endorsement or policy language granting additional insured status, and
   ii. Certificate of Insurance.

1.6. Standards for Insurance Companies

a. Insurers shall have an A.M. Best's rating of at least A:VII.

1.7. Documentation

a. The Certificate of Insurance must include the following reference: TW 12/13-132.

b. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Consultant agrees to maintain current Evidence of

Insurance on file with Water Agency for the entire term of this Agreement and any additional periods if specified in Sections 1.1, 1.2, 1.3, 1.4, or 1.5 above.

c. The name and address for mailing Additional Insured endorsements and Certificates of Insurance is: Sonoma County Water Agency, its officers, agents, and employees, 404 Aviation Boulevard, Santa Rosa, CA 95403-9019

d. Consultant shall submit current Evidence of Insurance prior to the renewal or replacement of any existing insurance policy.

e. Consultant shall provide immediate written notice if: (1) any of the required insurance policies is terminated; or (2) the limits of any of the required policies are reduced below the limits required in the contract.

f. Upon written request, copies of required insurance policies must be provided within thirty (30) days but with confidential information redacted.

1.8. Policy Obligations

a. Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

1.9. Material Breach

a. If Consultant fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. Water Agency, at its sole option, may terminate this Agreement and obtain damages from Consultant resulting from said breach. Alternatively, Water Agency may purchase the required insurance, and without further notice to Consultant, Water Agency may deduct from sums due to Consultant any premium costs advanced by Water Agency for such insurance. These remedies shall be in addition to any other remedies available to Water Agency.

Exhibit F

CERTIFICATION OF COMPLIANCE WITH FEDERAL LAWS AND AUTHORITIES

Contractor agrees to comply, and shall require all Subcontractors to comply, with the following federal laws (also referred to as "Federal Cross-Cutters"):

ENVIRONMENTAL AUTHORITIES

1. Archeological and Historical Preservation Act of 1974, Pub. L. 86-523, as amended, Pub. L. 93-291 16 USC § 469a-1.
2. Clean Air Act, Pub. L. 84-159, as amended.
3. Coastal Barrier Resources Act, Pub. L. 97-348, 96 Stat. 1653; 16 USC § 3501 et seq.
4. Coastal Zone Management Act, Pub. L. 92-583, as amended, 16 USC § 1451 et seq.
5. Endangered Species Act, Pub. L. 93-205, as amended, 16 USC § 1531 et seq.
6. Environmental Justice, Executive Order 12898.
7. Floodplain Management, Executive Order, 11988 as amended by Executive Order 12148.
8. Protection of Wetlands, Executive Order 11990, as amended by Executive Order 12608.
9. Farmland Protection Policy Act, Pub. L. 97-98, 7 USC § 4201 et seq.
10. Fish and Wildlife Coordination Act, Pub. L. 85-624, as amended.
11. National Historic Preservation Act of 1966, Pub. L. 89-665, as amended, 80 Stat. 917 (1966) 16 USC § 470 et seq.
12. Safe Drinking Water Act, Pub. L. 93-523, as amended, 42 USC § 300f et seq.
13. Wild and Scenic Rivers Act, Pub. L. 90-542, as amended, 82 Stat. 913; 16 USC § 1271 et seq.
14. Essential Fish Habitat Consultation. Pub. L. 94-265, as amended, 16 USC § 1801 et seq.
15. Recycled Materials. Executive Order 13101; Section 6002 Resource Conservation and Recovery Act - 42 USC § 6962.

ECONOMIC AND MISCELLANEOUS AUTHORITIES

1. Demonstration Cities and Metropolitan Development Act of 1966, Pub. L. 89-754, as amended, Executive Order 12372/ 42 USC § 3331 et seq.
2. Procurement Prohibitions under Section 306 of the Clean Air Act and Section 508 of the Clean Water Act, including Executive Order 11738, Administration of the Clean Air Act and the Federal

Water Pollution Control Act with Respect to Federal Contracts, Grants, or Loans; 42 USC § 7606; 33 USC § 1368; 40 CFR Part 31.

3. Uniform Relocation and Real Property Acquisition Policies Act, Pub. L. 91-646, as amended; 42 USC §§4601-4655.

4. Contractors, Subcontractors, Debarment and Suspension, Executive Order 12549; 2 CFR Part 180; 2 CFR Part 1532. The Excluded Parties List System can be found at http://epls.gov. The Contractor represents and warrants that it has included a term or conditions requiring compliance with this provision in all of its contracts and subcontracts. The Contractor acknowledges that failing to disclose the information as required at 2 CFR 180.335 may result in the termination, delay or negation of this Agreement.

5. Preservation of Open Competition and Government Neutrality Towards Government Contractors' Labor Relations on Federal and Federally Funded Construction Projects, EO 13202, as amended by EO 13208.

6. Hotel and Motel Fire Safety Act of 1990 (PL 101-391, as amended). Contractors may search http://www.usfa.dhs.gov/applications/hotel/.

7. Records and financial reporting. 40 CFR Part 31.

8. Copyright. 40 CFR Part 31.

SOCIAL POLICY AUTHORITIES

1. Age Discrimination Act of 1975, Pub. L. 94-135; 42 USC § 6102.

2. Race Discrimination. Title VI of the Civil Rights Act of 1964, Pub. L. 88-352.1; 42 USC § 2000d; 40 CFR Part 7.

3. Sex Discrimination. Section 13 of the Federal Water Pollution Control Act Amendments of 1972, Pub. L. 92-500 (the Clean Water Act); 33 USC § 1251; 40 CFR Part 7.

4. Disability Discrimination. Section 504 of the Rehabilitation Act of 1973, Pub. L. 93-112 (including Executive Orders 11914 and 11250); 29 USC § 794; 40 CFR Part 7.

5. Equal Employment Opportunity, Executive Order 11246.

6. Women's and Minority Business Enterprise, Executive Orders 11625, 12138, and 12432; 40 CFR Part 31.

7. Section 129 of the Small Business Administration Reauthorization and Amendment Act of 1988, Pub. L. 100-590.

8. Anti-Lobbying Provisions (40 CFR Part 34) Borrower agrees to submit certification and disclosure forms as requested by the State Water Resources Control Board or the USEPA. In accordance with the Byrd Anti-Lobbying Amendment, any Recipient who makes a prohibited expenditure under 40

CFR Part 34 or fails to file the required certification or lobbying forms shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such expenditure. The Recipient shall ensure that no Project Funds provided by the State Water Board under this assistance agreement are used to engage in lobbying of the federal government or in litigation against the United States unless authorized under existing law. The Recipient shall abide by its respective 2 CFR 200, 225, or 230, which prohibits the use of federal grant funds for litigation against the United States or for lobbying or other political activities.

9. Anti-Litigation Provisions (2 CFR 220, 225, or 230).

10. Trafficking Victims Protection Act of 2000.

11. ACORN Prohibition. None of the Project Funds used in this Agreement may be used for contracts or subcontracts to ACORN.

CERTIFICATION

I certify that _____
(Contractor)
has, or will, comply with the above list of federal laws and authorities.

_____ _____
Signature of Authorized Representative or Designee (Date)

Exhibit G

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY, AND VOLUNTARY EXCLUSION (CONSULTANT)

The prospective participant certifies to the best of its knowledge and belief that it and the principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction: violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for otherwise criminally or civilly charged by a government entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (b), above, of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transaction s (Federal, State, or local) terminated or cause or default.

I understand that a false statement on this certification may be ground for rejection of this proposal or termination of the award. In addition, under 18 USC Sec. 10 01, a false statement may result in a fine of up to $10,000 or imprisonment for up to 5 years, or both. [Note: to be executed by all principals]

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or had become erroneous by reason of changed circumstances.
4. The terms covered transaction, debarred, suspended, ineligible, lower tier covered transaction, participant, person, primary covered transaction, principal, proposal, and voluntarily excluded, as used in this clause, have the meaning set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower tier participant further agrees by submitting this proposal that it will include this clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from covered transactions, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the List of Parties Excluded from Federal Procurement and Nonprocurement Programs.
8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Exhibit I

Disadvantaged Business Enterprise (DBE) Procedural Guidelines

1.1. Summary of DBE Requirements

- Employ the Good Faith Efforts in steps 1 through 6 below.
- Complete and submit Form 1 (Good Faith Efforts Checklist) and supporting documentation prior to awarding any subcontract.
- Complete and submit Form 2 (DBE Subconsultant Participation Form) prior to awarding any subcontract.

1.2. Introduction

Funding for this project is anticipated to come in part from state or federal funds and therefore may require outreach to disadvantaged business enterprises (DBE) or other special provisions. The purpose of this document is to provide procedural guidelines that must be adhered to for DBE compliance along with forms that must be submitted with SOQs or project proposals. The selected consultant will be required to report actual DBE participation semi-annually to the Water Agency during project implementation

Consultants are encouraged to take all necessary and reasonable steps to ensure that DBE firms have the maximum opportunity to compete for and perform services on the contract, including participation in any supplemental contracts. If the consultant intends to subcontract a portion of the services on the project, the consultant is encouraged to seek out and consider DBE firms as potential subconsultants. The consultant is encouraged to contact DBE firms to solicit their interest, capability, and qualifications.

For the purposes of this document, a DBE means a business enterprise that is owned and controlled by one or more socially and/or economically disadvantaged persons. "Owned and controlled" is specified as a business which is (1) a sole proprietorship legitimately owned by an individual who is a disadvantaged person, or (2) a partnership or joint venture controlled by disadvantaged persons and in which at least 51 percent of the voting interest and 51 percent of the beneficial ownership interests are legitimately held by disadvantaged persons. Such persons include individuals who are Women, Black, Hispanic, Native Americans, Asian-Pacific Americans, Asian-Indian Americans, or any other minorities or individuals found to be disadvantaged by the Small Business Administration pursuant to Section 8(a) of the Small Business Act. Each DBE solicited and included in the proposal must be certified by the U.S. Environmental Protection Agency, U.S. Small Business Administration, U.S. Department of Transportation, or another state, local, tribal, or private entity whose certification criteria match those of the aforementioned federal agencies.

A DBE joint venture partner must be responsible for specific contract items of work or clearly defined portions thereof. Responsibility means actually performing, managing, and supervising the work with its own forces. The DBE joint venture partner must share in the capital contribution, control management, risks, and profits of the joint venture commensurate with its ownership interests.

Any public or private entity receiving state or federal funds must demonstrate that efforts were made to attract DBEs whenever services, supplies, or equipment are procured. The process to attract DBEs is referred to as the "Good Faith" effort (GFE). This effort requires that the consultant take the steps listed below to assure that DBEs are utilized to the maximum extent practicable. Failure to take these steps may be cause for Agency to terminate the agreement for cause.

Consultant must make a concerted and documented effort to solicit quotes from eligible DBEs for procured services, supplies, and equipment. If it is not practical or possible to comply with one or more of the six GFE steps, Consultant must prepare an explanation and submit to Agency prior to awarding any subcontract.

1.3. Demonstration of Good Faith Effort (Six Good Faith Steps)

The DBE "Good Faith" effort (GFE) consists of the following six steps:

STEP 1: Divide the total requirements, when economically feasible, into small tasks or quantities to permit maximum participation.
Consider in the scope of work whether portions of the work could be feasibly subcontracted with DBEs. This will include dividing total requirements into smaller tasks or quantities to permit maximum participation by DBEs. Submit documentation along with the SOQ that demonstrates the division of work into small proprietary portions (e.g. elements of planning, studies, design, permitting, monitoring, project implementation).

STEP 2: Establish delivery schedules, when work requirements permit, that encourage maximum DBE participation.
Make information on solicitation opportunities available to DBEs well in advance of the required requirements permit, arrange time frames for contracts and establish delivery schedules in a way that encourages and facilitates participation by DBEs in the competitive process. As indicated, submit documentation that includes DBE solicitation notifications and the date thereof.

STEP 3: Use the services of the U.S. Small Business Administration (SBA) and the Minority Business Development Agency (MBDA) of the U.S. Department of Commerce (DOC) in soliciting qualified DBEs.
These agencies offer several services that are generally provided at no cost, including Internet access to databases of DBEs (resources provided in Section 4 below). Utilization of these resources is required. As indicated, submit documentation along that demonstrates evidence of utilizing these resources.

STEP 4: Encourage contracting with a consortium of DBEs when a contract is too large for one of these firms to handle individually.

STEP 5: Include qualified DBEs on solicitation lists and record the information.
Solicitation should be as broad as possible. Ensure DBEs are made aware of contracting opportunities to the fullest extent practicable through outreach and recruitment activities. As indicated, submit documentation that demonstrates the preparation of a DBE solicitation list.

STEP 6: Require the consultant team and subconsultants to implement the steps (1) through (5) above for procuring services, supplies, or equipment.

1.4. DBE Outreach Resources

The outreach process identifies DBE firms that may be qualified to submit quotes on subcontracts for the project and then communicates information on the contracting opportunity to them via a phone call, fax, e-mail message, or letter.

One of the most important elements of the outreach is producing and retaining documentation of efforts made to contact DBE firms. This is typically done by producing printouts of web pages visited, phone logs of calls made or faxes sent, copies of letters sent via fax, mail or e-mail, and printouts of e-mails sent.

DBE firms can be identified utilizing many sources, but most federal funding sources require the consultant or consultant team to use only two: the Small Business Administration and the Minority Business Development Agency. State funding agencies that pass through federal funds may recommend other sources of DBE information. These include the California Public Utilities Commission (CPUC) and the California Department of Transportation (CalTrans). All of these organizations post information on their websites to aid in identifying DBE firms.

The web sites in the table below include a list of available sources for expanding the search for eligible DBEs. **Note that utilizing the SBA and MBDA resources are a mandatory** part of a GFE process. If DBE sources are not located, explain why and describe the efforts made.

DBE Resources	Contact Information
Small Business Administration (SBA) **To view DBE businesses:** 1. Go to http://web.sba.gov/pro-net/search/dsp_dsbs.cfm 2. At the top, click on **Quick Market Search** 3. Under **NAICS Codes** and **Keywords**, choose either default "**Any**," or "**All**." 4. Under **States,** scroll down and click on **California** 5. Click on **Help** next to "Metropolitan Statistical Area" to lookup project location. 6. Click **Search using these criteria** You may also use advanced search parameters by clicking on **"DSBS"** at the top and entering criteria in the provided fields.	PRO-Net Database Go to http://web.sba.gov/pro-net/search/dsp_dsbs.cfm
To post an opportunity: Users can use SUB-Net to post subcontracting opportunities free of charge. Small businesses can review this web site to identify opportunities in their areas of expertise. 1. Go to http://web.sba.gov/subnet 2. In the upper left corner, click on "**Post**." 3. Register* and log-in. 4. Click on **Sub-Net** 5. Click on **Enter Solicitation** and fill in details. *This requires that you enter your company profile and a DUNs Number. If you do not have a DUNs Number, you must register for one through http://www.dnb.com/us/duns_update/. It is possible to get a DUNs number free of charge within one business day.	Subnet and Bid Notification: http://web.sba.gov/subnet For assistance, contact 888-227-2423
U.S. Department of Commerce Minority Business Development Agency (MBDA) The MBDA is an agency within the U.S. Dept. of Commerce, created to foster the development and growth of minority businesses in the U.S. and coordinates resources in the public and private sectors to help DBE's. Consultants should contact the	www.mbda.gov/ (202) 482-0404 or email us at support@mbda.gov.

DBE Resources	Contact Information
centers and provide notices of contracting opportunities. The MBDA website allows you to post an opportunity, much like placing an advertisement in a trade journal. On the website, click on "My Business Tools" and register to obtain a login and password. Log in; click on "Business Dashboard;" click on "post opportunities;" click on your company name; click on "submit new opportunity;" and complete questionnaire. The user should obtain a screen print of the posted opportunity as documentation.	
California Public Utilities Commission (CPUC) CPUC maintains a database of DBE-owned business enterprises and serves to inform the public. The user starts by clicking on Database on the left and then selecting "Searchable Supplier Database". This will link to The Supplier Clearinghouse webpage. Click on "certified supplier search" and enter search criteria.	http://www.cpuc.ca.gov/puc/supplierdiversity
California Department of Transportation (CalTrans) Based on the federal Disadvantaged Business Enterprises (DBE) program, CALTRANS maintains a database and provides directories of minority and woman-owned firms. Click on "DBE Search". Select either "Click here to access the DBE Query Form" or "Click here to download the DBE Database in Excel" and perform your own queries. The user should print the search results page(s) and keep them with the rest of the documentation.	www.dot.ca.gov/hq/bep
North American Industry Classification System (NAICS) Under Downloads Reference Files, Tools, click "For 2007 NAICS" and Download files for NAICS definitions	http://www.census.gov/eos/www/naics/
U.S. EPA Office of Small, Disadvantaged Business Utilization (OSDBU) OSDBU's mission includes "fostering opportunities for partnerships, contracts, subagreements, and grants for small and socioeconomically disadvantaged concerns". One of the resources to assist prime contractors is a listing of small and disadvantaged businesses (a vendor profile system) registered with OSDBU. Select "search the OSDBU Registry" and click on the search criteria of interest (ethnicity, size, SIC, etc.)	http://cfpub.epa.gov/sbvps/

1.5. Consultant Responsibilities

- Pay subconsultants for satisfactory performance no more than 30 days from receipt of payment from the Water Agency.
- Notify the Water Agency in writing prior to termination of a DBE subconsultant for any reason.

- If a DBE Subconcultant fails to complete work under the subcontract for any reason, consultant shall employ the six GFEs if soliciting a replacement Subcontractor.
- Employ the GFE steps even if the Water Agency has achieved its DBE goal.
- Maintain records documenting compliance with the requirements.
- Provide semi-annual reports on DBE utilization in a format approved by the Water Agency.

5

FORM 1

Good Faith Efforts Checklist
Disadvantaged Business Enterprise Program (DBE)

In support of the actions identified in the Table below, the consultant must:

Attach this checklist along with supporting documentation for "Yes" answers and an explanation for "No" and "NA" answers.

DBE Checklist		Yes	No	NA[1]
1	Did you solicit proposals or quotes from subconsultants for this project?			
2	Did you review DBE resources (SBA, MBDA, etc.)?			
3	Did you develop a solicitation list of potential qualified DBE firms?			
4	Did you contact DBE's?			
5	Did you include DBE requirements in solicitations?			
6	Did you solicit proposals from DBE's?			
7	Did you break down the project, where economically feasible, into smaller components?			
8	Did project components have reasonable delivery schedules?			
9	Did you provide sufficient time to facilitate the submission of DBE proposals?			
10	Did you advertise the solicitation in local papers, or trade associations, or post to DBE websites? If yes, which papers/trade associations/websites?			
11	Did you encourage DBEs to submit proposals as a consortium because of project size?			
12	Did you require subconsultants to apply the good faith efforts?			
13	Were the good faith efforts identified as a "responsiveness/responsible" criterion in the solicitation?			
14	Did DBE firms submit proposals?			
15	Did you select any DBE firms?			
16	Is the subconsultant you selected using any subcontractors?			
17	If yes, did you ensure that the subconsultant implemented DBE procedures			

1. NA – Not Applicable

Supporting Documentation

1. Examples of supporting documentation include:

   i. List of DBE firms;
   ii. List of potential sub-contract work elements;
   iii. Evidence of contact with DBE firms (copies of invitations for proposals or quotes, web-site posts, contact letters, faxes and telephone call sheets, etc.);
   iv. Copies of all procurement advertisements; and,
   v. List of all consultants that submitted proposals or quotes. Any confidential information may be redacted from supporting documents.

Contract Provisions Required by Funding Authority

1.1 Introduction

Work under this Agreement is funded in part by the Department of the Interior Bureau of Reclamation, which obliges the Water Agency to include the provisions of 43 CFR 12.76(i)(1) through (13) as requirements of this Agreement. These requirements are set forth below.

Title 43, Code of Federal Regulations (43 CFR) – Public Lands: Interior

Title 43 - Public Lands: Interior
Subtitle A - Office of the Secretary of the Interior
Part 12 - ADMINISTRATIVE AND AUDIT REQUIREMENTS AND COST PRINCIPLES FOR ASSISTANCE PROGRAMS
Subpart C - Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments
Subjgrp - Changes, Property, and Subawards
Section 12.76 - Procurement.

12.76 - Procurement.

(i) Contract provisions. A grantee's and subgrantee's contracts must contain provisions in paragraph (i) of this section. Federal agencies are permitted to require changes, remedies, changed conditions, access and records retention, suspension of work, and other clauses approved by the Office of Federal Procurement Policy.

(1) Administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate. (Contracts more than the simplified acquisition threshold)

(2) Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of $10,000)

(3) Compliance with Executive Order 11246 of September 24, 1965, entitled “Equal Employment Opportunity,” as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of $10,000 by grantees and their contractors or subgrantees)

(4) Compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3). (All contracts and subgrants for construction or repair)

(5) Compliance with the Davis-Bacon Act (40 U.S.C. 276a to 276a-7) as supplemented by Department of Labor regulations (29 CFR part 5). (Construction contracts in excess of $2000 awarded by grantees and subgrantees when required by Federal grant program legislation)

(6) Compliance with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). (Construction contracts awarded by grantees and subgrantees in excess of $2000, and in excess of $2500 for other contracts which involve the employment of mechanics or laborers)

(7) Notice of awarding agency requirements and regulations pertaining to reporting.

(8) Notice of awarding agency requirements and regulations pertaining to patent rights with respect to any discovery or invention which arises or is developed in the course of or under such contract.

(9) Awarding agency requirements and regulations pertaining to copyrights and rights in data.

(10) Access by the grantee, the subgrantee, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.

(11) Retention of all required records for three years after grantees or subgrantees make final payments and all other pending matters are closed.

(12) Compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (Contracts, subcontracts, and subgrants of amounts in excess of $100,000)

(13) Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-163, 89 Stat. 871).

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 2
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors, Sonoma County Water Agency and Board of Directors, Sonoma Valley County Sanitation District
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Sonoma County Water Agency and Sonoma Valley County Sanitation District
Staff Name and Phone Number:	Kevin Booker 521-1865 Anne Crealock 547-1948
Supervisorial District(s):	First and Second
Title:	North Bay Water Reuse Program Phase 2 Final EIR Certification and Project Approval

Recommended Actions:

A. Adopt a resolution of the Board of Directors of the Sonoma County Water Agency certifying the Final Environmental Impact Report for the North Bay Water Reuse Program Phase 2 and making certain findings in connection therewith.

B. Adopt a resolution of the Board of Directors of the Sonoma Valley County Sanitation District approving projects under its jurisdiction identified in the North Bay Water Reuse Program Phase 2 Final Environmental Impact Report/Environmental Impact Statement, adopting mitigation measures and a Mitigation Monitoring Plan, adopting a Statement of Overriding Considerations, making certain related findings, and authorizing the filing of a Notice of Determination.

Executive Summary:

The North Bay Water Reuse Authority (Authority) is comprised of 11 wastewater and potable water utilities as Member Agencies, including the Sonoma County Water Agency (Water Agency) and the Sonoma Valley County Sanitation District (District). The Water Agency Board of Directors acts as the administrative agency for the Authority and is the Lead Agency under the California Environmental Quality Act (CEQA). As a member agency of the Authority, the District's Board of Directors is a Responsible Agency under CEQA.

The North Bay Water Reuse Program Phase 2 (Phase 2 Program) looks to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region. A Notice of Preparation and Draft Environmental Impact Report/Environmental Impact Statement (Report/Statement) were prepared and distributed for public review. Phase 2 Program projects evaluated at the project-level include: in the District's service area, a 2.2-mile recycled water distribution pipeline along Napa Road

(Napa Road Pipeline Project), as well as Member Agencies projects that include wastewater treatment capacity expansion, expansion of recycled water distribution, and upgrades at water recycling facilities.

Written comments were received from four entities during the Draft Report/Statement public review period. The comments focused on concerns regarding construction on or near State roadway facilities, potential for effects to geothermal reservoirs in the Sonoma Valley, the Phase 2 Program's relation to water quality objectives, and the potential for elements to exacerbate flooding or flooding risk. The Final Report/Statement includes revisions, updates and clarifications in response to comments received. The Final Report/Statement discloses potentially significant impacts that would be reduced to a less-than-significant level through implementation of mitigation measures in multiple resource areas. The document discloses potentially significant and unavoidable impacts related to Cultural Resources for a project under the jurisdiction of the Napa Sanitation District and related to Growth for Member Agencies implementing projects under the Proposed Project, including the District's Napa Road Pipeline Project. The Final Report/Statement discloses that the Phase 2 Program would provide recycled water, contributing to the provision of adequate water supply to support a level of growth that is consistent with the amount planned and approved within the General Plans for Sonoma, Marin, and Napa Counties. As described in the Draft Report/Statement, no appreciable growth in population or employment would occur as a direct result of the District's project under the Phase 2 Program, however provision of adequate water supplies to support planned development in the approved General Plans of the City of Sonoma and Sonoma County could result in secondary effects to the environment.

Water Agency staff recommend that the Board, acting as the administrative agency for the Authority and as the Lead Agency under CEQA, certify the Final Environmental Impact Report, which would allow participating Member Agencies to rely on the Final Report/Statement for project implementation and for funding opportunities through the U.S. Bureau of Reclamation's Title XIV Program. Staff recommends that the District's Board approve the Phase 2 Program and the District's Napa Road Pipeline Project, for the reasons set forth in the proposed Statement of Overriding Consideration. Staff recommends that the District Board, acting as a Responsible Agency under CEQA, adopt a resolution approving projects under its jurisdiction identified in the Phase 2 Program Final Report/Statement, adopt mitigation measures and a Mitigation Monitoring Plan, adopt a Statement of Overriding Considerations, making certain related findings, and authorize the filing of a Notice of Determination.

Discussion:

HISTORY/BACKGROUND OF THE ITEM:

The Authority, originally established under a Memorandum of Understanding (MOU) in August 2005 and most recently amended in November 2017, is comprised of 11 wastewater and potable water utilities as Member Agencies: the Water Agency, the District, Las Gallinas Valley Sanitary District, Novato Sanitary District, Napa Sanitation District, North Marin Water District, Napa County, Marin County (associate membership), Marin Municipal Water District, City of American Canyon, and the City of Petaluma. Authority Cooperating Agencies include the Central Marin Sanitation Agency. The Water Agency acts as the administrative agency for the Authority.

On December 8, 2009, the Board of Directors of the Water Agency, acting as the administrative agency for the Authority and as the Lead Agency under the CEQA, certified the Final Environmental Impact Report prepared for the North San Pablo Bay Restoration and Reuse Project (Phase 1 Project). The U.S.

Department of the Interior's Bureau of Reclamation (Reclamation) was the Lead Agency under the National Environmental Policy Act (NEPA) and filed a Record of Decision for the Final Environmental Impact Statement on January 28, 2011. The recycled water distribution projects implemented under Phase 1, including the Napa Sonoma Marsh Restoration Pipeline, are largely complete. Phase 1 projects cost approximately $104 million, but received $25 million in funding from federal sources, including Reclamation's Water SMART and Title XVI grants and American Recovery and Reinvestment Act funding, as well as $4.8 million from the California Department of Water Resources' Integrated Regional Water Management grant program.

The objectives of Phase 2 Program are to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region to improve local, regional, and state water supply reliability; offset demands on potable water supplies; address impaired groundwater basins; enhance local and regional ecosystems; maintain and protect public health and safety; promote sustainable practices; and implement integrated water management in an economically viable manner. The Phase 2 Program area extends approximately 10 to 15 miles inland from the San Pablo Bay within Marin, Sonoma, and Napa counties. The area extends as far south as San Quentin in Marin County, as far north as El Verano and including Petaluma in Sonoma County, and includes the cities of Napa and American Canyon in Napa County.

Phase 2 Program projects evaluated at the project-level include: in the District's service area, a 2.2-mile-long recycled water distribution pipeline along Napa Road (Napa Road Pipeline Project); in Novato Sanitation District's service area, treatment capacity expansion at the recycled water facility, recycled water distribution for Marin County Lower Novato Creek restoration, and a turnout to wetlands; in Marin Municipal Water District's service area, a recycled water distribution system expansion to San Quentin Prison; in Napa Sanitation District's service area, increased filter capacity and covered storage at the Soscol Water Recycling Facility; in the City of Petaluma's service area, increased capacity at the Ellis Creek Water Recycling Facility, an expansion of the urban recycled water distribution system, and agricultural recycled water expansion; and in the City of American Canyon's service area, upgrades to the water recycling facility and an expansion of the recycled water distribution system. Additional Phase 2 Program projects were evaluated at a programmatic level of analysis, including the Water Agency's Valley of the Moon and Sonoma aquifer storage and recovery projects. These program-level projects are currently at a conceptual level and are not proposed for implementation under the Phase 2 Program, but promote integrated water management and would be further evaluated for implementation if needed in the future, as additional design and funding become available.

The Water Agency contracted with Environmental Science Associates, as sub-consultant to Brown & Caldwell, to prepare a joint Report/Statement to evaluate potential environmental impacts of the Phase 2 Program in accordance with CEQA, the State CEQA Guidelines, the Water Agency's Procedures for the Implementation of CEQA, NEPA, and Reclamation's NEPA Handbook. A Notice of Preparation was circulated for a 30-day public review period from July 19 through August 21, 2017. Scoping meetings were held during the review period on: August 2 in San Rafael; August 3 in American Canyon; August 9 in Petaluma; and August 10 in Sonoma.

The Draft Report/Statement was circulated for a 45-day public review period from April 4 through May 18, 2018. During this time, four public hearings were held to provide interested persons with an

opportunity to comment verbally or in writing on the Phase 2 Program and the Draft Report/Statement. The public hearings were held: May 7 in American Canyon; May 9 in San Rafael; May 10 in Petaluma; and May 14 in Sonoma. No oral comments were received at any of the public hearings. A notice of availability for the Draft Report/Statement was sent to approximately 635 agencies and individuals, published in local and regional newspapers, and posted on the Water Agency's and Authority's websites. The Draft Report/Statement was made available for review at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document was made available on the Water Agency's and Authority's websites. A Notice of Completion was mailed, along with 15 electronic copies of the Draft Report/Statement, to the State Clearinghouse.

Written comments were received from four entities during the public review period. The comments focused on concerns regarding construction on or near State roadway facilities, potential for effects to geothermal reservoirs in the Sonoma Valley, the Phase 2 Program's relation to water quality objectives, and the potential for elements to exacerbate flooding or flooding risk.

The Final Report/Statement includes revisions, updates, and clarifications in response to comments received during the Draft Report/Statement review period. The Final Report/Statement does not include information regarding new significant impacts, alternatives, or mitigation measures that are considerably different from others previously analyzed, nor does any new information provided in the Final Report/Statement constitute "significant new information" within the meaning of CEQA as to require recirculation. The Final Report/Statement was distributed on August 3, 2018, and has been made available for the minimum 10-day review period required by CEQA. The Final Report/Statement is available at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document is available on the Water Agency's and Authority's websites. Reclamation has not yet completed the public review requirements under NEPA or a Record of Decision.

FINAL ENVIRONMENTAL IMPACT REPORT/ENVIRONMENTAL IMPACT STATEMENT CONCLUSIONS

The Final Report/Statement discloses potentially significant impacts that would be reduced to a less-than-significant level through implementation of mitigation measures identified in the following areas: Surface Hydrology, Groundwater Resources, Water Quality, Biological Resources, Transportation and Traffic, Air Quality, Noise, Hazards and Hazardous Materials, Public Services and Utilities, Cultural Resources and Tribal Cultural Resources, Recreation, Aesthetics, Energy Conservation, and Cumulative Impacts, Growth Inducement, and Secondary Effects of Growth. The document discloses potentially significant and unavoidable impacts related to Cultural Resources for a project under the jurisdiction of the Napa Sanitation District and related to Growth for Member Agencies implementing projects under the Proposed Project, including the District. The significant and unavoidable impact related to the District's Napa Road Pipeline Project is described below.

CERTIFICATION OF ENVIRONMENTAL IMPACT REPORT (Water Agency Board)

Water Agency staff recommend that the Board, acting as the administrative agency for the Authority and as the Lead Agency under CEQA, certify the Final Environmental Impact Report in accordance with CEQA, the State CEQA guidelines, and the Water Agency's Procedures for the Implementation of CEQA, and make certain findings in connection therewith. Certifying the document under CEQA will allow participating

Member Agencies to rely on the Final Report/Statement for project implementation and for funding opportunities through the Reclamation's Title XIV Program.

PROJECT APPROVAL (District Board)

The District is the responsible entity for implementing and constructing the Napa Road Pipeline Project, located within the District service area and included as part of the Phase 2 Program.

The Final Report/Statement discloses that the Phase 2 Program would provide recycled water for urban, agricultural, and environmental uses, and as such, would contribute to the provision of adequate water supply to support a level of growth that is consistent with the amount planned and approved within the General Plans for Sonoma, Marin, and Napa counties. As described in the Draft Report/Statement, no appreciable growth in population or employment would occur as a direct result of the District's project under the Phase 2 Program, however provision of adequate water supplies to support planned development in the approved General Plans of the City of Sonoma and Sonoma County would result in secondary effects to the environment, as identified in the City of Sonoma General Plan Environmental Impact Report and the Sonoma County General Plan Environmental Impact Report, and summarized in the Phase 2 Program Draft Report/Statement.

Notwithstanding the impact, staff recommends that the District's Board approve the Phase 2 Program and the District's Napa Road Pipeline Project, for the reasons set forth in the proposed Statement of Overriding Consideration. These overriding considerations include:

A. Implementation of the Proposed Project would provide potable offset of urban and agricultural demands on potable supplies, including surface and groundwater supplies.
B. Implementation of the Proposed Project would reduce the amount of treated effluent discharged to North San Pablo Bay.
C. Implementation of the Proposed Project would be consistent with State and local policies regarding the implementation of recycled water to provide potable water supply offset.
D. Implementation of the Proposed Project would be consistent with recycled water polices identified in approved General Plans within the proposed service area.
E. Implementation of the Proposed Project would reduce groundwater depletion in the Sonoma Valley by providing an alternative source of water for irrigation. Reducing groundwater depletion will benefit other users of area water, and help ensure the long-term viability of existing agricultural, residential, open space, and other uses in the Project area.
F. Implementation of the Proposed Project would reduce peak demand for water in the summer months. Reducing peak demand will benefit other users of water in the summer months, including threatened and endangered species.
G. The Proposed Project would be implemented under Reclamation's Title XIV program, which provides funding for recycled water programs that have demonstrated regional coordination and provide multiple benefits.

Staff recommends that the District Board, acting as a Responsible Agency under CEQA, adopt a resolution approving projects under its jurisdiction identified in the North Bay Water Reuse Program Phase 2 Final Report/Statement, adopt mitigation measures and a Mitigation Monitoring Plan, adopt a Statement of

Overriding Considerations, making certain related findings, and authorize the filing of a Notice of Determination.

Prior Board Actions:

04/03/18: Water Agency Board approved release of Draft Report/Statement for 45-day public review period, set public hearing officers, and scheduled public hearings.

11/14/17: Water Agency Board authorized the Chair of the Water Agency and the Chair of the District to sign the Authority's Fourth Amended Memorandum of Understanding, adding City of American Canyon as a member and adjusting governance and cost sharing provisions to incorporate changed membership; authorized Water Agency's General Manager or designee to execute an amended agreement with Brown and Caldwell to provide engineering, environmental, and public outreach services for Authority increasing the amount by $321,274, expanding the scope of work to include fiscal year 2017/2018, and extending the agreement term by ten months for a new not-to-exceed agreement total of $3,319,653 and end date of October 30, 2018; authorized expenditure of District funds for District's portion of costs for the above amended agreement with Brown and Caldwell; adopted a resolution of the Water Agency authorizing adjustments to the adopted fiscal year 2017/2018 budget in the amount of $25,230.58; and adopted a resolution of the District authorizing adjustments to the adopted fiscal year 2017/18 budget in the amount of $25,230.57.

09/12/17: Water Agency Board of Directors adopted a resolution authorizing the General Manager of the Water Agency, or his designee, to a) sign and file an application with the United States Bureau of Reclamation pursuant to the Water Infrastructure Improvements for the Nation Act for funding the North Bay Water Reuse Program construction activities; b) execute a cooperative agreement with the United States Bureau of Reclamation; and c) take all actions necessary to implement the cooperative agreement

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Waste Water Treatment and Water Reuse, Goal 1: Improve operational reliability of wastewater treatment and water reuse systems.

Water Agency's Board certification of the Final Report/Statement and the District's Board project approval would improve the availability of recycled water in the SVCSD service area and throughout the North San Pablo Bay region. It would also allow the SVCSD and other participating agencies to apply for federal funding to implement proposed projects.

☐ 4/5 Vote Required

Resolution Of The Board Of Directors Of The Sonoma County Water Agency, To Certify The North Bay Water Reuse Program Phase 2 Final Environmental Impact Report, And Make Certain Findings Therewith.

Whereas, the Sonoma County Water Agency (Water Agency) wishes to expand the beneficial use of recycled water in Sonoma County and to work cooperatively with other agencies within the North Bay region, including Marin and Napa counties, to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region.

Whereas, the North Bay Water Reuse Authority (Authority) is comprised of 11 wastewater and potable water utilities as Member Agencies, including the Water Agency, and the Water Agency Board of Directors acts as the administrative agency for the Authority.

Whereas, as provided for in California Environmental Quality Act (CEQA) Guidelines Section 15050, Water Agency is the CEQA Lead Agency for the preparation and circulation of the Environmental Impact Report/Environmental Impact Statement (Report/Statement) for the North Bay Water Reuse Program Phase 2 (Phase 2 Program, SCH# 2017072051).

Whereas, the U.S. Department of Interior, Bureau of Reclamation (Reclamation) and the Authority's Member Agencies prepared a Draft Environmental Impact Report/Environmental Impact Statement for the proposed North Bay Water Reuse Program Phase 2 (Phase 2 Program). The document is a joint Environmental Impact Report/Environmental Impact Statement (Report/Statement) and was prepared in accordance with the National Environmental Policy Act (NEPA), Reclamation's NEPA Handbook, CEQA, the State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA.

Whereas, in response to comments received on the Draft Report/Statement, a FinalReport/Statement has been prepared for the proposed Phase 2 Program, and the review process has been satisfactorily completed as more fully described below.

Now, Therefore, Be It Resolved that this Board finds that the foregoing recitals are true and correct and further finds, declares, determines and orders as follows:

PROCEDURAL FINDINGS:

1. The Phase 2 Program area extends approximately 10 to 15 miles inland from the San Pablo Bay within Marin, Sonoma, and Napa counties. Figure 2-3 in Chapter 2, Project Description, of the Draft Report/Statement shows the area of the Phase 2 Program. The Authority's Member Agencies collectively prioritized the projects within their individual service areas to participate in the Phase 2 Program. These are projects that each Member Agency has defined to a level of detail that allows for project-level environmental review and are collectively referred to as the Phase 2 Program. Phase 2 Program projects evaluated at the project-level include: in the Sonoma Valley County Sanitation District's service area, a 2.2-mile-long recycled water distribution pipeline along Napa Road; in Novato Sanitation District's service area, treatment capacity expansion at the recycled water facility, recycled water distribution for Marin County Lower Novato Creek restoration, and a turnout to wetlands; in Marin Municipal Water District's service area, a recycled water distribution system expansion to San Quentin Prison; in Napa Sanitation District's service area, increased filter capacity and covered storage at the Soscol Water Recycling Facility; in the City of Petaluma's service area, increased capacity at the Ellis Creek Water Recycling Facility, an expansion of the urban recycled water distribution system, and agricultural recycled water expansion; and in the City of American Canyon's service area, upgrades to the water recycling facility and an expansion of the recycled water distribution system. Additional Phase 2 Program projects were evaluated at a programmatic level of analysis, including the Water Agency's Valley of the Moon and Sonoma aquifer storage and recovery projects. These program-level projects are currently at a conceptual level and are not proposed for implementation under the Phase 2 Program but promote integrated water management and would be further evaluated for implementation if needed in the future, as additional design and funding become available.

Collectively, the Phase 2 Program would provide 4,885 acre-feet of new recycled water for beneficial use and would include: installation of 19.8 miles of new pipelines; construction of facilities onsite at the existing wastewater treatment plants to provide an additional 4.87 million gallons per day of tertiary treatment capacity; and development of approximately 10.1 acre-feet of storage, primarily for agricultural use.

2. As described in the Draft Report/Statement Section 1.1.1, Purpose and Need of the Proposed Action, the objectives of the Phase 2 Program are to promote the expanded beneficial use of recycled water and integrated water

management in the North Bay region to offset demands on potable supplies; enhance local and regional ecosystems; improve local, regional, and State water supply reliability; maintain and protect public health and safety; promote sustainable practices; support the sustainable management of groundwater basins; and implement recycled water facilities in an economically viable manner.

3. As allowed for in CEQA Guidelines Section 15084(d)(2), the Water Agency retained a consultant to assist with preparation of the environmental documents. The Water Agency, acting as Lead Agency, has directed, reviewed and edited as necessary all material prepared by the consultant, and such material reflects the Water Agency's independent judgment.

4. On July 19, 2017, the General Manager of the Water Agency circulated a Notice of Preparation (NOP) of an Environmental Impact Report to be mailed to local, state, and federal agencies, and to other interested parties. The Notice of Preparation was submitted to the State Clearinghouse and was available online at the Water Agency's and Authority's websites. The Notice of Preparation was directly mailed to 237 parties and a postcard notification of the notice's availability was sent to 425 parties. The Notice of Preparation was circulated for a 30-day public review period, which ended on August 21, 2017. The project description for the notice was based on the North Bay Water Reuse Program Phase 2 Feasibility Study completed in June 2017. No Initial Study was prepared since Water Agency staff decided in advance that a full Report/Statement would be required for this project.

5. The July 2017 Notice of Preparation also included notice for four scoping meetings held on August 2, 2017, in San Rafael; August 3, 2017, in American Canyon; August 9, 2017, in Petaluma; and August 10, 2017, in Sonoma. The purpose of the scoping meetings was to give the public an opportunity to make comments and suggestions on the scope of the Report/Statement.

6. On April 4, 2018, approximately 20 hard copies and/or compact discs of the Draft Report/Statement, along with Notices of Availability, were sent to responsible and trustee agencies, Member Agencies, and nine regional libraries. In addition, Notices of Availability were published in six newspapers of general circulation, posted on the Water Agency's and Authority's websites, and Notices of Availability and/or postcard notices were sent to approximately 635 interested agencies and residents located within the project area identified in the Draft Report/Statement, and to individuals who requested to be on the mailing list for the project. The Draft Report/Statement was made available for review at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document was made available on the Water Agency's and Authority's websites. A Notice of Completion was mailed, along with 15 electronic copies of the Draft Report/Statement, to the

State Clearinghouse.

7. The Draft Report/Statement was circulated for a 45-day public review period from April 4 through May 18, 2018. On May 7, 2018, in American Canyon; May 9, 2018, in San Rafael; May 10, 2018, in Petaluma; and May 14, 2018, in Sonoma, public hearings were held to receive comments on the Draft Report/Statement and on the proposed project. No members of the public provided comment and each public hearing was closed.

8. After the end of the public review period for the Draft Report/Statement, written comments from four entities were reviewed, and responses to comments were prepared. The Response to Comments document together with the Draft Report/Statement constitutes the Final Report/Statement.

9. The Final Report/Statement includes revisions, updates, and clarifications in response to comments received on the Draft Report/Statement. The revisions, updates, and clarifications made for the Final Report/Statement do not include disclosures of: 1) any new significant impact from the project; 2) a substantial unmitigated increase in the severity of any impact; or 3) a feasible alternative or mitigation measure considerably different from others previously analyzed that would clearly lessen project impacts but that the Water Agency does not propose to adopt. The new information provided in the Final Report/Statement does not constitute "significant new information" within the meaning of CEQA so as to require recirculation of the Final Report/Statement.

10. The Final Report/Statement was distributed on August 3, 2018, and was available for the minimum 10-day review period required by CEQA. The Final Report/Statement is available at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document is available on the Water Agency's and Authority's websites.

SUBSTANTIVE FINDINGS

1. The Water Agency, as the Lead Agency, has prepared the Final Report/Statement for the Phase 2 Program.

2. Pursuant to CEQA Guidelines Section 15090, the Board of Directors of the Water Agency (Board) has reviewed and considered the information contained in the Final Report/Statement for the Phase 2 Program, and considered the environmental effects of the Project as disclosed in the Final Report/Statement.

3. The Board finds that the Final Report/Statement describes a range of reasonable alternatives.

4. The Board finds that the Final Report/Statement represents a good faith effort to achieve completeness and full environmental disclosure.

5. The Final Report/Statement reflects the independent judgment and analysis of the Board of Directors of the Water Agency.

6. The Board certifies that it has reviewed and considered the information in the Final Report/Statement, and finds that it represents the independent judgment and analysis of the Sonoma County Water Agency Board of Directors. The Board finds that the Final Report/Statement is an adequate informational document, and has provided this Board and the public with full and fair disclosure of potential environmental impacts associated with the project.

Be It Further Resolved based on the record of this proceeding and the foregoing findings and determinations, the Board of Directors of the Sonoma County Water Agency does hereby certify that the Final Environmental Impact Report has been completed, reviewed, and considered in compliance with CEQA, the State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA, and that the Final Environmental reflects the independent judgment and analysis of this Board.

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Directors Of The Sonoma Valley County Sanitation District To Approve Projects Under Its Jurisdiction Identified In The North Bay Water Reuse Program Phase 2 Final Environmental Impact Report/Environmental Impact Statement, And Make Certain Findings Therewith.

Whereas, the Sonoma Valley County Sanitation District (District) wishes to expand the beneficial use of recycled water in Sonoma County and to work cooperatively with other agencies within the North Bay region, including Marin and Napa counties, to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region.

Whereas, the District is a Member Agency of the North Bay Water Reuse Authority (Authority), which has been formed to promote the use of recycled water within the region.

Whereas, the District has participated in the development and preparation of the North Bay Water Reuse Program Phase 2 Feasibility Study, which has incorporated projects identified by the District, for distribution of recycled water to reduce demands on potable supplies, referred to as the Napa Road Pipeline Project, and shown in Draft Environmental Impact Report/Environmental Impact Statement (Report/Statement) Figure 2-7.

Whereas, as provided for in California Environmental Quality Act (CEQA) Guidelines Section 15050, the Sonoma County Water Agency (Water Agency) is the CEQA Lead Agency for the preparation and circulation of the Report/Statement for the North Bay Water Reuse Program Phase 2 (Phase 2 Program, SCH# 2017072051).

Whereas, as provided for in CEQA Guidelines Section 15096, the District is a Responsible Agency, and will consider the Report/Statement prior to reaching a decision on projects within its jurisdiction that have been included in the Phase 2 Program.

Whereas, the U.S. Department of Interior, Bureau of Reclamation (Reclamation) and the Authority's Member Agencies prepared a Draft Environmental Impact Report/Environmental Impact Statement for the proposed North Bay Water Reuse

Program Phase 2 (Phase 2 Program). The document is a joint Environmental Impact Report/Environmental Impact Statement (Report/Statement) and was prepared in accordance with the National Environmental Policy Act (NEPA), Reclamation's NEPA Handbook, CEQA, the State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA.

Whereas, in response to comments received on the Draft Report/Statement, a Final Report/Statement has been prepared for the proposed Phase 2 Program, and the review process has been satisfactorily completed as more fully described below.

Whereas, on August 14, 2018, the Sonoma County Water Agency (Water Agency), as CEQA Lead Agency, certified that the Final Report/Statement has been: completed in compliance with CEQA, the State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA; was presented to the decision making body of the Lead Agency, and that the decision making body reviewed and considered the information contained in the Report/Statement; and that the Final Report/Statement reflects the Lead Agency's independent judgment and analysis.

Now, Therefore, Be It Resolved that this Board finds that the foregoing recitals are true and correct and further finds, declares, determines and orders as follows:

PROCEDURAL FINDINGS.

1. The Phase 2 Program area extends approximately 10 to 15 miles inland from the San Pablo Bay within Marin, Sonoma, and Napa counties. Figure 2-3 in Chapter 2, Project Description, of the Draft Report/Statement shows the area of the Phase 2 Program. The Authority's Member Agencies collectively prioritized the projects within their individual service areas to participate in the Phase 2 Program. These are projects that each Member Agency has defined to a level of detail that allows for project-level environmental review and are collectively referred to as the Phase 2 Program. Phase 2 Program projects evaluated at the project-level includes in the District's service area, a 2.2-mile-long recycled water distribution pipeline along Napa Road (Napa Road Pipeline Project). The Phase 2 Program also includes projects from Member Agencies, including the Novato Sanitary District, Marin Municipal Water, Napa Sanitation District, the City of Petaluma, and the City of American Canyon.

Collectively, the Phase 2 Program would provide 4,885 acre-feet of new recycled water for beneficial use and would include: installation of 19.8 miles of new pipelines; construction of facilities onsite at the existing wastewater treatment plants to provide an additional 4.87 million gallons per day of tertiary treatment capacity; and development of approximately 10.1 acre-feet of storage, primarily for agricultural use. The District's Napa Road Pipeline Project (District Project or Proposed Project) would expand the recycled water service area in the unincorporated areas of Sonoma County east of the City of Sonoma along Napa Road (Draft Report/Statement Figure 2-7, Appendix A). Pipeline construction would have a project yield of 200 acre-feet per year, and include 11,500 linear feet of 12-inch diameter pipeline located

within the roadway or roadway shoulder. The pipeline would connect to existing pipelines and extend eastward from 5th Street East to serve additional customers.

2. As described in the Draft Report/Statement Section 1.1.1, Purpose and Need of the Proposed Action, the objectives of the Phase 2 Program are to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region to offset demands on potable supplies; enhance local and regional ecosystems; improve local, regional, and State water supply reliability; maintain and protect public health and safety; promote sustainable practices; support the sustainable management of groundwater basins; and implement recycled water facilities in an economically viable manner.

3. On July 19, 2017, the General Manager of the Water Agency circulated a Notice of Preparation (NOP) of an Environmental Impact Report to be mailed to local, state, and federal agencies, and to other interested parties. The Notice of Preparation was submitted to the State Clearinghouse and was available online. The NOP was directly mailed to 237 parties and a postcard notification of the Notice of Preparation's availability was sent to 425 parties. The Notice of Preparation was circulated for a 30-day public review period, which ended on August 21, 2017. The project description for the Notice of Preparation was based on the *North Bay Water Reuse Program Phase 2 Feasibility Study* completed in June 2017. No Initial Study was prepared since Lead Agency staff decided in advance that a full Report/Statement would be required for this project.

4. The July 2017 NOP also included notice for four scoping meetings on August 2, 2017, in San Rafael; August 3, 2017, in American Canyon; August 9, 2017, in Petaluma, and August 10, 2017, in Sonoma. The purpose of the scoping meetings was to give the public an opportunity to make comments and suggestions on the scope of the Report/Statement.

5. On April 4, 2018, approximately 20 hard copies and/or compact discs of the Draft Report/Statement, along with Notices of Availability, were sent to: responsible and trustee agencies, Member Agencies, and nine regional libraries. In addition, Notices of Availability were published in six newspapers of general circulation, posted on the Water Agency's and Authority's websites, and Notices of Availability and/or postcard notices were sent to approximately 635 interested agencies and residents located within the project area identified in the Draft Report/Statement, and to individuals who requested to be on the mailing list for the project. The Draft Report/Statement was made available for review at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document was made available on the Water Agency's and Authority's websites. A Notice of Completion was mailed, along with 15 electronic copies of the Draft Report/Statement, to the State Clearinghouse.

6. The Draft Report/Statement was circulated for a 45-day public review period from April 4 through May 18, 2018. On May 7, 2018, in American Canyon; May 9, 2018, in San Rafael; May 10, 2018, in Petaluma; and May 14, 2018, in Sonoma, public hearings were held to receive comments on the Draft Report/Statement and on the proposed project. No members of the public provided comment and each public hearing was closed.

7. After the end of the public review period for the Draft Report/Statement, written comments from approximately four entities were reviewed, and responses to comments were prepared. The Response to Comments document together with the Draft Report/Statement constitutes the Final Report/Statement.

8. The Final Report/Statement includes revisions, updates, and clarifications in response to agency comment on the Draft Report/Statement. The revisions, updates, and clarifications made for the Final Report/Statement do not include disclosures of: 1) any new significant impact from the project; 2) a substantial unmitigated increase in the severity of any impact; or 3) a feasible alternative or mitigation measure considerably different from others previously analyzed that would clearly lessen project impacts, but that the District does not propose to adopt. The new information provided in the Final Report/Statement does not constitute "significant new information" within the meaning of CEQA so as to require recirculation of the Final Report/Statement.

9. The Final Report/Statement was distributed on August 3, 2018, and was available for the minimum 10-day review period required by CEQA. The Final Report/Statement is available at the Water Agency's administrative office, Member Agencies' offices, and at regional libraries in the project area, and an electronic version of the document is available on the Water Agency's and Authority's websites.

SUBSTANTIVE FINDINGS.

1. Pursuant to CEQA Guidelines Section 15096, the Board of Directors of the District (Board) has reviewed and considered the information contained in the Final Report/Statement for the Phase 2 Program, and considered the environmental effects of the Project as shown in the Final Report/Statement.

2. Less than Significant Impacts

2.01. The Board finds that the District Project described in the Phase 2 Program Report/Statement has certain impacts that are less than significant or are beneficial, which are fully and accurately identified in the Draft Report/Statement Chapter 3, Environmental Consequences, Chapter 4, Cumulative Impacts, and Chapter 5, Growth Inducement and Secondary Effects of Growth.

3. Significant Impacts Reduced to a Less than Significant Level by Mitigation Measures

3.01. The Board finds that the Phase 2 Program would cause certain significant or potentially significant adverse environmental impacts, which are fully and accurately summarized in Draft Report/Statement Chapter 3. The Board further finds that there are impacts, and corresponding mitigation measures as described in Draft Report/Statement Chapters 3 and 4, disclosed that fall outside its jurisdiction, and are the responsibility of another agency and should be adopted by such agency and not the District.

3.02. The Board finds that the District Project described in the Phase 2 Program Report/Statement would cause certain significant or potentially significant adverse environmental impacts, which are more

fully described in the Final Report/Statement. The Board further finds that changes or alterations have been required in or incorporated into the District Project that will mitigate those impacts to less-than-significant levels as described in Draft Report/Statement Chapters 3 and 4. Based on such findings, and the above statement of facts, the Board hereby finds that most of the significant or potentially significant adverse environmental effects posed by the District Project have been eliminated or reduced to a less-than-significant level. An explanation of the rationale for each finding is presented below.

A. Impacts and Mitigation Measures

1. Surface Hydrology

a) Impact 3.3.1: Project construction and operation could alter the existing drainage patterns in a manner that would result in substantial erosion, siltation, or flooding on- or off-site.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit. *Refer to Impact 3.5.1 in Water Quality.*

Mitigation Measure 3.3.1a: Stream and Drainage Crossings. *The Member Agencies shall implement the following measure during pipeline installation at stream or drainage crossings:*

1. *Schedule construction during the dry season and so as to avoid storm events to the extent feasible, or as required by regulatory permits (approximately June 15 to October 15);*
2. *Pipelines suspended from bridges shall be designed such that they do not interfere with conveyance of flows beneath the bridge, as determined by a licensed professional engineer;*
3. *At in-road drainage crossings where drainages pass beneath the road in existing culverts, and where there is sufficient cover between the culvert and road surface, the new pipeline will be installed above the existing culvert without removing or disturbing it. If the pipeline must be installed below the existing culvert, then the culvert will be cut and temporarily removed to allow pipeline installation.*
4. *If disturbance of the existing culvert is required, sediment curtains upstream and downstream of the construction zone shall be placed to prevent sediment disturbed during trenching activities from being transported and deposited outside of the construction zone.*
5. *Employ short-term drainage diversion and control measures such as sandbags, dikes, pumps, or other means; and*
6. *Following construction, restore the construction area to pre-existing conditions.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with California Environmental Quality Act Guidelines Section 15901(a)(1), that

changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: As discussed in the Draft Report/Statement, the proposed pipelines would cross streams and drainages only under certain necessary conditions. In such cases, the measures listed above would avoid direct impact to drainages. The drainage designs would be integrated with existing drainage systems such that drainage patterns do not result in new erosion, siltation, or flooding, and the construction site would be restored to pre-existing conditions, therefore, the impact on the drainage patterns would be less than significant.

b) Impact 3.3.2: Project operation would reduce the amount of annual discharge due to the recovery and use of recycled water that is currently discharged.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.3.2: SWRCB Change of Use Petition. *Member Agencies shall complete SWRCB Change of Use Petition for use of recycled water, pursuant to Section 1700 of the California Water Code. Direct diversions of less than 3.0 cubic feet per second (cfs) or storage of less than 200 AFY may qualify for a minor petition, as appropriate. Member Agencies shall complete SWRCB Change of Use Petition process prior to recycled water distribution.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Member Agencies would complete a State Water Resources Control Board petition for change of use as appropriate to ensure recovery and use of recycled water, and annual discharge amounts are compliant with state guidelines.

c) Impact 3.3.3: The proposed action could expose the public or structures to the risk of flooding due to placement of facilities within the one percent annual chance of exceedance flood level. The proposed action would also change the amount of discharge to local surface waters.

Mitigation: Applicable to District, Water Agency, Marin Municipal Water District, Novato Sanitary District, and City of Petaluma; not applicable to City of American Canyon and Napa Sanitation District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.3.3: *As part of the design process for seasonal storage, Member Agencies shall demonstrate through hydrologic and hydraulic analyses that the proposed modification and/or encroachment would not result in an increase in flood levels during the occurrence of the one percent annual chance of exceedance flood event. Analysis shall be performed by a California licensed engineer in accordance with standard engineering practices.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of the above measure would ensure that the proposed modification would not result in an increase in flood levels during the occurrence of the one percent annual chance of exceedance flood by incorporating hydrologic and hydraulic analyses into design.

d) Impact 3.3.4: Sea-level rise could affect operation of project facilities.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.3.4: *Design of proposed facilities shall consider sea level rise potential, and shall include appropriate measures in facility siting and design to address potential impacts related to sea level rise, similar to those applied to facility installation within 100-year flood plains. Design measures may include, but are not limited to: facility siting, access placement, access vault extension above projected water elevation, water tight vaults, and site protection.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of the above measure would ensure that proposed facilities consider potential sea-level rise scenarios into siting and design such that appropriate protective measure can be established.

e) Impact 3.3.5: The NBWRP Phase 2 would not cause or exacerbate any existing risk of inundation by seiche, tsunami, or mudflow.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.3.1a: Stream Drainage Crossings. *Refer to Impact 3.3.1 in Surface Hydrology.*

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit. *Refer to Impact 3.5.1 in Water Quality.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: As discussed in the Draft Report/Statement, the proposed pipelines would cross drainages only under certain necessary conditions. In such cases, the measures listed above would avoid direct impact to drainages, such as constriction of flood flow which could cause or exacerbate upstream flooding conditions. The drainage designs would be integrated with existing drainage systems, therefore, the impact on the drainage patterns would be less than significant.

2. Groundwater Resources

a) Impact 3.4.3: Proposed facilities may be affected by shallow groundwater levels and natural groundwater fluctuations.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.4.3: *The Member Agencies will implement the following measures:*

1. *All proposed improvements will be designed and constructed in accordance with current geotechnical industry standard criteria as overseen and approved by a state licensed geotechnical engineer.*
2. *Implement industry standard geotechnical measures to address high groundwater conditions as appropriate to reduce the potential for impacts related to groundwater fluctuation, in accordance with accepted geotechnical practices and current building code requirements.*

Possible design features include drainage blankets, perimeter pumps to temporarily decrease hydrostatic pressure, perimeter drainage trenches, and specific groundwater monitoring scenarios.

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Proposed facilities, including pipelines, pump stations, and storage facilities would be constructed in accordance with the geotechnical standards and criteria. The design measures would reduce the impacts related to groundwater fluctuation.

3. *Water Quality*

a) Impact 3.5.1: Disturbance of soils during construction of new project-related infrastructure could generate short term erosion-related water quality impacts. Construction activities could result in the accidental release of fuels or hazardous materials. Project construction activities could require dewatering that could result in the discharge of turbid waters into the local storm drain systems or nearby creeks.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. These measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit. *Member Agencies or their contractor shall comply with the provisions of the NPDES Construction Activity Stormwater permit, including preparation of Notice of Intent to comply with the provisions of this General Permit and preparation of a SWPPP. The SWPPP will identify implementation measures necessary to mitigate potential water quality degradation as a result of construction-related runoff. These measures will include BMPs and other standard pollution prevention actions, such as erosion and sediment control measures, proper control of non-stormwater discharges, and hazardous spill prevention and response. The SWPPP will also include requirements for BMP inspections, monitoring, and maintenance.*

The following items are examples of BMPs that would be implemented during construction to avoid causing water quality degradation:

1. *Erosion control BMPs, such as use of mulches or hydroseeding to prevent detachment of soil, following guidance presented in the California BMP Handbooks – Construction (CASQA 2003). A detailed site map will be included in the SWPPP outlining specific areas where soil disturbance may occur, and drainage patterns associated with excavation and grading activities. In addition,*

the SWPPP will provide plans and details for the BMPs to be implemented prior, during, and after construction to prevent erosion of exposed soils and to treat sediments before they are transported offsite.

2. *Sediment control BMPs such as silt fencing or detention basins that trap soil particles.*
3. *Construction staging areas designed so that stormwater runoff during construction will be collected and treated in a detention basin or other appropriate structure.*
4. *Management of hazardous materials and wastes to prevent spills and provide the means to contain any spills that might occur.*
5. *Groundwater treatment BMPs such that localized trench dewatering does not impact surface water quality.*
6. *Vehicle and equipment fueling BMPs such that these activities occur only in designated staging areas with appropriate spill controls.*
7. *Maintenance checks of equipment and vehicles to prevent spills or leaks of liquids of any kind.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of stormwater control measures and BMPs related to handling and storage of hazardous materials would minimize sedimentation and water quality impacts.

4. Biological Resources

a) Impact 3.6.1: Construction of the Proposed Project could result in impacts to jurisdictional wetlands and other waters of the United States, as well as impacts to waters of the State and riparian habitat.

Mitigation: Applicable to District, Novato Sanitary District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Marin Municipal Water District and Water Agency.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.6.1: *Implement the following measures to avoid, minimize and compensate for impacts to jurisdictional wetlands and other waters of the U.S. and State, and impacts to riparian habitat.*

Construction activities resulting in the introduction of fill or other disturbance to jurisdictional wetlands and other waters of the U.S. will require permit approval from the U.S. Army Corps of Engineers and water quality certification from the Regional Water Quality Control Board, pursuant to Section 401 of the Clean Water Act. Proposed facilities would most likely be authorized under Nationwide Permit #12 (Utility Lines) pursuant to Section 404 of the Clean Water Act. The CDFW has jurisdiction in the project area over riparian habitat, including stream bed and banks, pursuant to Sections 1600-1616 of the Fish and Game Code. Pipeline construction resulting in alteration to

channel bed or banks, extending to the outer dripline of trees forming the riparian corridor, is subject to CDFW jurisdiction. If work is proposed in these areas, project proponent will be required to obtain a Streambed Alteration Agreement (SAA) from the CDFW. Terms of these permits and SAA will likely include, but will not necessarily be limited to, the mitigation measures listed below.

1. *Specific locations of pipeline segments, storage reservoirs, and pump stations shall be configured, wherever feasible, to avoid and minimize direct and indirect impacts to wetlands and stream drainage channels. Consideration taken in finalizing configuration placement shall include:*

    a. *Reducing number and area of stream channel and wetland crossings where feasible. Crossings shall be oriented as close to perpendicular (90-degree angle) to the drainage or wetland as feasible.*
    b. *Placement of project components as distant as feasible from channels and wetlands.*
    c. *For pipeline construction activities in the vicinity of wetland and stream drainage areas, the construction work area boundaries shall have a minimum 20-foot setback from jurisdictional features1. Pipeline construction activities in proximity to jurisdictional features include: 1) entrance and exit pits for directional drilling and bore and jack operations; and 2) portions of pipeline segments listed as "parallel" to wetland/water features.*

2. *Sites identified as potential staging areas will be examined by a qualified biologist prior to construction. If potentially jurisdictional features are found that could be impacted by staging activities, the site will not be used.*
3. *Construction methods for channel crossing shall be designed to avoid and minimize direct and indirect impacts to channels to the greatest extent feasible. Use of trenchless methods including suspension of pipeline from existing bridges, directional drilling, and bore and jack tunneling will be used when feasible. Trenchless methods are required for all perennial drainage crossings (i.e., Lynch Creek). Construction occurring in the vicinity of riparian areas shall be delimited with a minimum 20-foot setback to avoid intrusion of construction activities into sensitive habitat.*

    The following additional measures shall apply to channel crossings in which the trenching construction method is used:

    a. *Limiting of construction activities in drainage channel crossings to low-flow periods: approximately April 15 to October 15.*
    b. *At in-road drainage crossings where drainages pass beneath the road in existing culverts, and where there is sufficient cover between the culvert and road surface, the new pipeline will be installed above the existing culvert without removing or disturbing it. If the pipeline must be installed below the existing culvert, then the culvert will be cut and temporarily removed to allow pipeline installation.*
    c. *At off-road drainage crossings, the construction corridor width will be minimized to the greatest extent feasible at the crossing and at least 20 additional feet to either side of the drainage at the crossing.*

[1] Setbacks of channels with associated riparian vegetation will be from the outer dripline edge of the riparian corridor canopies and/or the upper bank edge, or per City or County code, whichever is greater.

d. If disturbance of the existing culvert is required, sediment curtains upstream and downstream of the construction zone shall be placed to prevent sediment disturbed during trenching activities from being transported and deposited outside of the construction zone.

4. *Construction BMPs shall be implemented as discussed in **Mitigation Measure 3.5.1** in Section 3.5, Water Quality, to reduce risk of erosion and sediment transport into all construction areas in proximity of drainages.*
5. *For channels or wetlands for which soil removal is necessary (off-road crossings or wetlands to be trenched or otherwise directly disturbed), the top layer of the drainage or wetland bottom shall be stockpiled and preserved during construction. After the pipeline has been installed, the stockpiled material shall be placed back into the drainage or wetland feature to return the beds to approximately their original composition.*
6. *Project sites will be revegetated with an appropriate assemblage of native upland vegetation, and if necessary, riparian and wetland vegetation, suitable for the area. A plan describing pre-project conditions, restoration and monitoring success criteria will be prepared prior to construction.*
7. *To offset temporary and permanent impacts to wetlands and other waters of the U.S. and State, and impacts to riparian habitat, compensatory mitigation will be provided through on-site restoration to emulate pre-project conditions.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Potential impacts to riparian habitat during construction activities would be reduced by complying with the regulatory requirements and through measures such as avoiding stream crossings as feasible and setting setbacks from sensitive habitats.

b) Impact 3.6.2: Construction of NBWRP Phase 2 facilities could affect special-status aquatic species including central California coast steelhead, Chinook salmon, and California freshwater shrimp, or designated critical habitat for steelhead.

Mitigation: Applicable to District, Novato Sanitary District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Marin Municipal Water District and Water Agency.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

***Mitigation Measure 3.6.2:** Specific measures shall be implemented to protect aquatic habitats potentially inhabited by special-status fish and California freshwater shrimp.*

Sensitive fisheries and other aquatic resources shall be protected by minimizing in-stream and near-stream habitat impacts during project design, informally consulting with resource agencies (NMFS,

USFWS, CDFW, and USACOE), and implementing protective measures. For Lynch Creek, North Slough, and Arroyo Seco, special-status fish are presumed present. California freshwater shrimp are presumed present in Lynch Creek.

Because of the sensitivity of seasonal and ephemeral drainages, the following measures will be required to avoid and minimize impacts to aquatic habitat:

1. *Project designs shall be configured, whenever feasible, to avoid direct impacts to sensitive wetland areas and minimize disturbances to wetland and riparian corridors. Ground disturbance and construction footprints in these areas shall be minimized to the greatest degree feasible. Trenchless constructions methods will be employed wherever possible. In the event trenchless methods cannot be employed, the project proponent would obtain appropriate permit authorizations and implement construction methods per applicable Streambed Alteration Agreements.*
2. *All activities across waterways will be restricted to low-flow periods of June 15 through November 1. If the channel is dry, construction can occur as early as April 15 (in accordance with CDFW and RWQCB permit requirements). Restricting construction activities to this work window will minimize effects to California freshwater shrimp and steelhead;*
3. *Reclamation or appropriate agency shall ensure the appropriate permit authorizations are secured for stream crossings, and a qualified biological resource monitor shall be present at all times to alert construction crews to the possible presence of California freshwater shrimp during construction operations;*
4. *At least 15 days prior to onset of activities, Reclamation or appropriate agency shall submit the name(s) and credentials of biologists who would conduct activities authorized by the BO. No project activities shall begin until Reclamation has received written approval from the USFWS and CDFW that the biologist(s) is approved to conduct the work;*
5. *A Service-approved biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the California red-legged frog and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action;*
6. *If trenchless methods cannot be implemented due to geotechnical conditions, and the channel is not dry, water from around the section of trench that is within the actively flowing channels will be diverted. This will reduce the potential for sediment or other pollutants to enter the waterways and to affect downstream resources. Sediment curtains will be placed downstream of the construction zone to prevent disturbed sediment from being transported and deposited outside of the construction zone;*
7. *If ground water is encountered, or if water remains in the channel after flows are diverted, it will be pumped out of the construction area and into a retention basin constructed of hay bales lined with filter fabric. The pump(s) will be screened according to NMFS fish screening criteria for anadromous salmonids (NMFS, 1997);*
8. *Silt fencing will be installed in all areas where construction occurs within 100 feet of known or potential California freshwater shrimp or steelhead habitat;*
9. *A qualified biological monitor will be on site during all activities crossing waterways. The biological monitor will be authorized to halt construction if effects to California freshwater shrimp or salmonids are evident.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: The project would be designed to avoid sensitive wetland areas and measures such as educating the construction workers would minimize the impacts to special-status species.

c) Impact 3.6.3: Construction of the NBWRP Phase 2 has the potential to impact California red-legged frog and western pond turtles in upland and aquatic habitat.

Mitigation: Applicable to District, Novato Sanitary District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Marin Municipal Water District and Water Agency.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

***Mitigation Measure 3.6.3**: Implement protection measures to avoid and minimize impacts to western pond turtles and California red-legged frogs.*

1. *The implementation of measures identified for the protection of special-status fish and California freshwater shrimp would also protect California red-legged frogs and western pond turtles within aquatic habitat. When working within 200 feet of stream crossings, workers shall receive specific training in the identification, life history, local project area occurrence, and protection of western pond turtles and California red-legged frogs. Also, to minimize the likelihood of encountering turtles or frogs in upland areas near stream crossings, construction footprints shall be minimized to the greatest extent feasible. Based on reconnaissance-level surveys, if staging and construction activities occur principally within or immediately adjacent to project alignment roads, the project will be outside of frog and pond turtle habitat.*
2. *Trenchless methods will be employed at crossings presumed or known to support California red-legged frog. In the event trenchless methods cannot be employed, the project proponent would obtain appropriate permit authorizations and implement construction methods per applicable Streambed Alteration Agreements;*
3. *To the extent practicable, work activities within or adjacent to aquatic habitat that is potentially occupied by red-legged frogs will be completed between April 1 and October 31, which avoids the time period when California red-legged frogs are most likely to move through upland areas.*
4. *Prior to construction activities at stream crossings where aquatic impacts are expected, a qualified biologist shall perform California red-legged frog and western pond turtle surveys within suitable habitat within projected work areas. If California red-legged frogs or western pond turtles are encountered during construction activities, work in the immediate area shall cease until the area is determined to be free of sensitive species. If a pond turtle nest is located within a work area, a biologist with the appropriate permits may move the eggs to a suitable facility for incubation, and release hatchlings into the creek system in late fall. If California red-legged frog tadpoles or eggs are found, the biologist shall contact the USFWS to determine if moving any of these life-stages is appropriate.*

5. *At least 15 days prior to onset of activities, Reclamation or appropriate agency shall submit the name(s) and credentials of biologists who would conduct activities authorized by the BO. No project activities shall begin until Reclamation has received written approval from the USFWS that the biologist(s) is approved to conduct the work;*
6. *Reclamation or appropriate agency shall ensure the appropriate permit authorizations are secured for stream crossings, and a qualified biological resource monitor shall be present at all times to alert construction crews to the possible presence of California red-legged frog or western pond turtle during construction operations;*
7. *All trash that could attract predators will be regularly contained and removed from the work site.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such as conducting surveys for western pond turtles and California red-legged frogs prior to construction, informal USFWS consultation, avoiding aquatic habitat, and establishing working areas at a specified distance from the stream crossings would minimize the impact.

d) Impact 3.6.4: Construction of the NBWRP Phase 2 has the potential to affect special-status marsh birds, burrowing owl, and other nesting birds in and near the project sites.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.6.4: Impacts to Nesting Birds. *The appropriate Member Agency shall implement the following protection elements to avoid disturbing common and special-status nesting birds:*

1. *Whenever feasible, vegetation shall be removed during the non-breeding season (generally defined as September 1 to January 31).*
2. *For ground-disturbing activities occurring during the breeding season (generally defined as February 1 to August 31), a qualified wildlife biologist will conduct preconstruction surveys of all potential nesting habitat for birds within 500 feet of earthmoving activities. Construction activities will be constrained to the smallest area possible to minimize disturbance to potential nesting habitat.*
3. *For work in Ridgway's rail, California black rail, western snowy plover or western burrowing owl habitat, a Service-approved biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the bird species and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action.*
4. *All work areas, including staging areas will be surveyed prior to construction for bird nests during nesting season. If active bird nests are found during preconstruction surveys, a 500-foot no-*

disturbance buffer will be created around active raptor nests during the breeding season or until it is determined that all young have fledged. A 250-foot buffer zone will be created around the nests of other special-status birds. For non-special status migratory birds, buffer size will be determined in consultation with CDFW. Buffer zones may be modified in coordination with CDFW based on existing conditions at work locations.

If preconstruction surveys indicate that nests are inactive or potential habitat is unoccupied during the construction period, no further mitigation is required. Trees and shrubs that have been determined to be unoccupied by special-status birds or that are located at least 500 feet from active nests may be removed.

1. *For work in locations that provide habitat for listed marsh birds including Ridgway's rail, and special-status birds such as burrowing owl and black rail, protocol-level surveys will be conducted to determine species presence or absence.*
2. *If occupied burrowing owl burrows are discovered, construction exclusion areas would be established around the occupied burrows in which no disturbance would be allowed to occur. During the non-breeding season (September 1 through January 31), the exclusion zone would extend 160 feet around occupied burrows. During the breeding season (February 1 through August 31), exclusion areas would extend 250 feet around occupied burrows. Passive relocation of owls is not proposed. A qualified biologist will monitor owl activity on the site to ensure the species is not adversely affected by the project.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Act Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such as conducting surveys for threatened and endangered marsh birds, burrowing owl, and nesting birds prior to construction and restricting construction activities to non-breeding season would minimize the impact.

e) Impact 3.6.5: Construction of the NBWRP Phase 2 has the potential to affect special-status mammals, including salt marsh harvest mouse, and roosting or breeding bats in and near the project alignments.

Mitigation: Applicable to District, Water Agency, Novato Sanitary District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Marin Municipal Water District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.6.5: Impacts to Mammals.

1. *The appropriate Member Agency shall implement protection measures to avoid and minimize impacts on salt marsh harvest mouse during construction. Where avoidance of sensitive habitat (i.e., areas in or near pickleweed) is not feasible (e.g., by bridging or bore and jack), consultation with the USFWS would be initiated. If salt marsh harvest mouse is present or presumed to be present in the project area following informal coordination with USFWS, then formal consultation and a Biological Assessment in support of a Biological Opinion may be needed. Such a consultation would proceed as part of the Corps 404 permitting process. Similar coordination and permitting shall be performed with CDFW to address potential impacts to salt marsh harvest mouse. Staging areas shall be located outside potential salt marsh harvest mouse habitat.*
2. *To avoid potential impacts on salt marsh harvest mouse and Suisun ornate shrew, a qualified biologist shall conduct specific preconstruction surveys to delineate potential habitat in the project area. For areas within 100 feet of potential habitat, the project proponent shall install exclusionary fences to prevent species movement into the project area, and to prevent spoils from entering the salt marsh. Fencing will consist of a material that does not allow small mammals to pass through or over, and the bottom will be buried to a depth of at least six inches.*
3. *A qualified biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the species and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action.*
4. *Once a Biological Opinion is issued for the work, a qualified biologist will direct crews in the hand removal of pickleweed and remain on-site to provide biological monitoring during construction. The biological monitor shall inspect the exclusion fence to ensure their integrity, and shall conduct an education workshop for contractors outlining species' biology, legislative protection, and construction restrictions to reduce potential impacts. Protective measures for the salt marsh harvest mouse will equally protect the Suisun ornate shrew.*
5. *At the close of each workday, escape ramps/boards will be provided in all open trenches. Every morning prior to the start of construction, a qualified biologist will inspect all open trenches within 250 feet of emergent pickleweed (Salicornia pacifica) habitat for trapped mice. In the event a salt marsh harvest mouse or Suisun ornate shrew is found on-site, with approval from the Service, the biologist will remove animals from trenches before the start of construction.*
6. *A Service-approved biologist will be onsite during all ground-disturbing activities, including vegetation removal and during morning trench inspections, and otherwise available during the course of the construction work. The biologist will be responsible for informing the crews of the need to halt work if sensitive species are observed, and documenting compliance with the conservation measures and contacting the USFWS if any sensitive species are observed.*
7. *The appropriate Member Agency shall implement protection measures to avoid and minimize impacts on special-status bats in and near project facilities during construction.*
8. *In conjunction with breeding bird surveys (Mitigation Measure 3.6.4), a qualified biologist will conduct preconstruction surveys for special-status bats at each bridge crossing location and in rural (i.e., non-road) areas where any large trees (e.g., > 24-inch diameter at breast height) will be removed. If an active roost is observed, a suitably-sized buffer (e.g., 100 to 150 feet) will be placed around the roost if it appears that trenching or other project activities may cause abandonment. Demolition activities must cease until juvenile bats are self-sufficient and will not be directly or indirectly impacted by activities.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have

been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such as conducting surveys for salt harvest mouse, Suisun ornate shrew and special-status bats prior to construction, avoiding or maintaining a suitable buffer from an active roost, and restricting construction activities to non-breeding season would minimize the impact.

f) Impact 3.6.6: Project construction could result in impacts to listed and other special-status plants.

Mitigation: Applicable to District, Water Agency, Novato Sanitary District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Marin Municipal Water District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.6.6: Impacts to Rare Plants. *Before the initiation of any vegetation removal or ground-disturbing activities in areas that provide suitable habitat for special-status plants, the following measures shall be implemented:*

1. *A qualified botanist will conduct appropriately-timed surveys for special-status plant species, including those identified in Appendix 3.6C, in all suitable habitat that would be potentially disturbed by the project, including staging areas.*
2. *Surveys shall be conducted following the most recent CDFW- or other approved protocol.*
3. *If no special-status plants are found during focused surveys, the botanist shall document the findings in a letter to the appropriate agencies and no further mitigation will be required.*
4. *If special-status plants are found during focused surveys, the following measures shall be implemented:*

    a. *Information regarding the special-status plant population shall be reported to the CNDDB.*
    b. *If the populations can be avoided during project implementation, they shall be clearly marked in the field by a qualified botanist and avoided during construction activities. Before ground clearing or ground disturbance, all on-site construction personnel shall be instructed as to the species' presence and the importance of avoiding impacts to this species and its habitat.*
    c. *If special-status plant populations cannot be avoided, consultations with CDFW and/or USFWS would be required. A plan to compensate for the loss of special-status plant species could be required, detailing appropriate replacement ratios, methods for implementation, success criteria, monitoring and reporting protocols, and contingency measures that would be implemented if the initial mitigation fails; the plan would be developed in consultation with the appropriate agencies prior to the start of local construction activities.*
    d. *If mitigation is required, the project proponent shall maintain and monitor the mitigation area for 5 years following the completion of construction and restoration activities. Monitoring reports shall be submitted to the resource agencies at the completion of restoration and for 5 years following the completion of construction and restoration activities. Monitoring reports shall be submitted to the resource agencies at the completion*

of restoration and for 5 years following restoration implementation. Monitoring reports shall include photo-documentation, planting specifications, a site layout map, descriptions of materials used, and justification for any deviations from the mitigation plan.

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such as conducting surveys of vegetation and consultation with United States Fish and Wildlife Service and California Department of Fish and Wildlife as required, would minimize the impact.

g) Impact 3.6.7: The proposed project could affect heritage and other significant trees.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.6.7: *The following measures will be implemented to avoid or reduce impacts to heritage or other significant trees:*

1. *If trees are identified for removal or trimming, a certified arborist will inventory these trees, with the results of the inventory providing species, size (diameter at breast height), and number of protected trees. Also, in consultation with the appropriate jurisdiction, the arborist will determine if any are heritage or landmark trees.*
2. *If any protected trees are identified that will be potentially removed or damaged by construction of the proposed project, design changes will be implemented where feasible to avoid the impact.*
3. *Any protected trees that are removed will be replaced per applicable City and County tree protection ordinances (see Appendix 3.6A). Foliage protectors (cages and tree shelters) will be installed to protect the planted trees from wildlife browse. The planted trees will be monitored as required by the ordinance, or regularly during a minimum two-year establishment period and maintenance during the plant establishment period will include irrigation. After the establishment period, the native tree plantings are typically capable of survival and growth without supplemental irrigation.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such as avoiding protected trees and replacing any removing trees as per the local tree protection ordinances would minimize the impact to heritage and significant trees.

5. Traffic and Transportation

a) Impact 3.8.1: Construction of NBWRP Phase 2 would have temporary and intermittent effects on traffic and transportation conditions in the project area.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.8.1a: *The appropriate Member Agency for each NBWRP Phase 2 element shall obtain and comply with local and Caltrans road encroachment permits for roads that are affected by construction activities.*

The Work Area Protection and Traffic Control Manual includes requirements to ensure safe maintenance of traffic flow through or around the construction work zone, and safe access of police, fire, and other rescue vehicles (CJUTCC, 2014). In addition, the Traffic Management Plan (subject to local jurisdiction review and approval, or Caltrans for State roadways) required by ***Mitigation Measure 3.8.1b****, below, would direct how traffic flow is safely maintained during project construction.*

Mitigation Measure 3.8.1b: *The construction contractor for each NBWRP Phase 2 element shall prepare and implement a Traffic Control/Traffic Management Plan subject to approval by the appropriate local jurisdiction prior to construction. The plan – prepared in accordance with the California Manual on Uniform Traffic Control Devices – shall be subject to approval by Caltrans for work occulting in Caltrans facilities. The plan shall:*

1. *Identify hours of construction (between 7:00 AM and 7:00 PM; no construction shall be permitted between 10:00 PM and 7:00 AM unless stipulated in coordination with responsible jurisdiction on a case-by-case basis);*
2. *Identify hours for deliveries;*
3. *Include a discussion of haul routes, limits on the length of open trench, work area delineation, traffic control and flagging;*
4. *Identify all access and parking restriction, pavement markings and signage requirements (e.g., speed limit, temporary loading zones);*
5. *Layout a plan for notifications and a process for communication with affected residents and businesses prior to the start of construction. Advance public notification shall include posting of notices and appropriate signage of construction activities. The written notification shall include the construction schedule, the exact location and duration of activities within each street (i.e., which lanes and access point/driveways would be blocked on which days and for how long), and a toll-free telephone number for receiving questions or complaints;*
6. *Include a plan to coordinate all construction activities with emergency service providers in the area at least one month in advance. Emergency service providers shall be notified of the timing,*

location, and duration of construction activities. All roads shall remain passable to emergency service vehicles at all times;

7. *Include a plan to coordinate all construction activities with the appropriate local school district at least two months in advance. The school district shall be notified of the timing, location, and duration of construction activities. Coordinate with the appropriate local school district to identify peak circulation periods at schools along the alignment(s) (i.e., the arrival and departure of students), and require their contractor to avoid construction and lane closures during those periods. The construction contractor for each project component shall be required to maintain vehicle, pedestrian, and school bus service during construction through inclusion of such provisions in the construction contract. The assignment of temporary crossing guards at designated intersections may be needed to enhance pedestrian safety during project construction;*
8. *Include the requirement that all open trenches be covered with metal plates at the end of each workday to accommodate traffic and access; and*
9. *Specify the street restoration requirements pursuant to agreements with the local jurisdictions.*

Mitigation Measure 3.8.1c: *The appropriate Member Agency for each NBWRA Phase 2 element shall identify all roadway locations where special construction techniques (e.g., horizontal boring, directional drilling or night construction) will be used to minimize impacts to traffic flow.*

Mitigation Measure 3.8.1d: *The appropriate Member Agency for each NBWRA Phase 2 element shall develop circulation and detour plans to minimize impact to local street circulation. This may include the use of signing and flagging to guide vehicles through and/or around the construction zone.*

Mitigation Measure 3.8.1e: *The appropriate Member Agency for each NBWRA Phase 2 element shall encourage construction crews to park at staging areas to limit lane closures in the public right-of-way.*

Mitigation Measure 3.8.1f: *The appropriate Member Agency for each NBWRA Phase 2 element shall consult with the appropriate public transit service providers at least one month prior to construction to coordinate bus stop relocations (as necessary) and to reduce potential interruption of transit service.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Traffic mitigating measures such as preparing an implementing a traffic control and management plan and complying with the local road encroachment permits would minimize impacts from congestion during project construction.

b) Impact 3.8.2: Construction of NBWRP Phase 2 would temporarily disrupt circulation patterns near sensitive land uses (schools, hospitals, fire stations, police stations, and other emergency providers).

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.8.2a: *Pipeline construction near schools shall occur when school is not in session (i.e., summer or holiday breaks). If this is not feasible, a minimum of two months prior to project construction, the appropriate Member Agency for each NBWRA Phase 2 element shall coordinate with the appropriate local school district to identify peak circulation periods at schools along the alignment(s) (i.e., the arrival and departure of students), and require their contractor to avoid construction and lane closures during those periods.*

Mitigation Measure 3.8.2b: *A minimum of two months prior to project construction, the appropriate Member Agency for each NBWRP Phase 2 element shall coordinate with the appropriate local school district to identify alternatives to their Safe Routes to School program, alternatives for the school busing routes and stop locations, and other circulation provisions, as part of the Traffic Control/Traffic Management Plan (see* ***Mitigation Measure 3.8.1a****).*

Mitigation Measure 3.8.2c: *Implement Mitigation Measure 3.8.1b.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Coordination with local school districts and identifying alternative traffic routes would minimize the impacts from temporary disruption to access to sensitive land uses.

c) Impact 3.8.3: Construction of NBWRP Phase 2 would have temporary effects on alternative transportation or alternative transportation facilities.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.8.3: *Implement Mitigation Measure 3.8.1f.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have

been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Consulting with the appropriate public transit service providers prior to construction would minimize effects on access to alternative transportation facilities.

d) Impact 3.8.4: Construction of NBWRP Phase 2 would temporarily increase the potential for accidents on project roadways.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.8.4: *Implement Mitigation Measures 3.8.1b through 3.8.1f.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures noted above to reduce traffic congestion and delays from increased traffic from project construction would minimize any related traffic hazards.

e) Impact 3.8.5: Construction of the NBWRP Phase 2 would increase wear and tear on the designated haul routes used by construction vehicles to access the project work sites.

Mitigation: Applicable to all Member Agencies

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.8.5: *Roads damaged by construction shall be repaired to a structural condition equal to that which existed prior to construction activity as per conditions of the encroachment permit (see* ***Mitigation Measure 3.8.1a****).*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: The roads used for construction would be restored to pre-existing condition, therefore the traffic from project construction would not cause significant road wear.

6. Air Quality

a) Impact 3.9.1: Construction of the NBWRP Phase 2 projects would result in criteria pollutant emissions that could exceed air quality standards or contribute substantially to an existing or projected air quality violation.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.9.1-1a: BAAQMD Basic Construction Measures. *To limit dust, criteria pollutants, and precursor emissions associated with construction, the following BAAQMD-recommended Basic Construction Measures shall be implemented and included in all contract specifications for projects constructed under the Phase 2 Program:*

1. *All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.*
2. *All haul trucks transporting soil, sand, or other loose material off-site shall be covered.*
3. *All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.*
4. *All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).*
5. *All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.*
6. *Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.*
7. *All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.*
8. *Post a publicly visible sign with the telephone number and persons to contact at the North Bay Water Reuse Authority and/or the applicable member agency regarding dust complaints. These persons shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.*

Mitigation Measure 3.9.1-1b: Additional Construction Mitigation Measures. *The North Bay Water Reuse Authority and/or applicable member agency shall implement all feasible measures from the BAAQMD's Additional Construction Mitigation Measures listed below:*

1. *All exposed surfaces shall be watered at a frequency adequate to maintain minimum soil moisture of 12 percent. Moisture content can be verified by lab samples or moisture probe.*
2. *All excavation, grading, and/or demolition activities shall be suspended when average wind speeds exceed 20 mph.*
3. *Wind breaks (e.g., trees, fences) shall be installed on the windward side(s) of actively disturbed areas of construction. Wind breaks should have at maximum 50 percent air porosity.*
4. *Vegetative ground cover (e.g., fast-germinating native grass seed) shall be planted in disturbed areas as soon as possible and watered appropriately until vegetation is established.*
5. *The simultaneous occurrence of excavation, grading, and ground-disturbing construction activities on the same area at any one time shall be limited. Activities shall be phased to reduce the amount of disturbed surfaces at any one time.*
6. *All trucks and equipment, including their tires, shall be washed off prior to leaving the site.*
7. *Site accesses to a distance of 100 feet from the paved road shall be treated with a 6 to 12-inch compacted layer of wood chips, mulch, or gravel.*
8. *Sandbags or other erosion control measures shall be installed to prevent silt runoff to public roadways from sites with a slope greater than one percent.*
9. *Minimize the idling time of diesel powered construction equipment to 2 minutes.*
10. *The off-road diesel-powered equipment (more than 50 horsepower) to be used in the construction of any project (i.e., owned, leased, and subcontractor vehicles) under the Phase 2 Program shall be equipped with engines that achieve USEPA Tier 4 emissions standards.*
11. *Use low volatile organic compound (i.e., ROG) coatings beyond the local requirements (i.e., Regulation 8, Rule 3: Architectural Coatings).*
12. *Require that all construction equipment, diesel trucks, and generators be equipped with Best Available Control Technology for emission reductions of NOx and PM10.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of Bay Area Air Quality Management District-recommended Basic Construction Measures and Additional Construction Mitigation Measures would minimize emissions of criteria air pollutants during construction.

b) Impact 3.9.3: Construction of the NBWRP Phase 2 projects would result in emissions that could conflict with the 2017 Clean Air Plan.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.9.1-1a: BAAQMD Basic Construction Measures *and* ***Mitigation Measure 3.9.1-1b: Additional Construction.*** *Refer to Impact 3.9.1 in Air Quality.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of Bay Area Air Quality Management District-recommended Basic Construction Measures and Additional Construction Mitigation Measures would minimize emissions that could conflict with the 2017 Clean Air Plan.

c) Impact 3.9.4: Construction of the NBWRP Phase 2 could expose sensitive receptors to toxic air contaminants, including diesel particulate matter emissions.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure: *Implement* ***Mitigation Measure 3.9.1-1b: Additional Construction.*** *Refer to Impact 3.9.1 in Air Quality.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of Bay Area Air Quality Management District-recommended Additional Construction Mitigation Measures would minimize sensitive receptors exposure to toxic air contaminants, including diesel particulate emissions.

7. Noise

a) Impact 3.11.2: Construction activity would violate standards established in the local general plans or noise ordinances, and/or would adversely affect nearby sensitive receptors.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.11.2-2a: Construction Time-of-Day Restriction. *All NBWRP Phase 2 project construction activities shall be limited to the acceptable hours identified within the applicable*

jurisdiction policies and/or municipal codes unless granted a special exemption by the applicable jurisdiction.

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Construction noise levels would be limited to hours set forth in jurisdiction policies and/or municipal which would minimize potential to violate standards established in the local general plans or noise ordinances. Construction would be short-term and temporary; therefore, sensitive receptors would only be exposed to increased noise levels for a short duration.

8. Hazards and Hazardous Materials

a) Impact 3.12.5: Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan during construction.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measures 3.8.1b through 3.8.1f. *Refer to Impact 3.8.1 in Transportation and Traffic.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Traffic mitigating measures such as preparing an implementing a traffic control and management plan and complying with the local road encroachment permits would minimize impacts related to interfering with an adopted emergency response plan or emergency evacuation plan.

9. Public Services and Utilities

a) Impact 3.13.1: Project construction activities could temporarily affect response times for emergency service providers.

Mitigation: Applicable to District, Marin Municipal Water District, City of Petaluma, and City of American Canyon; not applicable to Novato Sanitary District, Water Agency, and Napa Sanitation District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.13.1: *The Member Agencies or Participating Municipalities will coordinate with local emergency service providers in its service area to inform them of the proposed construction activities and schedule, and provide temporary alternate access routes around construction areas as necessary.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Coordinating with local emergency service providers would reduce any effects on the response times for emergency response during project construction.

b) Impact 3.13.2: Project construction activities could require short-term police and fire protection services to assist in traffic management or in the event of an accident.

Mitigation: Applicable to District, Water Agency, Marin Municipal Water District, Novato Sanitary District, City of Petaluma, and City of American Canyon; not applicable to Napa Sanitation District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.13.2: *The Member Agency (i.e., project owner) or it construction contractor shall provide 72-hour notice to the local emergency service providers prior to construction of individual pipeline segments. The Member Agency or its construction contractor shall provide, upon request, a copy of the Traffic Control/Traffic Management Plan to the emergency service agencies for review prior to construction. Discussion on the Traffic Control/Traffic Management Plan is provided in Section 3.8, Transportation and Traffic.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: As noted in the traffic control plan and mitigation measures above, pre-construction notice to the local service providers would reduce any impacts related to police and fire assistance during project construction.

c) Impact 3.13.3: Project construction could result in temporary, planned, or accidental disruption to utility services.

Mitigation: Applicable to District, Water Agency, Marin Municipal Water District, Novato Sanitary District, City of Petaluma, and City of American Canyon; not applicable to Napa Sanitation District.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. This measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.13.3: *The Member Agencies (i.e., project owner) or its construction contractor shall identify utilities along the proposed pipeline routes and project sites prior to construction and implement the following measures:*

a. *Utility excavation or encroachment permits shall be obtained as required from the appropriate agencies. These permits include measures to minimize utility disruption. The service provider and its contractors shall comply with permit conditions regarding utility disruption.*
b. *Utility locations shall be verified through the use of the Underground Service Alert services and/or field survey.*
c. *As necessary, detailed specifications shall be prepared as part of the design plans to include procedures for the excavation, support, and fill of areas around utility cables and pipes. All affected utility services shall be notified of construction plans and schedule. Arrangements shall be made with these entities regarding protection, relocation, or temporary disconnection of services.*
d. *In areas where the pipeline would traverse parallel to underground utility lines within five feet, the project applicant shall employ special construction techniques, such as trench wall-support measures to guard against trench wall failure and possible resulting loss of structural support for the excavated areas.*
e. *Residents and businesses in the project corridor shall be notified of any planned utility service disruption two to four days in advance, in conformance with county and state standards.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Identifying utilities along the proposed pipeline routes and project sites prior to construction and executing measures to notify and coordinate with the affected utility services would minimize accidental disruption of utility services.

10. Cultural Resources and Tribal Cultural Resources

a) Impact 3.14.1 Impacts or Adverse Effects to Archaeological Resources, Human Remain, and Tribal Cultural Resources

This impact discussion focuses on archaeological resources, human remains, and tribal cultural resources that are considered historical resources or unique archaeological resources (for the purposes of CEQA), or historic properties (for the purposes of the National Historic Preservation Act).

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.14.1a: Inadvertent Discoveries. *If prehistoric or historic-era archaeological resources are encountered, the contractor shall immediately cease all work within 100 feet of the discovery. Prehistoric archaeological materials might include obsidian and chert flaked-stone tools (e.g., projectile points, knives, scrapers) or toolmaking debris; culturally darkened soil ("midden") containing heat-affected rocks, artifacts, or shellfish remains; and stone milling equipment (e.g., mortars, pestles, handstones, or milling slabs); and battered stone tools, such as hammerstones and pitted stones. Historic-era materials might include stone, concrete, or adobe footings and walls; filled wells or privies; and deposits of metal, glass, and/or ceramic refuse. After cessation of excavation, the contractor shall immediately contact the NBWRA and the appropriate Member Agency. The contractor shall not resume work until authorization is received from the appropriate Member Agency:*

1. *In the event of unanticipated discovery of archaeological resources during construction, the Member Agency shall retain the services of a qualified professional archaeologist (defined as an archaeologist that meets the Secretary of the Interior's Standards) to evaluate the significance of the find prior to resuming any activities.*
2. *If it is determined that the Project could damage a historical resource or a unique archaeological resource (pursuant to CEQA) or a historic property (pursuant to NHPA), mitigation shall be implemented with a preference for preservation in place. This may be accomplished through planning construction to avoid the resource; incorporating the resource within open space; capping and covering the resource; or deeding the site into a permanent conservation easement. If the site cannot be avoided, a qualified professional archaeologist shall prepare and implement a detailed research design and treatment plan in consultation with the Member Agency and the affiliated Native American tribe(s), as appropriate. Treatment for most resources would consist of (but would not be not limited to) sample excavation, artifact collection, site documentation, and historical research, with the aim to target the recovery of important scientific data contained in the portion(s) of the significant resource to be impacted by the Project. The treatment plan shall include provisions for analysis of data in a regional context, reporting of results within a timely manner, curation of artifacts and data at an approved facility, and dissemination of reports to local and state repositories, libraries, and interested professionals.*

Mitigation Measure 3.14.1b: Discovery of Human Remains. *If potential human remains are encountered, the appropriate Member Agency shall halt work in the vicinity of the find and contact the county coroner in accordance with PRC Section 5097.98 and Health and Safety Code Section 7050.5. If the coroner determines the remains are Native American, the coroner shall contact the*

Native American Heritage Commission. As provided in PRC Section 5097.98, the Commission shall identify the person or persons believed to be most likely descended from the deceased Native American. The most likely descendent makes recommendations for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in PRC Section 5097.98.

Mitigation Measure 3.14.1c: Cultural Resources Assessment for Staging Areas. *When locations for staging are defined, the staging areas should be subject to a cultural resources investigation completed by a qualified professional archaeologist that includes, at a minimum:*

1. *An updated records search at the NWIC;*
2. *An intensive survey of the staging areas;*
3. *A report disseminating the results of this research;*
4. *Recommendations to avoid impacts to identified resources that qualify as historical resources, unique archaeological resources, tribal cultural resources, or historic properties; and*
5. *If resources cannot be avoided, provide recommendations for additional cultural resources work necessary to mitigate any adverse impacts to recorded and/or undiscovered cultural resources.*

Mitigation Measure 3.14.1d: Cultural Resources Monitoring. *Prior to authorization to proceed, or issuance of permits, the appropriate Member Agency shall prepare a cultural resources monitoring plan. Monitoring shall be required for all surface alteration and subsurface excavation work including trenching, boring, grading, use of staging areas and access roads, and driving vehicles and equipment within all areas delineated as sensitive for cultural resources. A qualified professional archaeologist shall prepare the plan. The plan shall address (but not be limited to) the following issues:*

1. *Clear delineation and fencing of sensitive cultural resource areas requiring monitoring;*
2. *Training program for all construction and field workers involved in site disturbance;*
3. *Person(s) responsible for conducting monitoring activities, including Native American monitors, if necessary;*
4. *Person(s) responsible for overseeing and directing the monitors;*
5. *Schedule for submittal of monitoring reports and person(s) responsible for review and approval of monitoring reports;*
6. *Procedures and construction methods to avoid sensitive cultural resource areas;*
7. *Physical monitoring boundaries;*
8. *Protocol for notifications in case of encountering of cultural resources, as well as methods of dealing with the encountered resources (e.g., collection, identification, curation);*
9. *Methods to ensure security of cultural resources sites;*
10. *Protocol for notifying local authorities (i.e. Sheriff, Police) should site looting and other illegal activities occur during construction.*

If an intact archaeological deposit is encountered, all soil-disturbing activities within 100 feet of the find shall cease until the deposit is evaluated. The archaeological monitor shall immediately notify the appropriate Member Agency of the encountered archaeological resource. The protocol outlined in ***Mitigation Measure 3.14.1a*** *and* ***Mitigation Measure 3.14.1b*** *would be implemented.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Measures such Section 106 consultation and monitoring of cultural resources, archaeological and Native American sites, and cultural resource assessment would minimize impacts to the sites. In the inadvertent discovery of human remains, work would be halted and the mitigation would include notifying the Native American Heritage Commission and the most likely descendants would recommend the means of treating and disposing the remains.

11. Recreation

a) Impact 3.15.1: Project construction could result in short-term disturbance adjacent to recreational facilities.

Mitigation: Applicable to District, City of Petaluma, and City of American Canyon; not applicable to Marin Municipal Water District, Novato Sanitary District, Water Agency, and Napa Sanitation District.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. These measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.15.1: *The appropriate Member Agency shall coordinate with the appropriate local and regional agencies to identify detour routes for the bikeways and trails during construction where feasible, as part of the Traffic Control/Traffic Management Plan (see **Measure 3.8.1**). In addition, the Member Agency shall conduct outreach to notify the public of closures, detours, etc.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/District.

Rationale: Coordination with the local agencies and consulting local park management agency prior to construction would minimize any disturbance to recreational facilities.

12. Aesthetics

a) Impact 3.16.2: Implementation of NBWRP could affect views along eligible or designated Caltrans Scenic Highways or locally-defined scenic routes.

Mitigation: Applicable to District, Novato Sanitary District, City of Petaluma, and City of American Canyon; not applicable to Marin Municipal Water District, Water Agency, and Napa Sanitation District.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.16.2a: *Following construction activities, disturbed areas shall be restored to baseline conditions, by repaving roadways, replanting trees, and/or reseeding with a native seed mix typical of the immediately surrounding area.*

Mitigation Measure 3.16.2b: *Berms around constructed reservoirs shall be vegetated with native seed mixes to soften the visual effect of the reservoirs from adjacent roadways.*

Mitigation Measure 3.16.2c: *Design elements shall be incorporated to enhance visual integration of the pump stations and other above ground structures with their surroundings. Proposed facilities shall be painted low-glare earth-tone colors that blend with the surrounding terrain. Highly reflective building materials and/or finishes shall not be used in the designs for proposed facilities.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of the measures above would lessen the impacts to views along scenic roadways.

b) Impact 3.16.4: Development of the proposed facilities, particularly pump stations and storage reservoirs, would permanently alter the aesthetic character of the project area.

Mitigation: Applicable to District, Marin Municipal Water District, City of Petaluma, City of American Canyon, and Napa Sanitation District; not applicable to Novato Sanitary District and Water Agency.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.16.4a: *Following construction activities, disturbed areas shall be restored to baseline conditions, by repaving roadways, replanting trees, and/or reseeding with a native seed mix typical of the immediately surrounding area.*

Mitigation Measure 3.16.4b: *Design elements shall be incorporated to enhance visual integration of the pump stations or other project-related above ground structures with their surroundings. Proposed facilities shall be painted low-glare earth-tone colors that blend with the surrounding terrain. Highly reflective building materials and/or finishes shall not be used in the designs for proposed facilities.*

Mitigation Measure 3.16.4c: *After construction of any facility that is above grade and visible to sensitive receptors, visual screening and vegetation measures will be implemented to reduce impacts to scenic views. Trees or other suitable vegetation along the fenceline of the facility should be incorporated to reduce the industrial appearance of the structures. Similarly, berms for new storage ponds or pond reconfiguration will be re-vegetated to reduce the barren appearance of the berms.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Designing the project elements to provide visual screening or using non-reflecting building materials would not have a significant effect to the existing aesthetic character.

13. Energy Conservation

a) Impact 3.17.1: Use large amounts of fuel and energy in an unnecessary, wasteful, or inefficient manner during construction and decommissioning.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measures will mitigate the above impact to a less-than-significant level.

Mitigation Measure 3.9.1-1a: BAAQMD Basic Construction Measures *and* ***Mitigation Measure 3.9.1-1b: Additional Construction.*** *Refer to Impact 3.9.1 in Air Quality.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Implementation of Bay Area Air Quality Management District-recommended Basic Construction Measures and Additional Construction Mitigation Measures would minimize wasteful use of fuel and energy.

14. Cumulative Impacts

a) Impacts 4.1: Concurrent construction of several projects within the Sonoma, Napa, and Marin County areas could result in cumulative short-term impacts associated with construction activities. If implemented at the same time as other construction projects, construction of facilities could

contribute to potential short-term cumulative effects associated with erosion, cultural resource disturbance, disturbance of adjacent land uses, traffic disruption, dust generation, construction noise, aesthetics, air quality, biological resources, hazardous materials, water quality, public services and utilities. However, construction-related impacts would not result in long term alteration of the environment, and could be mitigated to less than significant levels through the use of mitigation measures identified throughout Chapter 3 of the Draft Report/Statement.

Mitigation: Applicable to all Member Agencies.

The following mitigation measure is hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A. The measure will mitigate the above impact to a less-than-significant level.

Mitigation Measure 4.1: *The Member Agencies shall coordinate construction activities along selected alignments to identify overlapping pipeline routes, project areas, and construction schedules. To the extent feasible, construction activities shall be coordinated to consolidate the occurrence of short-term construction-related impacts.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Due to their short-term nature and the inclusion of appropriate mitigation measures as established in Chapter 3 of the Draft Report/Statement, the Phase 2 Program's contribution to cumulative impacts on wastewater treatment capacity is not considerable.

b) Impact 4.5: Concurrent construction of NBWRP Phase 2 with other projects proposed in the Sonoma, Napa, and Marin County area, and other water and wastewater infrastructure projects, could result in cumulative long-term impacts to biological resources.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A.

Mitigation Measure: *Implement Mitigation Measures 3.6.1 through 3.6.7 in Biological Resources.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Mitigation measures for protection of the biological resources would minimize project impacts and its contribution to cumulative impacts to less than cumulatively considerable.

c) Impact 4.7: Concurrent operation of NBWRP Phase 2 with other projects could result in a cumulatively considerable net increase in GHG emissions or criteria pollutants for which the region is in non-attainment under applicable standards.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A.

Mitigation Measure: *Implement Mitigation Measures 3.9.1-1a and 3.9.1-1b, 3.9.3, and 3.9.4 in Air Quality.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Mitigation measures for greenhouse gas emissions would minimize project impacts and its contribution to cumulative impacts to less than cumulatively considerable.

d) Impact 4.8: Concurrent operation of NBWRP Phase 2 with other projects proposed in the Sonoma, Napa, and Marin County area and other water and wastewater infrastructure projects could result in cumulative long-term impacts to cultural resources.

Mitigation: Applicable to all Member Agencies.

The following mitigation measures are hereby adopted and will be implemented as set forth in the Mitigation and Monitoring Reporting Plan in Exhibit A.

Mitigation Measure: *Implement Measures 3.14.1a through 3.14.1e in Cultural Resources and Tribal Cultural Resources.*

Findings: Based on the Final Report/Statement and the entire record before the District, the Board finds, in accordance with CEQA Guidelines Section 15901(a)(1), that changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final Report/Statement.

Rationale: Mitigation measures for protection of the cultural and historic resources would minimize project impacts and its contribution to cumulative impacts to less than cumulatively considerable.

4. Unavoidable Adverse Environmental Impacts

4.01. The Draft Report/Statement Chapters 3 and 5 disclosed other significant or potentially significant environmental impacts that may not, or cannot, be avoided if the project identified in the Final Report/Statement is approved. The Board finds that specific economic, legal, social, technological, or other considerations make infeasible full mitigation of those impacts and make project alternatives infeasible, or that changes are the responsibility of another agency and should be adopted by such agency and not the District.

4.02. The Draft Report/Statement described that direct significant impacts attributable to the Phase 2 Program can either be avoided through project design or if unavoidable, can be reduced to a less-than-significant level through mitigation measures identified in the Draft Report/Statement. Indirect, or secondary, impacts related to growth under the adopted General Plans within the District's Project area may remain significant and unavoidable for specific issue areas. Impacts related to adverse effects to archaeological resources, human remains, and tribal cultural resources remain significant and unavoidable only for the Napa Sanitation District Soscol Water Recycling Facility Covered Storage project.

A. Significant and Unavoidable Impacts

1. Growth

a) Impact 5.1: The NBWRP Phase 2 would provide recycled water for urban, agricultural, and environmental uses, and as such, would contribute to the provision of adequate water supply to support a level of growth that is consistent with the amount planned and approved within the General Plans of Marin, Sonoma and Napa counties. No appreciable growth effects in population or employment would occur as a direct result of construction or operation of the proposed facilities. However, development under the General Plans accommodated by the proposed project could result in secondary environmental effects, which include effects that could be significant and unavoidable.

No additional mitigation measures are required, as described in the findings and rationale below. The Draft Report/Statement Chapter 5 describes that the City of Sonoma General Plan EIR and the Sonoma County General Plan EIR have established mitigation programs for these impacts; however, these impacts have been identified as remaining significant and unavoidable after mitigation by the individual General Plan EIRs.

Findings: Based on the Final Report/Statement and the entire record before the District Board, including the County and City environmental documents referenced in the Draft Report/Statement, the Board finds that the provision of recycled water within its service area under the Phase 2 Program, including the District's Project, while consistent with water supply planning within the service area, would enable growth under the approved General Plans within each service area to occur, and as such, could contribute to secondary effects of growth associated with buildout under approved General Plans. Some of these secondary effects of growth may remain significant and unavoidable within the District service area. The Board finds, in accordance with Section 15091(a)(2)

that mitigation measures to address these impacts are within the responsibility and jurisdiction of another public agency, and not the agency making the finding. Such changes have been adopted by such other agency, or can and should be adopted by such other agency. Although some of these secondary effects of growth may remain significant and unavoidable, specific economic, legal, social, technological or other considerations, including region-wide benefits for water management, outweigh the unavoidable adverse environmental effects. Therefore, the adverse environmental effects are considered acceptable, and a Statement of Overriding Considerations has been prepared. These findings are consistent with previous findings made by decision making bodies with jurisdiction over these General Plans.

Rationale: As discussed in the Draft Report/Statement, no appreciable growth in population or employment would occur as a direct result of the District's Project. However, provision of recycled water supply would assist in the provision of adequate water supplies to support planned development under the approved General Plans of the City of Sonoma and Sonoma County. Buildout under these General Plans could include secondary effects to the environment, as identified in the *City of Sonoma General Plan EIR* and the *Sonoma County General Plan EIR*, and summarized in the Draft Report/Statement Chapter 5. The environmental effects of growth most commonly identified as significant and unavoidable in the service area include those identified in the *City of Sonoma General Plan*: land use conflicts, increased traffic impacts, impacts to public utilities and services, including water supply, wastewater capabilities, and solid waste disposal. The environmental effects of growth identified as significant and unavoidable in the *Sonoma County General Plan EIR* include alteration of visual character in the Sonoma Valley. These effects, as described in Chapter 5, Growth Inducing Effects and Secondary Effects of Growth, of the Draft Report/Statement, are proportional to the District Project's provision of 200 acre-feet per year of recycled water, and considered incremental within the context of water management within the region. The project provides a level of recycled water supply consistent with the assumptions of the approved *City of Sonoma General Plan* and *Sonoma County General Plan*. As identified in the Draft Report/Statement Chapter 5, the *City of Sonoma General Plan EIR* and the *Sonoma County General Plan EIR*, have established mitigation programs for these impacts; however, these impacts have been identified as remaining significant and unavoidable after mitigation by individual General Plan EIRs.

5. Alternatives

5.01. CEQA requires that an Environmental Impact Report "describe a range of reasonable alternatives to the project or to the location of the project, which could feasibly attain the basic objectives of the project…" CEQA Guidelines Section 15126 (d). If a project alternative will substantially lessen the significant environmental effects of a proposed project, the decision maker should not approve the proposed project unless it determines that specific economic, legal, social, technological, or other considerations,… make the project alternative infeasible." Public Resources Code Section 21002, CEQA Guidelines Section 15091(a)(3). The Report/Statement evaluated alternative approaches to accomplishing the objectives of the project. The Findings with respect to the alternatives identified in the Draft Report/Statement are identified is this section.

5.02. The Board finds that the Final Report/Statement describes a range of reasonable alternatives to the Project. However, as described in Draft Report/Statement Chapter 6, the alternatives to the Project either cannot feasibly achieve project objectives, or will not avoid or substantially lessen project impacts.

5.03. The objectives of the Phase 2 Program are to promote the expanded beneficial use of recycled water and integrated water management in the North Bay region to improve local, regional, and state water supply reliability; offset demands on potable water supplies; address impaired groundwater basins; enhance local and regional ecosystems; maintain and protect public health and safety; promote sustainable practices; and implement integrated water management in an economically viable manner.

5.04. Two action alternatives were analyzed in the Draft Report/Statement at a project or program level of detail in addition to the "No Project Alternative" and the "No Action Alternative". Each of the action alternatives described below were developed to meet the purpose, objectives, and need identified by the Authority.

- **No Project Alternative:** Discussion of the No Project Alternative must examine the existing conditions and reasonably foreseeable future conditions that would exist if the project were not approved (CEQA Guidelines Section 15126.6(e)). Under the No Project Alternative, the Phase 2 Program would not be implemented and none of the proposed construction would occur nor would related water supply benefits result.
- **No Action Alternative:** Consideration of the No Action Alternative is required under the NEPA. The No Action Alternative represents a "future-without-project" scenario: a continuation of existing conditions for an estimation of the most reasonable future conditions that could occur without implementation of the Proposed Action or Storage Alternative. The No Action Alternative assumes that there is no joint project among the Member Agencies. It represents the "current status" in which additional wastewater treatment capacity and water recycling occurs strictly from the implementation of local plans for expansion, and the potential need to develop additional potable water supplies continues to be a regional challenge. In general, each Member Agency would continue to implement individual water recycling projects, subject to the availability of funding and completion of the environmental review process. The No Action Alternative would likely result in a smaller increment of water recycling projects within the region.
- **Proposed Action:** The Phase 2 Program, or Proposed Action, builds upon the Authority's Phase 1 infrastructure investments, which included $104 million in treatment, distribution, and storage projects to develop recycled water as part of the region's water supply portfolio. Building on Phase 1 technology and infrastructure investments, the Phase 2 Program would deliver increased yield through expanded treatment, new pipelines, and additional storage projects, while building resiliency into the region's long-term water supply through the use of recycled water. The Proposed Action would provide 4,885 acre-feet per year of recycled water supply through construction of 19.8 miles of pipeline, additional pump stations, 10 acre-feet of storage and 4.87 million gallons per day of wastewater treatment plant tertiary treatment capacity.
- **Storage Alternative.** The Storage Alternative would include the Proposed Action, as well as additional storage, treatment and distribution facilities to provide additional operational flexibility within individual Member Agency service areas. This alternative would include additional storage of 1,099 acre-feet, treatment (0.85 million gallons per day) and distribution facilities (11.0 miles) beyond the Phase 2 Program to provide additional operational flexibility within individual Member Agency service areas. Implementation of this Alternative would result

in an additional 1,934 acre-feet per year of recycled water compared to the Proposed Action, providing a total of 6,819 acre-feet per year of recycled water supply.

5.05. In addition to the alternatives of the project above, Chapter 6, Alternatives Analysis, of the Draft Report/Statement examined the following alternatives to the Phase 2 Program: Importation of Water; and Desalination.

A. Range of Alternatives and Findings

1. No Project Alternative

Discussion of the No Project Alternative must examine the existing conditions and reasonably foreseeable future conditions that would exist if the project were not approved (CEQA Section 15126.6(e)). Under the No Project Alternative, the Authority would not implement construction of facilities identified under the Proposed Action to provide a reliable recycled water distribution system to serve the water users in the District, Marin Municipal Water District, Novato Sanitary District, City of Petaluma, Napa Sanitation District, and City of American Canyon service areas.

Relationship to Project Objectives: Implementation of the No Project Alternative would not provide the benefits of water reclamation which include supporting sustainable groundwater management, offsetting potable water demand, enhancing ecosystems, promoting sustainable practices, achieving economic viability, and protecting human health. Additionally, the No Project Alternative would not improve current water reliability, either locally or regionally, particularly during peak demand periods. The No Project Alternative would not comply with State goals for water recycling, and would not reduce or assist in management of discharges to San Pablo Bay.

Environmental Impacts: Implementation of the No Project Alternative would avoid the construction related impacts and operational impacts identified for the proposed project. Most impacts associated with the proposed project would be reduced to a less-than-significant level through the incorporation of mitigation measures identified in the Draft Report/Statement, with the exception of significant and unavoidable impacts for growth inducement (and archaeological resources for Napa Sanitation District). The No Action Alternative would not provide the benefits of water reclamation, which include recycled water use, potable supply savings, reduced reliance on surface and groundwater, reduced groundwater pumping, and habitat enhancement. Under current conditions, the No Project Alternative would not assist in alleviating current water reliability – either locally, regionally, or State-wide – particularly during peak demand periods. The No Project Alternative would not comply with State goals for water recycling and would not reduce or assist in management of discharges to San Pablo Bay.

Findings: The No Project Alternative fails to achieve any of the project objectives, which are directed at improving water supply reliability, sustainable groundwater management, offsetting potable water demand, enhancing ecosystems, promoting sustainable practices, achieving economic viability, and protecting human health. Because it would not meet any of the project objectives,

and would fail to improve water quality and groundwater overdraft, the No Project Alternative is not considered environmentally superior.

2. No Action Alternative

In addition to the No Project Alternative, the Draft Report/Statement examines a No Action Alternative, as required under NEPA. The No Action Alternative represents a "future-without-project" scenario: a continuation of existing conditions for an estimation of the most reasonable future conditions that could occur without implementation of any action alternatives. The No Action Alternative assumes that there is no joint project among the Member Agencies. It represents the "current status" in which additional wastewater treatment capacity and water recycling occurs strictly from the implementation of local plans for expansion, and the potential need to develop additional potable water supplies continues to be a regional challenge. In general, each Member Agency would continue to implement individual water recycling projects, subject to the availability of funding and completion of the CEQA process. The No Action Alternative would likely result in a smaller increment of water recycling projects within the region, as noted below. Additionally, the lack of federal funding may delay or preclude the implementation of individual planned projects, due to the need to increase user rates in order to provide funds for implementation. It is anticipated that District would not implement the Napa Road Pipeline project, based upon the lack of funding for construction.

Relationship to Project Objectives: Implementation of the No Action Alternative would partially meet some the Phase 2 Program objectives, as it assumes that a smaller subset of recycled water projects, providing approximately 1,187 acre-feet per year of recycled water, would be implemented. The No Action Alternative would not satisfy any of the Phase 2 Program objectives to the degree provided by the Proposed Action and Storage Alternative, and would not meet the objective of implementing recycled water facilities in an economically viable manner, as no supplemental State or federal funding would be available to the Member Agencies. The No Action Alternative would have a subset of the impacts identified in Chapter 3 of the Draft Report/Statement, primarily associated with the construction of the facilities that individual Member Agencies would be able to implement without the benefit of regional coordination or federal funding.

The No Action Alternative would not involve the capital costs associated with the Proposed Action or Storage Alternative (described below). However, it would not be the most economically superior alternative. Financial constraints would limit implementation to local projects (e.g., Petaluma would only implement the Urban Recycled Water Expansion) and these projects would be ineligible for federal or State funding.

Environmental Impacts: Under the No Action Alternative, projects in the Novato Sanitary District, City of Petaluma, and City of American Canyon service areas would likely occur and provide approximately 1,187 acre-feet per year of recycled water. This represents approximately 3 percent of projected treated effluent discharged in 2025. Adverse environmental impacts associated with the construction of pipelines and pump stations would occur under the No Action Alternative, however to a lesser degree than the Proposed Action and Storage Alternative. The impacts would likely be shorter in

duration and would affect fewer sensitive receptors than those expected under implementation of the Proposed Action, given the difference in scale between the alternatives. In general, construction-related emissions and impacts to air quality and increased ambient noise would result under the No Action Alternative. Similarly, the No Action Alternative would potentially affect cultural, surface water, or biological resources in these three service areas. The Phase 2 Program service areas would experience some level of beneficial socioeconomic impact for all alternatives, with the exception of the No Project Alternative. However, this beneficial impact would be far more limited under the No Action Alternative.

Although the level of environmental impacts related to construction would be of a smaller scale, the No Action Alternative would not result in the level of potable offset for imported surface water, local surface water, and groundwater supplies that would be provided under the Proposed Action and Storage Alternative. Similarly, it would not substantially reduce the amount of treated effluent discharged to tributaries of North San Pablo Bay. Over time, it is expected that demand pressures on imported surface water, local surface water, and groundwater supplies would increase, and current water supply and delivery reliability issues would be exacerbated as growth under the approved General Plans within the Phase 2 Program service areas occurs. The No Action Alternative would not take full advantage of a local, sustainable, and energy efficient water supply implementation.

Findings: Because it would not substantially offset potable demand or reduce groundwater pumping, and would not significantly reduce or assist in management of effluent discharge to San Pablo Bay, the No Action Alternative is not considered environmentally superior.

3. Proposed Action – Phase 2 Program

As noted above, the Proposed Action (Phase 2 Program) builds upon the Authority's Phase 1 infrastructure investments, which included $104 million in treatment, distribution, and storage projects to develop recycled water as part of the region's water supply portfolio. Building on Phase 1 technology and infrastructure investments, the Proposed Action would deliver increased yield through expanded treatment, new pipelines, and additional storage projects, while building resiliency into the region's long-term water supply through the use of recycled water.

Collectively, the Phase 2 Program would provide 4,885 acre-feet of new recycled water for beneficial use and would include: installation of 19.8 miles of new pipelines, construction of facilities onsite at the existing waste water treatment plants to provide an additional 4.87 million gallons per day of tertiary treatment capacity, and development of approximately 10.1 acre-feet of storage, primarily for agricultural use. As with the Phase 1 projects, Phase 2 Program elements would offset drinking water that would no longer be used for non-potable uses, thus ensuring the highest quality water is reserved for potable uses. The Proposed Action includes the District's Napa Road Pipeline Project.

Relationship to the Project Objectives: The Proposed Action would be consistent with the Phase 2 Program's stated objectives, as summarized above**.** From an economic standpoint, projected capital costs associated with the Proposed Action are estimated at $66.0 million, with annual operations and

maintenance costs estimated a $1.3 million (Brown and Caldwell, 2017). This represents a lower cost than the Storage Alternative (described below).

Environmental Impacts: Based on the comparison of environmental effects in Appendix 6 of the Draft Report/Statement, the Proposed Action is the environmentally superior alternative in almost all resource areas. The Draft Report/Statement recommends measures to mitigated significant impacts to a less-than-significant level, with the exception of identified significant and unavoidable impacts related to the Phase 2 Program's contribution to potential secondary effects of growth associated with development under the approved General Plans within the region, and cultural resource impacts at the Napa Sanitation District Covered Storage project (Option A). Aside from that, the Proposed Action and Storage Alternative, would have similar potential for impact. Effects on natural resources would be in proportion to the size and number of facilities proposed. Most of the adverse environmental impacts would be associated with construction activities. The Proposed Action requires construction of the least amount of infrastructure compared to the Storage Alternative; therefore, it would result in less construction-related impacts. The Proposed Action requires the least amount of storage, making use of existing storage or land available at the wastewater treatment plants.

Findings: The Proposed Action would achieve the project objectives with least environmental impacts and costs, although would not provide the benefits from increased storage that would be offered by the Storage Alternative. The Proposed Action would have the capacity to provide recycled water to offset potable demand and improve water supply reliability. The Proposed Action appears to best meet the stated objectives of the project, for the following reasons:

1. **The Proposed Action provides offset for urban and agricultural demands on potable supplies, although not to the degree provided by the Storage Alternative.**
2. **The Proposed Action would provide recycled water to enhance local and regional ecosystems, as would the Storage Alternative and to a greater degree than the No Action Alternative.**
3. **The Proposed Action would improve local and regional water supply reliability, although not to the degree provided by the Storage Alternative.**
4. **The Proposed Action would maintain and protect public health and safety, as would all of the alternatives.**
5. **The Proposed Action would promote sustainable practices by providing recycled water, although not to the degree provided by the Storage Alternative.**
6. **The Proposed Action would promote sustainable management of groundwater basins by offsetting groundwater withdrawal, although not to the degree provided by the Storage Alternative.**
7. **The Proposed Action is less expensive than the Storage Alternative, but not the No Action and No Project alternatives.**

4. Storage Alternative

This alternative would include the Proposed Action, as well as additional storage, treatment and distribution facilities to provide additional operational flexibility within individual Member Agency service areas. The Storage Alternative would include construction of: 1,099 acre-feet of storage

facilities in service areas of the District (49 acre-feet of tertiary storage at the Mulas site), Novato Sanitary District (150 acre-feet of secondary storage), City of Petaluma (300 acre-feet of secondary storage) and Napa Sanitation District (600 acre-feet tertiary storage); additional tertiary treatment capacity at Novato Sanitary District recycled water facility (0.85 million gallons per day); and additional distribution facilities (11.2 miles of pipeline). Construction of storage facilities would have a construction footprint of approximately 79 acres. Implementation of this Alternative would result in an additional 1,934 acre-feet per year of recycled water supply compared to the Proposed Action, providing a total of 6,819 acre-feet per year of additional recycled water supply that would be available for beneficial use.

Relationship to the Project Objectives: The Storage Alternative would be consistent with the Phase 2 Program stated objectives, with one exception. It would provide a greater amount of recycled water to offset potable demand and increase water supply reliability. However, from an economic perspective, the Storage Alternative is not considered economically viable, as the storage elements which distinguish this alternative from the Proposed Action would not receive supplemental State and federal funding. This would represent an additional $125.9 million in construction costs and $1.9 million in annual operations and maintenance costs which the affected Member Agencies would need to cover with local funds or other undetermined funding sources.

Environmental Impacts: The Storage Alternative is not the environmentally superior alternative in most resource areas given the increased physical magnitude of its storage elements. For instance, this alternative would have the potential to disturb an additional 79 acres when compared to the Proposed Action. This would generate more substantial impacts to resources, such as biological resources, cultural resources, and water quality (i.e., erosion). Also, due to additive nature of the Storage Alternative (i.e., the Proposed Action *plus* additional storage reservoirs) and potential for overlapping construction activities, it has been determined that this alternative would have significant and unavoidable impacts to air quality due to the potential exceedance of nitrogen oxides (NO_X) significance thresholds. Therefore, while the nature of the impacts would be of a similar sort as the Proposed Action, the severity of those impacts would be greater under the Storage Alternative.

Findings: Although it would provide greater offset potable demand or reduce groundwater pumping and reduce or assist in management of effluent discharge to San Pablo Bay, the Storage Alternative is not considered environmentally superior due to the greater magnitude of the potential environmental impacts, as explained above.

5. Importation of Water

Under this alternative, potable or treated recycled water would be imported to Sonoma, Napa, or Marin counties from another community not participating in the Authority, such as Windsor, Yountville, Petaluma, Rohnert Park, Vallejo or Santa Rosa. For recycled water importation, a pipeline would be constructed from a sanitation district of another community to the users in Sonoma, Napa, or Marin, with booster pump stations to maintain sufficient water pressure.

Even if water were imported from the nearest community, this alternative would require construction of a large conveyance pipeline network to serve the Member Agency services areas. Some pipelines would approach 65 miles in length. This alternative was analyzed for the three criteria that were used to assess the alternatives of the project above.

For potable water importation into the region, expansion of the Department of Water Resources North Bay Aqueduct would be necessary. The capacity of the North Bay Aqueduct is currently fully allocated. This would also entail identification and acquisition of additional State Water Project entitlements to serve additional supplies to the Authority service areas. For cost comparison, the Phase 1 Feasibility Study (CDM, 2008) included expansion of the North Bay Aqueduct to provide 1,937 acre-feet per year of imported water to Napa MST area. Facility expansion would require a series of new pipeline alignments and booster pump station from Barker Slough.

Relationship to Project Objectives: Importation of recycled water into the Phase 2 Program service area would have the potential to meet some of the objectives, in that it would provide a recycled water supply to offset the use of potable supplies for irrigation. However, it is not anticipated that this alternative would provide a more sustainable or cost effective water supply, given the pipeline distances involved.

Fundamentally, this alternative would not offset potable supplies currently used for irrigation. Rather, they would continue to use imported potable supplies to meet irrigation demands. These alternatives would not reduce the amount of treated effluent discharge to tributaries of North San Pablo Bay, and would not provide a reliable habitat enhancement water supply for the Lower Novato Creek or Bel Marin Keys restoration projects. Additional importation of potable supplies would not improve the reliability to local water supplies, as SWP supplies are subject to drought year reliability.

Environmental Impacts: Importation of recycled water from an outside community would incur similar impacts as the alternatives discussed above. Impacts associated with pipeline construction would include short-term impacts to aesthetics, air quality, biological resources, cultural resources, hazards and hazardous materials, water quality, land use, noise, public services and utilities, and traffic. Pipeline construction could also result in temporary and permanent disturbance to jurisdictional wetlands and other waters, riparian habitat, special-status plant and animal species, and known or unknown cultural resources.

This alternative would cause lesser impacts to surface hydrology and reduce groundwater pumping; however, these effects would occur outside the Authority service areas and would not address groundwater pumping issues within these areas. Similarly, importing recycled water would not reduce wastewater discharge within the Authority service areas, since recycled water sources would lie outside these areas.

Importation of potable water would require additional infrastructure, which would result in construction-related environmental impacts and a potential increase in potable demand outside the

Authority service areas. Importing potable water would not reduce wastewater discharge within these areas.

Economic Feasibility: Under this alternative, the Member Agencies would face the institutional constraints of developing an agreement to obtain either recycled water or potable water supplies, prepare the cost estimates associated with purchase of the water, and sharing the costs of constructing new distribution infrastructure. Importing water from outside communities to individual service areas could require pipelines in excess of what would be required to develop recycled water supplies for Member Agencies. For example, if water were imported to the District from a community located at greater distances from Napa or Sonoma, such as Santa Rosa or Windsor, approximately 55 to 65 miles of pipeline would need to be constructed. It would require approximately 20 to 30 miles of pipeline to connect the District to the Novato Sanitary District Recycled Water Facility, or the Napa Sanitation District Soscol Water Recycling Facility. For cost comparison, the Phase 1 Feasibility Study (CDM, 2008) included expansion of the North Bay Aqueduct to provide 1,937 acre-feet per year of imported water to Napa MST area. Facility expansion would require a series of new pipeline alignments and booster pump station from Barker Slough. The cost of long-term water supply is assumed to be approximately $12.1 million, a new distribution system cost is approximately $49.8 million and the North Bay Aqueduct expansion cost is approximately$47.3 million (SCWA/USBR, 2008 updated to 2016 dollars). Napa County also estimates legal and administrative fees to implement this alternative would be approximately $10 million. Therefore, total costs would be approximately $119.1 million, which does not include annual operations and maintenance costs. The costs for 1,937 acre-feet of water to the MST area would be approximately $2,389 per acre foot (Brown and Caldwell, 2017).

Findings: This alternative would not substantially meet the project objectives, would also result in substantial environmental impacts above and beyond those of the Proposed Action, would increase the overall cost of the Phase 2 Program, and would not substantially reduce significant unavoidable impacts that cannot otherwise be mitigated. Therefore, it is not considered feasible or a desirable alternative to the Proposed Action.

6. Desalination

Desalination of saline water from San Pablo Bay would provide a reliable supply of water for irrigation. Currently, reverse osmosis treatment is the most cost-effective and feasible treatment option for desalination. The desalination plant could be sized and operated to provide a continuous source of supply. Due to the higher salinity of the source water and depending upon the efficacy of the reverse osmosis process, the high salinity (approximately 35,000 milligrams per liter of total dissolved solids), a flow of 5,500 acre-feet of source water would produce approximately 2,750 acre-feet of desalinated

water.[2] As such, higher feed pressure and need to increase the treatment capacity would result in a high electric power requirement.

The Marin Municipal Water District explored the viability of a desalination project that would provide supply to the Marin Municipal Water District Service Area. Construction of a 5.0-million gallons per day desalination plant was proposed, with the ability to expand capacity in 5.0-million gallons per day increments, up to a maximum capacity of 15 million gallons per day. The source water from San Pablo Bay would undergo several treatment processes in the facility, including solid removal, reverse osmosis, and disinfection and addition of materials for taste. The potable product water generated at the facility would have been 50 percent of the source water flowing into the facility. The brine produced in the reverse osmosis process would be blended with treated wastewater prior to discharge into the Bay. The solids would be disposed in the Redwood Landfill north of Novato.

Ability to Meet Project Objectives: This alternative would have the potential to meet some of the Phase 2 Program's stated objectives. However, desalination would not meet objectives to provide a reliable regional and local supply for habitat enhancement, would increase discharges to San Pablo Bay related to brine disposal, and would not improve the long-term sustainability of the regional water system or enhance sensitive ecosystems. Also, the construction of such a facility and follow-on operations and maintenance costs, as well as potential legal costs stemming from potential opposition, would exceed that of either the Proposed Action or Storage Alternative. Additionally, a substantial distribution system would be required to serve all Member Agencies.

Environmental Impacts: The environmental impacts associated with the desalination alternative would occur during construction of the project facilities similar to other alternatives. Construction activities would include construction of the reverse osmosis plant, pipeline, and waterside facilities. Environmental impacts to aesthetics, ambient noise, and water quality are typically associated with desalination facilities.

Long-term effects would include water quality impacts from the discharge of the brine generated by the desalination process. The discharge would be dispersed by currents in San Pablo Bay, affecting temperature, nutrients, and turbidity and, therefore, the abundance and diversity of marine organisms. Areas of potential concern in relation to marine water quality include temperature, dissolved oxygen, or salinity; possible localized changes in currents or in turbidity, due to the presence of intake pipes on the ocean bottom or due to the pumping/discharge of effluents from the desalination plant; and possible changes in dispersion of sewage plume effluent due to added discharge of brine effluent from the desalination plant. As such, a desalination project would require a baseline study to establish offshore conditions prior to desalination plant startup; and perform quarterly marine water quality/biological monitoring in accordance with the San Francisco Bay Regional Water Quality Control Board requirements during operational phase. Implementation of a desalination plant would also require construction of new facilities, which would incur construction-

[2] Assuming 50 percent efficacy, the reverse osmosis process would generate 50 percent desalinated water of the source water.

related impacts similar to those anticipated under the Proposed Action. Therefore, the desalination alternative would have a similar level of temporary environmental impact when compared to the alternatives examined.

Economic Feasibility: The capital costs and operations and maintenance costs could be prohibitive: the estimated capital cost of the Marin Municipal Water District plant was estimated at $121.1 million, with annual operations and maintenance costs as high as $7.1 million. Further, there are high energy costs associated with this alternative in addition to the costs for land acquisition, construction of seawater intake and potentially a brine water discharge line and brine water outfall. In addition, considering the extremely high cost for desalination, coupled with its greater dependency on large quantities of power, this alternative was not carried forward for further analysis.

Findings: Because this alternative would not substantially meet the Phase 2 Program objectives, would also result in substantial environmental impacts above and beyond those of the Proposed Action, would increase the overall cost of the Phase 2 Program, and would not substantially reduce significant unavoidable impacts that cannot otherwise be mitigated. Therefore, it is not considered feasible or a desirable alternative to the Proposed Action.

7. Environmentally Superior Project Alternative

The Lead Agency is not required by CEQA or NEPA to adopt an environmentally superior alternative that will not feasibly attain project objectives or reduce environmental effects. In the process of selecting the environmentally superior alternative, the Authority has evaluated several factors, including environmental effects, engineering and operational criteria, system reliability and flexibility, cost, and efficient coordination with other water recycling efforts, in determining which alternative is the best project to approve and implement.

CEQA and NEPA require that a Lead Agency demonstrate why a project or an alternative is selected. This is provided in the findings document. The Proposed Action has been identified as the most environmentally, equitable, and financially sustainable alternative that will effectively fulfill the NBWRP Phase 2 objectives. The Proposed Action would provide adequate conveyance, pumping, and storage capacity that would result in 4,885 acre-feet per year of recycled water, thereby offsetting a substantial amount of potable demand and reducing wastewater discharge to San Pablo Bay. The Proposed Action would achieve all of the program objectives with least environmental impacts and costs, although it would not provide the benefits from increased storage provided under the Storage Alternative. The Proposed Action would have the capacity to provide recycled water to offset potable demand and improve water supply reliability. The Proposed Action appears to best meet the stated objectives of Phase 2 Program for the following reasons:

1. The Proposed Action provides offset for demands on potable supplies, although not to the degree provided by the storage elements of the Storage Alternative.
2. The Proposed Action would provide the recycled water to the Lower Novato Creek and Bel Marin Keys restoration projects.

3. The Proposed Action would have reduced facility related impacts, particularly related to new storage facilities. The Proposed Action would avoid potential significant and unavoidable air quality impacts related to the Storage Alternative. Additionally, impacts related to disturbance of approximately 79 acres to construct storage would be avoided. These include impacts in the issue areas of water quality, biological resources, cultural resources, and agricultural resources.
4. The Proposed Action would improve local, regional, and state water supply reliability, although not to the degree provided by the storage elements of the Storage Alternative.
5. The Proposed Action would maintain and protect public health and safety, as would all alternatives.
6. The Proposed Action would promote sustainable practices by providing recycled water, although not to the degree provided by the storage elements of the Storage Alternative.
7. The Proposed Action would promote sustainable management of groundwater basins by providing reliable water supply options for non-potable uses that would otherwise be drawn from local groundwater sources, although not to the degree provided by the storage elements of the Storage Alternative.
8. The Proposed Action is the least expensive, with the exception of the No Action and No Project alternatives.

The Proposed Action would improve water supply reliability with a major emphasis on local water use. Water reuse would provide environmental benefits by offsetting surface and groundwater use, reducing the need to develop additional water supplies, and reducing discharge to the Bay. Although an incrementally smaller amount of recycled water would be available, it would represent an economically feasible alternative. Implementing the Proposed Action would cost 56 percent less than the Storage Alternative. Since the Proposed Action would represent the lower cost Action Alternative and would be implemented with federal and State funding support, it is the most cost-effective for the Member Agencies. The Proposed Action would require the least amount of new storage and rely on increasing treatment capacities at existing facilities and using ponds on existing wastewater treatment plant sites.

Compared to the Proposed Action, the Storage Alternative would increase regional storage options and provide incrementally more recycled water treatment and distribution facilities, albeit with greater costs for the Member Agencies, construction impacts, and greater potential for conflict with natural resources. Therefore, the Storage Alternative is not the most environmentally superior alternative.

In general, both the Proposed Action and the Storage Alternative would meet the stated Phase 2 Program objectives and comply with applicable regulations and policies. In relation to the stated program objectives and environmental impacts, the Storage Alternative would involve the greatest capital costs and maximum adverse environmental impacts due to the proportion of facilities that would be required. The benefit of reducing the amount of wastewater discharged to the Bay is counterbalanced by the environmental detriment caused during construction and facility operation; therefore, the Storage Alternative is not considered environmentally superior.

Based on the criteria set previously in this chapter for the alternatives analysis, with respect to its ability to meet the stated Phase 2 Program objectives, its potential environmental impacts, and the

cost of implementation, the Proposed Action is identified as the environmentally superior alternative. The Proposed Action would achieve the project objectives, result in lesser environmental impacts, and would incur lower costs. The Proposed Action would thus achieve all of the Phase 2 Program objectives while simultaneously providing a means for Member Agencies to achieve water management goals, meet future water demand, augment surface water use, and sustain environmental and water quality.

6. Adoption of Mitigation and Monitoring Reporting Plan

6.01. Pursuant to Public Resources Code Section 210821.6, the Board hereby adopts a mitigation monitoring and reporting plan (Exhibit A) for the mitigation measures under the jurisdiction of the District that were included in the Final Report/Statement. The Board adopts this plan pursuant to CEQA Guidelines Section 15096 (g)(1), which states that a Responsible Agency has responsibility for mitigating or avoiding only the direct or indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve. The contents of this plan are set forth in Exhibit A, attached hereto and incorporated herein by this reference. This mitigation monitoring and reporting plan is designed to ensure compliance with the mitigation measures adopted for the District's Project described in the Final Report/Statement. It will be implemented in accordance with all applicable requirements of the CEQA Statute, the State CEQA Guidelines, and the District's Procedures for the Implementation of CEQA.

7. Statement of Overriding Considerations

7.01. The Board has weighed the benefits of the Phase 2 Program against the unavoidable adverse environmental effects identified in the Final Report/Statement and hereby determines that those benefits outweigh the risks and adverse environmental impacts. The Board determines that these environmental impacts are acceptable and hereby finds that there are overriding considerations that justify the Board's approval of the components of the Phase 2 Program that are under its jurisdiction, which are identified in the findings above.

7.02. Pursuant to Public Resources Code Section 21081 and California Environmental Quality Act Guidelines Section 15093, Board adopts and makes the following Statement of Overriding Considerations regarding the remaining unavoidable impacts from the District's Napa Road Pipeline Project, which is part of the Phase 2 Program, and the anticipated economic, legal, social, technological, environmental, and other benefits.

1. In considering the proposed project, the District has weighed the benefits of the Phase 2 Program against its unavoidable environmental risks and potentially significant adverse impacts. The District hereby determines that the benefits of the Phase 2 Program outweigh its unavoidable environmental risks and unmitigated adverse impacts. The District finds that to the extent that the identified significant or potentially significant adverse impacts have not been avoided or substantially lessened, there are specific economic, legal, social, technological or other considerations that support approval of Phase 2 Program.
2. The District specifically adopts this Statement of Overriding Considerations and finds that: a) as part of the approval provisions, the Proposed Project has eliminated or substantially lessened

all significant effects on the environment where feasible; b) the remaining unavoidable impacts of the Proposed Project are acceptable in light of the environmental, economic, legal, social, technological, and other considerations set forth herein, because the benefits of the Phase 2 Program outweigh the significant and adverse impacts of the Phase 2 Program, as noted below.

3. The District finds that each of the overriding considerations set forth below constitutes a separate and independent ground for finding that the benefits of the Phase 2 Program outweigh its significant adverse environmental impacts and is an overriding consideration warranting approval of the Phase 2 Program. The District finds that substantial evidence in the record supports its findings in this regard.
4. The Phase 2 Program will have certain significant effects that are identified in the Final Report/Statement, but will not be fully mitigated. These effects include secondary impacts related to the implementation of approved General Plans within the Sonoma Valley County Sanitation District service area. The environmental effects of growth most commonly identified as significant and unavoidable in the service area include those identified in the City of Sonoma General Plan: land use conflicts, increased traffic impacts, loss of habitat, water quality, and impacts to public utilities and services, including water supply, wastewater capabilities, and solid waste disposal. The environmental effects of growth identified as significant and unavoidable identified in the Sonoma County General Plan include alteration of visual character in the Sonoma Valley. These effects are summarized in Chapter 5, Growth Inducing Effects and Secondary Effects of Growth, and described more fully in Appendix 5 of the Draft Report /Statement. The Proposed Project provides a level of recycled water supply consistent with the assumptions of the approved *City of Sonoma General Plan* and *Sonoma County General Plan*. As noted in these General Plans, some of these impacts will be reduced by identified mitigation measures, but the impacts may not be reduced to a less-than-significant level.
5. The District Board of Directors has carefully considered the Phase 2 Program described in the Draft Report/Statement and the unavoidable adverse environmental impacts associated with it and hereby identifies the following environmental, economic, legal, social, technological, and other benefits of the project:

    i. Implementation of the District's Project would provide potable offset of urban and agricultural demands on potable supplies, including surface and groundwater supplies.
    ii. Implementation of the Proposed Project would reduce the amount of treated effluent discharged to North San Pablo Bay.
    iii. Implementation of the Proposed Project would be consistent with State and local policies regarding the implementation of recycled water to provide potable water supply offset.
    iv. Implementation of the Proposed Project would be consistent with recycled water polices identified in approved General Plans within the proposed service area.
    v. Implementation of the Proposed Project would reduce groundwater depletion in the Sonoma Valley by providing an alternative source of water for irrigation. Reducing groundwater depletion will benefit other users of area water, and help ensure the long-term viability of existing agricultural, residential, open space, and other uses in the Project area.
    vi. Implementation the Proposed Project would reduce peak demand for water in the summer months. Reducing peak demand will benefit other users of water in the summer months, including threatened and endangered species.
    vii. The Proposed Project would be implemented under Reclamation's Title XIV program, which provides funding for recycled water programs that have demonstrated regional coordination and provide multiple benefits.

7.03. The District Board of Directors has weighed the above benefits of the Proposed Project against its unavoidable environmental risks and the adverse environmental effects that are described in the Final Report/Statement and hereby determines that the above benefits outweigh the risks and adverse effects. The District Board of Directors, therefore, determines that these risks and adverse environmental effects are acceptable.

Be It Further Resolved, based on the record of this proceeding and the foregoing findings and determinations, the Board of Directors of the Sonoma Valley County Sanitation District does hereby take the following actions:

1. Approval of the North Bay Water Reuse Program Phase 2. The Board approves and declares its intent to carry out the District's Project under its jurisdiction, as described in Chapter 2, Project Description, of the Draft Report/Statement.
2. Adoption of Mitigation Monitoring and Reporting Plan. The Board adopts the mitigation monitoring and reporting plan as set forth in Exhibit A, and authorizes and directs the General Manager or his assigns to take all appropriate steps in accordance with such plan to ensure that the required mitigation measures are carried out.
3. Statement of Overriding Considerations for the North Bay Water Reuse Program Phase 2. The Board adopts the Statement of Overriding Considerations set forth above after finding that the District's Project has certain environmental, economic, legal, social, technical, and other benefits that make the unavoidable adverse environmental impacts associated with it acceptable, and that mitigation of certain environmental impacts is in the jurisdiction of other agencies.
4. Notice of Determination. The Board directs the General Manager or his assigns to file a Notice of Determination with the County Clerk and the State Clearinghouse in accordance with the provisions of the CEQA Statute, the State CEQA Guidelines, and the District's Procedures for the Implementation of CEQA advising of the Board's approval of the District's Project described in Chapter 2, Project Description, of the Draft Report/Statement.
5. Custodian of Documents. The Board is the custodian of the documents or other material which constitute the record of proceedings upon which this Board's decision herein is based. These documents may be found Sonoma County Water Agency, 404 Aviation Drive, Santa Rosa, California, 95403.

EXHIBIT A

Mitigation Monitoring and Reporting Plan/Program

This report summarizes the mitigation measures that would be integrated into the North Bay Water Reuse Program (NBWRP) Phase 2 to reduce the potentially significant impacts to a less-than-significant level. These mitigation measures are fully described in the *NBWRP Phase 2 Draft Environmental Impact Report/Environmental Impact Statement* (EIR/EIS). References included in this report to impacts and resource area analyses are referring to those impacts and analyses included in the NBWRP Phase 2 Draft EIR/EIS. Also provided is a Mitigation Monitoring and Reporting Plan/Program (MMRP) organized in a tabular format, which identifies mitigation measures that apply to projects proposed by each Member Agency, including the Sonoma Valley County Sanitation District's Napa Road Pipeline Project, and are incorporated into the project. The tables following each measure provide a breakdown of how the mitigation measure would be implemented, who would be responsible, and when it would occur. The tables consist of five column headings which are defined as follows:

- *Implementation Procedure*: If needed, this column provides additional information on how the mitigation measures would be implemented.
- *Monitoring and Reporting Actions*: This column contains an outline of the appropriate steps to verify compliance with the mitigation measure.
- *Monitoring Responsibility*: This column contains an assignment of responsibility for the monitoring and reporting tasks.
- *Monitoring Schedule*: This column provides a general schedule for conducting each monitoring and reporting task, identifying where appropriate both the timing and the frequency of the action.
- *Responsible Agency*: This column states the agency, which would be responsible for implementing the mitigation measure. If the measure applies to all the Member Agencies, the responsible agency noted is "Member Agency". If the measure applies to specific agencies, the name of the agency or agencies is/are noted in the column.

Surface Hydrology

Impact 3.3.1: Changes in Drainage Patterns

Project construction and operation could alter the existing drainage patterns in a manner that would result in substantial erosion, siltation, or flooding on- or off-site.

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit

Refer to Impact 3.5.1 in Section 3.5, Water Quality.

Mitigation Measure 3.3.1a: Stream and Drainage Crossings

The Member Agencies shall implement the following measure during pipeline installation at stream or drainage crossings:

1. Schedule construction during the dry season and so as to avoid storm events to the extent feasible, or as required by regulatory permits (approximately June 15 to October 15);

2. Pipelines suspended from bridges shall be designed such that they do not interfere with conveyance of flows beneath the bridge, as determined by a certified professional engineer;

3. At in-road drainage crossings where drainages pass beneath the road in existing culverts, and where there is sufficient cover between the culvert and road surface, the new pipeline will be installed above the existing culvert without removing or disturbing it. If the pipeline must be installed below the existing culvert, then the culvert will be cut and temporarily removed to allow pipeline installation.

4. If disturbance of the existing culvert is required, sediment curtains upstream and downstream of the construction zone shall be placed to prevent sediment disturbed during trenching activities from being transported and deposited outside of the construction zone.

5. Employ short-term drainage diversion and control measures such as sandbags, dikes, pumps, or other means; and

6. Following construction, restore the construction area to pre-existing conditions.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Schedule construction to avoid storm events. 2. Integrate pipelines designs that do not interfere with conveyance of flows beneath bridges.	1. Incorporate schedule into construction specifications. 2. Incorporate pipeline designs into construction specifications.	1. Member Agency 2. Contractor/ Member Agency 3. Contractor/ Member Agency 4. Contractor/ Member Agency	1. Prior to and During Construction 2. Prior to Construction 3. During Construction	Member Agency

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
3. Install new pipeline above existing culverts without removing or disturbing them. 4. If disturbance of the existing culvert is required, place sediment curtains upstream and downstream of the construction zone. 5. Employ short-term drainage diversion and control measures such as sandbags, dikes, pumps, or other means. 6. Restore site to pre-existing conditions.	3. Incorporate construction method into construction specifications. 4. Incorporate construction method into construction specifications. 5. Incorporate use of these measures into construction specifications. 6. Inspect final site conditions after construction and verify its condition is it equivalent to that prior to construction. Incorporated into construction specifications.	5. Contractor/ Member Agency 6. Contractor/ Member Agency	4. During Construction 5. During Construction 6. After Construction	

Mitigation Measure 3.3.1b: Impervious Surface Area – WRF Improvements

Design of proposed facilities, including tertiary facilities and storage at Soscol WRF, shall be integrated into existing drainage infrastructure such that drainage patterns do not result in new erosion, siltation, or flooding. Design shall include appropriate collection and conveyance of stormwater to WWTP infrastructure, per each facility's NPDES Permit requirements for stormwater.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Incorporate design of proposed facilities into existing drainage infrastructure.	1. Incorporate design into construction specifications.	1. Contractor/ Member Agency	1. Prior to and During Construction	Napa Sanitation District

Impact 3.3.2: Reduction in flows within Stream Channels

Project operation would reduce the amount of annual discharge due to the recovery and use of recycled water that is currently discharged.

Mitigation Measure 3.3.2: SWRCB Change of Use Petition

Member Agencies shall complete SWRCB Change of Use Petition for use of recycled water, pursuant to Section 1700 of the California Water Code. Direct diversions of less than 3.0 cubic feet per second (cfs) or storage of less than 200 AFY may qualify for a minor petition, as appropriate. Member Agencies shall complete SWRCB Change of Use Petition process prior to recycled water distribution.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Comply with Section 1700 of the California Water Code.	1. Complete SWRCB Change of Use Petition for use of recycled water.	1. Member Agency	1. Prior to recycled water distribution.	Member Agency

Impact 3.3.3: Flooding and Effects to Surface Waters

The proposed action could expose the public or structures to the risk of flooding due to placement of facilities within the one percent annual chance of exceedance flood level. The proposed action would also change the amount of discharge to local surface waters.

Mitigation Measure 3.3.1a: Stream and Drainage Crossings

Refer to Impact 3.3.1.

Mitigation Measure 3.3.3: Floodplain Hydraulic Analysis for Seasonal Storage

As part of the design process for seasonal storage, Member Agencies shall demonstrate through hydrologic and hydraulic analyses that the proposed modification and/or encroachment would not result in an increase in flood levels during the occurrence of the one percent annual chance of exceedance flood event. Analysis shall be performed by a California licensed engineer in accordance with standard engineering practices.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Demonstrate through hydrologic and hydraulic analyses that the proposed modification and/or encroachment would not result in an increase in flood levels during the occurrence of the one percent annual chance of exceedance flood event.	1. California licensed engineer shall perform analysis.	1. Member Agency	1. Prior to construction	Member Agency

Impact 3.3.4: Flooding – Sea Level Rise

Sea-level rise could affect operation of project facilities.

Mitigation Measure 3.3.4: Design Measures Addressing Sea Level Rise

Design of proposed facilities shall consider sea level rise potential, and shall include appropriate measures in facility siting and design to address potential impacts related to sea level rise, similar to those applied to facility installation within 100-year flood plains. Design measures may include, but are not limited to: facility siting, access placement, access vault extension above projected water elevation, water tight vaults, and site protection.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Design facility to address potential impacts related to sea level rise. Design measures may include but are not limited to: facility siting, access placement, access vault extension above projected water elevation, water tight vaults, and site protection.	1. Incorporate design requirements into construction specifications.	1. Member Agency	1. Prior to construction	Member Agency

Impact 3.3.5: Flooding – Other Hazards

The NBWRP Phase 2 would not cause or exacerbate any existing risk of inundation by seiche, tsunami, or mudflow.

Mitigation Measure 3.3.1a: Stream and Drainage Crossings

Refer to Impact 3.3.1.

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit

Refer to Impact 3.5.1 in Section 3.5, Water Quality.

Groundwater Resources

Impact 3.4.3: Hydrostatic Pressure

Proposed facilities may be affected by shallow groundwater levels and natural groundwater fluctuations.

Mitigation Measure 3.4.3

The Member Agencies will implement the following measures:

1. All proposed improvements will be designed and constructed in accordance with current geotechnical industry standard criteria as overseen and approved by a state licensed geotechnical engineer.

2. Implement industry standard geotechnical measures to address high groundwater conditions as appropriate to reduce the potential for impacts related to groundwater fluctuation, in accordance with accepted geotechnical practices and current building code requirements. Possible design features include drainage blankets, perimeter pumps to temporarily decrease hydrostatic pressure, perimeter drainage trenches, and specific groundwater monitoring scenarios

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Design improvements with current geotechnical industry standard criteria. 2. Design improvements to address high groundwater conditions in accordance with accepted geotechnical practices. Possible design features include but are not limited to: drainage blankets, perimeter pumps to temporarily decrease hydrostatic pressure, perimeter drainage trenches, and specific groundwater monitoring scenarios.	1. Incorporate design requirements into construction specifications. 2. Incorporate design requirements into construction specifications.	1. Member Agency 2. Member Agency	1. Prior to construction 2. Water Quality

Impact 3.5.1: Short Term Construction-Related Effects

Disturbance of soils during construction of new project-related infrastructure could generate short term erosion-related water quality impacts. Construction activities could result in the accidental release of fuels or hazardous materials. Project construction activities could require dewatering that could result in the discharge of turbid waters into the local storm drain systems or nearby creeks.

Mitigation Measure 3.5.1: NPDES Construction Activity Stormwater Permit

Member Agencies or their contractor shall comply with the provisions of the NPDES Construction Activity Stormwater permit, including preparation of Notice of Intent to comply with the provisions of this General Permit and preparation of a SWPPP. The SWPPP will identify implementation measures necessary to mitigate potential water quality degradation as a result of construction-related runoff. These measures will include BMPs and other standard pollution prevention actions, such as erosion and sediment control measures, proper control of non-stormwater discharges, and hazardous spill prevention and response. The SWPPP will also include requirements for BMP inspections, monitoring, and maintenance.

The following items are examples of BMPs that would be implemented during construction to avoid causing water quality degradation:

1. Erosion control BMPs, such as use of mulches or hydroseeding to prevent detachment of soil, following guidance presented in the California BMP Handbooks – Construction (CASQA 2003). A detailed site map will be included in the SWPPP outlining specific areas where soil disturbance may occur, and drainage patterns associated with excavation and grading activities. In addition, the SWPPP will provide plans and details for the BMPs to be implemented prior, during, and after construction to prevent erosion of exposed soils and to treat sediments before they are transported offsite.

2. Sediment control BMPs such as silt fencing or detention basins that trap soil particles.

3. Construction staging areas designed so that stormwater runoff during construction will be collected and treated in a detention basin or other appropriate structure.

4. Management of hazardous materials and wastes to prevent spills and provide the means to contain any spills that might occur.

5. Groundwater treatment BMPs such that localized trench dewatering does not impact surface water quality.

6. Vehicle and equipment fueling BMPs such that these activities occur only in designated staging areas with appropriate spill controls.

7. Maintenance checks of equipment and vehicles to prevent spills or leaks of liquids of any kind.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Submit Notice of Intent and SWPPP for the NPDES General Construction Permit 2. Incorporate BMPs in standard construction	1. Comply with the SWPPP and NPDES permit requirements 2. Implement BMPs	1. procedures				

Biological Resources

Impact 3.6.1: Impacts on Wetlands, Streams and Riparian Habitats

Construction of the Proposed Project could result in impacts to jurisdictional wetlands and other waters of the United States, as well as impacts to waters of the State and riparian habitat.

Mitigation Measure 3.6.1

Implement the following measures to avoid, minimize and compensate for impacts to jurisdictional wetlands and other waters of the U.S. and State, and impacts to riparian habitat.

Construction activities resulting in the introduction of fill or other disturbance to jurisdictional wetlands and other waters of the U.S. will require permit approval from the U.S. Army Corps of Engineers and water quality certification from the Regional Water Quality Control Board, pursuant to Section 401 of the Clean Water Act. Proposed facilities would most likely be authorized under Nationwide Permit #12 (Utility Lines) pursuant to Section 404 of the Clean Water Act. The CDFW has jurisdiction in the project area over riparian habitat, including stream bed and banks, pursuant to Sections 1600-1616 of the Fish and Game Code. Pipeline construction resulting in alteration to channel bed or banks, extending to the outer dripline of trees forming the riparian corridor, is subject to CDFW jurisdiction. If work is proposed in these areas, project proponent will be required to obtain a Streambed Alteration Agreement (SAA) from the CDFW. Terms of these permits and SAA will likely include, but will not necessarily be limited to, the mitigation measures listed below.

1. Specific locations of pipeline segments, storage reservoirs, and pump stations shall be configured, wherever feasible, to avoid and minimize direct and indirect impacts to wetlands and stream drainage channels. Consideration taken in finalizing configuration placement shall include:

   a) Reducing number and area of stream channel and wetland crossings where feasible. Crossings shall be oriented as close to perpendicular (90-degree angle) to the drainage or wetland as feasible.

   b) Placement of project components as distant as feasible from channels and wetlands.

   c) For pipeline construction activities in the vicinity of wetland and stream drainage areas, the construction work area boundaries shall have a minimum 20-foot setback from

jurisdictional features[1]. Pipeline construction activities in proximity to jurisdictional features include: 1) entrance and exit pits for directional drilling and bore and jack operations; and 2) portions of pipeline segments.

2. Sites identified as potential staging areas will be examined by a qualified biologist prior to construction. If potentially jurisdictional features are found that could be impacted by staging activities, the site will not be used.

3. Construction methods for channel crossing shall be designed to avoid and minimize direct and indirect impacts to channels to the greatest extent feasible. Use of trenchless methods including suspension of pipeline from existing bridges, directional drilling, and bore and jack tunneling will be used when feasible. Trenchless methods are required for all perennial drainage crossings (i.e., Lynch Creek). Construction occurring in the vicinity of riparian areas shall be delimited with a minimum 20-foot setback to avoid intrusion of construction activities into sensitive habitat.

   The following additional measures shall apply to channel crossings in which the trenching construction method is used:

   a. Limiting of construction activities in drainage channel crossings to low-flow periods: approximately April 15 to October 15.

   b. At in-road drainage crossings where drainages pass beneath the road in existing culverts, and where there is sufficient cover between the culvert and road surface, the new pipeline will be installed above the existing culvert without removing or disturbing it. If the pipeline must be installed below the existing culvert, then the culvert will be cut and temporarily removed to allow pipeline installation.

   c. At off-road drainage crossings, the construction corridor width will be minimized to the greatest extent feasible at the crossing and at least 20 additional feet to either side of the drainage at the crossing.

   d. If disturbance of the existing culvert is required, sediment curtains upstream and downstream of the construction zone shall be placed to prevent sediment disturbed during trenching activities from being transported and deposited outside of the construction zone.

4. Construction BMPs shall be implemented as discussed in **Mitigation Measure 3.5.1** in Section 3.5, Water Quality, to reduce risk of erosion and sediment transport into all construction areas in proximity of drainages.

5. For channels or wetlands for which soil removal is necessary (off-road crossings or wetlands to be trenched or otherwise directly disturbed), the top layer of the drainage or wetland bottom shall be stockpiled and preserved during construction. After the pipeline has been installed, the stockpiled material shall be placed back into the drainage or wetland feature to return the beds to approximately their original composition.

6. Project sites will be revegetated with an appropriate assemblage of native upland vegetation and, if necessary, riparian and wetland vegetation suitable for the area. A plan describing pre-

[1] Setbacks of channels with associated riparian vegetation will be from the outer dripline edge of the riparian corridor canopies and/or the upper bank edge, or per City or County code, whichever is greater.

project conditions, restoration and monitoring success criteria will be prepared prior to construction.

7. To offset temporary and permanent impacts to wetlands and other waters of the U.S. and State, and impacts to riparian habitat, compensatory mitigation will be provided through on-site restoration to emulate pre-project conditions, or as required by regulatory permits and SAAs.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Acquire permits from USACE, CDFW, and RWQCB. 2. Implement Best Management Practices (BMPs). 3. Stockpile excavated soil. 4. Implement compensatory mitigation.	1. Comply with regulatory permit. 2. Sign-off on inspection report and/ or MMRP. 3. Sign-off on inspection report and/ or MMRP. 4. Comply with regulatory permits and SAAs.	1. Member Agency 2. Contractor 3. Contractor 4. Member Agency	1. Prior to Construction 2. During Construction 3. During Construction 4. Prior to and During Construction	Novato Sanitary District, Petaluma, Sonoma Valley County Sanitation District, American Canyon, Napa Sanitation District

Impact 3.6.2: Impacts to Special-status Fish and California Freshwater Shrimp

Construction of NBWRP Phase 2 facilities could affect special-status aquatic species including central California coast steelhead, Chinook salmon, and California freshwater shrimp, or designated critical habitat for steelhead.

Mitigation Measure 3.6.2

Specific measures shall be implemented to protect aquatic habitats potentially inhabited by special-status fish and California freshwater shrimp.

Sensitive fisheries and other aquatic resources shall be protected by minimizing in-stream and near-stream habitat impacts during project design, informally consulting with resource agencies (NMFS, USFWS, CDFW, and USACOE), and implementing protective measures. For Lynch Creek, North Slough, and Arroyo Seco, special-status fish are presumed present. California freshwater shrimp are presumed present in Lynch Creek.

Because of the sensitivity of seasonal and ephemeral drainages, the following measures will be required to avoid and minimize impacts to aquatic habitat:

1. Project designs shall be configured, whenever feasible, to avoid direct impacts to sensitive wetland areas and minimize disturbances to wetland and riparian corridors. Ground disturbance and construction footprints in these areas shall be minimized to the greatest degree feasible. Trenchless constructions methods will be employed wherever possible. In the event trenchless methods cannot be employed, the project proponent would obtain appropriate

permit authorizations and implement construction methods per applicable Streambed Alteration Agreements.

2. All activities across waterways will be restricted to low-flow periods of June 15 through November 1. If the channel is dry, construction can occur as early as April 15 (in accordance with CDFW and RWQCB permit requirements). Restricting construction activities to this work window will minimize effects to California freshwater shrimp and steelhead;

3. Reclamation or appropriate agency shall ensure the appropriate permit authorizations are secured for stream crossings, and a qualified biological resource monitor shall be present at all times to alert construction crews to the possible presence of California freshwater shrimp during construction operations;

4. At least 15 days prior to onset of activities, Reclamation or appropriate agency shall submit the name(s) and credentials of biologists who would conduct activities authorized by the BO. No project activities shall begin until Reclamation has received written approval from the USFWS and CDFW that the biologist(s) is approved to conduct the work;

5. A Service-approved biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the California red-legged frog and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action;

6. If trenchless methods cannot be implemented due to geotechnical conditions, and the channel is not dry, water from around the section of trench that is within the actively flowing channels will be diverted. This will reduce the potential for sediment or other pollutants to enter the waterways and to affect downstream resources. Sediment curtains will be placed downstream of the construction zone to prevent disturbed sediment from being transported and deposited outside of the construction zone;

7. If ground water is encountered, or if water remains in the channel after flows are diverted, it will be pumped out of the construction area and into a retention basin constructed of hay bales lined with filter fabric. The pump(s) will be screened according to NMFS fish screening criteria for anadromous salmonids (NMFS, 1997);

8. Silt fencing will be installed in all areas where construction occurs within 100 feet of known or potential California freshwater shrimp or steelhead habitat;

9. A qualified biological monitor will be on site during all activities crossing waterways. The biological monitor will be authorized to halt construction if effects to California freshwater shrimp or salmonids are evident.

Comply with permit conditions; sign-off on inspection report and/or MMRP	1. Member Agency 2. Contractor	1. Prior to Construction 2. During Construction	Novato Sanitary District, Petaluma, Sonoma Valley County Sanitation District, American Canyon, Napa Sanitation District

Impact 3.6.3: Impacts on Reptiles and Amphibians

Construction of the NBWRP Phase 2 has the potential to impact California red-legged frog and western pond turtles in upland and aquatic habitat.

Mitigation Measure 3.6.3

Implement protection measures to avoid and minimize impacts to western pond turtles and California red-legged frogs.

1. The implementation of measures identified for the protection of special-status fish and California freshwater shrimp would also protect California red-legged frogs and western pond turtles within aquatic habitat. When working within 200 feet of stream crossings, workers shall receive specific training in the identification, life history, local project area occurrence, and protection of western pond turtles and California red-legged frogs. Also, to minimize the likelihood of encountering turtles or frogs in upland areas near stream crossings, construction footprints shall be minimized to the greatest extent feasible. Based on reconnaissance-level surveys, if staging and construction activities occur principally within or immediately adjacent to project alignment roads, the project will be outside of frog and pond turtle habitat.

2. Trenchless methods will be employed at crossings presumed or known to support California red-legged frog. In the event trenchless methods cannot be employed, the project proponent would obtain appropriate permit authorizations and implement construction methods per applicable Streambed Alteration Agreements;

3. To the extent practicable, work activities within or adjacent to aquatic habitat that is potentially occupied by red-legged frogs will be completed between April 1 and October 31, which avoids the time period when California red-legged frogs are most likely to move through upland areas.

4. Prior to construction activities at stream crossings where aquatic impacts are expected, a qualified biologist shall perform California red-legged frog and western pond turtle surveys within suitable habitat within projected work areas. If California red-legged frogs or western pond turtles are encountered during construction activities, work in the immediate area shall cease until the area is determined to be free of sensitive species. If a pond turtle nest is located within a work area, a biologist with the appropriate permits may move the eggs to a

suitable facility for incubation, and release hatchlings into the creek system in late fall. If California red-legged frog tadpoles or eggs are found, the biologist shall contact the USFWS to determine if moving any of these life-stages is appropriate.

5. At least 15 days prior to onset of activities, Reclamation or appropriate agency shall submit the name(s) and credentials of biologists who would conduct activities authorized by the BO. No project activities shall begin until Reclamation has received written approval from the USFWS that the biologist(s) is approved to conduct the work;

6. Reclamation or appropriate agency shall ensure the appropriate permit authorizations are secured for stream crossings, and a qualified biological resource monitor shall be present at all times to alert construction crews to the possible presence of California red-legged frog or western pond turtle during construction operations;

7. All trash that could attract predators will be regularly contained and removed from the work site.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Conduct awareness training for construction personnel working within 200 feet of stream crossings. 2. Employ trenchless methods at crossings presumed or known to support California red-legged frogs. 3. Complete all work within or adjacent to aquatic habitat that is inhabited by red-legged frogs between April 1 and October 31 4. Perform California red-legged frog and western pond turtle surveys within suitable habitat within project work area. Cease work until the area is determined to be free of sensitive species if they are encountered. If a pond turtle nest is located within a work area, a biologist with the appropriate permits may move the eggs to a suitable facility for incubation, and release hatchlings into the creek system in late fall. red-legged frog tadpoles or eggs are found, the biologist shall contact the USFWS to determine if moving any of these life-stages is appropriate. 5. Submit the name(s) and credentials of biologists who would conduct activities authorized by the BO. 6. Ensure the appropriate permit authorizations are secured for stream crossings, and a qualified biological resource monitor shall be present at all times to alert construction crews to the possible presence of California red-legged frog or western pond turtle during construction operations. 7. Implement trash removal and trenchless construction methods where necessary.				

Impact 3.6.4: Impacts on Birds

Construction of the NBWRP Phase 2 has the potential to affect special-status marsh birds, burrowing owl, and other nesting birds in and near the project sites.

Mitigation Measure 3.6.4: Impacts to Nesting Birds

The appropriate Member Agency shall implement the following protection elements to avoid disturbing common and special-status nesting birds:

1. Whenever feasible, vegetation shall be removed during the non-breeding season (generally defined as September 1 to January 31).

2. For ground-disturbing activities occurring during the breeding season (generally defined as February 1 to August 31), a qualified wildlife biologist will conduct preconstruction surveys of all potential nesting habitat for birds within 500 feet of earthmoving activities. Construction activities will be constrained to the smallest area possible to minimize disturbance to potential nesting habitat.

3. For work in Ridgway's rail, California black rail, western snowy plover or western burrowing owl habitat, a Service-approved biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the bird species and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action.

4. All work areas, including staging areas will be surveyed prior to construction for bird nests during nesting season. If active bird nests are found during preconstruction surveys, a 500-foot no-disturbance buffer will be created around active raptor nests during the breeding season or until it is determined that all young have fledged. A 250-foot buffer zone will be created around the nests of other special-status birds. For non-special status migratory birds, buffer size will be determined in consultation with CDFW. Buffer zones may be modified in coordination with CDFW based on existing conditions at work locations.

   If preconstruction surveys indicate that nests are inactive or potential habitat is unoccupied during the construction period, no further mitigation is required. Trees and shrubs that have been determined to be unoccupied by special-status birds or that are located at least 500 feet from active nests may be removed.

5. For work in locations that provide habitat for listed marsh birds including Ridgway's rail, and special-status birds such as burrowing owl and black rail, protocol-level surveys will be conducted to determine species presence or absence.

6. If occupied burrowing owl burrows are discovered, construction exclusion areas would be established around the occupied burrows in which no disturbance would be allowed to occur. During the non-breeding season (September 1 through January 31), the exclusion zone would extend 160 feet around occupied burrows. During the breeding season (February 1 through August 31), exclusion areas would extend 250 feet around occupied burrows. Passive relocation of owls is not proposed. A qualified biologist will monitor owl activity on the site to ensure the species is not adversely affected by the project.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Limit vegetation removal to non-breeding season (September 1 to January 31) 2. In the event that construction occurs during the breeding season (February 1 to August 31), conduct surveys of all potential nesting habitat within 500 feet of earthmoving activities.	1. Incorporate into contract specifications. 2. Incorporate survey results and recommendations into contract specifications. 3. Incorporate into contract specifications; sign-off on inspection report and/or MMRP. 4. Comply with CDFW guidelines. Sign-off on inspection report and/ or MMRP.	1. Contractor 2. Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
3. Conduct training sessions for construction personnel specific to identification of sensitive bird habitat. 4. In the event that active bird nests are found during preconstruction surveys, establish a 500-foot buffer around active nest sites. Establish a 250-foot buffer around other active special-status bird nests. Remove trees, if necessary, that are not occupied by special-status birds. 5. Conduct protocol-level surveys in areas that contain suitable habitat for listed marsh birds. 6. Monitor owl activity on construction sites.	5. Incorporate survey results and recommendations into contract specifications 6. Summarize results and recommendations in daily log; sign-off on inspection report and/or MMRP.			

Impact 3.6.5: Impacts to Mammals

Construction of the NBWRP Phase 2 has the potential to affect special-status mammals, including salt marsh harvest mouse, and roosting or breeding bats in and near the project alignments.

Mitigation Measure 3.6.5: Impacts to Mammals

1. The appropriate Member Agency shall implement protection measures to avoid and minimize impacts on salt marsh harvest mouse during construction. Where avoidance of sensitive habitat (i.e., areas in or near pickleweed) is not feasible (e.g., by bridging or bore and jack), consultation with the USFWS would be initiated. If salt marsh harvest mouse is present or presumed to be present in the project area following informal coordination with USFWS, then formal consultation and a Biological Assessment in support of a Biological Opinion may be needed. Such a consultation would proceed as part of the Corps 404 permitting process. Similar coordination and permitting shall be performed with CDFW to address potential impacts to salt marsh harvest mouse. Staging areas shall be located outside potential salt marsh harvest mouse habitat.

2. To avoid potential impacts on salt marsh harvest mouse and Suisun ornate shrew, a qualified biologist shall conduct specific preconstruction surveys to delineate potential habitat in the project area. For areas within 100 feet of potential habitat, the project proponent shall install

exclusionary fences to prevent species movement into the project area, and to prevent spoils from entering the salt marsh. Fencing will consist of a material that does not allow small mammals to pass through or over, and the bottom will be buried to a depth of at least six inches.

3. A qualified biologist shall conduct a training session for construction personnel all working near appropriate habitat prior to the onset of construction activities. At a minimum, the training shall describe the species and their habitat, their importance, and the measures that are being implemented to conserve these species as they relate to the proposed action.

4. Once a Biological Opinion is issued for the work, a qualified biologist will direct crews in the hand removal of pickleweed and remain on-site to provide biological monitoring during construction. The biological monitor shall inspect the exclusion fence to ensure their integrity, and shall conduct an education workshop for contractors outlining species' biology, legislative protection, and construction restrictions to reduce potential impacts. Protective measures for the salt marsh harvest mouse will equally protect the Suisun ornate shrew.

5. At the close of each workday, escape ramps/boards will be provided in all open trenches. Every morning prior to the start of construction, a qualified biologist will inspect all open trenches within 250 feet of emergent pickleweed (*Salicornia pacifica*) habitat for trapped mice. In the event a salt marsh harvest mouse or Suisun ornate shrew is found on-site, with approval from the Service, the biologist will remove animals from trenches before the start of construction.

6. A Service-approved biologist will be onsite during all ground-disturbing activities, including vegetation removal and during morning trench inspections, and otherwise available during the course of the construction work. The biologist will be responsible for informing the crews of the need to halt work if sensitive species are observed, and documenting compliance with the conservation measures and contacting the USFWS if any sensitive species are observed.

7. The appropriate Member Agency shall implement protection measures to avoid and minimize impacts on special-status bats in and near project facilities during construction.

8. In conjunction with breeding bird surveys (**Mitigation Measure 3.6.4**), a qualified biologist will conduct preconstruction surveys for special-status bats at each bridge crossing location and in rural (i.e., non-road) areas where any large trees (e.g., > 24 inches in diameter at breast height) will be removed. If an active roost is observed, a suitably-sized buffer (e.g., 100 to 150 feet) will be placed around the roost if it appears that trenching or other project activities may cause abandonment. Demolition activities must cease until juvenile bats are self-sufficient and will not be directly or indirectly impacted by activities.

Impact 3.6.6: Impacts to Rare Plants

Project construction could result in impacts to listed and other special-status plants.

Mitigation Measure 3.6.6: Impacts to Rare Plants

Before the initiation of any vegetation removal or ground-disturbing activities in areas that provide suitable habitat for special-status plants, the following measures shall be implemented:

1. A qualified botanist will conduct appropriately-timed surveys for special-status plant species, including those identified in Appendix 3.6C, in all suitable habitat that would be potentially disturbed by the project, including staging areas.

2. Surveys shall be conducted following the most recent CDFW- or other approved protocol.

3. If no special-status plants are found during focused surveys, the botanist shall document the findings in a letter to the appropriate agencies and no further mitigation will be required.

4. If special-status plants are found during focused surveys, the following measures shall be implemented:

    a. Information regarding the special-status plant population shall be reported to the CNDDB.

    b. If the populations can be avoided during project implementation, they shall be clearly marked in the field by a qualified botanist and avoided during construction activities. Before ground clearing or ground disturbance, all on-site construction personnel shall be instructed as to the species' presence and the importance of avoiding impacts to this species and its habitat.

    c. If special-status plant populations cannot be avoided, consultations with CDFW and/or USFWS would be required. A plan to compensate for the loss of special-status plant species could be required, detailing appropriate replacement ratios, methods for implementation, success criteria, monitoring and reporting protocols, and contingency measures that would be implemented if the initial mitigation fails; the plan would be developed in consultation with the appropriate agencies prior to the start of local construction activities.

    d. If mitigation is required, the project proponent shall maintain and monitor the mitigation area for 5 years following the completion of construction and restoration activities. Monitoring reports shall be submitted to the resource agencies at the completion of restoration and for 5 years following restoration implementation. Monitoring reports shall include photo-documentation, planting specifications, a site layout map, descriptions of materials used, and justification for any deviations from the mitigation plan.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Conduct plant surveys. 2. Implement measures if special-status plants are present. 3. Mark special status plants and inform construction personnel of their presence. 4. Consult with CDFW and/or USFWS if special-status plants cannot be avoided. 5. If compensatory mitigation is required, monitor mitigation area.	1. Comply with CDFW protocol. Incorporate results and recommendations into contract specifications. In the event that no special-status plants are present, document findings in a letter to the appropriate resources agency. 2. Report information regarding present special-status plants to CNDDB. 3. Sign-off on inspection report and/or MMRP. 4. Coordination with CDFW and or USFWS; compliance with recommendations; development of a compensation plan. 5. Submit annual monitoring reports to resource agencies that include photo documentation, planting specifications, site layout map.	1. Qualified Botanist 2. Qualified Botanist 3. Qualified Botanist 4. Prior to Construction 5. 5 Years Following Construction	Novato Sanitary District, Petaluma, Sonoma Valley County Sanitation District, Sonoma County Water Agency, American Canyon, Napa Sanitation District

Impact 3.6.7: Impacts on Heritage and Other Significant Trees

The proposed project could affect heritage and other significant trees.

Mitigation Measure 3.6.7

The following measures will be implemented to avoid or reduce impacts to heritage or other significant trees:

1. If trees are identified for removal or trimming, a certified arborist will inventory these trees, with the results of the inventory providing species, size (diameter at breast height), and number of protected trees. Also, in consultation with the appropriate jurisdiction, the arborist will determine if any are heritage or landmark trees.

2. If any protected trees are identified that will be potentially removed or damaged by construction of the proposed project, design changes will be implemented where feasible to avoid the impact.

3. Any protected trees that are removed will be replaced per applicable City and County tree protection ordinances (see Appendix 3.6A). Foliage protectors (cages and tree shelters) will be installed to protect the planted trees from wildlife browse. The planted trees will be monitored as required by the ordinance, or regularly during a minimum two-year establishment period and maintenance during the plant establishment period will include irrigation. After the establishment period, the native tree plantings are typically capable of survival and growth without supplemental irrigation.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Inventory trees. 2. Consult with counties to determine if any identified trees are landmark trees. 3. Replace removed trees. 4. Monitor replacement trees.	1. Transportation and Traffic

Impact 3.8.1: Temporary Congestion and Delays

Construction of NBWRP Phase 2 would have temporary and intermittent effects on traffic and transportation conditions in the project area.

Mitigation Measure 3.8.1a

The appropriate Member Agency for each NBWRP Phase 2 element shall obtain and comply with local and Caltrans road encroachment permits for roads that are affected by construction activities.

The *Work Area Protection and Traffic Control Manual* includes requirements to ensure safe maintenance of traffic flow through or around the construction work zone, and safe access of police, fire, and other rescue vehicles (CJUTCC, 2014). In addition, the Traffic Management Plan (subject to local jurisdiction review and approval, or Caltrans for State roadways) required by **Mitigation Measure 3.8.1b**, below, would direct how traffic flow is safely maintained during project construction.

Mitigation Measure 3.8.1b

The construction contractor for each NBWRP Phase 2 element shall prepare and implement a Traffic Control/Traffic Management Plan subject to approval by the appropriate local jurisdiction prior to construction. The plan – prepared in accordance with the California *Manual on Uniform Traffic Control Devices* – shall be subject to approval by Caltrans for work occulting in Caltrans facilities. The plan shall:

1. Identify hours of construction (between 7:00 AM and 7:00 PM; no construction shall be permitted between 10:00 PM and 7:00 AM unless stipulated in coordination with responsible jurisdiction on a case-by-case basis);

2. Identify hours for deliveries;

3. Include a discussion of haul routes, limits on the length of open trench, work area delineation, traffic control and flagging;

4. Identify all access and parking restriction, pavement markings and signage requirements (e.g., speed limit, temporary loading zones);

5. Layout a plan for notifications and a process for communication with affected residents and businesses prior to the start of construction. Advance public notification shall include posting of notices and appropriate signage of construction activities. The written notification shall include the construction schedule, the exact location and duration of activities within each street (i.e., which lanes and access point/driveways would be blocked on which days and for how long), and a toll-free telephone number for receiving questions or complaints;

6. Include a plan to coordinate all construction activities with emergency service providers in the area at least one month in advance. Emergency service providers shall be notified of the timing, location, and duration of construction activities. All roads shall remain passable to emergency service vehicles at all times;

7. Include a plan to coordinate all construction activities with the appropriate local school district at least two months in advance. The school district shall be notified of the timing, location, and duration of construction activities. Coordinate with the appropriate local school district to identify peak circulation periods at schools along the alignment(s) (i.e., the arrival and departure of students), and require their contractor to avoid construction and lane closures during those periods. The construction contractor for each project component shall be required to maintain vehicle, pedestrian, and school bus service during construction through inclusion of such provisions in the construction contract. The assignment of temporary crossing guards at designated intersections may be needed to enhance pedestrian safety during project construction;

8. Include the requirement that all open trenches be covered with metal plates at the end of each workday to accommodate traffic and access; and

9. Specify the street restoration requirements pursuant to agreements with the local jurisdictions.

Mitigation Measure 3.8.1c

The appropriate Member Agency for each NBWRA Phase 2 element shall identify all roadway locations where special construction techniques (e.g., horizontal boring, directional drilling or night construction) will be used to minimize impacts to traffic flow.

Mitigation Measure 3.8.1d

The appropriate Member Agency for each NBWRA Phase 2 element shall develop circulation and detour plans to minimize impact to local street circulation. This may include the use of signing and flagging to guide vehicles through and/or around the construction zone.

Mitigation Measure 3.8.1e

The appropriate Member Agency for each NBWRA Phase 2 element shall encourage construction crews to park at staging areas to limit lane closures in the public right-of-way.

Mitigation Measure 3.8.1f

The appropriate Member Agency for each NBWRA Phase 2 element shall consult with the appropriate public transit service providers at least one month prior to construction to coordinate bus stop relocations (as necessary) and to reduce potential interruption of transit service.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Obtain local road encroachment permits for roads that are affected by construction activities. 2. Implement a traffic control plan which includes the following measures such as identifying hours of construction and deliveries; identifying access and parking restriction, pavement markings and signage requirements; and planning for notifications; coordinating all construction activities with emergency service providers; 3. Identify all roadway locations where special construction techniques (e.g., horizontal boring,	1. Incorporate permit regulations into contract specifications. 2. directional drilling or night construction) will be used to minimize impacts to traffic flow. 4. Develop circulation and detour plans to minimize impact to local street circulation. This may include the use of signing and flagging to guide vehicles through and/or around the construction zone. 5. Encourage construction crews to park at staging areas to limit lane closures in the public right-of-way. 6. Consult with the appropriate public transit service providers at least one month prior to construction to coordinate bus stop relocations (as necessary) and to reduce potential interruption of transit service.				

Impact 3.8.2: Temporary Disruption to Access

Construction of NBWRP Phase 2 would temporarily disrupt circulation patterns near sensitive land uses (schools, hospitals, fire stations, police stations, and other emergency providers).

Mitigation Measure 3.8.2a

Pipeline construction near schools shall occur when school is not in session (i.e., summer or holiday breaks). If this is not feasible, a minimum of two months prior to project construction, the appropriate Member Agency for each NBWRA Phase 2 element shall coordinate with the appropriate local school district to identify peak circulation periods at schools along the alignment(s) (i.e., the arrival and departure of students), and require their contractor to avoid construction and lane closures during those periods.

Mitigation Measure 3.8.2b

A minimum of two months prior to project construction, the appropriate Member Agency for each NBWRP Phase 2 element shall coordinate with the appropriate local school district to identify alternatives to their Safe Routes to School program, alternatives for the school busing

routes and stop locations, and other circulation provisions, as part of the Traffic Control/Traffic Management Plan (see **Mitigation Measure 3.8.1a**).

Mitigation Measure 3.8.2c

Implement **Mitigation Measure 3.8.1b**.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Restrict pipeline construction near schools to times when school is not in session (i.e., summer or holiday breaks). If this is not feasible, coordinate with the appropriate local school district a minimum of two months prior to project construction to identify peak circulation periods at schools along the alignment(s) (i.e., the arrival and departure of students), and require the contractor to avoid construction and lane closures during those periods.	1. Incorporate restrictions for schools into construction schedule and construction specifications.	1. Member Agency	1. Prior to and During Construction	Member Agency

Impact 3.8.3: Temporary Disruption to Access

Construction of NBWRP Phase 2 would have temporary effects on alternative transportation or alternative transportation facilities.

Mitigation Measure 3.8.3

Implement **Mitigation Measure 3.8.1f**.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.8.1f.	1. Incorporate transit service notification into contract specifications.	1. Member Agency	1. Prior to Construction	Member Agency

Impact 3.8.4: Temporary Potential Traffic Hazards

Construction of NBWRP Phase 2 would temporarily increase the potential for accidents on project roadways.

Mitigation Measure 3.8.4

Implement **Mitigation Measure 3.8.1b** through **3.8.1f**.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.8.1b. 2. Implement Mitigation Measure 3.8.1c. 3. Implement Mitigation Measure 3.8.1d. 4. Implement Mitigation Measure 3.8.1e. 5. Implement Mitigation Measure 3.8.1f.	1. Incorporate traffic control plan measures into contract specifications. 2. Incorporate techniques into contract specifications 3. Incorporate plans into contract specifications. 4. Incorporate parking restrictions into contract specifications. 5. Incorporate transit service notification into contract specifications.	1. Member Agency 2. Contractor/ Member Agency 3. Member Agency 4. Contractor 5. Member Agency	1. Prior to and During Construction 2. Prior to and During Construction 3. Prior to and During Construction 4. During Construction 5. Prior to Construction	Member Agency

Impact 3.8.5: Road Wear

Construction of the NBWRP Phase 2 would increase wear and tear on the designated haul routes used by construction vehicles to access the project work sites.

Mitigation Measure 3.8.5

Roads damaged by construction shall be repaired to a structural condition equal to that which existed prior to construction activity as per conditions of the encroachment permit (see **Mitigation Measure 3.8.1a**).

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Obtain local road encroachment permits for roads that are affected by construction activities.	1. Incorporate permit regulations into contract specifications.	1. Member Agency	1. Prior to Construction	Member Agency

Air Quality

Impact 3.9.1: Construction Emissions of Criteria Pollutants

Construction of the NBWRP Phase 2 projects would result in criteria pollutant emissions that could exceed air quality standards or contribute substantially to an existing or projected air quality violation.

Mitigation Measure 3.9.1-1a: BAAQMD Basic Construction Measures

To limit dust, criteria pollutants, and precursor emissions associated with construction, the following BAAQMD-recommended Basic Construction Measures shall be implemented and included in all contract specifications for projects constructed under the Phase 2 Program:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).

5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

7. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

8. Post a publicly visible sign with the telephone number and persons to contact at the North Bay Water Reuse Authority and/or the applicable member agency regarding dust complaints. These persons shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

Mitigation Measure 3.9.1-1b: Additional Construction

The North Bay Water Reuse Authority and/or applicable member agency shall implement all feasible measures from the BAAQMD's Additional Construction Mitigation Measures listed below:

1. All exposed surfaces shall be watered at a frequency adequate to maintain minimum soil moisture of 12 percent. Moisture content can be verified by lab samples or moisture probe.

2. All excavation, grading, and/or demolition activities shall be suspended when average wind speeds exceed 20 mph.

3. Wind breaks (e.g., trees, fences) shall be installed on the windward side(s) of actively disturbed areas of construction. Wind breaks should have at maximum 50 percent air porosity.

4. Vegetative ground cover (e.g., fast-germinating native grass seed) shall be planted in disturbed areas as soon as possible and watered appropriately until vegetation is established.

5. The simultaneous occurrence of excavation, grading, and ground-disturbing construction activities on the same area at any one time shall be limited. Activities shall be phased to reduce the amount of disturbed surfaces at any one time.

6. All trucks and equipment, including their tires, shall be washed off prior to leaving the site.

7. Site accesses to a distance of 100 feet from the paved road shall be treated with a 6 to 12-inch compacted layer of wood chips, mulch, or gravel.

8. Sandbags or other erosion control measures shall be installed to prevent silt runoff to public roadways from sites with a slope greater than one percent.

9. Minimize the idling time of diesel powered construction equipment to 2 minutes.

10. The off-road diesel-powered equipment (more than 50 horsepower) to be used in the construction of any project (i.e., owned, leased, and subcontractor vehicles) under the Phase 2 Program shall be equipped with engines that achieve USEPA Tier 4 emissions standards.

11. Use low volatile organic compound (i.e., ROG) coatings beyond the local requirements (i.e., Regulation 8, Rule 3: Architectural Coatings).

12. Require that all construction equipment, diesel trucks, and generators be equipped with Best Available Control Technology for emission reductions of NOx and PM10.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency

Impact 3.9.3: Conflict with Clean Air Plan

Construction of the NBWRP Phase 2 projects would result in emissions that could conflict with the 2017 Clean Air Plan.

Mitigation Measure 3.9.3

Implement **Mitigation Measures 3.9.1-1a** and **3.9.1-1b**.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.9.1-1a. 2. Implement Mitigation Measure 3.9.1-1b.	1. Review contract specifications.	1. Contractor	1. Design and During Construction	Member Agency

Impact 3.9.4: Exposure of Sensitive Receptors

Construction of the NBWRP Phase 2 could expose sensitive receptors to toxic air contaminants, including diesel particulate matter emissions.

Mitigation Measure 3.9.4

Implement **Mitigation Measure 3.9.1-1b**.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.9.1-1b.	1. Review contract specifications.	1. Contractor	1. Design and During Construction	Member Agency

Noise

Impact 3.11.1: Temporary Construction Noise

Construction activity would result in a substantial temporary increase in ambient noise levels in the vicinity of Program projects during construction.

Mitigation Measure 3.11.1: Construction Noise Reduction Measures (applies to Marin County Lower Novato Creek Project 1- Distribution Project)

The applicable Member Agency shall develop and implement a Construction Noise Reduction Plan. The Construction Noise Reduction Plan shall be submitted to the County of Marin for review and approval prior to construction. A disturbance coordinator shall be designated for the project to implement the provisions of the plan. At a minimum, the Construction Noise Reduction Plan shall implement the following measures:

1. Distribute to the potentially affected residences and other sensitive receptors within 100 feet of project construction boundary a "hotline" telephone number, which shall be attended during active construction working hours, for use by the public to register complaints. The distribution shall identify a noise disturbance coordinator who would be responsible for responding to any local complaints about construction noise. The disturbance coordinator would determine the cause of the noise complaints and institute feasible actions warranted to correct the problem. All complaints shall be logged noting date, time, complainant's name, nature of complaint, and any corrective action taken. The distribution shall also notify residents adjacent to the project site of the construction schedule.

2. All construction equipment shall have intake and exhaust mufflers recommended by the manufacturers thereof, to meet relevant noise limitations.

3. Maintain maximum physical separation, as far as practicable, between noise sources (construction equipment) and sensitive noise receptors. Separation may be achieved by locating stationary equipment to minimize noise impacts on the community.

4. Impact tools (e.g., jack hammers, pavement breakers) used during construction activities will be hydraulically or electrically powered where feasible to avoid noise associated with compressed air exhaust from pneumatically powered tools. Where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used.

5. Use construction noise barriers such as paneled noise shields, blankets, or enclosures adjacent to noisy stationary equipment. Noise control shields, blankets or enclosures shall be made featuring a solid panel and a weather-protected, sound-absorptive material on the construction-activity side of the noise shield.

6. Truck hauling access routes to project sites along local roadways shall use roadways with the fewest residences feasible to minimize vehicle noise exposure to nearby residences.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Develop and Implement Construction Noise Reduction Plan. 2. Distribute "hotline" telephone numbers to sensitive receptors. 3. Designate a noise disturbance coordinator. 4. Use appropriate equipment. 5. Appropriately locate all stationary noise-generating equipment. 6. Designate roadways with fewest residences feasible.	1. Incorporate into contract specifications; sign-off on inspection report and/or MMRP. 2. Sign-off on inspection report and/or MMRP. 3. Incorporate into contract specifications; sign-off on inspection report and/or MMRP. 4. Incorporate into contract specifications; sign-off on inspection report and/or MMRP. 5. Incorporate into contract specifications; sign-off on inspection report and/or MMRP. 6. Incorporate into contract specifications; sign-off on inspection report and/or MMRP.	1. Contractor 2. Contractor 3. Contractor 4. Contractor 5. Contractor 6. Contractor 7. Contractor	1. Prior to and During Construction 2. At least two weeks Prior to Construction 3. Prior to Construction 4. During Construction 5. During Construction 6. During Construction	Novato Sanitary District

Impact 3.11.2: Violation of Established Standards during Construction

Construction activity would violate standards established in the local general plans or noise ordinances, and/or would adversely affect nearby sensitive receptors.

Mitigation Measure 3.11-2a: Construction Time-of-Day Restriction

All NBWRP Phase 2 project construction activities shall be limited to the acceptable hours identified within the applicable jurisdiction policies and/or municipal codes unless granted a special exemption by the applicable jurisdiction.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement acceptable construction hours.	1. Incorporate into construction specifications; Sign-off inspection report and/or MMRP.	1. Contractor	1. Prior to and During Construction	Member Agency

Impact 3.11.3: Temporary Vibration Impacts

Construction activity could expose sensitive receptors to excessive ground-borne vibration levels.

Mitigation Measure 3.11-3: Vibration Control

The construction contractor shall use a trenchless technology (e.g., horizontal directional drill, lateral drilling, etc.) other than jack-and-bore when there are historical building structures within 100 feet of the proposed activities and/or any building structure within 50 feet of the proposed activities. If the contractor provides the applicable Member Agency with acceptable documentation indicating that alternative trenchless technology is not feasible for the given crossing, the contractor shall develop and implement a Construction Vibration Mitigation Plan to minimize construction vibration damage using all reasonable and feasible means available, including siting the jack-and-bore as far as possible from all nearby structures. The plan shall provide a procedure for establishing thresholds and limiting vibration values for potentially affected structures based on an assessment of each structure's ability to withstand the loads and displacements due to construction vibrations. The plan shall also include the development of a vibration monitoring plan to be implemented during construction of a particular crossing.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement trenchless technology, when appropriate. 2. Develop a Construction Vibration Mitigation Plan in the event that trenchless technology is not feasible.	1. Incorporate into contract specifications. 2. Incorporate into contract specifications.	1. Contractor 2. Contractor	1. During Construction 2. Prior to and During Construction	Sonoma County Water Agency

Impact 3.11.5: Violation of Established Standards during Operations

Expose people to or generate noise levels in excess of standards established in the local general plan, noise ordinance, or applicable standards of other agencies during operations.

Mitigation Measure 3.11-5: Stationary – Source Noise Controls

The applicant applicable Member Agency shall retain an acoustical engineer to design stationary -source noise controls and ensure the applicable noise standards are met. Prior to operations of the stationary noise source, the applicable Member Agency shall conduct a single 24-hour noise monitoring survey to ensure compliance with local noise standards.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Design stationary – source noise controls and ensure applicable noise standards are met. 2. Conduct noise monitoring survey.	1. Incorporate into construction specifications; Sign-off inspection report and/or MMRP. 2. Incorporate survey results and recommendations into project contract specifications.	1. Contractor/ Acoustical Engineer 2. Contractor/ Acoustical Engineer	1. Prior to Construction 2. After Construction	Sonoma County Water Agency

Hazards and Hazardous Materials

Impact 3.12.2: Emit Hazardous Materials near a School

Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.

Mitigation Measure 3.8.1b

Implement Mitigation Measure 3.8.1b as described in Section 3.8, Transportation and Traffic.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement a traffic control plan which includes the following measures such as identifying hours of construction and deliveries; identifying access and parking restriction, pavement markings and signage requirements; and planning for notifications; coordinating all construction activities with emergency service providers.	1. Incorporate traffic control plan measures into contract specifications.	1. Member Agency	1. Prior to Construction	Petaluma, American Canyon

Impact 3.12.3: Create Significant Hazards to the Public

Be located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment.

Mitigation Measure 3.12-3a: Health and Safety Plan

The construction contractor(s) shall prepare and implement a site-specific Health and Safety Plan as required by and in accordance with 29 CFR 1910.120 to protect construction workers and the public during all excavation and grading activities. The Health and Safety Plan shall include, but is not limited to, the following elements:

1. Designation of a trained, experienced site safety and health supervisor who has the responsibility and authority to develop and implement the site health and safety plan;

2. A summary of all potential risks to construction workers and maximum exposure limits for all known and reasonably foreseeable site chemicals;

3. Specified personal protective equipment and decontamination procedures, if needed;

4. Emergency procedures, including route to the nearest hospital; and

5. Procedures to be followed in the event that evidence of potential soil contamination (such as soil staining, noxious odors, debris or buried containers) is encountered. These procedures shall be in accordance with hazardous waste operations regulations and specifically include, but are not limited to, the following: immediately stopping work in the vicinity of the unknown hazardous materials release, notifying the appropriate regulatory agency, and retaining a qualified environmental firm to perform sampling and remediation, as needed.

Mitigation Measure 3.12-3b: Soil and Groundwater Management Plan

In support of the Health and Safety Plan described above, the construction contractor(s) shall develop and implement a Soil Management Plan that includes materials testing and disposal procedures specifying how the construction contractor will remove, handle, transport, and dispose of all excavated material in a safe, appropriate, and lawful manner. The plan shall identify protocols for soil testing, list action levels[2] to determine whether the soil may be reused or must be disposed of at an offsite facility permitted to accept the materials, identify the approved disposal site, and include written documentation that the disposal site will accept the waste. Contract specifications shall mandate full compliance with all applicable local, state, and federal regulations related to the identification, transportation, and disposal of hazardous materials, including those encountered in excavated soil.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Prepare and implement a site-specific Health and Safety Plan in accordance with 29 CFR 1910.120.	1. Incorporate plan requirements into construction specifications. 2. Incorporate plan	1. Contractor 2. Contractor	1. Prior to and During Construction 2. Prior to and During	Petaluma, American Canyon

[2] Action levels would include San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels to identify soil requiring cleanup, and landfill hazardous and designated waste acceptance criteria.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
2. Develop and implement a Soil Management Plan.	requirements into construction specifications.		Construction	

Impact 3.12.5: Interfere with Emergency Response Plan

Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan during construction.

Mitigation Measure 3.8.1b through 3.8.1f

Refer to Impact 3.8.1 in Section 3.8, Transportation and Traffic.

Impact 3.12.6: Wildland Fire Hazard

Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands.

Mitigation Measure 3.12.6: Fire Safety Plan

Prior to construction, the construction contractor for each project component that would be within or adjacent to an area designated as susceptible to wildland fires shall prepare and implement a fire safety plan to reduce the potential for starting wildland fires during construction activities. The fire safety plan shall provide, but not be limited to, the following elements:

> In consultation with local fire agencies, a Fire Safety Plan will be developed for each of the service areas designated as susceptible to wildland fires. The Fire Safety Plans will describe various potential scenarios and action plans in the event of a fire. During project construction, all staging areas, welding areas, or areas slated for development using spark-producing equipment will be cleared of dried vegetation or other material that could ignite. Any construction equipment that includes a spark arrestor shall be equipped with a spark arrestor in good working order. All vehicles and crews working at the project sites shall have access to functional fire extinguishers at all times. In addition, construction crews will be required to have a spotter during welding activities to look out for potentially dangerous situations, including accidental sparks.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Prepare and implement a Fire Safety Plan.	1. Incorporate Fire Safety Plan into construction specifications.	1. Contractor	1. Prior to Construction	Marin Municipal Water District, Petaluma

Public Services and Utilities

Impact 3.13.1: Temporary Effect on Response Times for Emergency Service Providers

Project construction activities could temporarily affect response times for emergency service providers.

Mitigation Measure 3.13.1

The Member Agencies or Participating Municipalities will coordinate with local emergency service providers in its service area to inform them of the proposed construction activities and schedule, and provide temporary alternate access routes around construction areas as necessary.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Coordinate with local emergency providers to inform them of the proposed construction activities and schedule. 2. Provide alternate routes for emergency service providers around construction areas as necessary.	1. Incorporate into contract specifications 2. Sign-off on inspection report and/or MMRP	1. Member Agency/ Contractor 2. Contractor	1. Prior to construction 2. During Construction	Marin Municipal Water District, Petaluma, Sonoma Valley County Sanitation District, American Canyon

Impact 3.13.2: Short-term Police and Fire Assistance

Project construction activities could require short-term police and fire protection services to assist in traffic management or in the event of an accident.

Mitigation Measure 3.13.2

The Member Agency (i.e., project owner) or it construction contractor shall provide 72-hour notice to the local emergency service providers prior to construction of individual pipeline segments. The Member Agency or its construction contractor shall provide, upon request, a copy of the Traffic Control/Traffic Management Plan to the emergency service agencies for review prior to construction. Discussion on the Traffic Control/Traffic Management Plan is provided in Section 3.8, Transportation and Traffic.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Provide notice to local fire and police agencies to notify them of construction of individual segments of	1. Sign-off on inspection report and/or MMRP. 2. Sign-off on	1. Member Agency/ Contractor 2. Member Agency/ Contractor	1. 72 hours Prior to Construction at each site. 2. Prior to	Marin Municipal Water District, Novato Sanitary District, Petaluma, Sonoma Valley

pipeline. 2. Provide Traffic Control Plan to local emergency service providers for review.	inspection report and/or MMRP.		Construction.	County Sanitation District, Sonoma County Water Agency, American Canyon

Impact 3.13.3: Temporary Disruption to Utility Services

Project construction could result in temporary, planned, or accidental disruption to utility services.

Mitigation Measure 3.13.3

The Member Agencies (i.e., project owner) or its construction contractor shall identify utilities along the proposed pipeline routes and project sites prior to construction and implement the following measures:

a. Utility excavation or encroachment permits shall be obtained as required from the appropriate agencies. These permits include measures to minimize utility disruption. The service provider and its contractors shall comply with permit conditions regarding utility disruption.

b. Utility locations shall be verified through the use of the Underground Service Alert services and/or field survey.

c. As necessary, detailed specifications shall be prepared as part of the design plans to include procedures for the excavation, support, and fill of areas around utility cables and pipes. All affected utility services shall be notified of construction plans and schedule. Arrangements shall be made with these entities regarding protection, relocation, or temporary disconnection of services.

d. In areas where the pipeline would traverse parallel to underground utility lines within five feet, the project applicant shall employ special construction techniques, such as trench wall-support measures to guard against trench wall failure and possible resulting loss of structural support for the excavated areas.

e. Residents and businesses in the project corridor shall be notified of any planned utility service disruption two to four days in advance, in conformance with county and state standards.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Acquire utility	1. Comply with	1. Contractor/	1. Prior to	Marin Municipal

Cultural Resources

Impact 3.14.1: Impacts or Adverse Effects to Archaeological Resources, Human Remains, and Tribal Cultural Resources

This impact discussion focuses on archaeological resources, human remains, and tribal cultural resources that are considered historical resources or unique archaeological resources (for the purposes of CEQA), or historic properties (for the purposes of the NHPA).

Mitigation Measure 3.14.1a: Inadvertent Discoveries

If prehistoric or historic-era archaeological resources are encountered, the contractor shall immediately cease all work within 100 feet of the discovery. Prehistoric archaeological materials might include obsidian and chert flaked-stone tools (e.g., projectile points, knives, scrapers) or toolmaking debris; culturally darkened soil ("midden") containing heat-affected rocks, artifacts, or shellfish remains; and stone milling equipment (e.g., mortars, pestles, handstones, or milling slabs); and battered stone tools, such as hammerstones and pitted stones. Historic-era materials might include stone, concrete, or adobe footings and walls; filled wells or privies; and deposits of metal, glass, and/or ceramic refuse. After cessation of excavation, the contractor shall

immediately contact the NBWRA and the appropriate Member Agency. The contractor shall not resume work until authorization is received from the appropriate Member Agency.

1. In the event of unanticipated discovery of archaeological resources during construction, the Member Agency shall retain the services of a qualified professional archaeologist (defined as an archaeologist that meets the Secretary of the Interior's Standards) to evaluate the significance of the find prior to resuming any activities.

2. If it is determined that the Project could damage a historical resource or a unique archaeological resource (pursuant to CEQA) or a historic property (pursuant to NHPA), mitigation shall be implemented with a preference for preservation in place. This may be accomplished through planning construction to avoid the resource; incorporating the resource within open space; capping and covering the resource; or deeding the site into a permanent conservation easement. If the site cannot be avoided, a qualified professional archaeologist shall prepare and implement a detailed research design and treatment plan in consultation with the Member Agency and the affiliated Native American tribe(s), as appropriate. Treatment for most resources would consist of (but would not be not limited to) sample excavation, artifact collection, site documentation, and historical research, with the aim to target the recovery of important scientific data contained in the portion(s) of the significant resource to be impacted by the Project. The treatment plan shall include provisions for analysis of data in a regional context, reporting of results within a timely manner, curation of artifacts and data at an approved facility, and dissemination of reports to local and state repositories, libraries, and interested professionals.

Mitigation Measure 3.14.1b: Discovery of Human Remains

If potential human remains are encountered, the appropriate Member Agency shall halt work in the vicinity of the find and contact the county coroner in accordance with PRC Section 5097.98 and Health and Safety Code Section 7050.5. If the coroner determines the remains are Native American, the coroner shall contact the Native American Heritage Commission. As provided in PRC Section 5097.98, the Commission shall identify the person or persons believed to be most likely descended from the deceased Native American. The most likely descendent makes recommendations for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in PRC Section 5097.98.

Mitigation Measure 3.14.1c: Cultural Resources Assessment for Staging Areas

When locations for staging are defined, the staging areas should be subject to a cultural resources investigation completed by a qualified professional archaeologist that includes, at a minimum:

1. An updated records search at the NWIC;

2. An intensive survey of the staging areas;

3. A report disseminating the results of this research;

4. Recommendations to avoid impacts to identified resources that qualify as historical resources, unique archaeological resources, tribal cultural resources, or historic properties; and

5. If resources cannot be avoided, provide recommendations for additional cultural resources work necessary to mitigate any adverse impacts to recorded and/or undiscovered cultural resources.

Mitigation Measure 3.14.1d: Cultural Resources Monitoring

Prior to authorization to proceed, or issuance of permits, the appropriate Member Agency shall prepare a cultural resources monitoring plan. Monitoring shall be required for all surface alteration and subsurface excavation work including trenching, boring, grading, use of staging areas and access roads, and driving vehicles and equipment within all areas delineated as sensitive for cultural resources. A qualified professional archaeologist shall prepare the plan. The plan shall address (but not be limited to) the following issues:

1. Training program for all construction and field workers involved in site disturbance;

2. Person(s) responsible for conducting monitoring activities, including Native American monitors, if necessary;

3. Person(s) responsible for overseeing and directing the monitors;

4. Schedule for submittal of monitoring reports and person(s) responsible for review and approval of monitoring reports;

5. Procedures and construction methods to avoid sensitive cultural resource areas (i.e. boring conduit underneath recorded or discovered cultural resource site);

6. Clear delineation and fencing of sensitive cultural resource areas requiring monitoring;

7. Physical monitoring boundaries;

8. Protocol for notifications in case of encountering of cultural resources, as well as methods of dealing with the encountered resources (e.g., collection, identification, curation);

9. Methods to ensure security of cultural resources sites;

10. Protocol for notifying local authorities (i.e. Sheriff, Police) should site looting and other illegal activities occur during construction.

If an intact archaeological deposit is encountered, all soil-disturbing activities within 100 feet of the find shall cease until the deposit is evaluated. The archaeological monitor shall immediately notify the appropriate Member Agency of the encountered archaeological resource. The protocol outlined in **Mitigation Measure 3.14.1a** and **Mitigation Measure 3.14.1b** would be implemented.

Mitigation Measure 3.14.1f: Program Elements and Storage Alternative: Cultural Resources Assessment

If this alternative is selected, the appropriate Member Agency will conduct a cultural resources investigation prepared by a qualified professional archaeologist that includes, at a minimum:

1. An updated records search at the NWIC;
2. An intensive cultural resources survey of the Project area;
3. A report disseminating the results of this research;
4. Recommendations to avoid impacts to identified resources that qualify as historical resources, unique archaeological resources, tribal cultural resources, or historic properties; and
5. Recommendations for additional cultural resources work necessary to mitigate any adverse impacts to recorded and/or undiscovered cultural resources.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Cease work within 100 feet of a find and inform the appropriate Member Agency in the event of an inadvertent discovery of cultural resources. 2. In the event of discovery of human remains, cease work and contact county coroner and NAHC if necessary. 3. Conduct cultural resources investigation for staging areas. 4. Prepare Cultural Resources Monitoring Plan. 5. Conduct a project-level Cultural Resources Assessment for program-level areas.	1. Copies of DPR 422 or 523 shall be retained in Member Agency files; incorporate recommendations for design modification if necessary. 2. Sign-off on inspection report and/ or MMRP; coordinate with NAHC. 3. Incorporate into contract specifications. 4. Incorporate into contract specifications. 5. Incorporate into contract specifications, and make recommendations for design modification if necessary.	1. Contractor/ Member Agency 2. Contractor/ Member Agency 3. Qualified Archaeologist 4. Qualified Archaeologist 5. Qualified Archaeologist	1. During Construction 2. During Construction 3. Prior to Construction 4. Prior to Construction 5. Following Project Design; Prior to Construction	Member Agency

Recreation

Impact 3.15.1: Temporary Disturbance

Project construction could result in short-term disturbance adjacent to recreational facilities.

Mitigation Measure 3.15.1a

The appropriate Member Agency shall coordinate with the appropriate local and regional agencies to identify detour routes for the bikeways and trails during construction where feasible, as part of the Traffic Control/Traffic Management Plan (see **Measure 3.8.1**). In addition, the Member Agency shall conduct outreach to notify the public of closures, detours, etc.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Identify and establish detours for disrupted bikeways and trails. 2. Implement Mitigation Measure 3.8.1a. 3. Conduct outreach to notify the public of closures, detours, etc.	1. Coordination with local and regional agencies. 2. Incorporate in contract specifications and Sign-off on inspection report and/ or MMRP that measures are being implemented. 3. Incorporate into contract specifications; sign-of on inspection report and/or MMRP.	1. Contractor/ Member Agency 2. Contractor 3. Contractor	1. Prior to and During Construction 2. Design and Prior to Construction 3. Prior to Construction	Petaluma, Sonoma Valley County Sanitation District, American Canyon

Aesthetics

Impact 3.16.2: Impact to Views Along Scenic Roadways

Implementation of NBWRP could affect views along eligible or designated Caltrans Scenic Highways or locally-defined scenic routes.

Mitigation Measure 3.16.2a

Following construction activities, disturbed areas shall be restored to baseline conditions, by repaving roadways, replanting trees, and/or reseeding with a native seed mix typical of the immediately surrounding area.

Mitigation Measure 3.16.2b

Berms around constructed reservoirs shall be vegetated with native seed mixes to soften the visual effect of the reservoirs from adjacent roadways.

Mitigation Measure 3.16.2c

Design elements shall be incorporated to enhance visual integration of the pump stations and other above ground structures with their surroundings. Proposed facilities shall be painted low-glare earth-tone colors that blend with the surrounding terrain. Highly reflective building materials and/or finishes shall not be used in the designs for proposed facilities.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Restore disturbed areas to baseline conditions. 2. Vegetate berms with native seed mixes. 3. Paint facilities low-glare earth-tone colors and refrain from using highly reflective building materials.	1. Inspect final site conditions after construction and verify its condition is it equivalent to that prior to construction. Incorporated into construction specifications. 2. Review construction specifications and landscape design. 3. Review construction specifications.	1. Contractor/ Member Agency 2. Contractor 3. Contractor	1. After Construction 2. Design and During Construction 3. Design and During Construction	Novato Sanitary District, Petaluma, Sonoma Valley County Sanitation District, American Canyon

Impact 3.16.3: Source of Light or Glare

NBWRP components could introduce new sources of light and glare on the project sites.

Mitigation Measure 3.16.3a

The exterior lighting installed around the operational and capacity storage reservoirs, distribution pump station, storage tanks, and booster pump station shall be of a minimum standard required to ensure safe visibility. Lighting also shall be shielded and directed downward to minimize impacts of light and glare.

Mitigation Measure 3.16.3b

All exterior lighting is directed downward and oriented to ensure that limited light source is directly visible from neighboring residential areas. If necessary, landscaping would be provided around proposed facilities. The vegetation would be selected, placed, and maintained to minimize off-site light and glare onto surrounding areas.

Mitigation Measure 3.16.3c

Dark colored, non-reflective building materials should be used for project components that cause potentially significant impact from glare to visual resources.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Incorporate shielded, downward-oriented, low intensity light sources in design. 2. Plant vegetation to act as a natural buffer around areas that require lighting. 3. Incorporate dark colored, non-reflective building material in design.	1. Review construction specifications. 2. Review construction specifications. 3. Review construction specifications.	1. Member Agency 2. Member Agency 3. Member Agency	1. During Design 2. During Design and After Construction 3. During Design and During Construction	Napa Sanitation District

Impact 3.16.4: Long-term Impact to Aesthetic Character

Development of the proposed facilities, particularly pump stations and storage reservoirs, would permanently alter the aesthetic character of the project area.

Mitigation Measure 3.16.4a

Following construction activities, disturbed areas shall be restored to baseline conditions, by repaving roadways, replanting trees, and/or reseeding with a native seed mix typical of the immediately surrounding area.

Mitigation Measure 3.16.4b

Design elements shall be incorporated to enhance visual integration of the pump stations or other project-related above ground structures with their surroundings. Proposed facilities shall be painted low-glare earth-tone colors that blend with the surrounding terrain. Highly reflective building materials and/or finishes shall not be used in the designs for proposed facilities.

Mitigation Measure 3.16.4c

After construction of any facility that is above grade and visible to sensitive receptors, visual screening and vegetation measures will be implemented to reduce impacts to scenic views. Trees or other suitable vegetation along the fenceline of the facility should be incorporated to reduce the industrial appearance of the structures. Similarly, berms for new storage ponds or pond reconfiguration will be re-vegetated to reduce the barren appearance of the berms.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Restore disturbed areas to baseline conditions. 2. Paint facilities low-glare earth-tone colors and refrain from using highly reflective building materials. 3. Incorporate trees and other vegetation along fence line of facility. Vegetate berms.	1. Inspect final site conditions after construction and verify its condition is it equivalent to that prior to construction. Incorporated into construction specifications. 2. Review construction specifications. 3. Review construction specifications and landscape design.	1. Contractor/ Member Agency 2. Contractor 3. Contractor	1. After Construction 2. Design and During Construction 3. Design and During Construction	Marin Municipal Water District, Petaluma, Sonoma Valley County Sanitation District, American Canyon, Napa Sanitation District

Energy Conservation

Impact 3.17.1 Wasteful Use of Fuel and Energy

Use large amounts of fuel and energy in an unnecessary, wasteful, or inefficient manner during construction and decommissioning.

Mitigation Measures 3.9.1-1a and 3.9.1-1b

Refer to Impact 3.9.1 in Section 3.9, Air Quality

Environmental Justice

Impact 3.18.1 Disproportionate Impacts to Minority or Low-Income Populations

Project construction could result in significant environmental impacts that could disproportionately affect minority or low-income populations.

Mitigation Measures 3.9.1-1a and 3.9.1-1b

Refer to Impact 3.9.1 in Section 3.9, Air Quality

Cumulative Impacts

Impact 4.1. Construction-related Cumulative Impacts.

Concurrent construction of several projects within the Sonoma, Napa, and Marin County areas could result in cumulative short-term impacts associated with construction activities. If implemented at the same time as other construction projects, construction of facilities could contribute to potential short-term cumulative effects associated with erosion, cultural resource

disturbance, disturbance of adjacent land uses, traffic disruption, dust generation, construction noise, aesthetics, air quality, biological resources, hazardous materials, water quality, public services and utilities. However, construction-related impacts would not result in long term alteration of the environment, and could be mitigated to less than significant levels through the use of mitigation measures identified throughout Chapter 3.

Mitigation Measure 4.1

The Member Agencies shall coordinate construction activities along selected alignments to identify overlapping pipeline routes, project areas, and construction schedules. To the extent feasible, construction activities shall be coordinated to consolidate the occurrence of short-term construction-related impacts.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Coordinate construction activities to identify overlapping routes and construction schedules.	1. Incorporate into contract specifications.	1. Member Agency	1. Prior to Construction	Member Agency

Impact 4.5. Cumulative Long-Term Impacts on Biological Resources

Concurrent construction of NBWRP Phase 2 with other projects proposed in the Sonoma, Napa, and Marin County area, and other water and wastewater infrastructure projects, could result in cumulative long-term impacts to biological resources.

Mitigation Measures in Section 3.6, Biological Resources

Refer to Section 3.6, Biological Resources.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.6.1. 2. Implement Mitigation Measure 3.6.2. 3. Implement Mitigation Measure 3.6.3. 4. Implement Mitigation Measure 3.6.4. 5. Implement Mitigation Measure 3.6.5. 6. Implement Mitigation Measure 3.6.6. 7. Implement Mitigation Measure 3.6.7.	1. Comply with regulatory permit; Sign-off on inspection report and/ or MMRP. 2. Comply with regulatory permit; Sign-off on inspection report and/ or MMRP. 3. Comply with regulatory permit; Sign-off on inspection report and/ or MMRP. 4. Incorporate into contract specifications; Comply with CDFW guidelines; Sign-off on inspection report and/or MMRP. 5. Incorporate into contract specifications; Comply with regulatory permit; Sign-off on inspection report and/ or MMRP. 6. Comply with CDFW protocol; Sign-off on inspection report and/ or MMRP. 7. Comply with City and County Tree ordinances; Sign-off on inspection report and/ or MMRP.	1. Member Agency/ Contractor 2. Member Agency/ Contractor 3. Member Agency/ Contractor 4. Contractor/ Qualified Biologist 5. Member Agency/ Contractor/ Qualified Biologist 6. Member Agency/ Qualified Biologist 7. Member Agency/ Certified Arborist	1. Prior to and During Construction 2. Prior to and During Construction 3. Prior to and During Construction 4. Prior to and During Construction 5. Prior to and During Construction 6. Prior to and During Construction 7. Prior to and After Construction	Member Agency

Impact 4.7. Cumulative Impacts from Greenhouse Gas Emissions

Concurrent operation of NBWRP Phase 2 with other projects could result in a cumulatively considerable net increase in GHG emissions or criteria pollutants for which the region is in non-attainment under applicable standards.

Mitigation Measures in Section 3.9, Air Quality

Refer to Section 3.9, Air Quality.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.9.1-1a. 2. Implement Mitigation Measure 3.9.1-1b. 3. Implement Mitigation Measure 3.9.3. 4. Implement Mitigation Measure 3.9.4.	1. Incorporate in contract specifications and Sign-off on inspection report and/ or MMRP that measures are being implemented 2. Incorporate in contract specifications and Sign-off on inspection report and/ or MMRP that measures are being implemented 3. Incorporate in contract specifications and Sign-off on inspection report and/ or MMRP that measures are being implemented 4. Incorporate in contract specifications and Sign-off on inspection report and/ or MMRP that measures are being implemented	1. Contractor 2. Contractor 3. Contractor 4. Contractor	1. During Construction 2. During Construction 3. During Construction 4. During Construction	Member Agency

Impact 4.8. Cumulative Long-Term Impacts on Cultural and Historic Resources

Concurrent operation of NBWRP Phase 2 with other projects proposed in the Sonoma, Napa, and Marin County area and other water and wastewater infrastructure projects could result in cumulative long-term impacts to cultural resources.

Mitigation Measures in Section 3.14, Cultural Resources and Tribal Cultural Resources

Refer to Section 3.14, Cultural Resources and Tribal Cultural Resources.

Implementation Procedure	Monitoring and Reporting Actions	Monitoring Responsibility	Monitoring Schedule	Responsible Agency
1. Implement Mitigation Measure 3.14.1a. 2. Implement Mitigation Measure 3.14.1b. 3. Implement Mitigation Measure 3.14.1c. 4. Implement Mitigation Measure 3.14.1d. 5. Implement Mitigation Measure 3.14.1e.	1. Copies of DPR 422 or 523 shall be retained in Member Agency files; incorporate recommendations for design modification if necessary. 2. Sign-off on inspection report and/ or MMRP; coordinate with NAHC. 3. Incorporate into contract specifications. 4. Incorporate into contract specifications. 5. Incorporate into contract specifications, and make recommendations for design modification if necessary.	1. Contractor/ Member Agency 2. Contractor/ Member Agency 3. Qualified Archaeologist 4. Qualified Archaeologist 5. Qualified Archaeologist	1. During Construction 2. During Construction 3. Prior to Construction 4. Prior to Construction 5. Following Project Design; Prior to Construction	Member Agency

Growth Inducement and Secondary Effects of Growth

Impact 5.1. Direct and Indirect Impacts on Growth

The NBWRP Phase 2 would provide recycled water for urban, agricultural, and environmental uses, and as such, would contribute to the provision of adequate water supply to support a level of growth that is consistent with the amount planned and approved within the General Plans of Marin, Sonoma and Napa Counties. No appreciable growth in population or employment would occur as a direct result of construction or operation of the proposed facilities. However, development under the General Plans accommodated by the proposed project could result in secondary environmental effects, which include effects that could be significant and unavoidable.

Mitigation Measure 5.1a

No additional mitigation measures required.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 3
(This Section for use by Clerk of the Board Only.)

To: Board of Directors, Sonoma County Water Agency, Occidental County Sanitation District

Board Agenda Date: August 14, 2018

Vote Requirement: 4/5

Department or Agency Name(s): Sonoma County Water Agency and Occidental County Sanitation District

Staff Name and Phone Number:
Kevin Booker, 521-1865

Supervisorial District(s):
Fourth & Fifth

Title: Budget Resolutions for the Occidental County Sanitation District and the Airport-Larkfield-Wikiup Sanitation Zone

Recommended Actions:

A) Adopt a Resolution authorizing adjustment to the Board Adopted Budget for Fiscal Year 2018-2019 for the Sonoma County Water Agency's Airport-Larkfield-Wikiup Sanitation Zone, in the amount of $420,000.
B) Adopt a Resolution authorizing adjustment to the Board Adopted Budget for Fiscal Year 2018-2019 for the Occidental County Sanitation District, in the amount of $90,000.
C) Authorize Sonoma County Water Agency's General Manager to approve change orders with TerraCon Constructors Inc for construction of backwash discharge piping and the compliance bypass piping at Airport-Larkfield-Wikiup Sanitation Zone Treatment Plant. The work involves a not to exceed amount of $150,000 to install piping for compliance with California Code of Regulations Title 22 requirements.

Executive Summary:

The Occidental County Sanitation District Wastewater Transport Compliance Project includes construction of a fill and receiving station at the Occidental County Sanitation District (District) and the Airport-Larkfield-Wikiup Sanitation Zone (Zone) Treatment Plant respectively. The Transport Compliance Project is currently under construction and is anticipated to be completed this fall. The construction of the stations will allow the transfer of untreated wastewater from the District to the Zone for treatment, storage, and disposal. The project will eliminate discharge of secondary-treated effluent into Graham's Pond (a headwaters to Dutch Bill Creek).

.

This item requests approval of resolutions authorizing adjustments to the Airport-Larkfield-Wikiup Sanitation Zone (Zone) budget to fund the Zone's share of the TerraCon Constructors, Inc. agreement for construction of a wastewater receiving facility and recycled water fill station at the treatment plant, and to increase appropriations for the Occidental County Sanitation District's share of the project by $90,000.

On February 6, 2018, the Board of Directors of the Occidental County Sanitation District (District) awarded and authorized the Chair to execute a contract with TerraCon Constructors, Inc. for $1,292,704 for construction of the District's Wastewater Transport Compliance Project. The Board agenda item underestimated the amount of appropriations the District had available for the project by $90,000. Also, following award, change orders increased the Wastewater Transport Compliance Project costs by $150,000 to $1,442,704. Of the $1,442,704 project cost, $402,704 represents the Zone's share for construction of the wastewater receiving station; a recycled water fill station; installation of the backwash discharge piping and the compliance bypass projects all occurring at the Zone's Treatment Plant. The Zone is also requesting $17,296 for possible future change orders bringing appropriations to a total of $420,000.

Discussion:

On February 6, 2018, the Board awarded and authorized the Chair to execute a contract with TerraCon Constructors, Inc. for $1,292,704 for construction of the Occidental County Sanitation District (District) Wastewater Transport Compliance Project. The Transport Compliance Project will allow wastewater from the District to be transferred to and treated at the Airport-Larkfield-Wikiup Sanitation Zone (Zone). In addition, the Zone will have a new recycled water fill station constructed.

Subsequent to the award of the District's Transport Compliance Project, the Zone added the backwash discharge piping project and the compliance bypass project to the District's Transport Compliance Project. The addition of these two small construction projects will result in compliance with Title 22 requirements and improve water quality influent to the micro filtration process at the Zone's Treatment Plant. The backwash water is being temporarily discharged above ground through large PVC pipe to an existing manhole. The permanent relocation will move the backwash discharge to the first lagoon which will: 1) improve water quality by allowing the biological processes to fulfill as much treatment prior to the micro filtration process; 2) eliminate existing safety hazards (trips, falls, failure of above ground pipe) surrounding the temporary PVC installation; and 3) eliminate additional pumping and electrical requirements. The compliance bypass will bring the tertiary recycled water process into compliance with Title 22 requirements (state guidelines for how treated and recycled water is discharged and used) and allow operational improvements in determining compliance and/or micro filtration failures.

The new total project cost including change orders is $1,442,704. The District's and Zone's share of construction costs is $1,040,000 and $402,704, respectively. The zone is requesting an additional $17,296 for possible future change orders. The District underestimated the amount of appropriations available for the project and is requesting an additional $90,000 from available District fund balance to fully implement the District's share of the wastewater receiving and recycled water fill stations at the Zone's treatment plant. In addition to receiving waste from the District, the Zone will allow private septic haulers to use the facility for a fee. Likewise, when completed the recycled water fill station will allow users to use recycled water for construction, landscaping, and agricultural purposes. The backwash discharge piping project and the compliance bypass project will improve the Zone's Treatment Plant efficiency.

Prior Board Actions:

02/18/2018	Awarded the Occidental County Sanitation District Wastewater Transport Compliance Project to TerraCon Constructors for $1,292,704.

12/12/2017	Board Action approving project, determining no significant effect on environment, approving the Initial Study and Negative Declaration, and authorizing filing of Notice of Determination.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Waste Water Treatment and Water Reuse, Goal 1: Improve operational reliability of wastewater treatment and water reuse systems.
This item will allow for efficient use of the wastewater facilities while helping to expand the use of recycled water.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses			
Additional Appropriation Requested	$510,000		
Total Expenditures	**$510,000**		
Funding Sources			
General Fund/WA GF			
State/Federal			
Fees/Other			
Use of Fund Balance	$510,000		
Contingencies			
Total Sources	**$510,000**		

Narrative Explanation of Fiscal Impacts:

With Board approval, FY 2018/2019 appropriations from fund balance in the amount of $420,000 for the Zone and $90,000 for the District will be made available in the Zone's and District's Construction Funds pursuant to the attached budgetary resolutions (Attachment R1 and R2).

Date: August 14, 2018 Resolution Number:

☑ 4/5 Vote Required

Resolution Of The Board Of Directors of the Sonoma County Water Agency authorizing adjustment to the Board Adopted Budget for Fiscal Year 2018-2019 for the Sonoma County Water Agency's Airport-Larkfield-Wikiup Sanitation Zone, in the amount of $420,000

Whereas, the Board of Directors of the Sonoma County Water Agency (Water Agency) adopted the Water Agency Fiscal Year 2018-2019 budget on June 15, 2018; and

Whereas, Sections 29088 through 29092 of the Government Code, State of California allow for adjustments to the Fiscal Year 2018-2019 Adopted Budget; and

Whereas, the Water Agency desires to adjust the Fiscal Year 2018-2019 Adopted Budget for the Airport-Larkfield-Wikiup Sanitation Zone Construction Fund in the amount of $420,000 for the wastewater receiving facility and recycled water fill station project at the treatment plant; and

Whereas, a resolution from the Water Agency's governing board authorizing such budget adjustment is required.

Now, Therefore, Be It Resolved that the County Auditor-Controller-Treasurer-Tax Collector and the County Administrator are hereby authorized and directed to complete the budgetary and accounting transfers and adjustments to the Sonoma County Water Agency (Water Agency) Fiscal Year 2018-2019 budget as follows:

Fiscal Year 2018-2019 Expenditures		**Amount**
44710-33100200	**Airport-Larkfield Wikiup Sanitation Zone Construction Fund**	
19832	CIP Infrastructure	420,000
	Total Expenditures	420,000

Title: Hanson Russian River Flood Plain Restoration

Recommended Actions:

a. Authorize the General Manager of the Sonoma County Water Agency to execute a funding agreement with the California Coastal Conservancy not to exceed $100,000 for additional groundwater and surface water studies related to the Master Restoration Plan; and,
b. Adopt a resolution authorizing adjustments to the Board adopted Sonoma County Water Agency Budget for Fiscal Year 2018-2019 for the Russian river Projects Fund in the amount of $100,000.

Executive Summary: The Hanson Russian River Floodplain Restoration Project (Project) is a public/private partnership project between Endangered Species Habitat (a nonprofit organization), NOAA Fisheries, the California Coastal Conservancy, and the County of Sonoma with the goal of transforming former gravel pits to a restored floodplain connected to the Russian River just west of the Town of Windsor. The proposed planning phase is currently underway to develop a Master Restoration Plan for the 357-acre site that will transform the property from a monotypic landscape of retired gravel pits to a restored river floodplain including a mosaic of aquatic, riparian and other natural habitats, as well as public access facilities including trails, parking area, non-motorized boat launch, and campground. The Project would serve as a demonstration project that could be brought to scale and apply to another terrace mining site on the west side of the Russian River as well as, other sites throughout the western United States. The Sonoma County Water Agency (Sonoma Water) is part of the technical advisory team, along with Permit Sonoma, which has recommended additional studies of potential groundwater and surface water interactions. A funding agreement between Sonoma Water the California Coastal Conservancy for an additional $100,000 would augment the $350,000 already allocated by the California Coastal Conservancy for the project development/planning phase.

Discussion: The project development and planning phase will evaluate and advance the results from the Hanson Russian River Ponds Floodplain Restoration: Feasibility Study and Conceptual Design, a feasibility study conducted

by EHC, NOAA Fisheries and the United States Geological Survey (http://scc.ca.gov/webmaster/ftp/pdf/sccbb/2016/1609/20160929Board08_Russian_River_Floodplain_Restoration_Ex3.pdf). The feasibility study provided planning and technical feasibility assessments for ecosystem restoration, flood hazard reduction, and water quality improvement at the Project site, including a range of alternatives. This phase of the Project will further evaluate that range of Project alternatives, then work with Project partners, stakeholders, and local landowners to analyze constraints, constructability and develop a 30% design for the selected alternative. The Environmental Review and Permitting phase will begin once the Master Restoration Plan applications are submitted to Permit Sonoma. Permit Sonoma will lead the Use Permit process and complete environmental review for the proposed project utilizing much of the information gathered during the Project development process.

The California Coastal Conservancy has funded the planning process, but additional analysis is recommended by Permit Sonoma to complete groundwater modeling and further analysis of the potential effects on the County's groundwater and surface water resources. Sonoma Water's intake facilities are located just downstream of the Project site and the Town of Windsor's well field is located just north of the Project site. The County and Sonoma Water would benefit from gaining a clearer understanding of the effects of the river floodplain on water quality in the river and the enhanced floodplain habitat would benefit Russian River fish and wildlife.

Prior Board Actions:

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Restoration of the former gravel pits to a connected flood plain would have important ecological benefits and would provide additional recreational opportunities.

Fiscal Summary			
Expenditures	**FY 17-18 Adopted**	**FY 18-19 Projected**	**FY 19-20 Projected**
Budgeted Expenses			
Additional Appropriation Requested	$100,000

Agreement for Funding of Hanson Russian River Floodplain Restoration Project

This grant agreement ("Agreement") is by and between **Sonoma County Water Agency**, a body corporate and politic of the State of California ("Water Agency"), and **California State Coastal Conservancy**, a State agency ("Recipient"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Article 6 (Term of Agreement).

R E C I T A L S

A. The Hanson Russian River Floodplain Restoration Project (Project) is a public/private partnership project between Endangered Species Habitat (nonprofit organization), NOAA Fisheries, County of Sonoma (Permit Sonoma), and Recipient. In support of the Project, Recipient has provided a grant to the nonprofit organization to restore a portion of the Russian River.

B. The goal of the Project is to transform former gravel pits to a restored floodplain connected to the Russian River just west of the Town of Windsor.

C. Water Agency is part of the technical advisory team, along with Permit Sonoma, which has recommended additional studies of potential groundwater and surface water interactions.

D. Water Agency's intake facilities are located just downstream of the Project site and Town of Windsor's well field is located just north of the Project site.

E. Permit Sonoma and Water Agency would benefit from gaining a clearer understanding of the effects of the Project on water quality in the river and how the enhanced floodplain habitat would benefit Russian River fish and wildlife.

F. Under this Agreement Water Agency is funding $100,000 for additional analysis to be performed by the nonprofit organization.

In consideration of the foregoing recitals and the mutual covenants contained herein, the Water Agency and the Recipient ("Parties") hereto agree as follows:

A G R E E M E N T

1. RECITALS

1.1. The above recitals are true and correct.

2. LIST OF EXHIBITS

2.1. The following exhibits are attached hereto and incorporated herein: Exhibit A (Insurance Requirements)

3. COORDINATION

3.1. Cooperation with Water Agency. Recipient shall coordinate the work with Water Agency's Project Manager. Contact information and mailing addresses are as follows:

Water Agency	Recipient
Project Manager: Don Seymour 404 Aviation Boulevard Santa Rosa, CA 95403-9019 Phone: 707-547-1925 Email: Donald.Seymour@scwa.ca.gov	Contact: Michael Bowen 1515 Clay Street, 10th Floor Oakland, CA 94612-1401 Phone: 510-286-1015 Email: Michael.Bowen@scc.ca.gov
Remit invoices to: Susan Bookmyer Same address as above or Email: susan.bookmyer@scwa.ca.gov	**Remit payments to:** Same address as above

4. RECIPIENT'S RESPONSIBILITIES

Recipient or the nonprofit organization shall complete the following:

4.1. General. Recipient agrees to perform all work in accordance with the requirements of applicable federal, state, and local laws.

4.2. Scope of Work. Recipient or the nonprofit organization will perform studies of potential groundwater and surface water interactions at the Project site including, but not limited to, groundwater modeling and further analysis of the potential effects on groundwater and surface water resources. Tasks include data collection and analysis, hydrogeologic conceptual model update, steady-state groundwater flow model development, groundwater flow model calibration and scenarios, water quality evaluation, technical memo(s), and meetings.

4.3. Content Online Accessibility.

a. *Accessibility:* Water Agency policy requires that all documents that may be published to the Web meet accessibility standards to the greatest extent possible, and utilizing available existing technologies.

b. *Standards:* Those responsible for preparing content intended for use or publication on a Water Agency/County-managed or Water Agency/County-funded web site must comply with applicable federal accessibility standards established by 36 C.F.R. section 1194, pursuant to section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. section 794(d)), and Water

Agency's Web Site Accessibility Policy located at http://sonomacounty.ca.gov/Services/Web-Standards-and-Guidelines/.

c. *Certification:* With each final receivable intended for public distribution (report, presentations posted to the Internet, public outreach materials), Recipient or the nonprofit organization shall include a descriptive summary describing how all deliverable documents were assessed for accessibility (e.g. Microsoft Word accessibility check; Adobe Acrobat accessibility check, or other commonly accepted compliance check).

d. *Alternate Format:* When it is strictly impossible due to the unavailability of technologies required to produce an accessible document, Recipient or the nonprofit organization shall identify the anticipated accessibility deficiency prior to commencement of any work to produce such deliverables. Recipient agrees to cooperate with Water Agency staff in the development of alternate document formats to maximize the facilitative features of the impacted document(s); e.g., embedding the document with alt-tags that describe complex data/tables.

e. *Noncompliant Materials; Obligation to Cure:* Remediation of any materials that do not comply with Water Agency's Web Site Accessibility Policy shall be the responsibility of Recipient. If Water Agency, in its sole and absolute discretion, determines that any deliverable intended for use or publication on any Water Agency/County-managed or Water Agency/County-funded Web site does not comply with Water Agency Accessibility Standards, Water Agency will promptly inform Recipient in writing. Upon such notice, Recipient or the nonprofit organization shall, without charge to Water Agency, repair or replace the non-compliant materials within such period of time as specified by Water Agency in writing. If the required repair or replacement is not completed within the time specified, Water Agency shall have the right to do any or all of the following, without prejudice to Water Agency's right to pursue any and all other remedies at law or in equity:

   i. Cancel any delivery or task order;

   ii. Terminate this Agreement pursuant to the provisions of Paragraph 7; and/or

   iii. In the case of custom Electronic and Information Technology (EIT) developed by Recipient for Water Agency, Water Agency may have any necessary changes or repairs performed by itself or by another contractor. In such event, Recipient shall be liable for all expenses incurred by Water Agency in connection with such changes or repairs.

f. *Water Agency's Rights Reserved:* Notwithstanding the foregoing, Water Agency may accept deliverables that are not strictly compliant with Water Agency Accessibility Standards if Water Agency, in its sole and absolute discretion, determines that acceptance of such products or services is in Water Agency's best interest.

4.4. Insurance. With respect to performance of work under this Agreement, Recipient and the nonprofit organization shall require all of its consultants, subcontractors, and other agents to maintain insurance as described in Exhibit A (Insurance Requirements).

4.5. Invoices. Recipient shall bill Water Agency upon execution of this Agreement with an invoice that is clearly marked with "California State Coastal Conservancy, Agreement for Funding of Hanson Russian River Floodplain Restoration Project, Project-Activity Code W0096D030."

4.6. Refund of Unused Funds. Following completion of work, Recipient shall submit receipts and invoices received from nonprofit organization to verify actual costs. If total of actual costs of authorized expenses is less than the total amount provided under this Agreement, Recipient shall refund the difference to Water Agency within 30 calendar days of completion of work.

4.7. Refund Upon Cancellation. If Recipient determines Project will not occur, Recipient shall immediately notify Water Agency in writing. In such case, Recipient shall refund any funding not expended by the nonprofit organization provided under this Agreement by Water Agency within 30 calendar days of said determination.

5. WATER AGENCY'S RESPONSIBILITIES

5.1. Total. The total amount payable under this Agreement shall not exceed $100,000.

5.2. Payment. Upon execution of Agreement and receipt of an invoice thereof, Water Agency will provide funds directly to Recipient in the amount of $100,000, which is the total amount of Water Agency's obligation under this Agreement.

6. TERM OF AGREEMENT

6.1. This Agreement shall expire on December 31, 2019, unless terminated earlier in accordance with the provisions of Article 7 (Termination).

7. TERMINATION

7.1. At any time and without cause, Water Agency has the right, in its sole discretion, to terminate this Agreement by giving five calendar days' written notice to Recipient. In the event of such termination, Water Agency will pay Recipient for services satisfactorily rendered to the date of termination. In addition, should Recipient fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, Water Agency may immediately terminate this Agreement by giving Recipient written notice of such termination, stating the reason for termination. In the event of such termination, Water Agency will pay Recipient for services satisfactorily rendered to the date of termination. However, Water Agency will

deduct from such amount the amount of damage, if any, sustained by Water Agency by virtue of the breach of the Agreement by Recipient. Water Agency's right to terminate may be exercised by Water Agency's General Manager.

8. SELF-INSURANCE

8.1. Each party shall maintain a program of self-insurance or excess insurance or any combination thereof, and shall name the other party as an additional insured thereon to protect against any liability for bodily injury or property damage arising out of or in connection with the performance of the insuring party, its officers, agents, and employees, under this Agreement. The liability coverage under such program of self-insurance or excess insurance shall not be less than $1,000,000 (one million dollars) for each occurrence. Each party shall supply a certificate of self-insurance to the other party on or before the time of execution of this Agreement by the parties. Each party shall notify the other party in writing prior to any termination of such self-insurance program.

9. MUTUAL INDEMNIFICATION

9.1. Each party to this Agreement (the "Indemnifying Party") agrees to accept all responsibility for loss or damage to any person or entity, and to defend, indemnify, hold harmless and release the other party (the "Indemnified Party"), and the Indemnified Party's supervisors, officers, agents, and employees, from and against any and all liabilities, actions, claims, damages, disabilities, or expenses that may be asserted by any person or entity, including the Indemnifying Party, to the extent resulting from the Indemnifying Party's breach of any material term of this Agreement, or Indemnifying Party's negligence or willful misconduct in connection with the performance of this Agreement, but excluding liabilities, actions, claims, damages, disabilities, or expenses to the extent arising from Indemnified Party's breach of any material term of this Agreement, or Indemnified Party's negligence or willful misconduct in connection with the performance of this Agreement. The Indemnified Party shall have the right to select its legal counsel at the Indemnifying Party's expense, subject to the Indemnifying Party's approval, which shall not be unreasonably withheld, except when prohibited by law. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for the parties hereto or their agents under workers' compensation acts, disability benefit acts, or other employee benefit acts.

10. ADDITIONAL REQUIREMENTS

10.1. Bottled Water. In accordance with Sonoma County Water Agency Board of Directors Resolution No. 09-0920, dated September 29, 2009, no Water Agency funding shall be used to purchase single-serving, disposable water bottles for use in Water Agency facilities or at Water Agency-sponsored events. This restriction shall not apply when potable water is not available.

10.2. Authority to Amend Agreement. Changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Changes to lengthen time schedules or make minor modifications to the scope of work, which do not increase the amount paid under the Agreement, may be executed by the Water Agency's General Manager in a form approved by County Counsel.

10.3. No Waiver of Breach. The waiver by Water Agency of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or promise or any subsequent breach of the same or any other term or promise contained in this Agreement.

10.4. Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Recipient and Water Agency acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Recipient and Water Agency acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

10.5. No Third-Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

10.6. Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California excluding the law of conflicts. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in the County of Sonoma.

10.7. Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

10.8. Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure section 1856. Each Party acknowledges that, in entering into this Agreement, it has not relied on any representation or undertaking, whether oral or in writing, other than those which are expressly set forth in this Agreement. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

10.9. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

10.10. Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

Exhibit A

Insurance Requirements

With respect to performance of work under this Agreement, Recipient shall require all of its subawardees, subcontractors, consultants, and other agents (Consultant) to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements* or the agent has the equivalent self-insurance. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

Water Agency reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so.

1. INSURANCE

1.1. Workers Compensation and Employers Liability Insurance

a. Required if (Consultant) has employees as defined by the Labor Code of the State of California.

b. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.

c. Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.

d. Required Evidence of Insurance: Certificate of Insurance.

e. If (Consultant) currently has no employees as defined by the Labor Code of the State of California, Recipient agrees to obtain the above-specified Workers Compensation and Employers' Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

1.2. General Liability Insurance

a. Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.

b. Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, Water Agency requires and shall be entitled to coverage for the higher limits maintained by Consultant.

c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by Water Agency. Consultant is responsible for any deductible or self-insured retention and shall fund it upon Water Agency's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the Water Agency.

d. Sonoma County Water Agency, its officers, agents, and employees, shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in Insurance Services Office form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between the additional insureds and Consultant and include a "separation of insureds" or "severability" clause which treats each insured separately.

1.3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limit may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

1.4. Professional Liability/Errors and Omissions Insurance

a. Minimum Limit: $1,000,000 per claim or per occurrence; $1,000,000 annual aggregate.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by Water Agency.

c. If Consultant's services include: (1) programming, customization, or maintenance of software: or (2) access to individuals' private, personally identifiable information, the insurance shall cover:

   i. Breach of privacy; breach of data; programming errors, failure of work to meet contracted standards, and unauthorized access; and

   ii. Claims against Consultant arising from the negligence of Consultant, Consultant's employees and Consultant's subcontractors.

d. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

e. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.

1.5. Standards for Insurance Companies

a. Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

1.6. Documentation

a. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

b. Recipient shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

c. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

1.7. Policy Obligations

a. Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

Title: Consulting Services for Potter Valley Hydroelectric Project Relicensing Proceedings

Recommended Actions:

Authorize the General Manager of the Sonoma County Water Agency to execute the Cooperative Agreement to Provide Funding for Shared Consulting Services with the Round Valley Indian Tribes in the not-to-exceed amount of $87,000, to evaluate impacts on Russian River and Eel River watersheds and inform future project relicensing proceedings.

Executive Summary:

The Sonoma County Water Agency (Water Agency) and the Round Valley Indian Tribes (Tribes) are committed to the development of best available science to evaluate the impacts of the Potter Valley Hydroelectric Project on fish species and water resources management in the Eel River and the Russian River, in the context of the relicensing proceeding pending before the Federal Energy Regulatory Commission. The Water Agency and the Tribes share and intend to promote the twin goals of restoring and maintaining the viability of salmonids and other fish species in both the Eel and Russian River Basins, and to ensure that water resources will continue to be managed to provide reliable water supplies in both basins. The Water Agency and the Tribes propose to undertake joint scientific studies of potential options to achieve these goals, and thereby supplementing the studies that Pacific Gas and Electric Company (as licensee) will be required to undertake for the purpose of the relicensing proceeding. The Water Agency and the Tribes intend to engage McBain and Associates (Consultant) for the purpose of conducting studies related to fish ecology and water resources management.

Discussion:

HISTORY OF ITEM/BACKGROUND

Pacific Gas &Electric's (PG&E) Potter Valley Project (Project) is a hydroelectric facility that diverts Eel River water through a tunnel to a powerhouse in the Russian River watershed. After being used to produce power, and in order to meet minimum instream flows required by its Federal Energy Regulatory Commission (Commission) license, water is discharged from the powerhouse to the East Fork of the

Russian River. Historically water discharged from the Project provided about half of the flows into Lake Mendocino. However, since a 2004 amendment to PG&E's Commission license, intended to benefit fishery resources in the Eel River, flows into Lake Mendocino have been reduced by approximately 40% - 70% annually compared to pre-2004 historical flows. In addition, drought conditions and emergency repairs over the last several years have further reduced Project's inflows.

The current Project license will expire in 2022. On April 6, 2017, PG&E began the relicensing process for the Potter Valley Project by filing the Notice of Intent to File Application for New License and Pre-Application Document. On May 10, 2018, PG&E sent a letter to the Eel-Russian River Commission to publicly announce its intention to auction the Project. However, the letter also stated that PG&E was still "open to exploring with local, county and/or state governmental entities that have an interest in the continued operation of the project the possibility of transferring it to a local or regional entity as an alternative to auction." PG&E's letter further stated it would continue the relicensing process while seeking a new owner for the Project. PG&E has stated it anticipates the auction process would begin this fall and would last approximately eighteen (18) months. PG&E's application for a new license must be filed by April 2020.

The Water Agency has been working with regional stakeholders, including PG&E, in a process convened by Congressman Huffman to plan for the future of the Project that sustains fisheries and water supply in both the Eel and Russian River Watersheds. As a result of these meetings, the Water Agency and the Tribes have proposed to partner together to conduct joint studies that are intended to inform and support the Huffman ad hoc process, and to supplement the studies required of PG&E in the relicensing proceedings. These studies will focus on the goals shared by the Water Agency and the Tribes of restoring and maintaining the viability of salmonids and other fish species in both the Eel and Russian River Basins, and to ensure that water resources will continue to be managed to provide reliable water supplies in both basins.

SERVICES TO BE PERFORMED

Under the proposed Agreement, the Consultant will participate in the Huffman Ad Hoc Committee Technical Working Group meetings to assess water supply and fish passage scenarios with various management scenarios associated with the future Potter Valley Project, including, but not limited to: (1) review of existing Russian River and Potter Valley Project HEC-ResSim model input data, assumptions, sensitivity analyses, uncertainty and limitations, and model run results; (2) participation in Working Group meetings and/or conference calls to develop alternative operational scenarios for the Project; and (3) work with Water Agency biologists to conduct a balanced evaluation of the ecological effects of Potter Valley Project flow management alternatives on the Eel River and Russian River.

The cost of services will not exceed $87,000 and the term end date is July 30, 2020. The Water Agency is funding this agreement fully, while the Tribes will provide support and oversite for the Consultant.

RECOMMENDATION

Authorize the General Manager of the Water Agency to execute the Cooperative Agreement to Provide Funding for Shared Consulting Services with the Round Valley Indian Tribes in the not-to-exceed amount of $87,000.

Prior Board Actions:
N/A
Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship
This Agreement will procure studies necessary to ensure the health of fisheries in the Eel and Russian River watershed and for a reliable potable water supply. Water Agency Strategic Plan Alignment Water Supply and Transmission System, Goal 2: Maintain and improve the reliability of the Water Transmission System.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$87,000		
Additional Appropriation Requested			
Total Expenditures	**$87,000**

CF/42-4-21 Round Valley Indian Tribes (Coop Agree to Fund Consulting Services for Potter Valley Project Relicensing Proceedings) (ID 7052)

COOPERATIVE AGREEMENT TO PROVIDE FUNDING FOR SHARED CONSULTING SERVICES

This agreement ("Agreement") is by and between the **Sonoma County Water Agency**, a body corporate and politic of the State of California ("Water Agency"), and the **Round Valley Indian Tribes**, a sovereign federally-recognized Indian tribe with authority over its Reservation in Mendocino County (the "Tribes"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Article 8.1 (Term of Agreement).

R E C I T A L S

A. Water Agency and the Tribes are committed to a goal of restoring and maintaining the viability of salmonids and other fish species in both the Eel and Russian River Basins.

B. Water Agency and the Tribes are committed to a goal that water resources will continue to be managed to provide reliable water supplies in both basins.

C. Water Agency and the Tribes are committed to the development of best available science to evaluate the impacts of the Potter Valley Hydroelectric Project on the fish species and water resources management in the Eel River and the Russian River, in the context of the relicensing proceeding pending before the Federal Energy Regulatory Commission.

D. Water Agency and the Tribes propose to undertake joint scientific studies of potential options to achieve the goals stated in Recitals A and B, supplementing the studies that Pacific Gas and Electric Company (as licensee) will be required to undertake for the purpose of the relicensing proceeding.

E. Water Agency and the Tribes intend to engage McBain and Associates (hereafter, Consultant) for the purpose of conducting studies related to fish ecology and water resources management.

F. Water Agency and Tribes are committed to cooperate with other public and private stakeholders in the development of best available science relevant to the relicensing proceeding for the Potter Valley Project, as well as the regional goals described in Recitals A and B.

In consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows.

A G R E E M E N T

1. RECITALS

1.1. The above recitals are true and correct.

2. STUDIES

2.1. The Tribes and Water Agency will discharge their responsibilities, as specified in Sections 3 and 4, to undertake the studies described in Exhibit A.

2.2. Consultant will function as an independent contractor. Communications between Consultant, Tribes, and Water Agency in the conduct of these studies will not be subject to attorney-client or attorney work product privileges.

2.3. The study reports will be public documents. Each report will include a disclaimer that that the Consultant prepared the report pursuant to this Agreement, as an independent contractor and not as expert for either party; and that the findings and conclusions in the report are the Consultant's alone and may not be attributed to the Water Agency or Tribes. Either party may use the reports at its discretion, subject to a reasonable good faith commitment that such use will be consistent with the Recitals.

3. WATER AGENCY'S RESPONSIBILITIES

3.1. Within 14 calendar days of the Effective Date, Water Agency shall deposit $87,000 in an account designated by the Tribes, for the purpose of the studies described in Exhibit A.

3.2. Water Agency shall participate in meetings with Consultant and Tribes and shall review and comment on study reports.

4. ROUND VALLEY INDIAN TRIBES' RESPONSIBILITIES

4.1. The Tribes shall prepare and execute an agreement with McBain and Associates to provide consulting services in an amount not to exceed $87,000, unless the Tribes provide additional funding for services under this Agreement in excess of that amount, for both services and expenses, consistent with the form attached as Exhibit A. Should McBain and Associates complete the work for less than the not-to-exceed amount listed above, the Tribes shall return the Water Agency's remaining funds to the Water Agency.

4.2. The Tribes shall act as liaison with the Consultant and provide any necessary project management, direction and coordination. This responsibility includes coordinating necessary meetings and providing status updates and analysis to Water Agency. The Tribes shall review and comment on study reports.

4.3. The Tribes shall provide Water Agency with a written accounting of all expenditures upon completion of the work identified in Exhibit A.

4.4. The Tribes shall maintain complete and accurate records of all associated transactions in compliance with generally accepted accounting principles as promulgated by the American Institute of Certified Public Accountants and the Governmental Accounting Standards Board. Such records shall be available to

Water Agency upon reasonable notice for inspection and analysis during business hours.

5. COMMUNICATION/DESIGNATED REPRESENTATIVES

5.1. The persons designated below shall, upon execution of this Agreement, have authority to grant discretionary approvals identified in this Agreement. Except as otherwise specifically provided in this Agreement, any notice, submittal, or communication required or permitted to be served on a party, may be served by personal delivery to the person or the office of the person identified below. Service may also be made by mail, by placing first-class postage, and addressed as indicated below, and depositing in the United States mail to:

Water Agency	Round Valley Indian Tribes
Project Manager: _____ 404 Aviation Boulevard Santa Rosa, CA 95403-9019 Phone: _____ Email: _____ Designated Representative: _____	Project Manager: _____ _____ _____ Phone: _____ Email: _____ Designated Representative: _____

6. TERMINATION

6.1. Either party may terminate its participation in this Agreement by giving 30 calendar-days written notice to the other party of its intent to terminate its participation in this Agreement. Termination shall not relieve the Water Agency of its obligation to pay costs and expenses related to the Consultant contract or otherwise allocated prior to the effective date of the termination. Water Agency's right to terminate may be exercised by Water Agency's General Manager.

7. EXPERTS.

7.1. This Agreement does not affect the status of the Consultants as experts for the Tribes in any activity other than the studies.

8. ADDITIONAL REQUIREMENTS

8.1. Term of Agreement: The term of this Agreement shall be from the date signed by both parties ("Effective Date") to June 30, 2020 ("Termination Date"), unless terminated earlier in accordance with the provisions of Article 6 .

8.2. Authority to Amend Agreement: Changes to this Agreement may only be made by written amendment, signed by both parties. The General Manager of the Water Agency and the person identified by the Tribes in Article 5 are authorized to execute amendments to the Agreement, provided that the amendments do not

substantially change the scope of the Agreement or increase the cost to Water Agency.

8.3. Construction: To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions shall remain in full force and effect and shall in no way be affected, impaired, or invalidated.

8.4. Making of Agreement: The Tribes and Water Agency acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the Agreement's interpretation; the language of the Agreement will not be construed against one party in favor of another. The Tribes and Water Agency acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

8.5. No Third-Party Beneficiaries: Nothing contained in this Agreement shall be construed to create, and the parties do not intend to create, any rights in third parties.

8.6. Captions: The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

8.7. Merger: This writing is intended both as the final expression of the Agreement between the parties with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure section 1856. Each Party acknowledges that, in entering into this Agreement, it has not relied on any representation or undertaking, whether oral or in writing, other than those which are expressly set forth in this Agreement. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

8.8. Entire Agreement: This Agreement is the entire Agreement between the parties.

8.9. Counterparts: This Agreement may be executed in multiple counterparts and all counterparts so executed shall constitute a single agreement binding. Original counterpart signature pages may be affixed to an original of this Agreement to create a single, complete agreement. Any counterpart executed by a Participant and/or Water Agency [District] and transmitted by electronic transmission shall be treated as an original signature page at the time of receipt. The actual original signature page shall also be mailed to Water Agency [District] within ten days of the date of the electronic transmission.

8.10. Survival of Terms: All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

8.11. Time of Essence: Time is and shall be of the essence of this Agreement and every provision.

7.12. Cooperation: The Tribes and the Water Agency agree to meet and confer as necessary to carry out the purposes of this Agreement.

7.13. Other Agreements: The Tribes and the Water Agency may enter into other agreements regarding other issues or concerns, and nothing in this Agreement shall be construed as obligating either party to enter into other agreements.

7.14. No Rights Created: This Agreement creates no right, obligation, benefit or responsibility that is enforceable at law or equity. Nothing in this Agreement obligates either party to fund particular projects or to otherwise transfer anything of value to the other party.

7.15. Legal Authority Not Altered: This Agreement is not intended to alter, limit, or expand either parties' legal authority.

7.16. Independent Interests: Nothing in this Cooperative Agreement shall affect the right or ability of the Tribes or the Water Agency to take positions on any issue independently of the other party. Each party retains the right to determine for itself its own best interest and to act accordingly.

Round Valley Indian Tribes

By: _____
James Russ
President

Date: _____

Exhibit A
Scope of Work for Consultants to the Round Valley Indian Tribes

Tasks:

Task 1. Ad Hoc Working Group Participation and Modeling

The Round Valley Indian Tribes' technical consultant will participate in the Jared Huffman Ad-Hoc Committee Technical Working Group meetings to assess water supply and fish passage scenarios with various management scenarios associated with the future Potter Valley Project (PVP). Subtasks will include (1) review of existing Russian River and PVP HEC-ResSim model input data, assumptions, sensitivity analyses, uncertainty and limitations, and model run results, (2) participation in Working Group meetings and/or conference calls to develop alternative PVP operational scenarios, review and summarize results, and determine next steps. The results of this work would 1) assist the Tribes in better understanding the PVP and Russian River models in use, 2) enable input into the development and application of the PVP and Russian River model to be used for the Ad-Hoc Committee and FERC studies, 3) assist Water Agency and Tribes in resolving any questions that may arise later from use of the models for Ad-Hoc Committee and FERC-related analyses, and 4) enable Water Agency and the Tribes collaboratively conduct a balanced evaluation of PVP and Russian River alternatives on water supply and ecological resources.

Task 2. Ecological evaluations related to PVP alternatives

Based on results of Task 1, work with Water Agency biologists to conduct a balanced evaluation of the ecological effects of PVP flow management alternatives on the Eel River and Russian River. Analyses will initially use information currently available, including the River 2D habitat assessment on the Russian River, the VTN flow-habitat curves and fish passage thresholds on the Eel River below the PVP. Once additional information is developed by PG&E as part of their proposed Study Plans (e.g., water temperature model, FYLF information), additional analyses may be conducted.

Deliverables:

- PowerPoint presentations (produced collaboratively with Water Agency staff) of model results, interpretation, and recommended next steps for briefing Water Agency management and the Tribal Council.
- PowerPoint presentations (produced collaboratively with Water Agency staff) summarizing ecological effects of flow management alternatives on the Eel River and Russian River.

Budget: $87,000

Timeline: August 1, 2018 - July 30, 2020

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 6
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors, Sonoma County Water Agency
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Sonoma County Water Agency
Staff Name and Phone Number:	Ryan Pedrotti / 521-2018
Supervisorial District(s):	
Title:	Update and Implement Energy Education Program with Sonoma Clean Power Authority

Recommended Actions:

Authorize the Sonoma County Water Agency's (Water Agency) General Manager to execute an agreement with Sonoma Clean Power Authority (Authority) for the Water Agency to update and implement an Energy Education Program through June 30, 2019, in the amount of $275,000 (Authority is paying the Water Agency) and, consistent with other agreements, authorize the General Manager to amend or terminate the agreement with approval of County Counsel.

Executive Summary:

The Water Education Program reaches roughly 12,000 students annually. The program provides field trips and classroom visits. This term requests authorization for the Water Agency and Authority to enter into an agreement to continue implementing an Energy Education Program.

Discussion:

HISTORY OF ITEM/BACKGROUND

The Water Education Program is an expansive program with established connections to teachers in schools throughout Sonoma and Marin Counties. Programs are aligned to current "Next Generation Science Standards," and teachers consistently apply for and provide excellent reviews of field and classroom programs, workshops, and assemblies.

As one of the largest energy users in Sonoma County, the Water Agency strived to become carbon neutral by 2015. In 2011 the Water Education Program began teaching about climate change and the water/energy nexus. The Water Agency achieved carbon neutral status, but climate change and energy efficiency continue to direct policy. Assembly Bill 32 aims to reduce greenhouse gas emissions to 80% below 1990 levels by 2050. Sonoma County is following the same goal. Statewide, 20% of energy use involves treating and transporting water. California has implemented "Next Generation Science Standards," and energy education will provide teachers locally based curriculum, teach students the water/energy nexus, energy efficiency, and the effects of climate change. Hands-on, science-based energy

and water education programs allow students to become informed and accountable citizens who make a positive impact.

The Water Education Program sought partners to offset the costs of developing energy education programs and has collaborated with the Authority to develop a scope of work. The Water Education Program has worked with the Regional Climate Protection Authority and the Center for Climate Protection to share resources and curriculum ideas.

SERVICES TO BE PERFORMED FOR AUTHORITY BY WATER AGENCY

Under the proposed agreement, the Authority will pay the Water Agency to update and implement an Energy Education Program. Services to be provided under the agreement include:

A. Market energy education programs in 2018-2019 water education brochure. Develop additional flyer for schools outside Water Agency education service area.
B. Implement and refine fourth grade classroom program: Renewable Energy-Be Part of the Climate Change Solution!
C. Incorporate climate change and energy efficiency into assembly program.
D. Conduct Climate Literacy and Understanding Global Climate Change teacher workshop.
E. Implement and refine third grade classroom program, which covers the water/energy nexus and how an increase in greenhouse gases lead to climate change.
F. Add energy efficiency theme to third to sixth grade poster contest. Authority and energy information will be featured in the 2019 calendar.
G. Implement careers in the water and energy industry program. Explore job shadow opportunities.
H. Incorporate water/energy nexus into fifth grade classroom and field trip program.
I. Develop giveaway items exploring the water/energy nexus.
J. Develop end of year report.

Under the agreement, the Water Agency will bill the Authority for services at the same rates that the Water Agency allocates to its internal projects and programs up to a maximum of $275,000. This means that the Water Agency is recovering its actual costs of providing services to Authority with no mark-up. The agreement terminates on June 30, 2019.

REQUEST FOR WATER AGENCY GENERAL MANAGER AMENDMENT AND TERMINATION AUTHORITY

Staff recommends that the Water Agency's General Manager be authorized to amend or terminate the agreement with approval of County Counsel.

RECOMMENDATION

Water Agency staff recommends that the Board authorize Water Agency's General Manager to execute an agreement with Authority to update and implement an Energy Education Program through June 30, 2019, in the amount of $275,000.

Prior Board Actions:

09/19/2017: Approved agreement between Water Agency and Authority to develop and implement an energy education program. Cost $275,000; term end June 30, 2018.

Strategic Plan Alignment	Goal 2: Economic and Environmental Stewardship

The proposed Energy Education Program supports the County's goal of protecting watersheds and reducing water usage through public education and outreach.

Water Agency Organizational Goals and Strategies, Goal 3: Increase outreach to the community, public, and employees. The proposed Energy Education Program will provide outreach to the community by helping educators teach students the value of water as an important natural resource and the connection between water and energy.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses			
Additional Appropriation Requested	$275,000		
Total Expenditures	**$275,000**		
Funding Sources			
General Fund/WA GF			
State/Federal			
Fees/Other	$275,000		
Use of Fund Balance			
Contingencies			
Total Sources	**$275,000**		

Narrative Explanation of Fiscal Impacts:

Additional appropriations of $275,000 for the Energy and Sustainability Fund will be included in the next quarterly consolidated budget adjustments with $275,000 in offsetting revenue from Authority. The consolidated budget adjustment will require 4/5 vote approval from the Board.

AGREEMENT FOR ENERGY EDUCATION PROGRAM

This Agreement for Professional Services ("Agreement"), dated as of July 1, 2018 ("Effective Date") is made by and between the Sonoma Clean Power Authority ("SCPA"), a California joint powers authority, and the Sonoma County Water Agency ("Water Agency"), a body corporate and politic of the State of California. SCPA and Water Agency may be individually referred to as a "Party" or collectively as "Parties."

1. **Scope of Services**: Water Agency agrees to provide any and all of the services as described in Exhibit A.

2. **Performance Standard**: Water Agency warrants that it possesses the necessary training, experience and skill to competently and professionally provide the services described in Exhibit A.

3. **Staffing and Coordination:** Water Agency shall cooperate, and closely coordinate, with SCPA staff in providing all services under this Agreement. Ryan Pedrotti (Key Staff) is deemed by SCPA to be a key person whose services were a material inducement to enter into this Agreement. Key Staff shall oversee and manage all services performed by Water Agency.

4. **Payment:** Water Agency shall submit one invoice for each calendar month in which services are performed. Invoices shall be signed by Key Staff, include copies of receipts for pre-approved reimbursable expenses, and contain the following detail for each billable entry:

    a. Date
    b. Detailed description of work performed and person(s) involved
    c. Time spent in 1/10th hour increments

    Upon receipt of properly prepared invoicing, SCPA shall pay Water Agency within 30 calendar days for services provided in accordance with this Agreement, applying the following rates:

    a. Water Agency shall be paid current weighted labor rates, including overhead, for Water Agency staff performing work under this Agreement plus actual costs of applicable materials. Weighted labor rates as of May 1, 2018, are listed in Exhibit A (Scope of Work). Rates are subject to change.
    b. Reimbursable expenses must be pre-approved by SCPA.

    In no event shall the amount payable for services performed during the term of this Agreement exceed $275,000.

5. **Term of the Agreement:** The initial term of this Agreement shall be from the Effective Date to June 30, 2019, unless terminated pursuant to Section 6 or amended by a written, executed amendment to the Agreement. Water Agency understands and agrees that funding for costs under this Agreement after July 1, 2019, is subject to approval by SCPA's

Board of Directors of a budget including such funding, and that SCPA may terminate this Agreement pursuant to Section 6 below if such funding is not approved.

6. **Termination:** Notwithstanding any other provision of this Agreement, at any time and without cause, the Parties shall have the unequivocal right to terminate this Agreement by giving thirty (30) calendar days written notice to the other Party. Notwithstanding any other provision of this Agreement, should Water Agency fail to perform any of its obligations or violate any of the terms of this Agreement (Termination for Cause), SCPA may, upon providing Water Agency written notice stating the reason for termination, immediately terminate this Agreement. In the event of termination, Water Agency, within fourteen (14) calendar days following the date of termination, shall deliver to SCPA all materials and work product subject to Section 16 and shall submit to SCPA a final invoice for all outstanding payments.

7. **Indemnification:** Each party shall indemnify, defend, protect, hold harmless, and release the other, its officers, agents, and employees, from and against any and all claims, loss, proceedings, damages, causes of action, liability, costs, or expense (including attorneys' fees and witness costs) arising from or in connection with, or caused by any act, omission, or negligence of such indemnifying party or its agents, employees, contractors, subcontractors, or invitees. This indemnification obligation shall not be limited in any way by any limitation on the amount or type of damages or compensation payable to or for the indemnifying party or its agents, employees, contractors, subcontractors, or invitees under workers' compensation acts, disability benefit acts, or other employee benefit acts.

8. **Insurance:** Water Agency shall maintain insurance and/or self-insurance as described below unless such insurance has been expressly waived in writing by SCPA.
    a. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California, and Employers Liability with minimum limits of $1,000,000 per accident; $1,000,000 disease per employee; $1,000,000 disease per policy.
    b. Commercial General Liability Insurance with Minimum Limits: $1,000,000 per occurrence; $2,000,000 general aggregate; $2,000,000 products/completed operations aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Umbrella Liability Insurance. If Water Agency maintains higher limits than the specified minimum limits, SCPA requires and shall be entitled to coverage for the higher limits maintained by Water Agency.
        1. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. Deductibles or self-insured retention that exceeds $25,000 must be approved in advance by SCPA. Water Agency is responsible for any deductible or self-insured retention and shall fund it upon SCPA's written request, regardless of whether Water Agency has a claim against the insurance or is named as a party in any action involving SCPA.

2. SCPA shall be an additional insured for liability arising out of operations by, or on behalf of, the Water Agency in the performance of this Agreement.
3. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.
4. The policy shall cover inter-insured suits between the additional insureds and Water Agency and include a “separation of insureds” or “severability” clause which treats each insured separately.

c. Automobile Liability Insurance with Minimum Limit of $1,000,000 combined single limit per accident. Automobile Insurance shall apply to all owned autos. If Water Agency currently owns no autos, Water Agency agrees to obtain such insurance should any autos be acquired during the term of this Agreement. Automobile Insurance shall apply to hired and non-owned autos.
d. Professional Liability/Errors and Omissions Insurance with Minimum Limit of $1,000,000 per claim or per occurrence. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by SCPA. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.
e. Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A: VII.
f. The Certificate of Insurance must include the following reference: Sonoma Clean Power Authority.
g. All required Evidence of Insurance shall be submitted to SCPA within 3 business days of the Effective Date. Water Agency agrees to maintain current Evidence of Insurance on file with SCPA for the entire term of this Agreement.
h. The name and address for Additional Insured endorsements and Certificates of Insurance is: Sonoma Clean Power Authority, Attn: Contract Administration, 50 Santa Rosa Avenue, Fifth Floor, Santa Rosa, CA, 95404.
i. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) business days before expiration or other termination of the existing policy.

j. Water Agency shall provide SCPA immediate written notice if:
   1. Any of the required insurance policies are terminated;
   2. The limits of any of the required policies are reduced; or
   3. The deductible or self-insured retention is increased.

k. Upon written request, certified copies of required insurance policies must be provided within thirty (30) calendar days.

l. Water Agency's indemnity and other obligations shall not be limited by these insurance requirements.

9. **Status of Water Agency:** Water Agency, in performing the services under this Agreement, shall act as an independent contractor and shall control the work and the manner in which it is performed. At no time shall Water Agency work as an agent or employee of SCPA and at no time shall Water Agency be entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits SCPA provides its employees. In the event SCPA exercises its right to terminate this Agreement pursuant to Section 6, Water Agency expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

10. **No Suspension or Debarment**: Water Agency warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any state or federal department or agency. Water Agency also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration.

11. **Taxes:** Water Agency agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement. Water Agency shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Water Agency agrees to indemnify and hold SCPA harmless from any liability which it may incur to the United States or to any US State as a consequence of Water Agency's failure to pay, when due, all such taxes and obligations. In the event SCPA is audited for compliance regarding any withholding or other applicable taxes, Water Agency agrees to, in a timely fashion, furnish SCPA with proof of payment of taxes on these earnings.

12. **Records Maintenance:** Water Agency shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to SCPA for inspection at any reasonable time. Water Agency shall maintain such records for a period of five (5) years following the expiration or termination of this Agreement.

13. **Conflict of Interest:** Water Agency warrants that it presently has no interest, and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with Water Agency's performance under this Agreement. Water Agency further warrants that

in the performance of this Agreement no person having any such interests shall be assigned by Water Agency to perform work under this agreement nor be given access to the information described in Section 16. Water Agency shall comply with any and all applicable California Fair Political Practices Act requirements.

14. **Statutory Compliance**: Water Agency shall comply with all applicable federal, state and local laws, regulations, statutes and policies applicable to the services provided under this Agreement.

15. **Nondiscrimination:** Without limiting any other provision of this Agreement, Water Agency shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated by reference.

16. **Confidentiality, Ownership and Disclosure of Work Product:** All information obtained by Water Agency under this Agreement shall be deemed confidential ("Confidential Information"). Unless SCPA provides written permission, Water Agency is compelled by a court of law or regulatory agency, the California Public Records Act, or Water Agency obtained Confidential Information from a source or sources other than SCPA, Water Agency shall not share Confidential Information with any other person or entity outside of SCPA staff and SCPA authorized representatives. Water Agency further agrees to execute non-disclosure agreements related to protecting Confidential Information as requested by SCPA. Provisions related to Confidential Information shall survive expiration or termination of the Agreement for a period of five (5) years. All reports, original drawings, graphics, plans, studies, and other data or documents ("Documents"), in whatever form or format, produced by Water Agency or Water Agency's subcontractors, Water Agency, and other agents within the term and scope of this Agreement shall be the property of SCPA. SCPA shall be entitled to immediate possession of such Documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Water Agency shall promptly deliver to SCPA all such Documents, which have not already been provided to SCPA in such form or format, as SCPA deems appropriate. Such Documents shall be and will remain the property of SCPA without restriction or limitation.

17. **Assignment and Delegation:** Parties shall not assign, delegate, sublet, or transfer any interest in, or duty under, this Agreement without the prior written consent of the other.

18. **Written Communications**: All written communications, including notices, bills and payments, may be made via electronic mail or to the following addresses:

Water Agency	SCPA
Project Manager: Ryan Pedrotti 404 Aviation Boulevard Santa Rosa, CA 95403-9019 Phone: 707-521-6209 Email: Ryan.pedrotti@scwa.ca.gov	Contact: Cordel Stillman 50 Santa Rosa Avenue, 5th Floor Santa Rosa, CA 95404 Phone: 707 890-8486 Email: CStillman@sonomacleanpower.org
Remit payments to:	**Remit invoices to:**
Justin Adalio Same address as above	Same address as above

19. **No Waiver of Breach**: The waiver by either party of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

20. **Construction:** To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The Parties agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated. The Parties acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one Party in favor of the other. Parties acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

21. **Consent:** Wherever in this Agreement the consent or approval of one Party is required to an act of the other Party, such consent or approval shall not be unreasonably withheld or delayed.

22. **No Third Party Beneficiaries:** Nothing contained in this Agreement shall be construed to create, and the Parties do not intend to create, any rights in third parties.

23. **Applicable Law and Forum:** This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement, or for the breach of this Agreement, shall be brought and tried in Santa Rosa, California, or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

24. **Exhibits:** In the event of a conflict between the body of this Agreement and any Exhibits or attachments, the language in the body of this Agreement shall prevail.

25. **Captions:** The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

26. **Merger:** This writing is intended both as the final expression of the Agreement between the Parties with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to California Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both Parties.

27. **Survival of Terms:** All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

28. **Time of Essence:** Time is and shall be of the essence of this Agreement and every provision within this Agreement.

Scope of Work

1. Market energy education programs in 2018-2019 water education brochure. Develop additional flyer for schools outside Water Agency education service area.
2. Implement and refine fourth grade classroom program: Renewable Energy-Be Part of the Climate Change Solution!
3. Incorporate climate change and energy efficiency into ZunZun assembly program.
4. Conduct Climate Literacy and Understanding Global Climate Change teacher workshop.
5. Implement and refine third grade classroom program, which covers the water energy nexus and how an increase in greenhouse gases lead to climate change.
6. Add energy efficiency theme to third-to-sixth grade poster contest. Sonoma Clean Power and energy information will be featured in the 2019 calendar.
7. Implement careers in the water and energy industry program. Explore job shadow opportunities.
8. Incorporate water/energy nexus into fifth grade classroom and field trip program.
9. Develop giveaway items exploring the water and energy nexus.
10. Develop end of year report.

Services under this Agreement shall be billed at the following hourly rates:

- Water Education Program Manager: (PM) $174.55
- Water Education Senior Program Specialist (SR PS): $143.34
- Water Education Program Specialist: (PS) $133.81
- Water Education Resource Technician II: (TECH II) $48.04
- Water Education Resource Technician I: (TECH I) $44.04

1. <u>Market energy education programs in existing water education brochure</u>

The Water Agency will distribute a brochure to every teacher in its service area highlighting the programs SCPA offers. Energy education programs will be included in this brochure. A flyer will be created and distributed to schools outside the Water Agency service area and within the SCPA service area. Webpages for energy education programs will be created and maintained on the Water Agency education program website.

Brochure development:
Sr. PS 80 hours at $143.34= $11,500
Material costs for printing one page flyer for Sonoma and Mendocino counties outside Water Agency service area: $2,500

Total: $14,000

2. Implement and refine fourth grade classroom program: Renewable Energy-Be Part of the Climate Change Solution!

The fourth grade program aims to visit at least 1,500 students in the 2018/2019 school year and will cover the following content:

- Students learn that electricity is generated from different sources and that renewable sources such as solar, wind, and geothermal are choices that will reduce our impact on Earth's changing climate.
- Students make scientific observations and ask questions to help them build their understanding of the concepts.
- Students learn that there are things we can all do to reduce the use of fossil fuels like saving water, walking to school, and changing a light bulb.

Water Agency is working to develop supplemental curriculum to enhance this lesson so students can bring information to their parents and take steps at home. Supplemental curriculum includes an at home water and energy audit and field trip opportunities to local Green Businesses (Amy's Kitchen was the destination in 2018).

Program and supplemental curriculum development, assessment, and evaluation:

SR PS 50 hours at $143.34= $7,200
PM 20 hours at $174.55 = $3,250
PS 70 hours at $133.81 = $9,500

Implementation and training:

PS 300 hours at $133.81= $40,000
TECH 300 hours at 44.04 = $13,000
Materials and transportation= $30,000
Materials may include light bulbs, showerheads, solar panels, and energy efficient handouts and lesson materials for visual aids. Transportation may include contracted bus service to transport students to field trip site.

Total: $102,950

3. Incorporate climate change and energy efficiency into ZunZun assembly program

Water Agency contracts with ZunZun, a multilingual, musical assembly program, to provide assemblies for 10,000 K-6 students annually. Each year Water Agency meets with ZunZun to develop the content for the upcoming assembly program and concepts such as energy efficiency, climate change, and fuel switching will be included in the program.

30 performances for $34,250 (half the content in the 45 minute presentation will be energy-related: energy efficiency, climate change, etc. SCPA will pay one-half of total cost of 25 performances**.**

Total: $17,125

4. Conduct Climate Literacy and Understanding Global Change teacher workshop

   Partner with the Center for Climate Protection and UC Berkeley to offer a teacher workshop. Understanding Global Change is a workshop developed by the UC Berkeley Museum of Paleontology to help teachers implement curriculum covering climate and global change. The focus of the content is how the climate is intricately linked to all living things and natural cycles on the globe, the carbon and water cycles included. A Water Agency educator has been trained on how to implement the workshop for teachers in the Water Agency and SCPA service areas. Teachers who participate in the workshop gain access to online resources and lesson plans.

   Workshop preparation, marketing, and implementation:

   SR. PS 100 hours at $143.34 = $14,500
   TECH 40 hours at $44.04 = $1,700

   Total: $16,200

5. Implement and refine third grade classroom program, which covers the water energy nexus and how an increase in greenhouse gases lead to climate change.

   Water Agency's third grade program consists of two lessons, the first covering storm drain pollution and water conservation and the second covering energy. Annually, Water Agency visits 2,500 students with this program and is looking to develop supplemental curriculum. Lesson two objectives include:

   - It takes energy (electricity) to get water to your home/school. (water energy nexus)
   - The difference between renewable energy sources and non-renewable energy sources.
   - Difference between weather and climate.
   - Climate Change means the planet is getting warmer because of more greenhouse gases.
   - Personal choices to reduce greenhouse gas emissions can help mitigate climate change.

   Program and supplemental curriculum development, assessment, and evaluation:

   SR PS 100 hours at $143.34 = $14,400

PS 100 hours at $133.81 = $13,400
PM 20 hours at $174.55 = $3,500

Implementation and training:

SR PS 120 hours at $143.34 = $17,250
TECH 200 hours at $44.04 = $8,500
Materials = $10,000.
Materials may include light bulbs, showerheads, solar panels, and energy efficient handouts and lesson materials for visual aids.

Total: $67,000

6. Add energy efficiency theme to third to sixth grade poster contest. Sonoma Clean Power and energy information will be featured in the 2019 calendar.

   Each year Water Agency conducts a poster contest for over 3,000 third and fourth grade students. Water Agency would like to expand the contest to include fifth and sixth grade and have specific themes for each grade. For example, the fourth grade theme would be Saving Water, Saves Energy. This theme would supplement the existing fourth grade classroom program. Winning poster are made into Water Agency's Water Awareness Calendar that is distributed to over 5,000 teachers and students throughout Sonoma and Marin counties. This distribution can be expanded into SCPA's service area as well.

   Calendar and poster contest development and management:

   SR PS 100 hours at $143.34 = $14,400
   Materials (poster paper and an expansion of calendars purchased): $7,600

   Total: $22,000

7. Add energy careers to careers in water industry presentation. Explore job shadow opportunities

   Currently, Water Agency has a presentation geared at high school and college students exploring careers in the water industry. The presentation highlights a few careers and has students work through real world scenarios someone in this position may encounter. A job shadow opportunity is available as well. Water Agency will highlight careers in the energy industry and coordinate job shadows with SCPA staff. The Energy Saves Schools Program is a great resource to expose high school students to STEM careers and how students can make a tangible difference in their energy usage. Water Agency will explore hosting an outdoor summer academy for middle and high school students at the Westside Water Education Center. Students will conduct citizen science

projects where they explore the topics of water quality, drinking water treatment, the water and energy nexus, renewable energy projects, and the impacts of climate change on our region.

Program development:

PS 50 hours at $133.81 = $6,700

Program Implementation:

PS 50 hours at $133.81 = $6,700

Total: $13,400

8. Incorporate water/energy nexus into fifth grade classroom and field trip program.

   Water Agency's existing fifth grade program reaches 3,500 students annually through a classroom visit and field trip. Water Agency will introduce the connection between water and energy during the classroom visit. During the field trip students will visit the collector well that pulls their drinking water from 100 feet below the Earth's surface.

   Program development:

   PS 50 hours at $133.81 = $6,700

   Program Implementation:

   PS 50 hours at $133.81 = $6,700
   TECH 200 hours at $44.04 = $8,500

   Total: $21,900

9. Develop giveaway items exploring the water and energy nexus.

   Water Agency will redesign the ruler currently given away to roughly 15,000 students annually to explain how saving water saves energy and include the Water Agency and SCPA logos. Water Agency currently gives away magnetic clips to third grade teachers when delivering a lesson in their classroom (the clip holds our Water Agency's informational packet together). Water Agency will redesign the clip to say "Saving Water Saves Energy" and have both logos on it. Water Agency will give this item away to teachers in Water Agency's classroom programs: Kindergarten, third, fourth, and fifth grades.

   Materials (half the cost of rulers and magnetic clips): $2,200

   Material development:

   PS 10 hours at $133.81 = $1,300

Total: $3,500

10. Develop end-of-year report

    The report will detail programs implemented, content covered, number of students/classes/schools visited and will be provided to SCPA by June, 30 2019. It will include teachers trained and number of ZunZun performances.

    Program evaluation report:

    PM 20 hours at $174.55 = $3,500

    Grand total: $275,000

Staff Name and Phone Number:	Chase Takajo / (707) 521-1872
Supervisorial District(s):	
Title:	As-Needed Field Operations Assistance Services

Recommended Actions:

A. Authorize Water Agency's General Manager to execute an agreement with Hanford Applied Restoration & Conservation for as-needed field operations assistance services through August 14, 2020, in the not-to-exceed amount of $500,000.
B. Adopt a Resolution authorizing adjustment to the Board Adopted Budget for Fiscal Year 2018-2019 for the Water Agency Warm Springs Dam Fund in the amount of $200,000.

Executive Summary:

Under the proposed agreement, Hanford Applied Restoration & Conservation will perform as-needed field operations assistance services supporting the Water Agency's Stream Maintenance Program. These services include vegetation management, sediment removal, and bank stabilization, which will maintain flood capacity and improve associated riparian habitat.

Discussion:

HISTORY OF ITEM/BACKGROUND

The Sonoma County Water Agency (Water Agency) developed the Stream Maintenance Program (Program) to improve and define the management and maintenance of flood control channels and streams under Water Agency's authority. The primary purpose of the Program is to provide an efficient and organized program to conduct stream maintenance activities, comply with relevant environmental regulations, and maintain flood capacity while enhancing the program area's natural resources. Habitat enhancement projects on Dry Creek require ongoing maintenance and were added to the Program recently. The Dry Creek projects are required for the Water Agency to meet the requirements set forth in the 2008 Russian River Biological Opinion.

Over the years, Water Agency has required as-needed assistance for field operations services supporting the Program since its adoption, including vegetation management, sediment removal, and bank stabilization, which will maintain flood capacity while improving associated riparian habitat. Costs for as-

needed field operations services in the Water Agency's Flood Control Zones have historically been $50,000 per year. Recently, staff identified the need for support services to maintain several miles of habitat enhancement projects on Dry Creek which flows from Warm Springs Dam. Costs for as-needed services are expected to be $200,000 per year.

SELECTION PROCESS

On February 1, 2018, Water Agency issued a Request for Statements of Qualifications to the following 17 firms:

1. American Tree Experts Inc., Petaluma, CA
2. BioEngineering Associates, Inc., Laytonville, CA
3. Cagwin & Dorward Landscape Contractors, Novato, CA
4. California Conservation Corps, Ukiah, CA
5. Center for Social and Environmental Stewardship, Windsor, CA
6. Conservation Corps North Bay, Cotati, CA
7. Delta Conservation Camp, Suisun City, CA
8. Empire Tree Experts, Santa Rosa, CA
9. Hanford Applied Restoration & Conservation, Sonoma, CA
10. Image Tree Service Inc., Windsor, CA
11. Konocti Conservation Camp, Lower Lake, CA
12. Laguna de Santa Rosa Foundation, Santa Rosa, CA
13. Prunuske Chatham,Inc., Sebastopol, CA
14. Sandborn Tree Services, Sebastopol, CA
15. Social Advocates for Youth, Santa Rosa, CA
16. Sonoma County Regional Parks, Santa Rosa, CA
17. Sonoma Ecology Center, Eldridge, CA

The Request for Statements of Qualifications was also posted on the Water Agency and County of Sonoma Purchasing Department websites.

The three firms listed below submitted Statements of Qualifications:

1. Cagwin & Dorward Landscape Contractors
2. Conservation Corps North Bay
3. Hanford ARC

The following criteria were used to evaluate each firm:

1) Thoroughness of Statements of Qualifications
2) Professional qualifications and demonstrated ability to perform the work
3) Exceptions to standard terms in the sample agreement

Hanford Applied Restoration & Conservation (Hanford) was selected to perform the work because it has the experience and resources necessary to complete the wide range of complex services required. These services include, but are not limited to, maintaining riparian habitat, vegetation maintenance, sediment removal, culvert clearing, native plant installation, hydroseeding, maintaining irrigation systems, and herbicide application.

SERVICES TO BE PERFORMED

Under the proposed agreement, Hanford will perform as-needed field operations assistance services supporting the Stream Maintenance Program, including vegetation management, sediment removal, and bank stabilization.

The cost of services will not exceed $250,000 in fiscal year 2018/2019 and $250,000 in fiscal year 2019/2020. The total agreement amount is not-to-exceed $500,000. The term end date is August 14, 2020.

RECOMMENDATION

Water Agency staff recommends that the Board authorize Water Agency's General Manager to execute an agreement with Hanford Applied Restoration & Conservation for as-needed field operations assistance services through August 14, 2020, in the amount of $500,000 and adopt a Resolution authorizing adjustment to the Board Adopted Budget for Fiscal Year 2018-2019 for the Water Agency Warm Springs Dam Fund in the amount of $200,000.

Prior Board Actions:

None

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

The services under this agreement support the Water Agency's Stream Maintenance Program, which protects and enhances riparian habitat resources while maintaining the flood control capacity in streams to the maximum extent feasible.

Flood Protection, Goal 1: Provide efficient and effective flood protection programs.
The as-needed field operations assistance services under this agreement support Water Agency's Stream Maintenance Program, which helps maintain flood capacity in streams.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$50,000	$250,000	
Additional Appropriation Requested	$200,000		
Total Expenditures	**$250,000**	**$250,000**	
Funding Sources			
General Fund/WA GF	$0	$0	$0
State/Federal			
Fees/Other	$50,000	$250,000	
Use of Fund Balance	$200,000		
Contingencies			
Total Sources	**$250,000**	**$250,000**	

Narrative Explanation of Fiscal Impacts:

Budgeted amount of $50,000 is available from FY 2018/2019 appropriations for the Flood Control Zone 1A, 2A, and 3A Funds. Additional appropriations of $200,000 for maintenance of recently completed Dry Creek Habitat Enhancement Projects in Dry Creek are required to process this expense. With Board approval, appropriations will be made in the Warm Springs Dam Fund pursuant to budgetary resolution (attachment R1). FY 2019/2020 appropriations will be budgeted in that fiscal year.

☑ 4/5 Vote Required

Resolution Of The Board Of Directors of the Sonoma County Water Agency Authorizing Adjustments to the Board Adopted Budget for Fiscal Year 2018-2019 for the Warm Springs Dam Fund in the Amount of $200,000

Whereas, the Board of Directors of the Sonoma County Water Agency (Water Agency) adopted the Water Agency Fiscal Year 2018-2019 budget on June 15, 2018; and

Whereas, Sections 29088 through 29092 of the Government Code, State of California allow for adjustments to the Fiscal Year 2018-2019 Adopted Budget; and

Whereas, the Water Agency desires to adjust the Fiscal Year 2018-2019 Adopted Budget for the Warm Springs Dam Fund in the amount of $200,000 for as-needed field operations assistance services supporting the Water Agency's Stream Maintenance Program on Dry Creek; and

Whereas, a resolution from the Water Agency's governing board authorizing such budget adjustment is required.

Now, Therefore, Be It Resolved that the County Auditor-Controller-Treasurer-Tax Collector and the County Administrator are hereby authorized and directed to complete the budgetary and accounting transfers and adjustments to the Sonoma County Water Agency (Water Agency) Fiscal Year 2018-2019 budget as follows:

Fiscal Year 2018-2019 Expenditures		Amount
14135-33030100	**Warm Springs Dam Fund**	
51803	Other Contract Services	200,000
	Total Expenditures	200,000
Fiscal Year 2018-2019 Funding Sources		
14135-33030100	**Warm Springs Dam Fund**	
	Fund Balance	200,000
	Total Funding Sources	200,000

Agreement for As-Needed Field Operations Assistance Services

This agreement ("Agreement") is by and between **Sonoma County Water Agency**, a body corporate and politic of the State of California ("Water Agency") and **Hanford Applied Restoration & Conservation**, a California corporation ("Service Provider"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Paragraph 7.1.

R E C I T A L S

A. Service Provider represents that it is a duly qualified and licensed landscaping firm, experienced in creek maintenance, flood control, and related services.

B. Water Agency developed the Stream Maintenance Program (SMP) to improve and define the management and maintenance of flood control channels and streams under Water Agency's authority. The primary purpose of the SMP is to provide an efficient and organized program to conduct stream maintenance activities, comply with relevant environmental regulations, and maintain flood capacity while enhancing the program area's natural resources.

C. From time to time, Water Agency requires assistance for field operations services supporting the SMP which will maintain flood capacity while improving associated riparian habitat. Under this Agreement Service Provider will provide services that include, but are not limited to, hydroseeding, native tree planting, vegetation management, invasive vegetation removal, bank stabilization, and culvert repair and replacement.

In consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

A G R E E M E N T

1. RECITALS

1.1. The above recitals are true and correct.

2. LIST OF EXHIBITS

2.1. The following exhibits are attached hereto and incorporated herein:

a. Exhibit A: Agreement Memorandum
b. Exhibit B: Scope of Work
c. Exhibit C: Schedule of Costs
d. Exhibit D: Insurance Requirements

3. WATER AGENCY'S REQUEST FOR SERVICES

3.1. *Initiation Conference:* The Water Agency's Agreement Administrator, Chase Takajo, will initiate requests for services through an Initiation Conference, which may be in person, by telephone, or by email. During the Initiation Conference, the Project Manager and Service Provider will establish and agree on the project information shown in Exhibit A (Agreement Memorandum).

3.2. *Agreement Memorandum:* Water Agency will prepare an Agreement Memorandum setting forth the terms for the subject project as established during the Initiation Conference. The Agreement Memorandum will be in the form as set forth in Exhibit A and will be executed by both parties prior to commencement of work.

3.3. *Amount of Work:* Water Agency does not guarantee a minimum or maximum amount of work. However, under no circumstances shall the amount of work (including materials) under any single Agreement Memorandum exceed $40,000.

4. SCOPE OF SERVICES

4.1. *Service Provider's Specified Services:* Service Provider shall perform the services listed in Exhibit B (Scope of Work) or as requested in the Agreement Memorandum, within the times or by the dates provided in the Agreement Memorandum and pursuant to Article 11 (Prosecution of Work). Service Provider shall provide necessary manpower and equipment required to carry out the requested services in a professional and expeditious manner.

4.2. *Contact Information:*

Water Agency	**Service Provider**
Project Manager: Chase Takajo 404 Aviation Boulevard Santa Rosa, CA 95403-9019 Phone: (707) 521-1872 Email: Chase.Takajo@scwa.ca.gov	Contact: Will Johnson 596 1st Street East Sonoma, CA 95476 Phone: (707) 766-4905 Email: will@hanfordarc.com
Remit invoices to:	**Remit payments to:**
Susan Bookmyer Same address as above or Email: susan.bookmyer@scwa.ca.gov	Attn: Will Johnson Same address as above

4.3. *Cooperation with Water Agency:* Service Provider shall coordinate the work with the Project Manager named in the Agreement Memorandum.

4.4. *Performance Standard and Standard of Care:* Service Provider hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with the standards of a reasonable professional having specialized knowledge and expertise in the services provided under this Agreement and in

accordance with all applicable federal, state and local laws, it being understood that acceptance of Service Provider's work by Water Agency shall not operate as a waiver or release. Water Agency has relied upon the professional ability and training of Service Provider as a material inducement to enter into this Agreement. If Water Agency determines that any of Service Provider's work is not in accordance with such level of competency and standard of care, Water Agency, in its sole discretion, shall have the right to do any or all of the following: (a) require Service Provider to meet with Water Agency to review the quality of the work and resolve matters of concern; (b) require Service Provider to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 8 (Termination); or (d) pursue any and all other remedies at law or in equity.

4.5. *Assigned Personnel:*

a. Service Provider shall assign only competent personnel to perform work hereunder. In the event that at any time Water Agency, in its sole discretion, desires the removal of any person or persons assigned by Service Provider to perform work hereunder, Service Provider shall remove such person or persons immediately upon receiving written notice from Water Agency.

b. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by Water Agency to be key personnel whose services were a material inducement to Water Agency to enter into this Agreement, and without whose services Water Agency would not have entered into this Agreement. Service Provider shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of Water Agency.

c. Key personnel shall be as listed in the applicable Agreement Memorandum.

d. In the event that any of Service Provider's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness, or other factors outside of Service Provider's control, Service Provider shall be responsible for timely provision of adequately qualified replacements.

5. SAFETY

5.1. *Site Safety Officer.* Prior to commencement of work, Service Provider shall designate a Site Safety Officer (SSO) and alternate SSO for this work and shall provide the names, telephone and/or cellular/pager numbers of both SSOs to Project Manager. Both SSOs shall be employees of Service Provider.

5.2. *Safety Orders.* All work shall be performed in accordance with the California Code of Regulations (CCR) Title 8, Division 1, Chapter 4 - Industrial Safety Orders and all other applicable laws to ensure the safety of the public and those performing the work.

5.3. *Safety Plan and Program.*

a. *Scope*: Service Provider shall furnish a copy of an Injury and Illness Prevention Program (IIPP), a Site-Specific Safety and Health Plan (SSHP), for this work. Service Provider shall also provide copies of applicable Material Safety Data Sheets and information regarding the SSO as described below. Plans, programs, and other information described herein shall be furnished to Water Agency's Project Manager prior to commencement of work.

b. *Injury and Illness Prevention Program*: Service Provider's IIPP shall conform with the General Industrial Safety Orders (CCR Title 8, Division 1, Chapter 4, Subchapter 7, Section 3203), and the California Labor Code (§6401.7).

c. *Site-Specific Safety and Health Plan and Monitoring*: The SSHP shall describe health and safety procedures to be implemented during all phases of work in order to ensure safety of the public and those performing the work. The SSHP shall be modeled after the guidelines for a SSHP listed in CCR Title 8, Division 1, Chapter 4, Subchapter 7, Section 5192, Item (b)(4).

6. PAYMENT

6.1. *Total Costs:* Total costs under this Agreement shall not exceed $500,000.

a. Task Limit: The amount of work (including materials) under any single Agreement Memorandum exceed shall not exceed $40,000, unless approved by County Counsel.

6.2. *Method of Payment:* Service Provider shall be paid in accordance with the following terms:

a. Service Provider shall be paid in accordance with Exhibit C (Schedule of Costs). Billed hourly rates shall include all costs for overhead and any other charges, other than expenses specifically identified in Exhibit C. Expenses not expressly authorized by the Agreement shall not be reimbursed.

6.3. *Invoices:* Service Provider shall submit its bills in arrears on a monthly basis, based on work completed for the period, in a form approved by Water Agency. The bills shall show or include:

a. Service Provider name

b. Name of Agreement

c. Water Agency's Project-Activity Code as listed in the applicable Agreement Memorandum.

d. Task performed with an itemized description of services rendered by date

e. Time in quarter hours devoted to the task

f. Hourly rate or rates of the persons performing the task

g. Summary of work performed by subconsultants, as described in Paragraph 17.4

6.4. *Timing of Payments:* Unless otherwise noted in this Agreement, payments shall be made within the normal course of Water Agency business after presentation of an invoice in a form approved by Water Agency for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by Water Agency.

6.5. *Taxes Withheld by Water Agency:*

a. Pursuant to California Revenue and Taxation Code (R&TC) section 18662, the Water Agency shall withhold seven percent of the income paid to Service Provider for services performed within the State of California under this Agreement, for payment and reporting to the California Franchise Tax Board, if Service Provider does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

b. If Service Provider does not qualify, as described in Paragraph 6.5.a, Water Agency requires that a completed and signed Form 587 be provided by Service Provider in order for payments to be made. If Service Provider is qualified, as described in Paragraph 6.5.a, then Water Agency requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, Service Provider agrees to promptly notify Water Agency of any changes in the facts. Forms should be sent to Water Agency pursuant to Article 18 (Method and Place of Giving Notice, Submitting Bills, and Making Payments) of this Agreement. To reduce the amount withheld, Service Provider has the option to provide Water Agency with either a full or partial waiver from the State of California.

6.1. *Funding:*

a. Funding for this Agreement is as follows:

Current Fiscal Year	*Budgeted Appropriation*
2018-2019	$250,000
Subsequent Fiscal Years	*Planned Appropriation*
2019-2020	$250,000

b. Availability of Funding in Subsequent Fiscal Years:

i. Water Agency's performance under this Agreement in subsequent years is contingent upon appropriation of funds by Water Agency's Board of Directors. Water Agency shall have no liability under this Agreement if sufficient funds are not appropriated in subsequent fiscal years by Water Agency's Board of Directors for the purpose of this Agreement.

ii. If funding for this Agreement for any fiscal year is reduced or eliminated by Water Agency's Board of Directors, Water Agency shall have the

option to either terminate this Agreement in accordance with Article 8 (Termination) or offer an amendment to Service Provider to reflect the reduced amount.

7. TERM OF AGREEMENT AND COMMENCEMENT OF WORK

7.1. *Term of Agreement:* This Agreement shall remain in effect until depletion of the not-to-exceed amount listed in Paragraph 6.1, or until August 14, 2020, whichever occurs first, unless terminated earlier in accordance with the provisions of Article 8 (Termination

7.2. *Commencement of Work:* Service Provider is authorized to proceed with work upon receipt of each fully executed Agreement Memorandum.

8. TERMINATION

8.1. *Authority to Terminate:* Water Agency's right to terminate may be exercised by Water Agency's General Manager.

8.2. *Termination Without Cause:* Notwithstanding any other provision of this Agreement, at any time and without cause, Water Agency shall have the right, in its sole discretion, to terminate this Agreement by giving 5 days written notice to Service Provider.

8.3. *Termination for Cause:* Notwithstanding any other provision of this Agreement, should Service Provider fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, Water Agency may immediately terminate this Agreement by giving Service Provider written notice of such termination, stating the reason for termination.

8.4. *Delivery of Work Product and Final Payment Upon Termination:* In the event of termination, Service Provider, within 14 days following the date of termination, shall deliver to Water Agency all reports, original drawings, graphics, plans, studies, and other data or documents, in whatever form or format, assembled or prepared by Service Provider or Service Provider's subcontractors, consultants, and other agents in connection with this Agreement subject to Paragraph 14.9 and shall submit to Water Agency an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

8.5. *Payment Upon Termination:* Upon termination of this Agreement by Water Agency, Service Provider shall be entitled to receive as full payment for all services satisfactorily rendered and reimbursable expenses properly incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Service Provider bear to the total services otherwise required to be performed for such total payment; provided, however, that if services are to be paid on a per-hour

or per-day basis, then Service Provider shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to termination multiplied by the applicable hourly or daily rate; and further provided, however, that if Water Agency terminates the Agreement for cause pursuant to Paragraph 8.3, Water Agency shall deduct from such amounts the amount of damage, if any, sustained by Water Agency by virtue of the breach of the Agreement by Service Provider.

9. INDEMNIFICATION

9.1. Service Provider agrees to accept all responsibility for loss or damage to any person or entity, including Sonoma County Water Agency, and to indemnify, hold harmless, and release Sonoma County Water Agency, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Service Provider, that arise out of, pertain to, or relate to Service Provider's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Service Provider agrees to provide a complete defense for any claim or action brought against Sonoma County Water Agency based upon a claim relating to Service Provider's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Service Provider's obligations under this Article 9 apply whether or not there is concurrent or contributory negligence on the part of Sonoma County Water Agency, but, to the extent required by law, excluding liability due to conduct of Sonoma County Water Agency. Sonoma County Water Agency shall have the right to select its legal counsel at Service Provider's expense, subject to Service Provider's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Service Provider or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

10. INSURANCE

10.1. With respect to performance of work under this Agreement, Service Provider shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in Exhibit D (Insurance Requirements).

11. PROSECUTION OF WORK

11.1. Performance of the services hereunder shall be completed within the time required within each Agreement Memorandum, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Service Provider's performance of this Agreement shall be extended by a number of days equal to the number of days Service Provider has been delayed.

11.2. When work is requested of Service Provider by Water Agency, all due diligence shall be exercised and the work accomplished without undue delay, within the performance time specified in the Agreement Memorandum(s).

12. EXTRA OR CHANGED WORK

12.1. Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Changes to lengthen time schedules or make minor modifications to the scope of work, which do not increase the amount paid under the Agreement, may be executed by the Water Agency's General Manager in a form approved by County Counsel. The parties expressly recognize that Water Agency personnel are without authorization to order all other extra or changed work or waive Agreement requirements. Failure of Service Provider to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Service Provider shall be entitled to no compensation whatsoever for the performance of such work. Service Provider further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of Water Agency.

13. CONTENT ONLINE ACCESSIBILITY

13.1. *Accessibility:* Water Agency policy requires that all documents that may be published to the Web meet accessibility standards to the greatest extent possible, and utilizing available existing technologies.

13.2. *Standards:* All consultants responsible for preparing content intended for use or publication on a Water Agency/County-managed or Water Agency/County-funded web site must comply with applicable federal accessibility standards established by 36 C.F.R. section 1194, pursuant to section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. section 794(d)), and Water Agency's Web Site Accessibility Policy located at http://sonomacounty.ca.gov/Services/Web-Standards-and-Guidelines/.

13.3. *Certification:* With each final receivable intended for public distribution (report, presentations posted to the Internet, public outreach materials), Service Provider shall include a descriptive summary describing how all deliverable documents were assessed for accessibility (e.g. Microsoft Word accessibility check; Adobe Acrobat accessibility check, or other commonly accepted compliance check).

13.4. *Alternate Format:* When it is strictly impossible due to the unavailability of technologies required to produce an accessible document, Service Provider shall identify the anticipated accessibility deficiency prior to commencement of any work to produce such deliverables. Service Provider agrees to cooperate with

Water Agency staff in the development of alternate document formats to maximize the facilitative features of the impacted document(s); e.g., embedding the document with alt-tags that describe complex data/tables.

13.5. *Noncompliant Materials; Obligation to Cure:* Remediation of any materials that do not comply with Water Agency's Web Site Accessibility Policy shall be the responsibility of Service Provider. If Water Agency, in its sole and absolute discretion, determines that any deliverable intended for use or publication on any Water Agency/County-managed or Water Agency/County-funded Web site does not comply with Water Agency Accessibility Standards, Water Agency will promptly inform Service Provider in writing. Upon such notice, Service Provider shall, without charge to Water Agency, repair or replace the non-compliant materials within such period of time as specified by Water Agency in writing. If the required repair or replacement is not completed within the time specified, Water Agency shall have the right to do any or all of the following, without prejudice to Water Agency's right to pursue any and all other remedies at law or in equity:

a. Cancel any delivery or task order
b. Terminate this Agreement pursuant to the provisions of Article 8 (Termination); and/or
c. In the case of custom Electronic and Information Technology (EIT) developed by Service Provider for Water Agency, Water Agency may have any necessary changes or repairs performed by itself or by another contractor. In such event, Service Provider shall be liable for all expenses incurred by Water Agency in connection with such changes or repairs.

13.6. *Water Agency's Rights Reserved:* Notwithstanding the foregoing, Water Agency may accept deliverables that are not strictly compliant with Water Agency Accessibility Standards if Water Agency, in its sole and absolute discretion, determines that acceptance of such products or services is in Water Agency's best interest.

14. REPRESENTATIONS OF SERVICE PROVIDER

14.1. *Status of Service* Provider*:* The parties intend that Service Provider, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Service Provider is not to be considered an agent or employee of Water Agency and is not entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits Water Agency provides its employees. In the event Water Agency exercises its right to terminate this Agreement pursuant to Article 8 (Termination), Service Provider expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

14.2. *No Suspension or Debarment:* Service Provider warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Service Provider also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration.

14.3. *Taxes:* Service Provider agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Service Provider agrees to indemnify and hold Water Agency harmless from any liability which it may incur to the United States or to the State of California or to any other public entity as a consequence of Service Provider's failure to pay, when due, all such taxes and obligations. In case Water Agency is audited for compliance regarding any withholding or other applicable taxes, Service Provider agrees to furnish Water Agency with proof of payment of taxes on these earnings.

14.4. *Records Maintenance:* Service Provider shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to Water Agency for inspection at any reasonable time. Service Provider shall maintain such records for a period of four (4) years following completion of work hereunder.

14.5. *Conflict of Interest:* Service Provider covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Service Provider further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if required by law or requested to do so by Water Agency, Service Provider shall submit a completed Fair Political Practices Commission Statement of Economic Interests (Form 700) with Water Agency within 30 calendar days after the Effective Date of this Agreement and each year thereafter during the term of this Agreement, or as required by state law.

14.6. *Statutory Compliance/Living Wage Ordinance:* Service Provider agrees to comply, and to ensure compliance by its subconsultants or subcontractors, with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Service Provider expressly acknowledges and agrees that this Agreement is subject to the provisions of

Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

14.7. *Nondiscrimination:* Service Provider shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

14.8. *Assignment of Rights:* Service Provider assigns to Water Agency all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Service Provider in connection with this Agreement. Service Provider agrees to take such actions as are necessary to protect the rights assigned to Water Agency in this Agreement, and to refrain from taking any action which would impair those rights. Service Provider's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as Water Agency may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of Water Agency. Service Provider shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of Water Agency.

14.9. *Ownership and Disclosure of Work Product:* All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Service Provider or Service Provider's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of Water Agency. Water Agency shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Service Provider shall promptly deliver to Water Agency all such documents, which have not already been provided to Water Agency in such form or format as Water Agency deems appropriate. Such documents shall be and will remain the property of Water Agency without restriction or limitation. Service Provider may retain copies of the above described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of Water Agency.

15. PREVAILING WAGES

15.1. *General:* Service Provider shall pay to any worker on the job for whom prevailing wages have been established an amount equal to or more than the general prevailing rate of per diem wages for (1) work of a similar character in the locality in which the work is performed and (2) legal holiday and overtime work in said locality. The per diem wages shall be an amount equal to or more than the stipulated rates contained in a schedule that has been ascertained and determined by the Director of the State Department of Industrial Relations and Water Agency to be the general prevailing rate of per diem wages for each craft or type of workman or mechanic needed to execute this Agreement. Service Provider shall also cause a copy of this determination of the prevailing rate of per diem wages to be posted at each site work is being performed, in addition to all other job site notices prescribed by regulation. Copies of the prevailing wage rate of per diem wages are on file at Water Agency and will be made available to any person upon request.

15.2. *Compliance Monitoring and Registration*: This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations. Service Provider shall furnish and shall require all subcontractors to furnish the records specified in Labor Code section 1776 (e.g. electronic certified payroll records) directly to the Labor Commissioner in a format prescribed by the Labor Commissioner at least monthly (Labor Code section 1771.4(a)(3)). Service Provider and all subcontractors performing work that requires payment of prevailing wages shall be registered and qualified to perform public work pursuant to Labor Code section 1725.5 as a condition to engage in the performance of any services under this Agreement.

15.3. *Subcontracts:* Service Provider shall insert in every subcontract or other arrangement which Service Provider may make for performance of such work or labor on work provided for in the Agreement, provision that Subcontractor shall pay persons performing labor or rendering service under subcontract or other arrangement not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work fixed in the Labor Code. Pursuant to Labor Code section 1775(b)(1), Service Provider shall provide to each Subcontractor a copy of sections 1771, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code.

15.4. *Compliance with Law:* Service Provider stipulates that it shall comply with all applicable wage and hour laws, including without limitation Labor Code sections 1725.5, 1775, 1776, 1777.5, 1813, and 1815 and California Code of Regulations, Title 8, section 16000, et seq.

16. DEMAND FOR ASSURANCE

16.1. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article 15 limits Water Agency's right to terminate this Agreement pursuant to Article 8 (Termination).

17. ASSIGNMENT AND DELEGATION

17.1. *Consent:* Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

17.2. *Subcontracts:* Notwithstanding the foregoing, Service Provider may enter into subcontracts with the subconsultants specifically identified herein. If no subconsultants are listed, then no subconsultants will be utilized in the performance of the work specified in this Agreement.

17.3. *Change of Subcontractors or Subconsultants:* If, after execution of the Agreement, parties agree that subconsultants not listed in Paragraph 17.2 will be utilized, Service Provider may enter into subcontracts with subconsultants to perform other specific duties pursuant to the provisions of this Paragraph 17.2. The following provisions apply to any subcontract entered into by Service Provider other than those listed in Paragraph 17.2:

a. Prior to entering into any contract with subconsultant, Service Provider shall obtain Water Agency approval of subconsultant.

b. All agreements with subconsultants shall (a) contain indemnity requirements in favor of Water Agency in substantially the same form as that contained in Article 9 (Indemnification), (b) contain language that the subconsultant may be terminated with or without cause upon reasonable written notice, and (c) prohibit the assignment or delegation of work under the agreement to any third party.

17.4. *Summary of Subconsultants' Work:* Service Provider shall provide Water Agency with a summary of work performed by subconsultants with each invoice submitted under Paragraph 6.3. Such summary shall identify the individuals performing work on behalf of subconsultants and the total amount paid to subconsultant, broken down by the tasks listed in the Scope of Work.

18. METHOD AND PLACE OF GIVING NOTICE, SUBMITTING BILLS, AND MAKING PAYMENTS

18.1. *Method of Delivery:* All notices, bills, and payments shall be made in writing and shall be given by personal delivery, U.S. Mail, courier service, or electronic means. Notices, bills, and payments shall be addressed as specified in Paragraph 4.2.

18.2. *Receipt:* When a notice, bill, or payment is given by a generally recognized overnight courier service, the notice, bill, or payment shall be deemed received on the next business day. When a copy of a notice, bill, or payment is sent by electronic means, the notice, bill, or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill, or payment is deposited in the U.S. mail and postmarked on the date of the electronic transmission (for a payment, on or before the due date), (2) the sender has a written confirmation of the electronic transmission, and (3) the electronic transmission is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills, and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this Article 18.

19. MISCELLANEOUS PROVISIONS

19.1. *No Bottled Water:* In accordance with Water Agency Board of Directors Resolution No. 09-0920, dated September 29, 2009, no Water Agency funding shall be used to purchase single-serving, disposable water bottles for use in Water Agency facilities or at Water Agency-sponsored events. This restriction shall not apply when potable water is not available.

19.2. *No Waiver of Breach:* The waiver by Water Agency of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or promise or any subsequent breach of the same or any other term or promise contained in this Agreement.

19.3. *Construction:* To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Service Provider and Water Agency

acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Service Provider and Water Agency acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

19.4. *Consent:* Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

19.5. *No Third-Party Beneficiaries:* Except as provided in Article 9 (Indemnification), nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

19.6. *Applicable Law and Forum:* This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or in the forum nearest to the City of Santa Rosa, in the County of Sonoma.

19.7. *Captions:* The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

19.8. *Merger:* This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure section 1856. Each Party acknowledges that, in entering into this Agreement, it has not relied on any representation or undertaking, whether oral or in writing, other than those which are expressly set forth in this Agreement. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

19.9. *Survival of Terms:* All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

19.10. *Time of Essence:* Time is and shall be of the essence of this Agreement and every provision hereof.

/

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the date last signed by the parties to the Agreement.

Scope of Work

1. TASKS

1.1. Requested services may include, but are not limited to, the following:

a. Hydroseeding
b. Native tree planting
c. Vegetation management
d. Invasive vegetation removal
e. Bank stabilization
f. Culvert repair/replacement

1.2. Review and Acceptance of Work Products

a. First Draft: Prepare each work product in draft form and submit to Water Agency for review and approval in accordance with the date listed for this deliverable in the applicable Agreement Memorandum. Water Agency will return 1 copy of the draft work product to Service Provider with comments or approval in writing.
b. Subsequent Draft(s): If Water Agency requests revisions, revise the draft work deliverable and resubmit 1 copy of the draft work deliverable for Water Agency approval.
c. Final: Following Water Agency approval and prior to Water Agency's acceptance of work under this Agreement, submit the final approved work deliverable to Water Agency in accordance with the date listed for this deliverable in the applicable Agreement Memorandum.

2. DELIVERABLES

2.1. Submit one electronic copy in PDF format (emailed, on CD, or via internet) of each final deliverable to Water Agency.

2.2. Comply with requirements of Article 13 (Content Online Accessibility).

Exhibit C

Schedule of Costs

PERSONNEL	
Title	**Rates not Subject to Prevailing Wage**
Administrative Assistant	$56.00 per hour
Non-Prevailing Wage Labor	$45.00 per hour
Project Engineer	$73.00 per hour

Qualifications:

1. Equipment includes equipment indirect costs (fuel, oil, grease)
2. Equipment mobilization/demobilization in not included in equipment cost
3. 2018 and 2019 rates provided due to CA DIR predetermined labor increase as currently advertised

Exhibit D

Insurance Requirements

Service Provider shall maintain and require all of its subcontractors and other agents to maintain the insurance listed below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Service Provider shall not commence Work, nor allow its employees, subcontractors or anyone to commence Work until the required insurance has been submitted and approved by Water Agency. Any requirement for Service Provider to maintain insurance after completion of the Work shall survive this Agreement.

Water Agency reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Water Agency's failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or Water Agency's failure to identify any insurance deficiency shall not relieve Service Provider from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. INSURANCE

1.1. Workers Compensation and Employers Liability Insurance

a. Required if Service Provider has employees as defined by the Labor Code of the State of California.

b. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.

c. Employers' Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.

d. The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against Water Agency.

e. Required Evidence of Insurance:

i. Subrogation waiver endorsement and

ii. Certificate of Insurance

f. If Service Provider currently has no employees as defined by the Labor Code of the State of California, Service Provider agrees to obtain the above-specified Workers' Compensation and Employers' Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

1.2. General Liability Insurance

a. Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.

b. Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The General Aggregate shall apply separately to each Project. The required limits may be

satisfied by a combination of General Liability Insurance and either Commercial Excess or Commercial Umbrella Liability Insurance. If Service Provider maintains higher limits than the specified minimum limits, Water Agency requires and shall be entitled to coverage for the higher limits maintained by Service Provider.

c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000, it must be approved in advance by Water Agency. Service Provider is responsible for any deductible or self-insured retention and shall fund it upon Water Agency's written request, regardless of whether Service Provider has a claim against the insurance or is named as a party in any action involving the Water Agency.

d. Insurance shall be continued for one (1) year after completion of the Work.

e. Sonoma County Water Agency, its officers, agents, and employees, shall be endorsed as additional insureds for liability arising out of ongoing and completed operations by or on behalf of the Service Provider in the performance of this Agreement. The foregoing shall continue to be additional insureds for (1) year after completion of the Work under this Agreement.

f. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

g. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

h. The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against Water Agency.

i. The policy shall cover inter-insured suits between the additional insureds and Service Provider and include a "separation of insureds" or "severability" clause which treats each insured separately.

j. Required Evidence of Insurance:

   i. Copy of the additional insured endorsement or policy language granting additional insured status, and

   ii. Certificate of Insurance.

1.3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limit may be satisfied by a combination of Automobile Liability Insurance and either Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Service Provider currently owns no autos, Service Provider agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. Required Evidence of Insurance: Certificate of Insurance.

1.4. Contractors Pollution Liability Insurance

a. Minimum Limits: $1,000,000 per pollution Incident; $1,000,000 Aggregate. If Service Provider maintains higher limits than the specified minimum limits, Water Agency requires and shall be entitled to coverage for the higher limits maintained by Service Provider.

b. The policy shall cover:

i. Bodily injury, sickness, or disease sustained by any person, including death;

ii. Property damage, including physical injury to or destruction of tangible property including the resulting loss of use thereof;

iii. Cleanup costs, and the loss of use of tangible property that has not been physically injured or destroyed including diminution of value and natural resources damages;

iv. Loss arising from pollutants including but not limited to fungus, bacteria, asbestos, lead, silica, and contaminated drywall;

v. Contractual liability coverage for liability assumed by Contractor under a written contract or agreement;

vi. Claims arising from owned and non-owned disposal sites utilized in the performance of this Agreement; and

vii. Inter-insured suits between the additional insureds and Contractor and shall include a “separation of insureds” or “severability” clause which treats each insured separately.

c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000, it must be approved in advance by Water Agency. Service Provider is responsible for any deductible or self-insured retention and shall fund it upon Water Agency’s written request, regardless of whether Service Provider has a claim against the insurance or is named as a party in any action involving the Water Agency.

d. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of work.

e. Service Provider shall maintain the insurance for one (1) year after completion of the work. If the insurance is on a Claims-Made basis, the continuation coverage may be either: (a) a renewal of the existing policy; (b) an extended reporting period endorsement; or (c) a replacement insurance policy with a retroactive date no later than the commencement of the work.

f. Sonoma County Water Agency, its officers, agents, and employees, shall be endorsed as additional insureds for liability arising out of ongoing and completed operations by or on behalf of the Service Provider in the

performance of this Agreement. The foregoing shall continue to be additional insureds for (1) year after completion of work under this Agreement.

g. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

h. Required Evidence of Coverage:

   i. Copy of the additional insured endorsement or policy language granting additional insured status,

   ii. Copy of the endorsement or policy language indicating that coverage is primary and non-contributory, and

   iii. Certificate of Insurance including an indication of the coverage basis: occurrence or claims-made. If claims-made, the Certificate shall show the policy retroactive date.

1.5. Standards for Insurance Companies

a. Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

1.6. Documentation

a. The Certificate of Insurance must include the following reference: TW 17/18-059.

b. Service Provider shall submit all required Evidence of Insurance prior to the execution of this Agreement. Service Provider agrees to maintain current Evidence of Insurance on file with Water Agency as specified in Sections 1.1, 1.2, 1.3, or 1.4 above for the required period of insurance.

c. The name and address for mailing Additional Insured endorsements and Certificates of Insurance is: Sonoma County Water Agency, 404 Aviation Boulevard, Santa Rosa, CA 95403-9019.

d. Service Provider shall submit Required Evidence of Insurance for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

e. Service Provider shall provide immediate written notice if: (1) any of the required insurance policies are terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

f. Upon written request, Service Provider shall provide certified copies of required insurance policies within thirty (30) days.

1.7. Policy Obligations

a. Service Provider's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

1.8. Material Breach

a. If Service Provider fails to maintain insurance which is required pursuant to this Agreement, such failure shall be deemed a material breach of this Agreement. Water Agency, at its sole option, may terminate this Agreement and obtain damages from Service Provider resulting from said breach. Alternatively, Water Agency may purchase the required insurance, and without further notice to Service Provider, Water Agency may deduct from sums due to Service Provider any premium costs advanced by Water Agency for such insurance. These remedies shall be in addition to any other remedies available to Water Agency.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 6/28/2018

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 8
(This Section for use by Clerk of the Board Only.)

To: Board of Directors, Sonoma County Water Agency

Board Agenda Date: August 14, 2018

Vote Requirement: Majority

Department or Agency Name(s): Sonoma County Water Agency

Staff Name and Phone Number:
David Royall 521-1892

Supervisorial District(s):

Title: Janitorial Services

Recommended Actions:

Authorize Water Agency's General Manager to execute an agreement with James Furuli Investment Company, Inc., dba Environmental Dynamics to provide janitorial services through August 24, 2020, for the amount of $300,000.

Executive Summary:

This item requests authority for the Sonoma County Water Agency's (Water Agency) General Manager to execute an agreement with James Furuli Investment Company, Inc., dba Environmental Dynamics (Service Provider) to provide janitorial services at various Water Agency and County Sanitation District (District) facilities as follows: Administration office, operations and maintenance office, and fisheries environmental lab in Santa Rosa; water education building in Forestville; treatment plant in Sonoma; and treatment plant in Guerneville. The agreement amount is $300,000 for two years.

Discussion:

HISTORY OF ITEM/BACKGROUND

Water Agency requires janitorial services at its facilities including Water Agency's administration office, operations and maintenance office, and fisheries environmental lab in Santa Rosa; water education building in Forestville; treatment plant in Sonoma; and treatment plant in Guerneville.

From 2008 to 2016, Water Agency generally contracted for janitorial services under a joint agreement with City of Santa Rosa (City). City conducted the selection process and entered into an agreement with the selected service provider. City and Water Agency entered into a joint agreement for Water Agency's share of the cost of janitorial services. During this time period, there was one agreement between Water Agency and James Furuli Investment Co. Inc. dba Environmental Dynamics. This agreement was for approximately four days of janitorial services only at Water Agency's newly occupied 204 Concourse Boulevard facilities. Preparing a low-dollar-amount agreement was more efficient than amending the existing joint agreement with the City to add this work.

Beginning in 2016 Water Agency began contracting for janitorial services separately from the City of Santa Rosa in order to simplify the ordering of supplies and enable Water Agency to control its own scheduling.

SELECTION PROCESS

On January 22, 2016, Water Agency issued a Request for Statements of Qualifications to the following eight firms:

1. Altech Building Services, Santa Rosa, California
2. County of Sonoma General Services, Santa Rosa, California
3. Integrity Construction Maintenance, Inc., Sebastopol, California
4. James Furuli Investment Company, Inc., dba Environmental Dynamics, Petaluma, California
5. ML Cleaning, Petaluma, California
6. Professional Touch Maintenance Services, Santa Rosa, California
7. Redwood Building Maintenance, Petaluma, California
8. Wine Country Residential and Commercial, Santa Rosa, California

The Request for Statements of Qualifications was also posted on the Water Agency and County of Sonoma Purchasing Department websites.

James Furuli Investment Company, Inc., dba Environmental Dynamics (Service Provider) was the only firm to submit a Statement of Qualifications. Evaluation was based on thoroughness of the response, professional qualifications and demonstrated ability to perform the work, and exceptions to standard terms in sample agreement. Service Provider was selected to perform the work because Service Provider meets the evaluation criteria and has a great deal of experience in this field. Additionally, Service Provider has successfully worked with the Water Agency in the past and is familiar with Water Agency processes, procedures, and facilities.

SERVICES TO BE PERFORMED

Under the proposed agreement, Service Provider will clean and restock restrooms; sweep, mop, or vacuum floors, as appropriate; dust office furniture; empty wastebaskets; and other general janitorial services. These services are substantially the same as those provided under previous agreements for the last two years.

The cost of services will not exceed $150,000 in fiscal year 2018/2019 and $150,000 in fiscal year 2019/2020. The total agreement amount is $300,000. This agreement covers services rendered from August 25, 2018, to August 24, 2020.

RECOMMENDATION

Water Agency staff recommends that the Board authorize Water Agency's General Manager to execute an agreement with James Furuli Investment Company, Inc., dba Environmental Dynamics to provide janitorial services through August 24, 2020 for the amount of $300,000.

Prior Board Actions:

04/26/2016: Authorize Water Agency's General Manager to execute an agreement with James Furuli Investment Company, Inc., dba Environmental Dynamics to provide janitorial services for the amount of $300,000, term end April 30, 2018.

03/10/2015: Second Amendment to below agreement. Additional Cost $131,320.80; new term end date of February 28, 2016.

03/26/2013: Authorizing Chair to execute a joint agreement with City of Santa Rosa to provide janitorial services; and authorizing the Water Agency's General Manager to terminate, if appropriate, or amend the Agreement, provided amendments do not cumulatively increase the total cost by more than $15,000 or substantially change the scope of work, and to approve additions, deletions, or changes in assignment of work to subconsultants, following the procedures set forth in the Agreement. Cost $274,795; term end February 28, 2015.

Strategic Plan Alignment Goal 3: Invest in the Future

Work under the agreement meets this goal by investing in infrastructure.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	150,000	150,000	
Additional Appropriation Requested			
Total Expenditures	**150,000**	**150,000**

COOPERATIVE AGREEMENT TO PROVIDE FUNDING FOR SHARED CONSULTING SERVICES

This agreement ("Agreement") is by and between the **Sonoma County Water Agency**, a body corporate and politic of the State of California ("Water Agency"), and the **Round Valley Indian Tribes**, a sovereign federally-recognized Indian tribe with authority over its Reservation in Mendocino County (the "Tribes"). The Effective Date of this Agreement is the date the Agreement is last signed by the parties to the Agreement, unless otherwise specified in Article 8.1 (Term of Agreement).

R E C I T A L S

A. Water Agency and the Tribes are committed to a goal of restoring and maintaining the viability of salmonids and other fish species in both the Eel and Russian River Basins.

B. Water Agency and the Tribes are committed to a goal that water resources will continue to be managed to provide reliable water supplies in both basins.

C. Water Agency and the Tribes are committed to the development of best available science to evaluate the impacts of the Potter Valley Hydroelectric Project on the fish species and water resources management in the Eel River and the Russian River, in the context of the relicensing proceeding pending before the Federal Energy Regulatory Commission.

D. Water Agency and the Tribes propose to undertake joint scientific studies of potential options to achieve the goals stated in Recitals A and B, supplementing the studies that Pacific Gas and Electric Company (as licensee) will be required to undertake for the purpose of the relicensing proceeding.

E. Water Agency and the Tribes intend to engage McBain and Associates (hereafter, Consultant) for the purpose of conducting studies related to fish ecology and water resources management.

F. Water Agency and Tribes are committed to cooperate with other public and private stakeholders in the development of best available science relevant to the relicensing proceeding for the Potter Valley Project, as well as the regional goals described in Recitals A and B.

In consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows.

A G R E E M E N T

1. RECITALS

1.1. The above recitals are true and correct.

2. STUDIES

2.1. The Tribes and Water Agency will discharge their responsibilities, as specified in Sections 3 and 4, to undertake the studies described in Exhibit A.

2.2. Consultant will function as an independent contractor. Communications between Consultant, Tribes, and Water Agency in the conduct of these studies will not be subject to attorney-client or attorney work product privileges.

2.3. The study reports will be public documents. Each report will include a disclaimer that that the Consultant prepared the report pursuant to this Agreement, as an independent contractor and not as expert for either party; and that the findings and conclusions in the report are the Consultant's alone and may not be attributed to the Water Agency or Tribes. Either party may use the reports at its discretion, subject to a reasonable good faith commitment that such use will be consistent with the Recitals.

3. WATER AGENCY'S RESPONSIBILITIES

3.1. Within 14 calendar days of the Effective Date, Water Agency shall deposit $87,000 in an account designated by the Tribes, for the purpose of the studies described in Exhibit A.

3.2. Water Agency shall participate in meetings with Consultant and Tribes and shall review and comment on study reports.

4. ROUND VALLEY INDIAN TRIBES' RESPONSIBILITIES

4.1. The Tribes shall prepare and execute an agreement with McBain and Associates to provide consulting services in an amount not to exceed $87,000, unless the Tribes provide additional funding for services under this Agreement in excess of that amount, for both services and expenses, consistent with the form attached as Exhibit A. Should McBain and Associates complete the work for less than the not-to-exceed amount listed above, the Tribes shall return the Water Agency's remaining funds to the Water Agency.

4.2. The Tribes shall act as liaison with the Consultant and provide any necessary project management, direction and coordination. This responsibility includes coordinating necessary meetings and providing status updates and analysis to Water Agency. The Tribes shall review and comment on study reports.

4.3. The Tribes shall provide Water Agency with a written accounting of all expenditures upon completion of the work identified in Exhibit A.

4.4. The Tribes shall maintain complete and accurate records of all associated transactions in compliance with generally accepted accounting principles as promulgated by the American Institute of Certified Public Accountants and the Governmental Accounting Standards Board. Such records shall be available to

Water Agency upon reasonable notice for inspection and analysis during business hours.

5. COMMUNICATION/DESIGNATED REPRESENTATIVES

5.1. The persons designated below shall, upon execution of this Agreement, have authority to grant discretionary approvals identified in this Agreement. Except as otherwise specifically provided in this Agreement, any notice, submittal, or communication required or permitted to be served on a party, may be served by personal delivery to the person or the office of the person identified below. Service may also be made by mail, by placing first-class postage, and addressed as indicated below, and depositing in the United States mail to:

Water Agency	Round Valley Indian Tribes
Project Manager: _____ 404 Aviation Boulevard Santa Rosa, CA 95403-9019 Phone: _____ Email: _____ Designated Representative: _____	Project Manager: _____ _____ _____ Phone: _____ Email: _____ Designated Representative: _____

6. TERMINATION

6.1. Either party may terminate its participation in this Agreement by giving 30 calendar-days written notice to the other party of its intent to terminate its participation in this Agreement. Termination shall not relieve the Water Agency of its obligation to pay costs and expenses related to the Consultant contract or otherwise allocated prior to the effective date of the termination. Water Agency's right to terminate may be exercised by Water Agency's General Manager.

7. EXPERTS.

7.1. This Agreement does not affect the status of the Consultants as experts for the Tribes in any activity other than the studies.

8. ADDITIONAL REQUIREMENTS

8.1. Term of Agreement: The term of this Agreement shall be from the date signed by both parties ("Effective Date") to June 30, 2020 ("Termination Date"), unless terminated earlier in accordance with the provisions of Article 6 .

8.2. Authority to Amend Agreement: Changes to this Agreement may only be made by written amendment, signed by both parties. The General Manager of the Water Agency and the person identified by the Tribes in Article 5 are authorized to execute amendments to the Agreement, provided that the amendments do not

substantially change the scope of the Agreement or increase the cost to Water Agency.

8.3. Construction: To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions shall remain in full force and effect and shall in no way be affected, impaired, or invalidated.

8.4. Making of Agreement: The Tribes and Water Agency acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the Agreement's interpretation; the language of the Agreement will not be construed against one party in favor of another. The Tribes and Water Agency acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

8.5. No Third-Party Beneficiaries: Nothing contained in this Agreement shall be construed to create, and the parties do not intend to create, any rights in third parties.

8.6. Captions: The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

8.7. Merger: This writing is intended both as the final expression of the Agreement between the parties with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure section 1856. Each Party acknowledges that, in entering into this Agreement, it has not relied on any representation or undertaking, whether oral or in writing, other than those which are expressly set forth in this Agreement. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

8.8. Entire Agreement: This Agreement is the entire Agreement between the parties.

8.9. Counterparts: This Agreement may be executed in multiple counterparts and all counterparts so executed shall constitute a single agreement binding. Original counterpart signature pages may be affixed to an original of this Agreement to create a single, complete agreement. Any counterpart executed by a Participant and/or Water Agency [District] and transmitted by electronic transmission shall be treated as an original signature page at the time of receipt. The actual original signature page shall also be mailed to Water Agency [District] within ten days of the date of the electronic transmission.

8.10. Survival of Terms: All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

8.11. Time of Essence: Time is and shall be of the essence of this Agreement and every provision.

7.12. Cooperation: The Tribes and the Water Agency agree to meet and confer as necessary to carry out the purposes of this Agreement.

7.13. Other Agreements: The Tribes and the Water Agency may enter into other agreements regarding other issues or concerns, and nothing in this Agreement shall be construed as obligating either party to enter into other agreements.

7.14. No Rights Created: This Agreement creates no right, obligation, benefit or responsibility that is enforceable at law or equity. Nothing in this Agreement obligates either party to fund particular projects or to otherwise transfer anything of value to the other party.

7.15. Legal Authority Not Altered: This Agreement is not intended to alter, limit, or expand either parties' legal authority.

7.16. Independent Interests: Nothing in this Cooperative Agreement shall affect the right or ability of the Tribes or the Water Agency to take positions on any issue independently of the other party. Each party retains the right to determine for itself its own best interest and to act accordingly.

Exhibit A
Scope of Work for Consultants to the Round Valley Indian Tribes

Tasks:

Task 1. Ad Hoc Working Group Participation and Modeling

The Round Valley Indian Tribes' technical consultant will participate in the Jared Huffman Ad-Hoc Committee Technical Working Group meetings to assess water supply and fish passage scenarios with various management scenarios associated with the future Potter Valley Project (PVP). Subtasks will include (1) review of existing Russian River and PVP HEC-ResSim model input data, assumptions, sensitivity analyses, uncertainty and limitations, and model run results, (2) participation in Working Group meetings and/or conference calls to develop alternative PVP operational scenarios, review and summarize results, and determine next steps. The results of this work would 1) assist the Tribes in better understanding the PVP and Russian River models in use, 2) enable input into the development and application of the PVP and Russian River model to be used for the Ad-Hoc Committee and FERC studies, 3) assist Water Agency and Tribes in resolving any questions that may arise later from use of the models for Ad-Hoc Committee and FERC-related analyses, and 4) enable Water Agency and the Tribes collaboratively conduct a balanced evaluation of PVP and Russian River alternatives on water supply and ecological resources.

Task 2. Ecological evaluations related to PVP alternatives

Based on results of Task 1, work with Water Agency biologists to conduct a balanced evaluation of the ecological effects of PVP flow management alternatives on the Eel River and Russian River. Analyses will initially use information currently available, including the River 2D habitat assessment on the Russian River, the VTN flow-habitat curves and fish passage thresholds on the Eel River below the PVP. Once additional information is developed by PG&E as part of their proposed Study Plans (e.g., water temperature model, FYLF information), additional analyses may be conducted.

Deliverables:

- PowerPoint presentations (produced collaboratively with Water Agency staff) of model results, interpretation, and recommended next steps for briefing Water Agency management and the Tribal Council.
- PowerPoint presentations (produced collaboratively with Water Agency staff) summarizing ecological effects of flow management alternatives on the Eel River and Russian River.

Budget: $87,000

Timeline: August 1, 2018 - July 30, 2020

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 9
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors, Sonoma County Water Agency
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Sonoma County Water Agency
Staff Name and Phone Number:	Kevin Booker / 521-1865
Supervisorial District(s):	First and Second
Title:	North Bay Water Reuse Authority Phase II Grant Administration

Recommended Actions:

Adopt a Resolution authorizing the General Manager of the Sonoma County Water Agency, or his designee:

(1) Sign and file an application with the United States Bureau of Reclamation pursuant to the Water Infrastructure Improvements for the Nation Act for funding the North Bay Water Reuse Program construction activities;
(2) Execute a cooperative agreement with the United States Bureau of Reclamation; and
(3) Take all actions necessary to implement the cooperative agreement.

Executive Summary:

Approval of this item would authorize the General Manager of the Sonoma County Water Agency (Water Agency), or his designee, to file a funding application under Funding Opportunity Announcement No. BOR-DO-18-F011 on behalf of the North Bay Water Reuse Authority (Authority) with the United States Bureau of Reclamation (Bureau) for construction of the City of Petaluma's Ellis Creek Water Recycling Facility Capacity Increase Project and the City of American Canyon's Recycled Water Distribution System Expansion, under the Water Infrastructure Improvements for the Nation Act (Act), and would authorize the General Manager, or his designee, to execute a cooperative agreement with Bureau if the application is approved. In accordance with the Authority's Fourth Amended Memorandum Of Understanding, the Water Agency acts as the Authority's administrative agency, which includes submitting grant applications and managing grant awards for the 11 member agencies. The City of Petaluma's Ellis Creek Water Recycling Facility Capacity Increase Project and the City of American Canyon's Recycled Water Distribution System Expansion are the only projects included in this grant application and seek to increase tertiary filtration and disinfection capacity by 2.12 million gallons per day, and to construct over 3,000 feet of recycled water distribution pipelines, respectively. The Water Agency does not have a project in this application, but would provide services as the administrative agency in the amount of $24,323 (of which approximately $3,999 would be reimbursed by the grant). The Water Agency services include ensuring compliance with the funding requirements and pass-through project reimbursements to both

agencies. The City of Petaluma and City of American Canyon will be responsible for all costs arising from their respective projects, including reimbursing all Water Agency administration costs not reimbursed by the Bureau. The total project cost eligible under the Bureau funding guidelines is estimated to be $9,538,051 and the Authority is seeking reimbursement of 25% or 2,384,513.

Discussion:

On November 6, 2001, the Board of Directors of the Water Agency authorized and directed the General Manager to pursue state and federal funding for water reuse projects that would put recycled water to beneficial use within Sonoma, Marin, and Napa counties. In 2002, the Water Agency entered into a cooperative agreement with the Bureau under the authority of Public Law 102-575, Title XVI, to prepare a feasibility study to assess regional water recycling opportunities for restoration and agricultural irrigation.

Since 2005 the Authority, which was established under a Memorandum of Understanding among counties, cities, and local water and sanitation districts, has been coordinating interagency efforts to expand the beneficial use of recycled water in the North Bay Region. Current Authority members include the City of Petaluma, Las Gallinas Valley Sanitary District, Marin County, Marin Municipal Water District, City of American Canyon, Napa County, Napa Sanitation District, North Marin Water District, Novato Sanitary District, Sonoma County Water Agency, and Sonoma Valley County Sanitation District. The Memorandum of Understanding designates the Water Agency as the administrative agency for purposes of carrying out the administrative tasks of the Authority.

The Authority is a cooperative program that builds regional water supply resiliency for all water users by expanding the use of recycled water for agricultural, urban, and environmental uses, thereby reducing reliance on local and imported surface and groundwater and reducing the amount of treated effluent releases to San Pablo Bay. The North Bay Water Reuse Program's (Program) projects provide new, long-term local water supplies that also offer numerous economic and environmental benefits for the region, including:

1. A reliable, new water supply for the region's agriculture;
2. An alternative water supply for irrigation of parks, golf courses, and public landscaping;
3. Increased water for restoration of wetlands and improved in-stream flows for riparian habitat and fisheries recovery;
4. Reduced demand on limited local surface and groundwater supplies;
5. Less discharge of treated wastewater into San Pablo Bay;
6. Reduced demand on potable water imported from the Russian River; and
7. Leveraged, cooperative funding opportunities through regional agency partnering.

Each of the Authority wastewater agencies has recycled water projects, and through partnering with other Authority member agencies, new recycled water customers have been served throughout the Program area.

Under Phase I of the Program, $25,000,000 has been received in federal grant funding and $5,886,800 in state grant funding to construct pipeline, reservoirs, pump stations, and upgraded treatment facilities.

The Act was enacted in December 2016 to address water resources infrastructure that is critical to the nation's economic growth, health and competitiveness. The Act allows new water recycling projects to be eligible for federal funding under the WaterSMART Title XVI Program.

The Authority has been working on Phase II of the Program. The purpose of Phase II is to explore options for expanding the recycled water use, and other water management options, within the North San Pablo Bay region beyond the projects constructed under Phase I of the Program. In 2017, the Bureau reviewed the Title XVI Feasibility Study for the projects proposed for Phase II, found that they meet all the requirements of the Bureau, and transmitted them to Congress. To obtain funding under the Act, the Authority must submit a funding application and, if the application is approved, enter a cooperative agreement with the Bureau to oversee the projects. The City of Petaluma's Ellis Creek Water Recycling Facility Capacity Increase Project includes facility upgrades at the existing facility to increase tertiary filtration and disinfection capacity from 4.68 to 6.8 million gallons per day (an increase of 2.12 million gallons per day). Project components include 2.12 million gallons per day capacity tertiary filters with associated piping and pumps and UV disinfection lamps. The project will provide 712 acre-feet per year of additional tertiary recycled water available for reuse, providing an offset to potable water use in the area. The construction cost eligible under the grant guidelines is estimated at $9,022,053, and the City of Petaluma is seeking 25%, $2,255,513, in cost reimbursement in this application. The City of American Canyon's Recycled Water Distribution System Expansion Project includes construction of over 3,000 feet of recycled water pipelines. This project would efficiently utilize existing assets to increase the distribution of recycled water and supply 48 acre-feet annually. The construction cost eligible under the grant guidelines is estimated at $500,000 and the City of American Canyon is seeking 25%, $125,000, in cost reimbursement in this application. The cities will be responsible for all costs arising from the projects, including reimbursing all Water Agency administration costs not reimbursed by the Bureau.

As the Authority administrative agency, the Water Agency would administer the grant on behalf of Authority members. Grant administration includes demonstrating compliance with Title XVI grant provisions, semi-annual financial and narrative reporting, invoicing, and acting as the pass-through agency for Bureau reimbursements. The estimated fully loaded cost to administer the grant funding is $24,323 (of which $15,998 is eligible under the funding guidelines). The Water Agency's administration costs will be partially reimbursed by the grant (approximately $3,999) and all remaining balances will be paid by Phase II Participating member agencies as stipulated in the North Bay Water Reuse Authority Memorandum of Understanding.

Funding awards announcements are expected in late Fall 2018 with obligation occurring in late Winter/Early spring 2019.

Prior Board Actions:

9/12/2017	Resolution authorizing the General Manager of the Sonoma County Water Agency, or his designee, to a) sign and file an application with the United States Bureau of Reclamation pursuant to the Water Infrastructure Improvements for the Nation Act for funding the North Bay Water Reuse Program construction activities; b) execute a cooperative agreement with the United States Bureau of Reclamation; and c) take all actions necessary to implement the cooperative agreement.

7/18/2017	Amendment of existing delegated authority for the General Manager to execute agreements entered by the Sonoma County Water Agency in its capacity as Administrative Agency of the North Bay Water Reuse Authority to increase from $25,000 to $50,000, in line with the current delegated signature authority for Water Agency contracts. B) Link the delegated authority for the General Manager to execute agreements entered into on behalf of the North Bay Water Reuse Authority to the delegated authority for Water Agency contracts for any future changes to the latter.
3/17/2015	Resolution authorizing the General Manager of the Sonoma County Water Agency, or his designee, to: a) file a grant application to the Bureau of Reclamation's Title XVI Water Reclamation and Reuse Program; b) execute a cooperative agreement with the United States Bureau of Reclamation; and c) take all actions necessary to implement the grant agreement.

Strategic Plan Alignment Goal 3: Invest in the Future

The North Bay Water Reuse Program's projects align with the County's goal of investing in the Future. The Program will provide an alternative source of water for agricultural irrigation in Sonoma County.

Water Agency Water Supply Goals and Strategies, Goal 2: Protect the Water Agency's existing water rights and our clean, high-quality water supply, and improve system resiliency by continuing to develop alternative supplies.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	243,051	1,802,208	359,577
Additional Appropriation Requested	0		
Total Expenditures	**243,051**	**1,802,208**	**359,577**
Funding Sources			
General Fund/WA GF			
State/Federal	238,873	1,788,151	357,488
Fees/Other	4,178	14,057	2,089
Use of Fund Balance			
Contingencies			
Total Sources	**243,051**	**1,802,208**	**359,577**

Narrative Explanation of Fiscal Impacts:

Budgeted amount of $243,501 is available from FY 2018/2019 appropriations in the Recycled Water Fund. No additional appropriation is required.

The project is being implemented by three agencies; Sonoma County Water Agency, City of Petaluma, and City of American Canyon. The cities will be responsible for funding construction of their respective projects. The Water Agency, acting as fiscal agent, will incur costs for administration of the project, as well as, pass-through funds reimbursed by the Bureau to the participating cities. Accordingly, the table only shows the funds that are directly expended by the Water Agency or will be passed through to the cities. City of Petaluma's project has a total eligible cost of $9,022,053. The City of American Canyon's project has a total eligible cost of $500,000. The Water Agency's project has a total cost of $24,323 (of which $15,998 is eligible under the funding guidelines). The application seeks 25% in cost reimbursement on a total eligible project cost of $9,538,051, or $2,384,513 over the three year period. The total project cost is $2,404,836 over a three year period, which includes the $2,384,513 grant pass-through to the member agencies, plus the Water Agency's $24,323 cost to administer the grant as the fiscal agent.

The cities will be responsible for all costs arising from the Project including reimbursing Water Agency for administration costs not reimbursed by the Bureau. This includes all non-reimbursed grant eligible costs and overhead costs in excess of the 10% de minimis federal indirect cost rate. Therefore, the cities are expected to owe the Water Agency an additional $20,323 over the course of the project, which is reflected as a "Fees/Other" funding source in the above Fiscal Summary. Water Agency anticipates billing the cities in arrears on an annual basis and requesting final payment at grant closeout in FY20-21.

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Directors of the Sonoma County Water Agency, State Of California, authorizing the General Manager of the Sonoma County Water Agency, or his designee, to sign and file an application with the United States Bureau of Reclamation's Water Infrastructure Improvements Nation Act (WIIN) for funding the North Bay Water Reuse Program construction activities; execute a cooperative agreement with the United States Bureau of Reclamation; and take all actions necessary to implement the cooperative agreement.

Whereas, the Sonoma County Water Agency (Water Agency) wishes to promote and expand the beneficial use of recycled water in the North San Pablo Bay Region thereby promoting the conservation of limited surface and groundwater resources; and

Whereas, the Water Agency, Sonoma Valley County Sanitation District, Napa Sanitation District, Novato Sanitary District, County of Napa, North Marin Water District, City of American Canyon, City of Petaluma, Marin Municipal Water District, County of Marin and Las Gallinas Valley Sanitary District, collectively known as the North Bay Water Reuse Authority (NBWRA), signed a Memorandum of Understanding to assess and implement regional water recycling opportunities to offset potable water; and

Whereas, the Memorandum of Understanding designates the Water Agency as the administrative agency for purposes of carrying out the administrative tasks of the NBWRA; and

Whereas, the Bureau of Reclamation released a new funding opportunity for Title XVI water recycling projects under the Water Infrastructure Improvements for the Nation Act (P.L. 114-322). The WIIN Act was enacted in December 2016 to address water resources infrastructure that is critical to the nation's economic growth, health and competitiveness; and

Whereas, the NBWRA conducted a study to assess the feasibility of implementing its Phase II regional water recycling construction projects; and

Whereas, NBWRA Title XVI Feasibility Study that has been reviewed by the Bureau of

Reclamation, found to meet all the requirements of Reclamation; and

Whereas, the Bureau of Reclamation has established procedures and criteria necessary to administer the program; and

Whereas, said procedures and criteria established by the Bureau of Reclamation require a resolution certifying the approval of application by the Applicant's governing body before submission of said application to Reclamation; and

Whereas, the NBWRA Board of Directors, at its January 27, 2014 meeting approved of the Water Agency submitting applications on behalf of the NBWRA.

Now, Therefore, Be It Resolved that the Board of Directors hereby finds, determines, certifies, and declares as follows:

1. The General Manager of the Water Agency, or his designee, is hereby authorized to sign and file an application with the Bureau of Reclamation for funding construction projects for the North Bay Water Reuse Program, under the Bureau's Title XVI Water Reclamation and Reuse Program.

2. The General Manager of the Water Agency, or his designee, is hereby authorized to execute a cooperative agreement with the Bureau of Reclamation.

3. The General Manager of the Water Agency, or his designee, is hereby authorized take all actions necessary to implement the grant agreement.

Clerk of the Board

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 10
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors, Sonoma County Water Agency
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Sonoma County Water Agency
Staff Name and Phone Number:	David Cook (707) 574-1944 Candace Messner (707) 524-6424
Supervisorial District(s):	Fifth
Title:	Green Valley Creek High Flow Channel Project

Recommended Actions:

A. Adopt a resolution adopting the Initial Study and Negative Declaration for the Green Valley Creek High Flow Channel Project, making certain related findings, approving the project, and directing the General Manager to file a Notice of Determination;
B. Authorize the Water Agency's General Manager to execute a License Agreement with Jay and Tammie Ress that will allow the Water Agency to construct the Green Valley Creek High Flow Channel Project, on property owned by Jay and Tammy Ress (Ress Property), located at 10201 Green Valley Road, Sebastopol; and
C. Delegate authority to the Water Agency's General Manager to execute a Limited Duration Easement at the termination of the License Agreement for continued use of the Ress Property for the proposed Green Valley Creek High Flow Project for a period not to exceed four years in substantially the form provided to the Board following approval from County Counsel.

Executive Summary:

The Sonoma County Water Agency (Water Agency) is proposing the Green Valley Creek High Flow Channel Project (Proposed Project or Project). Green Valley Creek flooding of the Green Valley Road crossing has been increasing in magnitude, frequency and duration for the past several years. The purpose of this Proposed Project is to reduce the frequency of flooding onto Green Valley Road and adjacent properties by excavating and maintaining channels to accommodate storm flows. The Project would be maintained for five years, if the Water Agency is able to secure the property rights necessary to perform the excavation and maintenance activities for the portions of the creek located on private property. Long-term benefits of the Project include increased aquatic habitat, riparian restoration, fewer wildlife strandings resulting from flooding of Green Valley Road, and reduced degradation of habitats downstream from sedimentation. The Water Agency received six comment letters/emails from persons interested in the Proposed Project. This item will adopt a resolution adopting the Initial Study and Negative Declaration for the Project, making certain related findings, approving the project, and directing the General Manager

to file a Notice of Determination. This item also authorizes the Water Agency's General Manager to execute a one-year License Agreement to acquire the property rights necessary for construction of the Proposed Project and delegates authority to the Water Agency's General Manager to execute a Limited Duration Easement at the termination of the License Agreement to allow for continued maintenance of the Proposed Project for a period not to exceed four years.

Discussion:

History of Item/Background

Green Valley Creek is a tributary of the Russian River located in western Sonoma County near the City of Sebastopol. Green Valley Creek flooding of the Green Valley Road crossing has increased in magnitude, frequency and duration for the past several years. Much of the flooding is a result of sedimentation in the existing natural creek channel that directs waters toward the road and adjacent vineyard. The vineyard has no downstream outlet to the creek, and the potential exists for stranding of species listed under the State and federal Endangered Species Acts, including Central California coast coho salmon and California freshwater shrimp. There is also a threat to public safety presented by flooding of the road. As of 2012, one inch of rain in a 24-hour period produced enough creek flow to overtop Green Valley Road and in 2016 and 2017, creek flows over the road took several weeks to recede, causing road closure and road surface damage.

The 2016-2017 winter season brought record rainfall to Sonoma County. In February 2017, Water Agency staff responded to extended flooding at Green Valley Road by completing emergency flood control work at the Green Valley Creek crossing. The emergency work included excavating 500 feet of the Green Valley Creek active channel parallel to Green Valley Road. The emergency work also required rescue of fish and wildlife stranded in the flooded adjacent vineyard and habitat restoration.

Green Valley Creek High Flow Channel Project

The Water Agency is proposing the Green Valley Creek High Flow Channel Project (Proposed Project or Project) to reduce the potential of storm waters overtopping the creek banks and flooding roads and adjacent properties. The Proposed Project would help retain and expand the channel capacity gained by the 2017 flooding emergency response.

The Proposed Project is comprised of five components: 1) vegetation removal from existing understory vegetation for an access road, in the area of the high flow channel, and along the historic channel for flood conveyance; 2) placing temporary fill for an access road across the historic channel; 3) excavating a high flow channel and removing sediment to maintain the active channel; 4) annual project maintenance for a period of five years; and 5) revegetating with native plants. A high flow channel would be excavated within an existing sediment bar located between a historic channel and the active channel, which was excavated during the 2017 flooding emergency response. To maintain the benefit of the capacity gained through excavation of these channels, sediment would be removed from either the emergency and/or the high flow channel annually depending on sedimentation each year. Maintenance would be implemented annually over five years based on sediment accumulation and vegetation growth. Grant funding is being pursued to design and implement a long term project to address flooding issues in the project area. In November 2017, the Water Agency, in partnership with Sonoma County Transportation and Public Works, completed and submitted an application for Federal Emergency Management Agency Hazard Mitigation

Assistance Grant Program funding to help cover long-term project costs. We anticipate learning if the grant will be awarded for the project within the next year.

Project construction is anticipated to take up to three weeks in the fall of 2018. Revegetation activities would be completed during late fall 2018. The Proposed Project would include implementation of Best Management Practices (measures) to protect the riparian and aquatic resources within the Proposed Project area. These measures would avoid or minimize disturbance to wetland and aquatic habitats, common fish and wildlife, nesting birds, and special status species.

California Environmental Quality Act Documentation

The Initial Study and Negative Declaration of Environmental Impact (Initial Study) was available on June 22, 2018, for a 33-day public review period that ended on July 24, 2018. The Initial Study addresses the potential environmental impacts of the Proposed Project and determined that there is no substantial evidence that the Proposed Project would have a significant adverse impact upon the environment and therefore, no mitigation is required. A notice of availability for the Initial Study for public review was distributed to the jurisdictional and permitting agencies and sent to stakeholders, interested persons, and property owners adjacent to the Proposed Project area on June 22, 2018. Copies of the Initial Study and notice of availability were also made available at the Water Agency's administrative office and Sebastopol Regional Library. A legal notice was also published in the Press Democrat, and display ads were posted in the Sonoma County Gazette and on NextDoor. Six comment letters/emails were received from interested persons, five of which support the Proposed Project. One comment received from a landowner expressed their concerns that the Proposed Project may divert more water, sediment and debris on to their property.

The Water Agency received a formal request for consultation only from the Federated Indians of Graton Rancheria (Tribe) under Assembly Bill 52 (AB52). The Tribe requested that the Proposed Project include contacting the Tribe's Tribal Heritage Preservation Officer (Officer) and engage in tribal consultation if cultural resources are inadvertently encountered during ground disturbing activities. The Proposed Project description was modified to include a notification provision. Water Agency staff concluded that the revisions would not result in a new significant adverse effect on the environment that would require recirculation of the Initial Study.

On July 5, 2018, Water Agency submitted an application for Sonoma County General Plan 2020 (General Plan) consistency review to Sonoma County Permit & Resource Management Department (Permit Sonoma). Permit Sonoma completed review of the Proposed Project on July 18, 2018, and determined that the project is consistent with the General Plan. Applications for the federal and State permits required for project implementation have been submitted and are pending completion of CEQA and final project reviews by resource agencies.

Acquisition of Property Rights

In order to construct the Proposed Project, the Water Agency must acquire rights to construct and maintain the project from Jay and Tammie Ress on their property located at 10201 Green Valley Road, Sebastopol (Assessor's Parcel Number 104-050-013). Water Agency staff appraised the value of the property rights needed for the Project and has successfully negotiated a License Agreement with Mr. and Mrs. Ress. The total compensation for the License Agreement is Eight Thousand Eight Hundred Dollars ($8,800.00).

Although the Proposed Project is scheduled to last for five years, Mr. and Mrs. Ress required that the Water Agency only execute a one year License Agreement for the initial sediment removal work. After successful completion of the initial year's work, Mr. and Mrs. Ress have expressed their willingness to execute another agreement to extend the Water Agency's access to their property to allow the Water Agency to maintain the Project for the additional 4 years to Project completion. Water Agency staff has prepared a Limited Duration Easement, which would allow the Water Agency to maintain the Project under the same terms and conditions as the License Agreement. The total compensation for the Limited Duration Easement is Thirty-Five Thousand Two Hundred Dollars ($35,200).

Water Agency staff recommends that the Board, adopt a resolution determining that the Proposed Project will not have a significant adverse effect on the environment, adopting the Initial Study for the Proposed Project, approving the Proposed Project, and directing the filing of a Notice of Determination, and authorize the Water Agency's General Manager to execute a License Agreement and Limited Duration Easement with Jay and Tammie Ress.

Prior Board Actions:

04/03/2018: Approved agreement between Water Agency and Gold Ridge Resource Conservation District for funding of work completed on the Green Valley Road Stream Crossing Feasibility and Design Project from November 1, 2016, through June 30, 2017. Cost $17,596; term end June 30, 2017.

03/26/2013: Approved agreement between Water Agency and Gold Ridge Resource Conservation District for funding of Green Valley Road Stream Crossing Project. Cost $86,200; term end December 31, 2014.

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Protect, maintain, and manage parks, public lands, and open space systems that promote recreation, health, and agricultural viability and protect watersheds, promote biodiversity, and contribute to the economic vitality. This Item supports Strategic Goal 2 Economic and Environmental Stewardship by protecting farmland and infrastructure from flooding, as well as restoring aquatic and riparian habitat and reducing wildlife strandings.

Water Agency Strategic Plan Alignment
Flood Protection, Goal 1: Provide efficient and effective flood protection programs.
The Green Valley Creek High Flow Channel Project is intended to address flooding issues that could impact threatened and endangered aquatic species and potentially threaten public safety due to road flooding.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$187,128	$112,010	$112,010
Additional Appropriation Requested			
Total Expenditures	**$187,128**	**$112,010**	**$112,010**

Use of Fund Balance			
Contingencies			
Total Sources	**$187,128**	**$112,010**	**$112,010**

Narrative Explanation of Fiscal Impacts:

Total costs associated with this item are $635,168 over the five year period from FY 2018/2019 through FY 2022/2023. Budgeted amount of $187,128 is available from FY 2018/2019 appropriations in Flood Control Zone 5A. No additional appropriation is required. Annual maintenance costs ($112,010 per year) will be included in future budgets.

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Directors Of The Sonoma County Water Agency Determining That The Green Valley Creek High Flow Channel Project Will Not Have A Significant Adverse Effect On The Environment; Adopting The Initial Study and Negative Declaration Of Environmental Impact For The Project; Approving the Project, Making Certain Related Findings, And Authorizing The Filing Of A Notice Of Determination. (Fifth District)

Whereas, the Sonoma County Water Agency (Water Agency), proposes to improve the flood capacity of Green Valley Creek by excavating and maintaining channels within a section of Green Valley Creek adjacent to the Green Valley Road crossing and to maintain such channels for a period of five years; and

Whereas, the Water Agency, as Lead Agency per California Environmental Quality Act (CEQA) Guidelines Section 15050, prepared an Initial Study and Negative Declaration of Environmental Impact (Initial Study) for the Green Valley Creek High Flow Channel Project (Project), in accordance with CEQA, the State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of the CEQA; and

Whereas, the Initial Study discloses potential environmental impacts of implementing the Project, identifies the means to avoid and minimize potential significant adverse impacts on the environment and concludes the Project would not have a significant adverse effect on the environment.

Now, Therefore, Be It Resolved that this Board finds that the foregoing recitals are true and correct and further finds, declares, determines and orders as follows:

Procedural Findings:

1. The Project is located on Green Valley Creek, a tributary of the Russian River, in western Sonoma County near the City of Sebastopol. The Project area is bordered by Green Valley Road and vineyards to the east and agricultural lands on the west as shown in the Initial Study Figure 3. The purpose of the Project is to lessen recurrent flooding of Green Valley Road and adjacent property by excavating and maintaining channels to accommodate storm flows;

2. As described in the Initial Study Project Description, the Project is comprised of five components: 1) removing vegetation within the work area, consisting of removal of existing

understory vegetation for an access road, in the area of the high flow channel, and along the historic channel for flood conveyance; 2) placing temporary fill for an access road across the historic channel; 3) excavating the high flow channel and removing sediment to maintain the active channel; 4) annual project maintenance for the purpose of maintaining flood capacity by removing sediment in the high flow and active channels and vegetation management for a period of five years; and 5) revegetating with native plants;

3. The Notice of Completion and Notice of Availability/Notice of Intent to Adopt Initial Study and Negative Declaration of Environmental Impact (Notice of Availability) and Initial Study were posted with the California Governor's Office of Planning and Research State Clearinghouse on June 22, 2018. The Notice of Availability was also posted at the Sonoma County Clerk's office on June 22, 2018. The Notice of Availability and Initial Study were sent to responsible and trustee agencies and individuals, and made available on Water Agency's website. The Notice of Availability and postcards were sent to 313 individuals and nearby property owners. The Notice of Availability was published in the Press Democrat on June 24, 2018. The Initial Study was available for review at Water Agency's administrative office and at the Sebastopol regional library;

4. The Initial Study was available for a 33-day public review period ending July 24, 2018. Six comment letters were received during the public review process from interested persons;

5. The Water Agency received a formal request for consultation only from the Federated Indians of Graton Rancheria (Tribe) under Assembly Bill 52 (AB52). The Tribe requested that the Proposed Project include contacting the Tribe's Tribal Heritage Preservation Officer (Officer) and engage in tribal consultation if cultural resources are inadvertently encountered during ground disturbing activities. The Initial Study Project Description was modified to include a notification provision if cultural resources are inadvertently encountered. This modification would not result in a new significant adverse effect on the environment that would require recirculation of the Initial Study;

6. The Initial Study did not identify any potentially significant impacts of the Project on the environment; and

7. On July 5, 2018, the Water Agency submitted an application for Sonoma County General Plan 2020 (General Plan) consistency review to the Sonoma County Permit & Resource Management Department (Permit Sonoma). Permit Sonoma completed review of the Proposed Project on July 18, 2018, and determined that the project is consistent with the General Plan.

Substantive Findings:

1. The Water Agency, as Lead Agency, has prepared the Initial Study and Negative Declaration of Environmental Impact in accordance with CEQA, State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA;

2. The Board of Directors of the Water Agency (Board) has reviewed and considered the environmental effects of the Project as disclosed in the Initial Study and Negative Declaration, including public comments and Water Agency response to comments;

3. The Board finds that the Initial Study represents a good faith effort to achieve completeness and full environmental disclosure; and

4. The Board certifies that it has reviewed and considered the information in the Initial Study, and finds that there is no substantial evidence that the project will have a significant effect on the environment and that the negative declaration reflects the independent judgment and analysis of the Sonoma County Water Agency Board of Directors.

Be It Further Resolved that the Board of Directors of the Sonoma County Water Agency having received, reviewed, and considered the Initial Study and Negative Declaration of Environmental Impact and other evidence in the administrative record, hereby finds, determines, and certifies as follows:

1. All of the above recitals are true and correct;

2. The Initial Study and Negative Declaration of Environmental Impact for the Project is hereby adopted;

3. The Project is hereby approved and the Water Agency's General Manager is directed to file a Notice of Determination with the County Clerk in conformance with the provisions of CEQA, State CEQA Guidelines, and the Water Agency's Procedures for the Implementation of CEQA; and

4. The Clerk of the Board is designated as the custodian of the documents and other materials that constitute the record of the proceedings upon which the Board's decisions herein are based. These documents may be found at the office of the Clerk of the Board, 575 Administration Drive, Room 100A, Santa Rosa, CA 95403.

Summary and response to comments received during public review period for the Initial Study and Negative Declaration of Environmental Impact for the Green Valley Creek High Flow Channel Project

The Initial Study and Negative Declaration of Environmental Impact (Initial Study) for the Green Valley Creek High Flow Channel Project (Proposed Project) was available for public review from June 22 to July 24, 2018. Six comments were received during the public review period and are summarized below.

Summary of Comments Received and Responses

- The Water Agency received a formal request for consultation only from the Federated Indians of Graton Rancheria (Tribe) under Assembly Bill 52 (AB52). The Tribe requested that the Proposed Project include contacting the Tribe's Tribal Heritage Preservation Officer (Officer) and engage in tribal consultation if cultural resources are inadvertently encountered during ground disturbing activities. The Proposed Project description was modified to include a notification provision. Water Agency staff concluded that the revisions would not result in a new significant adverse effect on the environment that would require recirculation of the Initial Study.

- Mr. Joseph Browning submitted comments dated June 23, 2018. Mr. Browning voiced his support for the Proposed Project, and expressed his concerns about the project maintenance ending after five years.
    - Response: The Water Agency is not the entity responsible for maintaining the hydraulic capacity of Green Valley Creek at the Green Valley Road crossing. However, support of work that would address the Green Valley Creek flooding issues and help alleviate risk to public safety and listed fish and wildlife species aligns with Water Agency's Mission and Strategic Plan. The Water Agency is actively pursuing funding to support the design, environmental review, permitting and implementation of project that would help address Green Valley Creek flooding in the long term. In November 2017, the Water Agency, in partnership with Sonoma County Transportation and Public Works, completed and submitted an application for Federal Emergency Management Agency (FEMA) Hazard Mitigation Assistance Grant Program funding to help cover long-term project costs.

- Gregory Eldridge provided a comment letter supporting the Proposed Project, dated July 5, 2018. However, Mr. Eldridge also expressed his opinion that the north side of the Green Valley Road bridge appears to be a bottleneck due to the existing levee and trees, and suggests that this area be evaluated.
    - Response: The Proposed Project includes sediment clearing and debris removal at the north and south side of the bridgehead to help convey storm flows at this location.

- A landowner (Landowner) provided a comment letter dated July 22, 2018. Landowner owns property downstream of the Proposed Project. The property is under a Williamson Act contract until January 1, 2019 at such time Landowner plans to construct dwellings. Landowner is concerned that the Proposed Project would "divert" flood flows and increase sediment and debris on his property resulting in additional flooding, cause property damage, reduce property values, impact agricultural use, and impact future development plans. Also, Landowner expressed the belief that Green Valley Road and Bridge restrict the natural flow of the creek and the creek should be allowed to follow a path across the roadway and adjacent vineyard.
    - The main objective of the Proposed Project is to reduce Green Valley Creek flooding of Green Valley Road in order to reduce road closures and threats to public safety, which limit commuter and emergency vehicle access, and reduce property damage. As stated in the Initial Study, "A geomorphic assessment concluded that the Proposed Project would increase conveyance of flood waters through the project area and reduce flooding and overtopping of Green Valley Road (SCWA 2018). But, the gains in conveyance may be limited by the channel downstream of Green Valley Road bridge [including Landowners property], which would still lack the capacity to effectively convey large flood flows". Although the flood capacity of Green Valley Creek adjacent to the Landowner's property is limited (i.e., unable to convey large flows), the project activity of removing sediment and vegetation would reduce flooding in the project area, and reduce the accumulation of sediment and debris farther downstream. Overall, maintenance of the flood capacity of the creek would reduce the risk of flood damage, albeit minor, to properties, including Landowner and may provide a small benefit to agriculture use and development opportunities. Also, development along Green Valley Creek is mostly restricted by the 100-year flood zone that far exceeds the footprint of flooding observed during typical winter flood events and is the focus of the Proposed Project.
    - The Agricultural and Forest Resources (section 4.2) of the Draft Initial Study has been revised to describe that the Landowner's parcel is currently under a Williamson Act contract downstream of the Proposed Project area.

- Darlene Flint, John Clayton and Kaete Hansen provided comments dated June 22, June 23 and June 23, 2018 (respectively) expressing their general support of the Proposed Project.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 11
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors of the Sonoma County Agricultural Preservation and Open Space District
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Sonoma County Agricultural Preservation and Open Space District
Staff Name and Phone Number:	Kim Batchelder, 565-7355
Supervisorial District(s):	Countywide
Title:	Environmental Services Agreements

Recommended Actions:

Authorize the General Manager of the Sonoma County Agricultural Preservation and Open Space District to execute eleven service agreements for environmental services and planning work on District-protected lands totaling $925,000 effective for three years ending on August 14, 2021, as follows:

1. An agreement with Prunuske Chatham, Inc., in an amount not-to-exceed $200,000;
2. An agreement with Tukman Geospatial LLC in an amount not-to-exceed $150,000;
3. An agreement with John C. Garcia DBA Garcia and Associates, Inc. in an amount not-to-exceed $100,000;
4. An agreement with Pacific Watershed Associates, Inc. in an amount not-to-exceed $100,000;
5. An agreement with Robert E. Evans DBA Rob Evans & Associates in an amount not-to-exceed $100,000;
6. An agreement with Moore, Iacofano, and Goltsman, Inc. DBA MIG, Inc. in an amount not-to-exceed $75,000;
7. An agreement with Roger Sternberg in an amount not-to-exceed $50,000;
8. An agreement with Sonoma Resource Conservation District in an amount not-to-exceed $50,000;
9. An agreement with Thomas M. Origer DBA Tom Origer & Associates in an amount not-to-exceed $50,000;
10. An agreement with Arthur W. Dawson DBA Baseline Consulting in an amount not-to-exceed $25,000; and,
11. An agreement with Evans & De Shazo, Inc. in an amount not-to-exceed $25,000.

Executive Summary:

Since 1990, the Sonoma County Agricultural Preservation and Open Space District has protected over 114,000 acres across the county. Currently, the agency owns and manages over 5,000 acres and holds conservation easements across almost 109,000 acres. Each property was acquired for a specific

conservation purpose, and must be stewarded in perpetuity to permanently protect the identified conservation values.

Consultant services are required to complete activities for District-protected properties, ranging from resource assessments, environmental planning and permitting, analysis of agricultural and forestry production potential, environmental and cultural impact studies, short and long-term resource management planning and sustainable protection and enhancement of sensitive resources.
Eleven service providers were selected pursuant to a request for proposals process to help satisfy this broad list of technical needs for in-depth study and analysis to safeguard the resources currently protected and to evaluate resources that should be protected into perpetuity.

Discussion:

Sonoma County Agricultural Preservation and Open Space District (Ag + Open Space) staff is committed to monitoring conservation easements, managing fee title lands, and evaluating future conservation projects that continue to enhance the value of the 114,000 acres protected with public funds in the county. In addition, Ag + Open Space is in the process of completing the Vital Lands Initiative – a comprehensive plan for the next 15 years of conservation in Sonoma County. This level of planning depends on good science and investigative analysis utilizing the extensive technological skills and knowledge base found throughout the county and the Bay Area. The development of tools such as the Sonoma County Vegetation & Habitat Mapping Program (Sonoma Veg Map) and the use of Light Detection and Radar (LiDAR) are two examples of how Ag + Open Space is utilizing advanced conservation tools to improve our decision-making and conservation efforts overall.

Ag + Open Space currently divides its workload between three technical programs: Acquisition, Stewardship and Conservation Planning. Each of these programs address specific technical needs with internal staff and resources. However, the depth and complexity of technical areas such as resource management and environmental impacts, conservation biology and protected species, erosion control and fire recovery, groundwater recharge and economic evaluation of resources, among others, require a robust and diverse set of skills and experience. Given the breadth and depth of expertise required for many of these projects, and the cyclical and unpredictable nature of the work, the most efficient use of taxpayer dollars is to enter into as-needed contracts with specialized outside resources that can focus on these issues and provide staff with a range of options and management recommendations. This allows staff to easily make thoughtful, well-informed, science-based decisions to protect and enhance the conservation values of Sonoma County.

In addition, the cyclical and unpredictable nature of the work, as well as-needed specialized expertise, suggests a need for consultants rather than staff to accomplish these tasks. The District requires a wide variety of services offered by more than one entity. It is necessary to identify technical experts in areas of resource assessments, environmental impacts, working lands, cartography and other advanced fields. The proposed contracts will assist the District in filling information gaps and connecting conservation efforts through strategic planning and analysis of the best available information from sources familiar with Sonoma County as well as sources used throughout the Bay Area and the Central Valley.

The District proposes eleven as-needed service agreements (on file with the Clerk of the Board) for a total amount not to exceed $925,000 with:

1. Prunuske Chatham, Inc., in an amount not-to-exceed $200,000;
2. Tukman Geospatial LLC in an amount not-to-exceed $150,000;
3. John C. Garcia DBA Garcia and Associates, Inc. in an amount not-to-exceed $100,000;
4. Pacific Watershed Associates, Inc. in an amount not-to-exceed $100,000;
5. Robert E. Evans DBA Rob Evans & Associates in an amount not-to-exceed $100,000;
6. Moore, Iacofano, and Goltsman, Inc. DBA MIG, Inc. in an amount not-to-exceed $75,000;
7. Roger Sternberg in an amount not-to-exceed $50,000;
8. Sonoma Resource Conservation District in an amount not-to-exceed $50,000;
9. Thomas M. Origer DBA Tom Origer & Associates in an amount not-to-exceed $50,000;
10. Arthur W. Dawson DBA Baseline Consulting in an amount not-to-exceed $25,000;
11. Evans & De Shazo, Inc. in an amount not-to-exceed $25,000.

These contracts for various services are described in Attachment 1 (List of Consultants and Awards). Each firm submitted a proposal that was selected based on its ability to fulfill District needs in four technical tasks:

1. Natural and Cultural Resources Assessment, Habitat Restoration, Management, and Protection Plans;
2. Environmental Impact Assessments and Permitting Services;
3. Agricultural and/or Forest Productivity and Management Assessment; and
4. Investigative Research, Analysis, Mapping and Miscellaneous Technical Support.

In some cases, the service provider is providing technical expertise across all four technical tasks (see scopes of work On File for Prunuske Chatham Inc. and Moore Iacofano Goltsman, Inc. DBA MIG, Inc.). While other service providers are more specialized, providing services in only one technical task (see scopes for Thomas M. Origer DBA Tom Origer & Associates or Evans & De Shazo, Inc.). The consultants may be responsible for environmental evaluation services such as vegetation, and habitat, and fuel load assessment, cultural resources studies, and threatened and rare species surveys. Certain consultants may also provide environmental impact assessment services (California Environmental Quality Act (CEQA) or National Environmental Protection Act (NEPA) analysis and documentation) for projects such as capital improvement projects, management plan implementation, or habitat restoration work to be executed on District properties.

Environmental services may be required for work related to interim management of fee land properties or acquisition and stewardship of conservation easements. These contracted services will assist the District in implementing recent Board direction to transfer ownership of most recreational fee land properties to partnering entities (Regional Parks, cities, and other partner entities) in the coming years. Similarly, when assessing future conservation projects, District staff sometimes need to fully understand the agricultural and forestry capacity and productivity analysis in order to determine a fair market value of a potential conservation easement. Also, with the pending implementation of the Vital Lands Initiative, the selected service providers can continue to assist us in using the best available data and scientific insights to protect the next most important lands or natural resources.

Competitive Selection Process

The District conducted a Request for Proposal (RFP) process to identify and screen qualified consultants for the work described above. The work was divided into three basic tasks and four technical tasks, see Attachment 3 (sample Scope of Work). The RFP was sent to approximately 100 firms and advertised on

the Ag + Open Space website and the County Purchasing website. A total of 26 entities submitted proposals for this RFP. Using a set of selection criteria, an internal and external evaluation committee reviewed all of the proposals, scored each according to the pre-established criteria, and then the top ranked candidates capable of satisfying the services needed were selected. The candidates submitted responsive proposals that clearly addressed the needs of the District and thoughtfully responded to the elements described in the RFP.

Once a project or technical need has been identified, staff will initiate a meeting to describe the agency's needs under the As-Needed agreement. Specific details of each work assignment will be determined during project initiation, including the specific project scope of work, schedule for completion of the project scope, cost estimate, and payment provisions. Staff will then prepare a Task Order (see sample in Attachment 2) to memorialize the agreement reached during project initiation or through the project cost estimate process. The Task Order must be signed by District staff and the Consultant prior to the onset of work. The District will not guarantee any minimum or maximum amount of work to be completed under the As-Needed agreements. One advantage of selecting multiple service providers is the ability to request cost estimates to a pre-approved group of consultants in order to keep approved task orders competitive across many markets.

Local Preference, Local Experience

Most of the selected firms are located in Sonoma County, and most have significant experience working in our unique ecological landscapes. Some of the service providers are based in the Bay Area, but are capable of bringing a diverse set of skills that will complement local service providers.

Prior Board Actions:	
November 12, 2013:	Board approved seven As-Needed contracts for environmental and land management services. The proposed contracts directly support program elements included in the Board-approved Acquisition Plan 2006, the Board-approved Fee Land Strategy 2012, and Vital Lands Initiative 2018 (pending Board approval).
Strategic Plan Alignment	Goal 2: Economic and Environmental Stewardship

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$311,000	$312,000	$302,000
Additional Appropriation Requested			
Total Expenditures	$311,000	$312,000	$302,000
Funding Sources

Sample Scope of Work

Contract Procedures and Protocol:

All work under this As-Needed Agreement will be initiated by a District staff member. Specific details of each work assignment will be determined during project initiation, including the specific project scope of work, schedule for completion of the project scope and price, which will be set in accordance with Section 2 Payment of the Agreement.

For each project, the District may prepare a request for a project cost estimate from one or more consultants for a specific task or group of tasks. For complex projects where on-site inspection may be necessary to clarify the anticipated scope of work, a pre-quote conference may be held by District staff at the work site. If a pre-quote conference is scheduled by District staff, Consultant shall attend the conference. Consultant will respond to the District's request for project cost estimate with a written quote which shall include a description of the work to be performed and the proposed cost for all related services and materials. The District reserves the right to request clarification of a submitted project cost estimate. Based on the cost estimate submitted, the District will select a consultant based on its assessment of a consultant's capacity, qualifications, and record of service with the District and/or other clients, as well as the proposed cost for the project. The District may select the lowest cost estimate, but reserves the right to consider other factors in determining which consultant to use for any specific Scope of Work. A Task Order will be prepared for the selected consultant based on the estimate received. The Task Order (see Exhibit B: Task Order) must be signed by District staff and the consultant prior to the commencement of work.

Technical Needs of this Service Agreement:

Consultant must work with District staff to coordinate site visits and ensure that project assignments are completed on schedule. Consultant will coordinate meetings as needed with the District and facilitate the flow of information necessary to support the project deliverables.

TASK 1: Project Coordination

Consultant shall coordinate all work and, upon request, attend meetings and site visits with a District representative. If specified in the Task Order, Consultant shall attend meetings and/or coordinate meetings with staff and other stakeholders to provide updates, initial conclusions and discuss next steps or recommendations.

In support of the Consultant's work, District shall provide the following as needed:

- Access to all project reports, aerial photographs and maps relating to the site's environmental and cultural resources in order to support consultant in executing the described scope of services in an efficient manner
- Site plans and base maps will be provided at the District's expense
- Access to the property; access to District data layers, databases, mapping templates, and GIS data for analysis
- Necessary equipment and logistical support for staff training events or meetings.

TASK 2: Report Writing

In many cases, the Consultant may be required to prepare a written report to present background information, field surveys, and management recommendations for a specified project or property. Specific report requirements will be clearly defined in the Task Order and may include the following:

Background Information/References: List sources included in the literature review/background search including District resources, interviews, polling, internet searches, meetings and summarize the results.

Summarize Research Findings: Consultants will provide initial findings to support management recommendations or conservation actions from on-going research and analysis.

Site Assessment: A descriptive analysis of field results from site assessments should include information regarding timing of field surveys, methodology, and conclusions. Data sheets shall be included as an Appendix. Specifically, the Field Survey section of the Written Report may address some of the following biological disciplines:

- Identification of plant and/or animal species within the study area.
- Identification of Sensitive and/or Critical Habitats within the project area.
- Assessment of potential impacts to biological resources (plant, animal, critical and/or sensitive habitats) that could result from implementation of the project.

Graphics: A wide range of applicable graphics may be part of any written or web-based report, including but not limited to those specified in task, Graphics/Mapping.

Final Report: District staff may instruct the Consultant to submit appropriate documentation such as an annotated outline or draft written report prior to submitting final report. District staff shall determine the most appropriate form for draft and final report submittals depending on the scope of work. Possible options may include:

- Hard-copy.
- Electronic copy transmitted via e-mail or compressed file via web-based data transfer site with Microsoft Word 2013 or earlier (i.e., Hightail.com).
- Cloud-based tools as a feasible option/alternative (Google Docs, DropBox, etc.).
- Americans with Disabilities Act (ADA) compliant .pdf version for posting on the District's website.

TASK 3: Graphics/Mapping

The Consultant shall prepare all graphics requested in the Task Order, which may include, but not be limited to, photos, maps, charts and tables. Consultant shall produce maps that meet District standards for presentation for GIS data layers that meet minimum requirements for metadata documentation (including but not limited to summary/description, use constraints, point of contact, and field descriptions).

TASK 4: Natural and Cultural Resources Assessment, Habitat Restoration, Management, and Protection Plans

For properties where District is responsible for planning, permitting and executing management practices, staff will outline specific requests for management recommendations or approaches to address the land management related goals. These management recommendations or approaches must be compatible with the conservation objectives for a given property. Tasks may include development, review and analysis of the following:

- Invasive plant management
- Riparian habitat evaluation
- Erosion control plans
- Forest conditions
- Forest management options
- Rangeland assessments
- Site-level fire prescriptions
- Fuel-load reduction strategy
- Road maintenance of existing networks
- Fire prescriptions
- Habitat restoration plans

Below is a list of potential services required to assist the District with natural and/or cultural resource assessments:

Botanical Surveys

Consultant may be requested to conduct site assessments in the field that may include the following:

- Reconnaissance-level plant surveys.
- Plant community identification and assessment.
- Full season floristic surveys to cover the flowering season for all potential special status plants.
- Floristic surveys for special status plant species shall be conducted in compliance with regulatory protocols for special status plant species.

Wildlife Surveys

Consultant may be requested to conduct site assessments in the field that may include the following:

- Reconnaissance-level habitat assessment and/or wildlife surveys. Surveys for special status species shall be conducted in compliance with applicable regulatory protocols for the specific species. Consultant shall indicate species for which they have an incidental take permit.
- Design and establish motion-sensored camera wildlife monitoring and apply other non-invasive monitoring methodologies to capture actual populations and presence surveys.
- Complete wildlife permeability assessments to evaluate conservation value of a property to improve wildlife habitat conditions.
- Assessment of potential of spreading nonnative species (e.g., broom, periwinkle, English ivy), disease (Sudden Oak Death Syndrome) or opportunistic animal species (e.g., barred owl, bullfrog) that may impact habitat functions and conservation values of a given property.

Riparian Corridor Assessments And Management Recommendations

Assess riparian corridor function and provide recommendations for protecting the natural function of the corridor.

Revegetation and Habitat Restoration Planning, Design and Monitoring

- Develop native plant revegetation plans and/or habitat enhancement plans.
- Monitor revegetation areas including documenting health and vigor of the plants, photo-documentation, monitoring report preparation, assessing compliance with plans and permits.
- Make recommendations for improved success, and coordination with regulatory agencies.

Cultural Resources Analysis and Protection Strategies

- Perform a Northwest Information Center records search for specified properties of interest currently protected by the District or under consideration for acquisition.
- Complete site assessments of proposed capital improvement projects to document all archaeological or cultural sites.
- Provide a technical report that documents the findings and records all archaeological or cultural sites discovered.
- Contribute to the cultural resources section of management plans and cultural resources section CEQA or NEPA related studies.
- Advise District staff on any issues that may require tribal consultation. Assist the staff in developing a strategy to reach out to any tribal entities that may have an interest in a given project.

TASK 5: Environmental Impact Assessments & Permitting Services

Below is a list of potential services required to assist District in complying with local, state and federal environmental and planning laws.

Assessment of Environmental Impact

Site Inspection of a proposed project – District staff will orient Consultant to a specific project and the Consultant will determine the potential for environmental impact in accordance with the California Environmental Quality Act (CEQA), Sonoma County environmental regulations (Permit Sonoma), U.S. Army Corps of Engineers (USACOE), and/or State Water Resources Control Board (SWRCB).

Compliance with local, state and federal regulatory agencies may include:

- Sonoma County's General Plan
- National Environmental Policy Act (NEPA)
- Section 106 of the National Heritage Preservation Act (NHPA) – cultural resources
- Wetland delineation and definition of Area of Potential Effect (APE), under the jurisdictions of the Waters of U.S. and Waters of the State
- Americans with Disabilities Act (ADA) for universal access opportunities

Preparation of Environmental Documentation

- Notice of Intent and Scoping Meeting, including Agency consultation
- Preparation of an Initial Study
- Distribution of documents to State Clearinghouse and other entities as required and appropriate

Public Meetings and Outreach

- Attend Board Meetings, as requested (District Board of Directors).
- Facilitate, support and prepare for public meetings.

Regulatory and Ministerial Permitting

- Identify permit requirements and process including costs and potential timelines.
- Describe potential ministerial permit requirements (e.g., grading, drainage, building, etc.) and process for obtaining regulatory permits for any of the proposed activities, including but not limited to:
  - United States Army Corps of Engineers
  - United States Department of Fish and Wildlife
  - United States National Oceanic and Atmospheric Administration Fisheries
  - California Department of Fish and Wildlife
  - State Water Resources Control Board
  - North Coast and San Francisco Bay Regional Water Quality Control Boards
  - Permit Sonoma
- Prepare appropriate regulatory permit applications to state and Federal environmental regulatory agencies.

TASK 6: Agricultural and/or Forest Productivity and Management Assessment

Below is a list of potential services required to assist District in agricultural and/or forest productivity and management assessment analyses:

Rangeland Site Assessments and Management Recommendations

Consultant shall complete rangeland site assessments to determine species diversity for potential grazing leases, define appropriate stocking for a given property, and identify potential limitations and opportunities for grazing on District properties. Site assessments should clearly define existing infrastructure and sensitive resources that will require management actions in order to offer appropriate conditions for grazing lessees. Consultant should demonstrate practical experience and knowledge of grazing practices, market demand, and be able to identify the essential infrastructure necessary to support a grazing lease on a given property (i.e., fencing, watering, protection of livestock, protection of water courses etc.).

Forest Site Conditions

Conduct site visits to assess assets and liabilities of a property including road conditions and design, slopes, forest type and species mix, watershed and other property conditions which directly relate to forest operations on a given property.

Review and analyze data from Timber Harvest Plans and Non-Industrial Timber Management Plans on project properties including existing timber cruises, soils maps, site index, road network maps, water resources maps (springs and well), vegetation maps, biological inventories, timber appraisals, title report, and other reports and data provided by District or landowner.

Sustainable Forest Management Conservation Easement Provisions
Discuss District objectives for forest conservation and draft appropriate forestry provisions for a working forest conservation easement. Includes site visit and review of any existing management plans on the property.

Forest Management Review
Review proposed Management Plans on forested properties related to conservation easement provisions and provide technical comments to District.

Review proposed THP/NTMP for consistency with conservation easement and provide comments to District.

Timber Appraisal
Develop a Timber Appraisal Report that determines a conservation easement's impact on the market value of the harvestable timber resources of property.

TASK 7: Investigative Research, Analysis, Mapping and Miscellaneous Technical Support

Below is a list of potential services required to assist District in investigative research, analysis, mapping and miscellaneous technical support:

Research and Analysis
Consultant may need to conduct general research and analysis in support of District goals and objectives.

GIS Mapping and Analysis
Consultant may need to conduct advanced spatial analyses including raster analysis and classification, edit and digitize features, develop custom geoprocessing tools using PYTHON scripting or Model Builder, develop and maintain geodatabases; develop web mapping tools and applications through District's ArcGIS Online account; develop custom mapping applications via ESRI's Collector and Survey 123 applications.

Cartography
Consultant may need to develop advanced cartographic products, including publication quality printed maps, map templates, and/or web maps using District style standards.

Technical Writing and Support
Consultant may need to prepare documentation of research findings or technical support with references for conservation goals and objectives for Sonoma County.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 12
(This Section for use by Clerk of the Board Only.)

To:	Board of Directors of the Sonoma County Agricultural Preservation and Open Space District
Board Agenda Date:	August 14, 2018

Department or Agency Name(s):	Sonoma County Agricultural Preservation and Open Space District
Staff Name and Phone Number:	Mary Dodge, Admin & Fiscal Services Manager
Supervisorial District(s):	All
Title:	Sixth Amendment to Lease for Office of Sonoma County Agricultural Preservation and Open Space District

Recommended Actions:

Authorize the General Manager of the Sonoma County Agricultural Preservation and Open Space District to execute an amendment to the Lease Agreement between Papeete, LLC and the District, extending the lease for two years, through July 31, 2020 for a total cost of $438,592.

Executive Summary:

The Agricultural Preservation and Open Space District has negotiated a second two-year extension of the existing lease agreement with its landlord, Papeete, LLC. This unusual two-year lease period proposed is in response to a Board-directed evaluation of the Agricultural Preservation and Open Space District's office space options, which include purchasing a site as potential long-term cost-savings alternatives to paying monthly rent. The requested term extension allows for the time needed to finalize the evaluation and to acquire a cost-effective and well-located facility.

Discussion:

The Agricultural Preservation and Open Space District (Ag + Open Space) has been at its current facility at 747 Mendocino Ave, Santa Rosa, CA 95401 since March 26, 1996. The lease has been amended five times to include upgrades and expansions in 2007, 2011 and 2016. The current office space totals 9,239 square feet.

The current monthly rent of $16,526.00 equates to an annual cost of $21.46 per square foot. From August 2018 through July 2019, the rent will increase to $18,034.93, or $23.42 per square foot. From August 2019 through July 31, 2020, the rent will increase to $18,514.39 f, or $24.05 per square foot.

The increased cost per square foot represents two years of the 2.75% historical annual inflation increase which was inadvertently omitted in the last lease. Ag + Open Space concurs that this error should be

rectified, and the 5.5% increase is included in FY-2018-19 only, making the annual inflation increase of 5.5% a one-year-only event. In FY19-20 the annual inflation increase returns to the 2.75% of the base rate.

Additionally, Ag + Open Space recently purchased a hybrid vehicle. When an electric Vehicle Charging Outlet is installed, a $50 per month charge will be added to the lease for additional electricity used by the vehicle.

Finally, the lease allows Ag + Open Space to terminate the lease without penalty with a six-month written notice, offering Ag + Open Space the flexibility it may need in the event a permanent location is found.

Prior Board Actions:

August 9, 2016:	Authorized General Manager to execute amendment to Lease.
December 13, 2011:	Authorized General Manager to execute amendment to Lease.
January 8, 2008:	Authorized General Manager to execute amendment to Lease.
February 7, 2006:	Authorized General Manager to execute amendment to Sublease.
October 4, 2005:	Authorized General Services Director to exercise option of Lease.
August 21, 2001:	Authorized General Manager to execute amendment to Sublease.
February 27, 2001:	Authorized Renewal of Sublease.
March 26, 1996:	Authorized President to execute subject Sublease.

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

The requested amendment allows the District to stay at its current location while other office space options are evaluated.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$216,419	$222,173	
Additional Appropriation Requested

1. Lease Agreement – Sixth Amendment

Related Items "On File" with the Clerk of the Board:

SIXTH AMENDMENT TO LEASE

This Sixth Amendment to Lease ("Sixth Amendment"), dated as of July 6 _____, 2018 ("Effective Date"), is by and between **PAPEETE, LLC**, a California limited liability company ("Landlord"), successor-in-interest to SONOMA GROWTH FUND XIV, a California limited partnership, and the **SONOMA COUNTY AGRICULTURAL PRESERVATION AND OPEN SPACE DISTRICT**, a public agency formed pursuant to the provisions of Public Resources Code Section 5500 et. seq. ("District"), assignee of the Sonoma County Open Space Authority ("Original Tenant"). Landlord and District are sometimes collectively referred to herein as the "parties" and singularly as "party". All capitalized terms used herein shall, unless otherwise defined, have the meaning ascribed to those terms in the Lease (as defined below).

RECITALS

WHEREAS, Landlord and Original Tenant entered into that certain Lease dated June 6, 1996 ("Original Lease") for premises located at 747 Mendocino Avenue, Santa Rosa, California ("Premises"); and

WHEREAS, Original Tenant and the District entered into that certain sublease dated March 26, 1996 ("Sublease"), as amended, whereby District subleases approximately eight thousand thirty-eight (8,038) rentable sq. ft. of improved office space from Original Tenant ("Subleased Premises"); and

WHEREAS, on February 28, 2001, Original Tenant properly exercised its first option to extend the term of the Lease; and

WHEREAS, Landlord and Original Tenant entered into that certain First Amendment to Lease dated August 21, 2001 ("First Amendment") to confirm the expiration date of the Lease and to enlarge the Premises by approximately one thousand four hundred seventy-four (1,474) rentable square feet; and

WHEREAS, Landlord and Original Tenant entered into that certain Second Amendment to Lease dated February 9, 2006 ("Second Amendment") to further amend the lease in order to, among other things: (i) extend the term; (ii) specify rental payments; and (iii) provide for additional work of improvements to the Premises; and

WHEREAS, Landlord and Original Tenant entered into that certain Third Amendment to Lease dated January 8, 2008 ("Third Amendment") in order to, among other things: (i) expand the premises by approximately one thousand two hundred sixty-three (1,263) square feet; (ii) provide for work of improvements; (iii) provide for additional options; and (iv) specify rental payments; and

WHEREAS, in accordance with the provisions in Section 15 of the Lease, Original Tenant assigned all of its right, title and interest in the Lease and delegated all of its obligations thereunder to the District pursuant to that certain Assignment of Lease dated March 31, 2011 ("Assignment"), by and between Original Tenant and District; and

WHEREAS, Landlord and Original Tenant entered into that certain Fourth Amendment to Lease dated December 13, 2011 ("Fourth Amendment") in order to: (i) confirm that Original Tenant properly exercised its option with respect to the First Extended Term of the Lease; (ii) expand the Premises by approximately eight hundred ninety-two (892) sq. ft.; (iii) provide for work of improvements; and (iv) specify monthly rental payments; and

WHEREAS, on September 9, 2016 the Parties entered into that certain Fifth Amendment to lease dated May 2, 2016 ("Fifth Amendment") in order to (i) expand the Premises by approximately 309 square feet and (ii) specify monlty rental payments; and

WHEREAS, the Original Lease as modified by the First Amendment, Second Amendment, Third Amendment Fourth Amendment, Fifth Amendment and Sixth Amendment, is hereafter referred to as the "Lease"; and

WHEREAS, District is hereafter referred to as the "Tenant"; and

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

AGREEMENT

1. The foregoing Recitals are true and correct and are hereby incorporated and expressly made a part of this Sixth Amendment.

2. Effective as of the Effective Date of this Sixth Amendment, the Lease is hereby amended as follows:

A. Section 2.6 of the Lease is hereby deleted in its entirety and replaced with the following section:

"2.6 2018 Extension Term. Effective upon execution of the Sixth Amendment to Lease, the term of this Lease is extended until July 31, 2020. At any time after August 30, 2018, Tenant may provide six months written notice to the Landlord of its intention terminate the Lease, which termination becomes effective upon the expiration of the six-month notice period."

A.1. Section 3 Use of Premises is hereby amended by including the following section:

Section 3.3. Electric Vehicle Charging Outlet. Tenant shall install (1) one electrice vehicle charging outlet (EVCO) to be used solely by Tenant. The EVCO shall be rated NEMA 5-20 (125V 20 amp) and located on the north-east light pole in the parking lot. Landlord shall provide electricy for the EVCO. Tenant will pay for cost of installing and maintaining EVCO and pay $50.00 per month to Landlord for additional electricity used by EVCO. Upon expiration of the Lease, the EVCO equipment installed for the use by the District shall remain the property of the Landlord.

B. Section 4.2 of the Lease is hereby deleted in its entirety and replaced with the following section:

"4.2 Rental Amounts During Initial Term, First Extended Term and month-to-month tenancy. Tenant shall pay to Landlord, in lawful money of the United States, the following rental amounts:

a) For the period commencing on August 1, 2018 through July 31, 2019 the sum of Eighteen Thousand Thirty Four dollars ($18,034.93) per month;

b) For the period commencing on August 1, 2019 through July 31, 2020 the sum of Eighteen Thousand Five Hundred Fourteen ($18,514.39) per month.

C. Section 20.3 of the lease is hereby deleted in its entirety and replaced with the following section:

"20.3 Addresses. Addresses for purposes of giving notice are set forth below:

Tenant: **SONOMA COUNTY AGRICULTURAL PRESERVATION & OPENSPACE DISTRICT**
Attn: General Manager
747 Mendocino Avenue, Suite 100
Santa Rosa, CA 95401-4850

With a copy to:
COUNTY OF SONOMA

Santa Rosa, CA 95403

Landlord: **PAPEETE, LLC**
Attn: Ms. Arlene Allsman
P.O. Box 641
Bolinas, CA 94924."

3. Except to the extent the Lease is specifically amended or supplemented by this Sixth Amendment, the Lease, together with exhibits is, and shall continue to be, in full force and effect as originally executed, and nothing contained herein shall, or shall be construed to modify, invalidate or otherwise affect any provision of the Lease or any right of Tenant arising thereunder.

4. This Sixth Amendment shall be governed by and construed under the internal laws of the State of California, and any action to enforce the terms of this Sixth Amendment or for the breach thereof shall be brought and tried in the County of Sonoma.

LANDLORD AND TENANT HAVE CAREFULLY READ AND REVIEWED THIS SIXTH AMENDMENT AND EACH TERM AND PROVISION CONTAINED HEREIN AND, BY EXECUTION OF THIS SIXTH AMENDMENT, SHOW THEIR INFORMED AND VOLUNTARY CONSENT THERETO.

IN WITNESS WHEREOF, the parties hereto have executed this Sixth Amendment as of the Effective Date.

County of Sonoma Agenda Item Summary Report Clerk of the Board 575 Administration Drive Santa Rosa, CA 95403	**Agenda Item Number: 13** (This Section for use by Clerk of the Board Only.)
To: Board of Directors of the Sonoma County Agricultural Preservation and Open Space District	
Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s): Agricultural Preservation and Open Space District	
Staff Name and Phone Number: Bill Keene, 565-7348	**Supervisorial District(s):** All
Title: Reauthorization of Farm Bill (2018) – Amendment to Agreement	
Recommended Actions:	
Authorize the General Manager of the Agricultural Preservation and Open Space District to execute an amendment to a July 31, 2017 agreement with 9b Group, Inc., extending the term one year and adding $50,000 to the payment terms for a total amount not-to-exceed $100,000. This will allow for continued representation during finalization of the Reauthorization of the Conservation title in the 2018 Farm Bill and the subsequent development of Rules, Regulations, and implementing Manuals.	
Executive Summary:	
In 2017, the Agricultural Preservation and Open Space District entered into a one-year agreement with 9b Group, Inc., a benefit corporation that represents agricultural, land conservation and sustainability interests at the House, Senate and Administration government level. The existing agreement centered on the Reauthorization of the 2018 Farm Bill, with the goal of advancing agricultural opportunities in Sonoma County. The vast majority of our goals are now contained in the 2018 Farm House Bill, the 2018 Farm Senate Bill, or both. While substantial progress has been made in the reauthorization process, many components of the legislation will be negotiated and finalized as the House and Senate embark on a joint Conference to resolve differences. The Agricultural Preservation and Open Space District is requesting approval to add additional time and funding to continue its investment as the 2018 Farm Bill moves forward to Congressional passage, enactment into law, and implementation.	
Discussion:	
<u>Background</u> For several years, the Agricultural Preservation and Open Space District (District) has worked with firms with land conservation and sustainability experience to establish a more active role in securing federal-level conservation funding and representation on key environmental and agricultural policy issues. The purpose of these partnerships has been, and continues to be 1) to ensure exposure of the District at the federal level, 2) to provide leadership and expertise on issues relative to Sonoma County, and 3) to develop relationships with Congressional and federal agencies, in order to position the District to secure opportunities for federal funding for its programs. The District does not have the capacity to conduct	

this work in-house, as it requires experienced representation at the federal level and regular contact with federal agencies and legislative committees. The District's request to extend its agreement with the 9b Group directly supports these goals.

The Farm Bill is administered by the United States Department of Agriculture (USDA) and represents the primary agricultural and food policy tool of the federal government. The Farm Bill is the single largest federal funding source for private land conservation and includes funding for conservation easements, forest and grassland restoration and management, wetland protections, soil conservation, and improved water quality programs. It is updated and reauthorized approximately every five years. The current bill, the Agricultural Act of 2014 (2014 Farm Bill) was passed by Congress and signed into law on February 8, 2014, and several components of it will expire on September 30, 2018. The 2014 Farm Bill is in the process of being reauthorized by Congress (2018 Farm Bill). In late June, 2018, both the House and Senate passed their respective versions of the farm bill (H.R. 2 and S.B. 3042). The bill will now go through a formal Conference to reconcile the differences between the two bills. Once that is accomplished, the unified bill will go back to the House and Senate for an up or down vote, and, if passed, will be sent to the President where it is expected to be signed into law. Once this occurs, the work focus will shift to the USDA where the development of the Rules, Regulations, and implementing instructions will occur. Getting good policy at the federal agency level will be critical to ensure the District will be able to maximize use of the programs.

In its final form, the Farm Bill will have a significant impact on the District's priority objectives.

Requested Action from the Board of Directors

The District seeks to continue working with 9b Group, Inc., as the 2018 Farm Bill enters the final legislative stages and progresses toward implementation. In July, the House and Senate will name Conferees to resolve differences between the two versions of the Farm Bill. This work is expect to take a few months. 9b Group will maintain close contact with Conferee staff and select Congressional members, focusing on issues that are important to the District, including but not limited to the Agricultural Conservation Easement Program and the Regional Conservation Partnership Program. Both bills contain provisions advocated by the District over the past year, and 9b Group will weigh in to protect those provisions and seek their incorporation into the final bill. Concurrently, 9b Group will work to ensure that no policy detrimental to the District is introduced into the final version of the bill.

Additionally, the District will benefit from 9b Group's guidance through implementation of the new bill's Rules and Regulations, through a strengthened relationship with the USDA, specifically the Under Secretary for Farm Production and Conservation, and the Chief and Leadership of the Natural Resources Conservation Service.

With successful inclusion of the District's interests in 2018 Farm Bill, Sonoma County will be better positioned to serve and support its agriculture community.

Prior Board Actions:

None

Strategic Plan Alignment	Goal 2: Economic and Environmental Stewardship
By achieving greater visibility and presence, and by attracting additional federal funding, the District will be capable of leveraging its funding to support agriculture in Sonoma County.

1. Amendment to Reauthorization of 2018 Farm Bill Agreement

Related Items "On File" with the Clerk of the Board:

1. Reauthorization of 2018 Farm Bill Agreement

FIRST AMENDMENT
TO
AGREEMENT FOR CONSULTING SERVICES

This First Amendment (the "Amendment") effective upon date of execution ("Effective Date") is by and between the Sonoma County Agricultural Preservation and Open Space District ("District") and the 9B Group, Inc., a benefit corporation (hereinafter "Consultant").

RECITALS

WHEREAS, District and Consultant entered into that certain Agreement for Consulting Services No. 1086 dated as of July 26, 2017 ("Agreement") whereby Consultant agreed to perform certain services related to formulating strategies, developing campaigns, and guiding proposals through administrative and legislative processes with a focus on federal policy related to agriculture, and related services; and

WHEREAS, District and Consultant desire to amend the Agreement for Consulting Services in order to 1) extend the term of the agreement to July 31, 2019, and 2) continue Consultant's representation during finalization of the Reauthorization of the Conservation title in the 2018 Farm Bill, and 3) to add fifty thousand dollars ($50,000.00) for compensation for additional representation and work, for a contract total of one hundred thousand dollars ($100,000.00).

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

AGREEMENT

1. The first sentence of Article 1.1 of the Agreement, Consultant's Specified Services, is hereby deleted and replaced with the following language:

> "Consultant shall perform the services described in Exhibit A and Exhibit A-1 attached hereto and incorporated herein by this reference (hereinafter "Scope of Work and Budget"), and within the times or by the dates provided for in Exhibit A and Exhibit A-1 and pursuant to Section 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit A and Exhibit A-1, the provisions in the body of this Agreement shall control.

2. Section 2 of the Agreement first sentence, Payment, is hereby deleted and hereby replaced with the following language:

"For all services and incidental costs required hereunder, consultant shall be paid in accordance with the budget set forth in Exhibit A and Exhibit A-1, provided, however, that total payments to Consultant shall not exceed one hundred thousand dollars ($100,000.00) without the prior written approval of District

3. Section 3 of the Agreement, Term of Agreement, is hereby deleted and replaced with the following language:

"The term of this Agreement shall be from the date of execution through July 31, 2019, unless terminated earlier in accordance with the provisions of Section 4.

4. Except to the extent the Agreement is specifically amended or supplemented hereby, the Agreement, together with exhibits is, and shall continue to be, in full force and effect as originally executed, and nothing contained herein shall, or shall be construed to modify, invalidate, or otherwise affect any provision of the Agreement or any right of District arising thereunder.

5. This Amendment shall be governed by and construed under the internal laws of the State of California, and any action to enforce the terms of this Amendment or for the breach thereof shall be brought and tried in the County of Sonoma.

DISTRICT AND CONSULTANT HAVE CAREFULLY READ AND REVIEWED THIS AMENDMENT AND EACH TERM AND PROVISION CONTAINED HEREIN AND, BY EXECUTION OF THIS AMENDMENT, SHOW THEIR INFORMED AND VOLUNTARY CONSENT THERETO.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment the day and year first above written.

Title: Sonoma County Community Development Commission Loan Policy Revisions

Recommended Actions:

Approve amended Sonoma County Community Development Commission (Commission) loan policy regarding Executive Director's authority to waive accrued interest on Commission loans where appropriate to preserve the long-term affordability of Commission-supported properties.

Executive Summary:

This agenda item proposes to amend the Commission loan policy regarding accrued interest on loans issued by the Commission. The current Commission loan policy requires that all accrued interest be added to the outstanding principal balance at the time of loan modification or extension and that the loan be amortized. The amended policy will give the Executive Director of the Commission the discretion to waive a portion, or up to the entire amount, of accrued interest at the time of loan extension or modification, subject to financial analysis and legal review, in order to further the primary goal of preserving affordable housing. Borrowers seeking to modify or extend Commission loans at the maturity date of the initial 30-year loan term will be required to enter a new 55-year Affordable Rental Housing Agreement (ARHA) as part of that process.

Discussion:

This Board Item seeks to align Commission Loan Policy with industry best practice in order to create and preserve affordable housing. Forgiving accrued interest during loan modification and extension is a critical tool in the Commission's work to preserve affordable housing. This is particularly true for small, deeply affordable housing developments. The financial situation of the majority of these types of properties is extremely challenging, with significant existing debt and accrued interest on the balance sheet and limited ability to repay, extensive capital needs and deferred maintenance, and few resources. In the Commission's effort to provide affordable housing, it is far more cost efficient to preserve existing affordable housing than to create new housing when existing affordable housing units are lost. Flexibility in restructuring debt described in this Board Summary Item is critical to borrowers who are recapitalizing in an effort to preserve affordable housing. The Commission has followed

industry best practice by issuing gap funding in the form of loans rather than grants due in large part to the fact that loans benefit Developers in their efforts to garner competitive Low Income Housing Tax Credit (LIHTC) funding.

In many cases, the Commission already has the authority to issue funds in the form of grants; therefore, this policy revision is consistent with the Executive Director's existing authority. In either case (grant or loan), the Commission records an Affordable Rental Housing Agreement against the property title; this Agreement runs with the land for 30 to 55 years regardless of the status of the loan.

The CDC performs a careful fiscal and legal review when borrowers request loan modification, and will this mechanism when necessary to preserve the affordability of a property. In the case of the example property described below the Commission can waive approximately $60K in accrued interest per unit, funds which the Commission did not anticipate recapturing, and preserve that unit's affordability for the duration of the existing 55-year ARHA. This can be compared to the $150K to $250K of investment needed to build one replacement unit of affordable housing (roughly the cost of creating affordability during development rather than using an ongoing subsidy). The economic benefits of preserving affordable housing using this mechanism are evident.

Recapitalization is a common necessity for projects as components fail or become obsolete and large capital replacements are needed. This process of refinancing debt and/or bringing in new funding (tax credits, etc.) normally should improve cash flow, but mainly serves to keep the project viable. During this process, if a project is seeking to extend a Commission loan at the conclusion of the initial 30-year loan term, the Commission will implement a new 55-year ARHA as part of that process.

The Commission has a large number of active Community Development Block Grant (CDBG), US Department of Housing and Urban Development (HUD) HOME Investment Partnership Program (HOME), and County Fund for Housing (CFH) loans. In the period from Fiscal Year '08-'09 to Fiscal Year '17-'18 alone the Commission issued over $20 million in CFH gap loans. As these loans reach maturity, or the properties need recapitalization, and borrowers seek loan modification or extension to preserve affordable housing projects, the Commission will be processing a steady stream of requests. As the process of preparing and presenting Board Items requires a significant amount of staff time, repeating these steps as each request comes in becomes a challenge for staff and detracts from other crucial work.

<u>Commission Loan Policy regarding accrued interest</u>:

The primary goal of the Commission Loan Policy is the provision, preservation, and creation of affordable housing. To accomplish this goal, the Commission has issued millions of dollars in CFH, CDBG, and HOME loans. The standard maturity for these loans is approximately 30 years. As these loans mature, or as projects that were originally funded using Commission loans require substantial recapitalization and rehabilitation, borrowers make requests to the Commission for loan extensions or loan modifications in an effort to restructure debt and preserve these affordable housing assets. Current policy states, "*<u>Loan Modification, Assignment and Assumption</u>: The Commission's Executive Director is authorized to modify, assign and approve assumption of Commission loans, in compliance with funding source regulations and with County Counsel review and approval as to form, provided that*

the loan remains in a secure position as required by Section III F. and as demonstrated by appraisal or by other means that is satisfactory to Commission, and provided that the ongoing public purpose of the development is protected." Commission-issued financing under these programs is extremely valuable in the creation of affordable housing in that it provides deferred-payment loans at below-market interest rates which can be subordinated to primary financing. However, current Commission Loan Policy directs that outstanding principal and accrued interest be amortized at the time of loan modification or extension. For those projects seeking loan modification or extension for the purpose of preserving the affordability of the housing project, this requirement restricts the borrower's ability to obtain additional financing needed to carry out capital improvements and repairs. Affordable projects generally cannot afford to service the debt under these revised terms.

As quoted above, current Commission Loan Policies address the subject of loan term extension, loan restructure and loan forgiveness. However, no provision is included which would allow the Executive Director to waive a portion, or up to the entire amount, of accrued interest if this is necessary in order to preserve the affordability of the project. An example is presented below that illustrates the need for this policy revision.

<u>Example affordable housing project</u>:
The Commission holds secured notes for two loans issued in 1994 that assisted in the development of an 18-unit multi-family project. Both loans will mature in 2026 at the end of their 30-year term. The original project was a limited partnership funded with federal tax credits, and following the expiration of the federal tax credit compliance period all of the loans have now been assumed by the non-profit project sponsor. Although these loans do not mature until 2026, the sponsor needs to commence with essential repairs and rehabilitation of the development, now 23 years old and without capital sufficient reserves to conduct the work. They have a commitment from a lender to refinance the first mortgage on the property, yielding approximately $300,000 for rehabilitation work, while also reducing the debt service to be paid by operating income.

(The sponsor submitted a Physical Needs Assessment on 7/31/2017, from which they have derived a scope of work using net proceeds from refinancing; along with the primary tasks of reroofing and painting, they will do some minor repairs, improve lighting, and remove trip hazards in the parking and landscape areas.)

The lender will underwrite a 10-year term on their mortgage only if the subordinate debt is either forgiven or extended.

The subject loans are as follows, including the interest accrued through the 12/31/2017:

HOME Loan (2nd lien position):
$312,300 principal + $1,086,021 interest (accrued @ 6.67% compounded interest*) = $1,398,321
*These terms were based on program terms and the APR at the time the loan was issued.

CDBG Loan (5th lien position):
$125,000 principal + $90,267 interest (accrued @3% simple interest) = $215,267

There are no HOME or CDBG program prohibitions on forgiving or modifying the terms of loans made with those funds.

24 CFR 982.205 (b) clarifies that HOME assistance can take the form of low-interest or no-interest loans as well as grants.

24 CFR 570.202 (b) indicates that CDBG funds can be used as loans or grants, and no criteria are listed.

The interest can be forgiven by the Commission and the principal of the loans extended on a deferred payment basis. In this case, the income and rent restrictions can be extended as a condition for the modification and extension of these loans. This will serve to preserve the affordable housing asset and guarantee that the project remains affordable and sustainable.

To ensure sufficient oversight and transparency, the Commission is currently exploring best practices, such as the development of a finance or loan subcommittee to review loans. In addition the Commission looks to develop an annual report that would show all business loans for which accrued interest had been forgiven. Staff intends to return to the Board at a future date with recommendations on both of these initiatives.

Requested Action:
The Commission requests that the Board approve Loan Policy revisions as attached in the Draft Amended Loan Policy document.

Prior Board Actions:

10/19/2016: Approved revised Sonoma County Community Development Commission Loan Policies;
07/19/16: Approved revisions to Sonoma County Community Development Commission Loan Policies and Homeownership Policies

Strategic Plan Alignment	Goal 1: Safe, Healthy, and Caring Community

Fiscal Summary			
Expenditures	**FY 17-18 Adopted**	**FY 18-19 Projected**	**FY 19-20 Projected**

Narrative Explanation of Fiscal Impacts:

The proposed loan policy revisions do not impact the Commission's adopted or projected operating budget. Accrued interest on Commission loans is not a mechanism that replenishes Commission loan funds. Even the highest performing affordable assets do not produce enough excess cash flow to pay off more than a small portion of loan principal during the original loan term, let alone accrued interest. Furthermore, this policy adjustment is targeted toward smaller, more deeply affordable deals which return no cash to the CDC. At the time a borrower plans to recapitalize an asset (with the goal of rehabilitation and preservation) accrued interest on the balance sheet becomes an obstacle to new financing efforts.

The Commission only receives a small amount of cash flow split each year from the existing portfolio of loans, generally from larger, high-performing assets. Therefore, there is not a scenario wherein the Commission is looking to deferred, accrued interest on small, deeply affordable properties either as a short-term or a long-term revenue source.

I. INTRODUCTION

A. Purpose & Objectives:

1. The purpose of these Loan Policies is to create a standardized reference for origination, modification, and administration of real estate loans made by the Sonoma County Community Development Commission (Commission), either on its own behalf or on behalf of the County of Sonoma (collectively referred to herein as Commission loans), using federal, state, and/or local funds. These Policies govern the following real estate lending programs:

   a. Affordable housing development

   b. Affordable housing acquisition and preservation

   c. Housing rehabilitation of five units or more that are located in one or more buildings sited on one or more contiguous parcels under common ownership (projects of four units or less are governed by the policy document entitled HOUSING REHABILITATION LOAN PROGRAM DESIGN: OWNER-OCCUPANT AND RENTAL HOUSING).

   d. Community facilities sponsored or owned by community-based, 501 (c) (3) non-profit agencies (e.g. senior or teen centers or homeless services facilities).

2. The primary objective of these Loan Policies is to provide an efficient mechanism for providing public funds to the community for the purpose of developing and preserving affordable housing and financing community facilities.

B. Authority:

1. These Policies have been adopted concurrently by the Sonoma County Board of Supervisors and the Commissioners of the Sonoma County Community Development Commission, and apply exclusively to funds managed by the Community Development Commission. No revisions may be made hereto without the express action of the Board of Supervisors and Commissioners.

2. The Executive Director of the Commission is hereby authorized to accept and process loan applications per the provisions of these policies and applicable funding source rules, guidelines, and regulations, to interpret these policies, and to make policy exceptions pursuant to the criteria established in Section VII of these policies.

3. Where a funding source policy, regulation, rule or guideline conflicts with the policies described herein, the funding source policy, regulation, rule or guideline will prevail.

C. Conflict of Interest:

No member of the governing body of the County of Sonoma or the Commission and no other official or employee or agent of the County government, Commission, or any other local government agency who exercises any decision-making functions or responsibilities in connection with the planning and implementation of the real estate lending activities governed by these Loan Policies shall directly or indirectly be eligible to participate in or benefit from said lending programs governed.

II. DEFINITIONS

Affordable Housing Agreement - A contract with the Commission executed by the developer of a residential project, and recorded against the subject property, that limits the sales price and/or monthly rent of specified dwelling units within the project, limits the income level of the household occupying the specified units, establishes a time period during which the specified units shall continue to be sold and/or rented at affordable prices, and which may contain administrative, enforcement, or other provisions to ensure that the specified units are sold and/or rented to targeted households at affordable sales prices and/or monthly rent over the entire term of the agreement.

Amortized Payment Loan – A loan to be repaid, with interest and principal, by a series of regular payments that are equal or nearly equal, without any special balloon payment prior to maturity.

Covenant – An agreement or promise to do or not to do a particular act or to use or not use property in a certain way (See Affordable Housing Agreement).

Deferred Payment Loan - A loan that is due and payable, with principal and either accrued interest or a share of appreciation, upon sale or transfer of the property or upon maturity on the loan. No regular payments are required with the final payment being due upon maturity as a balloon payment.

Density Bonus - A density increase allowed pursuant to the Sonoma County Zoning Regulations (Density bonus programs) over the otherwise maximum allowable residential density permitted in the applicable zoning district.

Fair Market Value (FMV) - For purposes of the initial sale of affordable ownership units, the fair market value as defined in the Sonoma County Zoning Regulations. For purposes of resale of affordable ownership units, the fair market value as determined according to the procedure set forth in the Option Agreement.

Funding Agreement – A HOME Developer Agreement, CDBG Subrecipient Agreement, CFH Funding Agreement, Low & Moderate Income Housing Asset Fund Agreement, or other unrecorded document setting forth the terms and conditions imposed upon the borrower in order to receive Commission financing.

Incentives - A modification of zoning code requirements (e.g., minimum open space, minimum lot size, setbacks, parking standards) or an allowance of other regulatory incentives or measures granted in exchange for the provision of affordable ownership housing or affordable rental housing pursuant to the Sonoma County Zoning Regulations.

Lien – A form of encumbrance that usually obligates specific property as security for the repayment of a debt.

Option Agreement – An agreement granting the Commission a first right either to purchase an affordable ownership unit for a price established through a formula under the Agreement, or to assign the Commission's first right to an eligible buyer to purchase the affordable ownership unit at that price.

Reconveyance –An instrument used to transfer title to real property from a trustee to the equitable owner, when title is held as collateral security for a debt.

Residual Receipts - Residual Receipts means, in a particular calendar year, the amount by which Gross Revenue exceeds Annual Operating Expenses, as more particularly defined in Section III. E.

Share of Appreciation - A specified share of the appreciation in value of a particular affordable ownership unit equal to the ratio of the principal amount of the deferred payment loan to the FMV of the affordable ownership unit that the loan financed, at the time the loan was made, multiplied by the difference between the FMV at the time of resale and the FMV of the affordable ownership unit at the time the loan was made. To the extent permitted by applicable law, regulations, and any senior mortgage lender(s), the promissory note evidencing the deferred payment loan, a recorded covenant between the buyer and Commission, or another instrument shall require the seller of an affordable ownership unit, at resale, to pay the Commission the Commission's share of appreciation due under the promissory note, notwithstanding any prior prepayment by the seller of any principal or interest due on the loan.

III. LOAN TERMS AND CONDITIONS

The Commission will use a variety of funding sources to offer deferred-payment loans with either a share of appreciation or below-market interest rates as prescribed by the approved guidelines for each specific funding source.

A. Maximum Loan Amount: Maximum loan amounts shall be determined per the approved guidelines for each specific funding source. In any event, the

maximum loan shall not exceed the minimum amount of funding necessary to achieve project feasibility.

B. Term: The loan term shall be consistent with local, state and federal law and regulation and may correspond to the requirements of other financing sources. If a covenant is required (e.g., a housing affordability covenant) the term of said covenant may be longer than the term of the loan but the term of any covenant shall not be shorter than the term of the loan. All Commission loans can be paid in part or in full prior to the date of loan maturity without penalty; however, any such prepayment shall not reduce the term of any covenant on the property.

C. Interest Rate: Unless otherwise required by the regulations or policies of the funding source, the fixed interest rate for all Commission deferred-payment, interest-bearing loans subject to these policies is 3%, simple-interest. Interest shall accrue from the date on which funds are disbursed.

D. Share of Appreciation: If required by a particular affordable housing homeownership program, a Share of Appreciation shall be used in the place of an interest rate. Please see the Sonoma County Affordable Housing Program Homeownership Policies Share of Appreciation Approach.

E. Residual Receipts Payments: To the extent a multifamily project has residual receipts as defined below in any fiscal year, residual receipts shall be divided as follows:

1. the project sponsor shall be entitled to retain fifty percent 50%; and

2. the remaining fifty percent (50%) shall be divided proportionately between the Commission and other secured creditors with residual receipts rights based on their percentage of the total outstanding financing with residual receipts rights.

Residual Receipts means, in a particular calendar year, the amount by which Gross Revenue exceeds Annual Operating Expenses.

a. "Gross Revenue," with respect to a particular calendar year, shall mean all revenue, income, receipts, and other consideration actually received from operation and leasing of the Development. "Gross Revenue" shall include, but not be limited to: all rents, fees and charges paid by tenants, Section 8 payments or other rental subsidy payments received for the dwelling units, deposits forfeited by tenants, all cancellation fees, price index adjustments and any other rental adjustments to leases or rental agreements; proceeds from vending and laundry room machines; the proceeds of business interruption or similar insurance; the proceeds of casualty insurance to the extent not utilized to repair or rebuild the Development (or applied toward the cost of recovering such proceeds); and condemnation awards for a taking of part or all of the Development for a temporary period. "Gross Revenue" shall also include the fair market value of any goods or services provided in

consideration for the leasing or other use of any portion of the Development. "Gross Revenue" shall not include tenants' security deposits, loan proceeds, capital contributions or similar advances.

b. "Annual Operating Expenses," with respect to a particular calendar year shall mean the following costs reasonably and actually incurred for operation and maintenance of the Development to the extent that they are consistent with an annual independent audit performed by a certified public accountant using generally accepted accounting principles: property taxes and assessments imposed on the Development; debt service currently due on a non-optional basis (excluding debt service due from residual receipts or surplus cash of the Development) on loans associated with development of the Development and approved by the Commission; property management fees and reimbursements, not to exceed fees and reimbursements which are standard in the industry and pursuant to a management contract approved by the Commission; resident services fee, if any, with prior Commission approval of scope of services and amount of fee; partnership management fees (including any asset management fees), if any, not to exceed a total of Thirty-two Thousand Five Hundred Dollars ($32,500) per year, all as approved by the Commission at the time the tax credit syndication occurs, increasing annually at a rate not exceeding the lesser of the increase in the Consumer Price Index (as published for San Francisco by the Bureau of Labor Statistics) or 3%; any Tax Credit Adjuster Distributions to the Investor Limited Partner as permitted in the Partnership Agreement; all costs associated with organization, accounting, tax return preparation of the Borrower, including tax preparation fees, annual franchise tax fees of the Borrower, premiums for property damage and liability insurance; utility services not paid for directly by tenants, including water, sewer, and trash collection; maintenance and repair; any annual license or certificate of occupancy fees required for operation of the Development; security services; advertising and marketing; cash deposited into reserves for capital replacements of the Development in an amount not to exceed six tenths of one percent (.6%) of the construction costs of improvements in the Development; cash deposited into an operating reserve in an amount not to exceed 3% of Annual Operating Expenses or the amount required in connection with the permanent financing and the tax credit syndication, whichever is greater (or any greater amount approved by the Commission) but with the operating reserve capped at six (6) months gross rent from the Development (as such rent may vary from time to time); payment of any previously unpaid portion of the developer fee due Borrower (without interest) not exceeding a cumulative developer fee due Borrower in the maximum amount set forth in the Agreement; extraordinary operating costs specifically approved by the Commission; payments of deductibles in connection with casualty insurance claims not normally paid from reserves, the amount of uninsured losses actually replaced, repaired or restored, and not normally paid from reserves, and other ordinary and reasonable operating expenses approved by the Commission and not listed above. Annual Operating Expenses shall not include the following: depreciation,

amortization, depletion or other non-cash expenses or any amount expended from a reserve account.

F. Loan Security: All loans shall be secured by a Deed of Trust.

1. Seniority: Commission loans shall be senior to all loans of lesser principal amounts, and to loans that recapture the value of a County Density Bonus or other regulatory incentives.

2. Appraisals: All appraisals must be prepared by a Certified General Appraiser or by a Certified Residential Appraiser if the project is exclusively residential. An appraisal is generally considered current if it not more than six months old.

3. Developer Loans:

a. Except when allowed under the guidelines of a specific funding source, loans for site acquisition, and any predevelopment, demolition, or relocation costs that will be incurred prior to commitment of all financing necessary to complete the development, require a current site appraisal that demonstrates that the "as is" value of the property will fully secure the loan.

b. Loans for construction and all other costs require a current post-completion appraisal that demonstrates that the value of the completed project, taking into account all projected permanent financing for the project.

c. Existing Commission loans that are being subordinated pursuant to Section IV.A must be secured by the "as is" value of the property at the time of subordination.

4. Homebuyer Loans:

a. The value of the unit must secure fully the principal amount of a long-term loan to a buyer of an assisted ownership unit. When the buyer borrows funds to pay any portion of the buyer's reasonable and customary closing costs, the loan can be unsecured by the amount of the funds borrowed to pay those closing costs.

b. Option Agreements: In the same escrow in which an eligible homebuyer purchases a unit assisted with a Commission loan, the Commission will record an option agreement granting the Commission the first right to purchase the unit at resale for thirty (30) years. The option period may exceed 30 years if specified by the requirements of other federal, state, or local programs that assist the ownership project.

G. Loan Fees: The Commission may collect loan origination and modification fees as established by these Policies and as subsequently amended by the Sonoma County Board of Supervisors from time to time.

1. Developer Loans: Except as prohibited by the primary funding source, as amended by the Board, and/or as provided in Section VI. F. of these Policies, the current fees are:

a. The loan origination fee is 1% of the Commission's principal loan amount.

b. The fee for modifications, subordinations, assignments and assumptions - is the greater of (i) $500 or (ii) 0.5% of the then outstanding balance of the loan principal plus accrued interest calculated as of the date on which the application for change is submitted to Commission, to a maximum of $2,500.

2. Homeownership Loans:

a. Initial Sale Administrative Fee. Upon close of escrow of the sale of an affordable homeownership unit to the initial buyer, the Commission shall receive an administrative fee equal to 1.0% of the Commission's principal loan amount(s).

b. Resale Administrative Fee. When the Commission, its agent or assignee exercises the Commission's option to purchase an affordable homeownership unit and completes the purchase, the seller shall pay the Commission an administrative fee equal to 3% of the Fair Market Value of the property.

H. Use of Funds: Funds shall only be used in accordance with the approved regulations, policies, and guidelines for each specific funding source.

I. Loan Approval: Commission staff shall exercise sound underwriting practices in all loan evaluations.

1. In all instances, the Commission's underwriting standards will be employed in a consistent, equitable manner. The Commission will at all times utilize sound judgment in making loans to ensure that the public funds are adequately protected. The Commission's underwriting standards will normally follow private lending practices but may in some cases be more lenient if in doing so, public policy objectives will be achieved.

2. Loan applications shall be subject to normal commercial underwriting criteria by the Commission. Such criteria may include, but are not limited

to: credit reports, risk analyses, appraisals, title reports, cash-flow analyses, review of loan documentation from other project lenders, etc.

J. Discretion of Commission Staff: It shall be within the purview of the Commission Executive Director, or designee, to disapprove any loan application at any stage of processing through any formal or informal action which is consistent with sound underwriting practices and fair housing lending procedures.

K. Insurance/Property Taxes: Borrower shall maintain adequate hazard, liability, and automobile insurance, as required by County policy. Property Taxes and all assessments must be paid current throughout the life of the loan.

L. Environmental Assessment and Clearance: All projects must complete the appropriate level(s) of state and/or federal environmental review before funds may be released. If federal funds are involved in the project through a Commission loan or from some other source, no construction activities may take place after application submittal and prior to the completion of the federal environmental clearance process and associated public notification requirements.

M. Prevailing Wages and Related:

1. Federal: Where the source of Commission loan proceeds is from a federal government source, the project must comply with the requirements of the Secretary of Labor in accordance with the Davis-Bacon and Related Acts as amended, the provisions of Contract Work Hours and Safety Standards Act, and the Copeland "Anti-Kickback" Act (40 USC 276a-276a-5; 40 USC 327 and 40 USC 276c). The project shall also comply with the regulations of the Department of Labor, under 29 CFR Parts 1, 3, 5 and 7 governing the payment of wages and ratio of apprentices to journey workers.

2. State: For all projects, regardless of funding source, project sponsor shall adhere to all State of California laws and regulations regarding payment of prevailing wages, as applicable, and shall certify to the Commission, in writing, said compliance.

N. Relocation Requirements: Borrowers must agree to comply with all applicable federal, state, and local relocation laws and regulations, as applicable.

O. Affordability and Use Restrictions: All projects receiving Commission loans are subject to the affordability and/or facility or land use restrictions as required by the funding source or local policy. An Affordable Housing Agreement or Regulatory Covenant will be recorded against the assisted property restricting the continued occupancy or use of the property per the laws and regulations of the particular funding source and approved local policy, and shall run with the land.

P. Financial Feasibility: The project must demonstrate that due to market location, prevailing economic conditions, the proposed use, or property operating cost, that the development would be economically infeasible but for some degree of public financial assistance. The Commission may provide assistance to projects in the *least amount* required to create financial feasibility.

Q. Leverage Objective: Project sponsors shall demonstrate efforts to effectively leverage the use of public and private funds for the proposed project by identifying other available private and public financing programs and designing the project to qualify for those sources of assistance.

R. Contingency Requirements: Proposed new construction projects must demonstrate that a minimum soft cost contingency of 3% and a hard cost contingency of 5% are included by providing the Commission a Development Budget including a Sources and Uses Table. For facility or housing rehabilitation or renovation loans, or for projects with an unusual degree of risk or uncertainty, a minimum soft cost contingency of 5% and a hard cost contingency of 10% must be included in the Development Budget. The amount of the required contingency budget may be higher as reasonably established by the Commission Executive Director.

S. Conditions to Enter into Funding Agreements, to Convey Loan Documents to Escrow, to Permit Recordation of Documents, and to Release Loan Funds:

1. Conditions to Enter into Funding Agreements: Before Commission staff can offer a Funding Agreement to an applicant, the applicant must provide Commission with documentary evidence that the following conditions have been met:

    a. The applicant has site control through the projected acquisition date or start date of the project.

    b. Whenever required by funding source policies or regulations, the project has received all required environmental clearance.

    c. For HOME Developer Agreements, the applicant must meet all requirements in the HOME Final Rule [24 CFR Part 92, Section 92.504(c)(3)].

    d. The applicant has satisfied any additional conditions attached to loan approval by the Board of Supervisors.

2. Conditions to Convey Loan Documents to Escrow: The Commission may submit loan documents to escrow only after receiving and approving the following:

    a. Acceptable current appraisal demonstrating that the Commission loan will be fully secured as required under Section III.F.

b. Proof of current property tax payments.

c. Proof of insurance meeting Commission insurance requirements.

d. Proof of required environmental clearance and compliance, as applicable.

e. For loans to pay for site acquisition and any predevelopment, demolition, or relocation costs that will be incurred prior to commitment of all financing necessary to complete the development, written commitment of all funds necessary to complete the acquisition.

f. For loans to pay for site improvements, development soft costs, construction, and other such purposes, written commitment of all construction and permanent financing necessary to complete development.

g. For loans to pay for site improvements, development soft costs, construction, and other such purposes, documentation of all required land use approvals.

h. Proof of compliance with any other loan conditions.

3. Conditions to Permit Recordation of Documents: The Commission may authorize the recordation of its documents and the close of escrow only after receiving and approving the following:

a. Execution of the Commission's escrow instructions by the Escrow Officer.

b. Title insurance meeting Commission standards.

c. Original, certified or conformed copies of executed Commission loan documents, including but not limited to Promissory Notes, Deeds of Trust, Grant Deeds, Affordable Housing Agreements and other required covenants.

d. Certification by the Title or Escrow Officer that the documents from all other parties to the transaction have been executed and will be recorded as appropriate.

4. Conditions to Release Loan Funds: The Commission may disburse loan funds through escrow, or after close of escrow, only upon receipt of the additional following items, as applicable:

a. All of the items listed above in Section III S. 1 and 2.

b. Proof of compliance with prevailing wage requirements, as applicable.

IV. LOAN ADMINISTRATION

A. Subordination: The Commission's Executive Director is authorized to subordinate Commission loans and options, with County Counsel review and approval as to form, provided that the loan or the option remains in a secure position as required by Section III F. and as demonstrated by appraisal or by other means satisfactory to Commission.

1. Developer Loans: The Commission will accept a subordinate position to a new senior mortgage only if the ongoing public purpose of the development is protected and the transaction will not adversely affect the security of the Commission's loan in any way.

2. Homeownership Loans: The Commission will accept a subordinate position to a new senior mortgage if all of the following conditions are met:

a. The owner will not take cash out of the transaction. On a case by case basis, the Executive Director may approve a cash out transaction for home improvements if no other loan from any funding source secured against the property expressly prohibits a cash out refinance. The request will be considered if funds are used to correct health, safety, and code problems, or to preserve or enhance the value of the property. The owner must obtain written Commission approval for the scope of work and cost of the improvements before the Commission will consent to a subordination request. Failure to do so may make a property ineligible for consideration.

b. The refinancing objective is to obtain a new senior mortgage with a fixed interest rate lower than the interest rate of the current senior mortgage. A fixed interest rate higher than the current mortgage will be allowed only where "cash out" funds are required to correct health, safety, and code problems of the property, subject to prior Commission approval of the scope of work and cost of improvements.

c. The principal amount of the new senior mortgage will not exceed the sum of the original principal amount of the senior mortgages when the property was first purchased plus the owner's share of the closing costs to refinance the new senior mortgages. Provided that Commission's loan remains in a secure position, and with the Commission's prior written approval, the owner may borrow a

higher loan amount for the sole purpose of correcting health, safety, and code problems of the property.

d. Cash proceeds from a refinance transaction will be disbursed from escrow for payment to vendors on a draw basis, with written consent from the Commission.

B. Loan Modification, Assignment and Assumption: The Commission's Executive Director is authorized to modify, assign and approve assumption of Commission loans, in compliance with funding source regulations and with County Counsel review and approval as to form, provided that the loan remains in a secure position as required by Section III F. and as demonstrated by appraisal or by other means that is satisfactory to Commission, and provided that the ongoing public purpose of the development is protected.

C. Due at Maturity: Commission loans shall be due and payable in full at the time of loan maturity. See Section VI for guidelines specific to mature loans.

D. Prepayments: Borrower may make prepayments on existing loans to repay the outstanding balance, or any portion thereof, at any time without penalty. Payments will first be credited towards any outstanding fees or penalties due, then to the interest due, and then to reduce the original principal amount of the loan.

E. Conversion: Upon written approval of the Commission's Executive Director or her/his designee, a borrower may choose to have a deferred payment loan converted to a fully amortized loan for the remainder of the loan term or 15 years, whichever is less. The borrower will be required to make pre-determined monthly payments of principal and interest each month for the balance of the loan term. The Commission will use underwriting standards detailed in Section III.I. in determining whether to approve a borrower's request to convert a deferred-payment loan to an amortized loan.

F. Reporting Requirements: Reporting requirements shall be determined per the approved regulations, policies, and guidelines for each specific funding source.

G. Loan Consolidation: Where a project receives multiple Commission loan awards, the Commission may consolidate loans, at the discretion of the Executive Director or his/her designee.

H. Rental of Homeownership Units: The purchaser of a homeownership unit must reside in the unit as their principal residence and may not rent the unit in its entirety to another party.

1. Notwithstanding the owner occupancy requirement stated above, unless prohibited by the requirements of the funding source or local policy, the Commission Executive Director may, in his or her sole discretion, approve

temporary rental of an ownership unit in its entirety to another party under the following conditions.

a. The owner cannot reside in the unit for a specified period of time, after which they plan to return to the unit, because they are either receiving medical care in a residential facility, working at a temporary job assignment outside of Sonoma County, or attending an educational institution that is located outside of Sonoma County; or

b. The owner plans to sell and move from the unit permanently but, due to market or other conditions beyond the owner's control, they cannot sell the unit for an amount sufficient to repay all senior liens.

2. The owner of a homeownership unit may rent the unit in its entirety only upon receipt of express written approval of the Commission's Executive Director. Such approval will be for a term of up to one year, with additional one year terms available upon review and approval by the Commission's Executive Director, in his or her sole discretion.

3. A homeownership unit that is rented in its entirety pursuant to the terms of this section shall be rented to low-income households (at or below 80% of area median income) at rent levels that are considered affordable to households with incomes at 60% of area median income. The owner must have Commission staff review proposed rental applications and rental agreements to ensure the rent does not exceed permitted rent levels and to approve the income eligibility of each proposed renter household.

4. Failure to reoccupy the unit at the expiration of the term of approval, or failure to comply with the affordability terms of this section, shall constitute a default under the Commission's Deed of Trust and/or Option.

I. Compliance Monitoring: If a Commission-assisted development is subject to monitoring by another agency, such as the California Department of Housing and Community Development, the California Tax Credit Allocation Committee, the California Housing Finance Agency, the U.S. Department of Housing and Urban Development, and other federal, state or local public agencies, and the other agency's affordability requirements are the same or more restrictive than the Commission's affordability requirements, the borrower may be able to reduce Commission monitoring fees. Annually on or before June 1st, during the term of the affordability period, the borrower will submit evidence of the other agency's affordability requirements and monitoring of the development's compliance with those requirements. The submitted documentation must be sufficiently detailed for the Commission to confirm whether the other agency's requirements for the development or units are in compliance with the Commission's affordability requirements.

For all Commission units not subject to the same or more restrictive requirements, or if evidence of another agency's monitoring is not submitted by the date due to the Commission or is not sufficient for the Commission to monitor compliance with the Commission's Program affordability requirements, the Commission shall charge the borrower an annual monitoring fee. The Commission has established an annual fee of $75 per monitored unit, or $100 per monitored emergency shelter, transitional housing, group home or other congregate facility, with said fees subject to periodic cost of living adjustments. Developer shall pay the fee to Commission on or before June 1st of each year of the term described in Section III. B. of these Loan Policies or otherwise set in specific loan financing source Funding Policies. The developer shall submit annual compliance reports and tenant rosters on forms that the Commission shall provide. The annual compliance report that the borrower submits to the Commission will include a tenant roster listing household size, income and rent for each tenant in a Commission-assisted unit. The Commission shall review reports for compliance with the Commission's Program requirements, shall require the developer to correct violations of those requirements, and may request additional documentation from the borrower, as the situation dictates.

The Commission may conduct periodic site visits to Commission-assisted developments. During the visits, Commission representatives may interview the resident manager, review a sample of the on-site tenant files, inspect a sample of the units of varying size and affordability, and tour the common areas and grounds of the development. The Commission will prepare a written report of each site visit.

V. COLLECTIONS

A. Amortized Loan Collections: The borrower shall make regular monthly payments directly to the loan-servicing agent as specified by the Commission. The Commission Executive Director shall have the authority to select an outside loan-servicing agent or to collect loan payments in-house.

B. Deferred-Payment Loan Collections: When due, the borrower shall make full repayment of the loan directly to the Commission.

C. Loan Defaults

1. If a borrower appears to be in default of one or more of the loan terms contained in the Promissory Note, Deed of Trust, or any other loan document, the Commission Executive Director shall consult with the Office of the Sonoma County Counsel.

2. Upon default in any loan terms, fraud or misrepresentation in any loan application, or transfer of the underlying real property or security interest without the written approval of the Commission, or for any other reason specified in the borrower's Promissory Note, the principal balance may be

accelerated and made immediately due and payable at any time without further notice.

3. If the Commission Executive Director determines that the borrower is in material default of one or more of the loan terms and is not reasonably likely to cure the default, the Commission Executive Director, with the advice of County Counsel, shall initiate foreclosure proceedings.

    a. The Commission may contract with a trust deed service company to carry out a Notice of Default and Sale on behalf of the Commission or may carry out the foreclosure process in-house.

    b. The Commission may disburse funds for all costs necessary to enforce its lien and complete the foreclosure sale process, including but not limited to: legal fees, trust deed service fees, past-due property taxes, utility charges, property hazard and liability insurance, needed maintenance and repair, and real estate agent fees.

    c. If the loan is reinstated, any collection or foreclosure expenses will be the responsibility of the owner as a condition of reinstatement, if permitted by the terms of the loan documents.

4. If permitted under the terms of the loan documents and California law, if trustee's sale proceeds minus the amount of any senior liens and the Commission's foreclosure costs are less than the amount of the outstanding loan balance, and the Commission's Executive Director concludes, after consultation with County Counsel, that there is a reasonable likelihood that the amount likely to be recovered will exceed litigation costs, the Commission shall seek a deficiency judgment for the difference.

VI. MATURE LOANS (Non-profit Agencies Only)

When an existing Commission loan is at or nearing maturity and a request for a loan term extension, restructuring, or forgiveness is received, the following guidelines shall dictate the Commission's response to such a request. Loan extensions, restructuring or forgiveness will only be approved if all the following criteria are met:

A. Loan Compliance and Property Status:

The borrower has demonstrated material compliance with conditions of the loan over the life of the loan and is in good status with the Commission and all other public entities with regards to the underlying financing and the use and operation of the property.

B. Condition of Property:

The subject property must be in good condition. If significant amounts of maintenance have been deferred, the loan extension, restructuring or forgiveness request will be denied.

C. Project Income and Financial Structure:

The borrower must reasonably demonstrate that projected operating income and reserves are sufficient to finance ongoing operating expenses, including debt service, and capital replacement and maintenance for the period of any proposed loan term extension.

D. Loan Security

The borrower must demonstrate through an appraisal or other means acceptable to Commission staff that the value of the property is adequate to continue to fully secure any extended-term Commission debt.

E. Loan Terms

1. Loans for Housing:

a. Existing deferred payment loans for housing projects shall be restructured as fully amortized loans unless the borrower presents compelling evidence that the borrower lacks adequate resources to service an amortized loan. In that case, an extended deferred-payment loan term may be approved. The Commission shall not forgive loans for permanent housing projects.

b. The annual interest rate for all restructured and extended loans shall be 3%. The maximum loan term extension is 15 years.

c. For existing deferred payment loans that are extended but restructured as fully amortized loans, the debt to be fully amortized is the principal as of the maturity date. The interest accrued, as of the maturity date, will also be repaid in equal installments over the term of the loan extension. That is, if the loan is extended for 180 months, the amount of accrued interest due at loan maturity will be divided by 180 and that amount will be paid monthly in addition to the amount derived from fully amortizing, at 3%, the loan principal amount at the time of loan maturity.

d. For loans that are extended as deferred payment loans, interest is accrued at 3% simple interest calculated upon the principal balance as of the date of maturity. The interest accrued up to the maturity date will be repayable upon the new maturity date of the extended loan.

~~d.~~e. For loans that are extended or restructured, if the Commission determines that the affordable housing project lacks resources to support debt service on an amortized loan, or if accrued interest will present a barrier to the preservation of affordable housing, accrued interest may be waived in part or in its entirety.

2. Loans for Public Facilities:

a. If all criteria detailed in this Section VI. A. through D. are met, the Commission shall forgive loans for public facilities such as, but not limited to, fire stations, transitional housing and emergency shelters for the homeless, teen centers, senior centers, and similar community facilities.

b. For loans made with CDBG funds: If the loan is forgiven, a subsequent deed restriction will be recorded against title to the property stipulating that the real property must be used to meet one of the national objectives in 24 CFR Part 570.208 until twenty five (25) years after expiration of the CDBG Subrecipient Agreement and that if the property is not used to meet one of the national objectives during this period, the borrower shall pay to the Commission an amount equal to the then-current fair market value of the property, less any portion of the value attributable to expenditures of non-CDBG funds for acquisition of, and improvements to, the property. The property owner shall also continue to abide by all other applicable CDBG regulations.

F. Loan Modification Fee

The borrower shall pay a loan modification fee for any mature loan that the Commission modifies through granting a loan term extension, refinancing or other modification of existing terms. The fee shall be equal to 0.5% of the sum of the outstanding loan principal and accrued interest calculated on the maturity date. Fee payment is required prior to recordation of any loan modification. Payment of the fee is also required if a loan is forgiven.

VII. ALTERNATIVE LOAN TERMS

Where the Commission's Executive Director determines, after consultation with County Counsel, that one or more federal, state and/or local financing programs available to a project will achieve results that are equivalent to, or more effective than, the affordability or other public purpose of the relevant Commission program, and that such financing programs are otherwise compatible with the Commission program and County and Commission policies and objectives, the Commission's Executive Director is authorized to modify Commission loan terms and policies to the degree necessary for the project to utilize those financing sources.

SONOMA COUNTY COMMUNITY DEVELOPMENT COMMISSION

LOAN EXTENSION AND MODIFICATION AGREEMENT
of
NONRECOURSE PROMISSORY NOTE
SECURED BY A DEED OF TRUST
AND
DATED DECEMBER 7, 1993

Santa Rosa, California
_____, 2018

Notwithstanding any provision to the contrary set forth in that certain Promissory Note dated December 7, 1993, and amended on December 18, 1995 in the original principal amount of One Hundred Twenty-Five Thousand dollars ($125,000), entered into by and between the Sonoma County Community Development Commission (the Commission) and
the Note is hereby modified as follows:

The second paragraph reference to the maturity date is replaced in its entirety by the following:

"The principal and interest shall be due and payable on the occurrence of the earlier of (1) July 31, 2028 or (2) a default by Maker on its obligations as set forth in the rider to the Deed of Trust"

Borrower requested the Commission waive all accrued interest through July 16, 2018 up to $92,290.97 to enable borrower to refinance and rehabilitate the property. In an effort to preserve existing affordable housing, the Commission has approved the request.

Said Promissory Note is secured by a Deed of Trust with rider and Assignment of Rents dated December 7, 1993 and re-recorded in the Sonoma County land records on September 29, 1994 as document number

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 15
(This Section for use by Clerk of the Board Only.)

To: Board of Supervisors

Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s): Auditor-Controller Treasurer-Tax Collector	
Staff Name and Phone Number:	**Supervisorial District(s):**
Levi Ehrlich 565-3289	4th & 5th

Title: Gold Ridge Resource Conservation District Fund Transfer

Recommended Actions:

Approval of the Resolution of the Board of Supervisors, County of Sonoma, State of California, authorizing the Auditor-Controller Treasurer-Tax Collector to establish a temporary fund transfer for Gold Ridge Resource Conservation District in an amount up to $600,000.

Executive Summary:

The Gold Ridge Resource Conservation District ("the District"), in conjunction with the Auditor-Controller Treasurer-Tax Collector, is requesting the Board to approve a temporary fund transfer in an amount not to exceed $600,000 in order to provide the District with sufficient cash to meet their cash flow needs and repay the current note held by the County Treasury.

Discussion:

The District was established in 1941 as one of the original resource conservation districts, and the first in Sonoma County. The District was established to ensure strong, productive, and viable agricultural endeavors in Western Sonoma County can continue by improving soil and water quality. Providing an economically and ecologically viable and healthy agricultural community.

To that end, the District has applied for and received several awards from federal, state and local sources for specific projects. The following is a brief summary of the major awards and amounts remaining to be billed:

Funding Agency	Grant/Contract Amount Remaining	Project
California Department of Conservation	$13,501	Department of Conservation Resource Conservation District Assistance

California Department of Fish & Wildlife	$1,067,474	Fisheries Restoration Grant Program, Green Valley Watershed Coho Migration Enhancement Project-Design, Atascadero Subwatershed Coho Habitat, Dempster Vineyard Dam Removal Project, Dutch Bill Creek (Alliance), and Iron Horse Vineyards Dam Removal Project
California Department of Food & Agriculture	$42,987	Climate Beneficial Vineyard Management
California Department of Transportation	$88,175	Cal Trans Gleason Beach
California Department of Water Resources	$258,301	North Coast Integrated Regional Water Management Plan Phase 5 and 6
California State Coastal Conservancy	$34,016	Lower Green Valley Coho Migration
California Water Resources Control Board	$351,609	Green Valley Creek Rural Water Conservation
Foundation	$28,682	LandSmart Program in West Sonoma County
National Fish & Wildlife Foundation	$57,383	Rainwater Catchment Project and Landowner Assist for Streamflow Enhancement
National Resource Conservation Science	$541,898	LandSmart plans for the National Resource Conservation Science Regional Conservation Partnership Program
Santa Rosa Plain Groundwater Sustainability Agency	$26,789	Santa Rosa Plain Groundwater Sustainability Interim Administration
Sonoma County Agricultural Preservation and Open Space District	$105,492	Sonoma County Agricultural Preservation and Open Space District Agreement for Services
Sonoma County Memorandum Of Understanding	$311,818	Ombudsman Services
Sonoma County Water Agency	$119,957	Groundwater Level Monitoring and Outreach Efforts, Alliance Redwoods Water Conservation Design, Russian River Cooperative 1617-156, and Green Valley Outreach and Mitigation
Trout Unlimited, Inc.	$120,969	Russian River Coho Water Resources Partnership Year 8 and Upper Green Valley Groundwater Monitoring Project
West Coast Watershed	$45,528	Monte Rio Community Outreach & Technical Assistance
TOTAL	$3,214,579	

The District must spend the funds prior to reimbursement from awarding agencies and does not have adequate cash to cover these upfront expenditures. By resolution, the District has requested a temporary fund transfer under Article XVI, Section 6 of the State Constitution. This fund transfer takes the form of a line of credit with a limit of $600,000 requested for FY 2018-19. The line of credit will be repaid by the last Monday in April of the current fiscal year. This line of credit is necessary to allow the District to maintain operations prior to reimbursements being received and represents a low risk to the County as the grants/contracts have already been awarded to the District.

The District currently has a note with the County Treasury in the amount of $600,000 that serves as bridge financing between April 2018 and August 2018. This note is due and payable on August 31, 2018. The District's cash balance in the County Treasury as of July 31, 2018 is $411,856. In addition, the District has a nominal amount in their Exchange Bank checking account. Accordingly, the District will need to use approximately $192,644 of the temporary fund transfer to pay off the balance of the current note held by the Treasury, including interest.

Your Board delegated authority to the Auditor-Controller Treasurer-Tax Collector to approve temporary fund transfers to agencies that can secure transfers wholly by revenue collected through the secured property tax system. The District does not receive sufficient property tax support to meet the current temporary fund transfer request. In FY 2017-18, the District received about $28,000 in property tax revenues; therefore, Board of Supervisors approval is required for a temporary fund transfer secured by revenue from outside sources.

In FY14-15, the District agreed to work with the Auditor-Controller Treasurer-Tax Collector to develop a plan that addressed their structural deficit with the aim of eliminating their annual deficit in FY14-15 and working down their accumulated deficit. This goal has been met, and the District anticipates FY18-19 revenues to exceed expenditures by approximately $4,544.

Prior Board Actions:

Last year the board approved a similar transfer of $650,000 on August 22, 2017, Resolution No. 17-0303

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Protect watersheds, public lands & open space systems and promote agricultural viability

Narrative Explanation of Fiscal Impacts:

The recommended temporary fund transfer has no significant financial impact. Rather than a physical transfer of cash to the District, this action provides authority for the District to operate with a deficit cash position up to the approved amount. To the extent the District's cash balance is negative, they will recognize negative interest earnings in the treasury pool.

☐ 4/5 Vote Required

Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Authorizing The Auditor-Controller Treasurer-Tax-Collector To Establish A Temporary Fund Transfer For Gold Ridge Resource Conservation District In An Amount Up To $600,000.

Whereas, the Gold Ridge Resource Conservation District (the District) has outstanding awards from State and Federal Grants, and contracts with various local agencies in the amount of $3,214,579 to complete several water projects that will protect and restore the watersheds within the District, and;

Whereas, the District must expend funds for approved projects and programs prior to reimbursement from the awarding agencies, and;

Whereas, the District does not have sufficient funds on hand to provide for the operation of the District during the 2018/2019 fiscal year, and;

Whereas, Article XVI, Section 6, of the State Constitution authorizes the temporary transfer of funds in the custody of the County Treasurer upon the approval of the Board of Supervisors, and;

Whereas, the District has anticipated grant revenues of $1,929,598 and total budgeted revenues of $2,621,443 for fiscal year 2018/2019;

Now, Therefore, Be It Resolved the Board of Supervisors of the County of Sonoma hereby authorizes the establishment of a temporary funds transfer to the District in the amount not to exceed $600,000.

Resolution No. 2018-08

Dated: July 19, 2018

RESOLUTION OF THE GOVERNING BOARD OF GOLD RIDGE RESOURCE CONSERVATION DISTRICT OF THE COUNTY OF SONOMA, STATE OF CALIFORNIA, REQUESTING FUND TRANSFER UNDER ARTICLE XVI, SECTION 6 OF THE STATE CONSTITUTION

RESOLVED by the Governing Board of the GOLD RIDGE RESOURCE CONSERVATION DISTRICT, a District of the County of Sonoma, State of California, that:

WHEREAS, this District does not have sufficient funds on hand to provide for the operation of the District during the 2018/19 fiscal year, and

WHEREAS, Article XVI, Section 6 of the State Constitution authorizes a temporary transfer of funds in the custody of the County Treasurer upon approval of the Board of Supervisors, and

WHEREAS, the revenues to said District for the current fiscal year, July 1, 2018 to June 30, 2019, are budgeted at $2,621,443

NOW, THEREFORE, IT IS DETERMINED AND ORDERED as follows:

1. That the Board of Supervisors of the County of Sonoma is hereby requested to authorize a temporary transfer to this District on an as-needed basis of not to exceed $600,000.00 during the 2018/19 fiscal year; said sum will not exceed 85% of the revenues to said District during said fiscal year.

2. For the convenience of the County Treasurer and County Auditor a schedule of monthly-anticipated cash flow is attached hereto.

3. That the County Treasurer of the County of Sonoma be requested to recommend, and the County Auditor of the County of Sonoma be requested to acknowledge said transfer.

4. That certified copies of this resolution be forwarded by the Clerk of this Board to the Board of Supervisors of the County of Sonoma, the County Auditor and County Treasurer of this County.

The foregoing resolution was introduced by Ann Cassidy,

who moved its adoption, seconded by Mel Sanchietti, and adopted on roll

call on July 19, 2018 by the following vote:

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 16
(This Section for use by Clerk of the Board Only.)

To:	The Board of Supervisors of Sonoma County
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Auditor-Controller-Treasurer-Tax Collector (ACTTC)
Staff Name and Phone Number:	Jonathan Kadlec 565-6124
Supervisorial District(s):	
Title:	2018 Defaulted Property Tax Sale

Recommended Actions:

Approve a resolution of the Sonoma County Board of Supervisors authorizing the ACTTC to conduct the sale of tax defaulted property at either a public auction on or after October 26, 2018 or a sealed bid sale on or after November 7, 2018.

Executive Summary:

In accordance with Revenue and Taxation Code Sections 3691 through 3694 and 3706, the Auditor-Controller Treasurer-Tax Collector (ACTTC) is required to sell at Public Auction properties that are delinquent five years or more on their secured property taxes. The ACTTC is expecting to auction approximately 32 properties this year, of which 16 are improved properties and 16 are unimproved (See Attachment 1 – Public Auction Parcels).

Additionally, the ACTTC is conducting a Sealed Bid sale of tax defaulted property. In accordance with Revenue and Taxation Code Section 3691, 3692, 3694, 3695 and 3706, the ACTTC is required to sell by Sealed Bid, those Tax Defaulted properties that are delinquent five years or more on their secured property tax and of limited value to the general public. Approval of the sale and fixing of the date, time and place must be authorized by the Board of Supervisors and the State Controller's office. The ACTTC is expecting to offer 62 parcels which are all believed to be unimproved (See Attachment 2 – Sealed Bid Parcels).

The Sealed Bid sale differs from the Public Auction sale because the Assessor has deemed these parcels as unusable by their size, location, or other conditions and the parcels can only be offered to eligible bidders.

Discussion:

In accordance with Revenue and Taxation Code Sections 3691 through 3694 and 3706, the Auditor-Controller Treasurer-Tax Collector (ACTTC) is required to sell at Public Auction properties that are

delinquent five years or more on their secured property taxes. The ACTTC is expecting to offer at Public Auction approximately 32 properties this year, of which 16 are improved properties and 16 are unimproved.

Additionally, the ACTTC is conducting a Sealed Bid sale of tax defaulted property. In accordance with Revenue and Taxation Code Section 3691, 3692, 3694, 3695 and 3706, the ACTTC is required to sell by Sealed Bid, those Tax Defaulted properties that are delinquent five years or more on their secured property tax and of limited value to the general public. Approval of the sale and fixing of the date, time and place must be authorized by the Board of Supervisors and the State Controller's office.

The Sealed Bid sale differs from the Public Auction sale because the Assessor has deemed these parcels as unusable by their size, location, or other conditions and the parcels can only be offered to eligible bidders.

For the Public Auction, assessees may avoid the sale of the tax defaulted properties by paying the full amount due and thereby redeeming the property. All redemption payments must by physically received in the office of the ACTTC before the close of business on the last business day before the date of commencement of the sale (Revenue and Taxation Code Section 3707 (b)). Upon receipt of a timely redemption, the property will be withdrawn from the sale. Notice will be given to all parties of interest and a sale list will be published in accordance with Section 3702 of the Revenue and Taxation Code.

Efforts made to inform property owners of delinquent property taxes and the potential auction of the property at tax sale include numerous written notifications to the assessee, publications in the local Press Democrat newspaper, certified notifications to the assesse and, in accordance with Revenue and Taxation Code Section 3704.7(a), a personal visit is made to the property to speak with the owner/occupant of the property. At this personal visit, the owner/occupant is given information regarding their right to redeem the property up to the close of business of the last business day prior to the sale, and their right to claim excess proceeds if the property is sold. If no person is located at the property, the notice is posted at the property and photographic evidence of delivery is obtained.

Approval of the sale must be provided by the Board of Supervisors under Revenue and Taxation Code Section 3694. Attachment 1 to this item provides a description of each property to be sold and the minimum price at which each property is proposed to be sold, as required by Revenue and Taxation Code Section 3698. The Board's approval will commence the process of Public Notification and establish the redemption dates for the current or last assessee of a property. The internet sale is set for on or after October 26, 2018

For the Sealed Bid sale, this approval will commence the process of Public Notification and will establish redemption dates for the current or last assessee. Notice will be given to all in accordance with Section 3702 of the California Revenue and Taxation Code.

The Sealed Bid minimum bids are set at a level to help maximize the success of the sale of the parcels. Parcels offered at Sealed Bid are typically unbuildable, low value parcels and it is in the best interest of the County to sell them at a price low enough to remove them from the delinquent tax roll. Many of the parcels had previously been over valued creating an artificially high base tax amount or have other

direct charges which may not be applicable. The minimum bids are below what is needed to fully pay the delinquent taxes and will result in a tax loss. Pursuant to California Revenue & Taxation Code Section 4703, the Tax Loss Reserve Fund (TLRF) is a mandated fund required to maintain a balance of 1% of ad valorem taxes (Teetered taxes) levied on the current tax roll and is held in trust for any potential tax losses resulting from Public Auction or Sealed bid sales. In the event of a tax loss, the TLRF is then used pay off the remaining balance of previously Teetered taxes after tax-defaulted sale proceeds are posted. Assuming that all the parcels sell at the listed minimum bids (see Attachment 2), the TLRF would be required to pay approximately $108,000 toward the defaulted tax amounts not captured by the sale of these parcels. If any of the parcels sell for more than the minimum amount shown, it will reduce the potential need for a TLRF contribution.

Pursuant to Revenue & Taxation Code Section 3691 properties eligible for either the public auction or the sealed bid sale may not include any property that was damaged by a State or Federally declared disaster. None of the properties listed were damaged by the October 2017 fires

Prior Board Actions:

8-16-16 Board approved Resolution authorizing sale of Tax Defaulted Property
7-29-14 Board approved Resolution authorizing sale of Tax Defaulted Property
6-12-12 Board approved Resolution authorizing sale of Tax Defaulted Property
6-8-10 Board approved Resolution authorizing sale of Tax Defaulted Property

Narrative Explanation of Fiscal Impacts:

The Tax Loss Reserve Fund is a mandated trust fund required to maintain a balance of 1% of all taxes and assessments levied on the tax roll (with some minor exceptions). Because this is a trust fund it is not a budgeted item and therefore there will be no budget impact.

County of Sonoma
State of California

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Authorizing The Sale Of Tax Defaulted Property At Public Auction On Or After October 26, 2018 And Also Authorizing The Sale Of Tax Defaulted Property By Sealed Bid On Or After November 7, 2018 Pursuant To Chapter 7 Of Part 6 Of Division 1 Of The California Revenue And Taxation Code.

Whereas, the County Auditor-Controller Treasurer-Tax Collector has requested approval to sell Tax Defaulted property which is subject to the power of sale at either a public auction or a sealed bid sale; and

Whereas, under Revenue and Taxation Code Section 3694, the Board of Supervisors of the County of Sonoma must approve the sale of Tax Defaulted property;

Now, Therefore, Be It Resolved that the Board of Supervisors of the County of Sonoma, State of California, hereby grants approval for the Auditor-Controller Treasurer-Tax Collector to sell at Public Auction on or after October 26, 2018 properties that are Tax Defaulted 5 or more years and are subject to the Tax Collector power to sell, in accordance with provisions of Chapter 7, of Part 6, of Division 1, of the California Revenue and Taxation Code, and also approves a sealed bid sale on or after November 7, 2018.

Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Board of Supervisors
Staff Name and Phone Number:	Supervisor Gore, 565-2241
Supervisorial District(s):	Fourth
Title:	Disbursement of Fiscal Year 2018-2019 Fourth District Community Investment Fund Grant Awards

Recommended Actions:

Approve Community Investment Fund grant awards and Authorize the County Administrator, or designee, to execute an agreement with the following non-profit entities for advertising and economic development efforts for FY 2018-2019: Cloverdale Arts Alliance –Friday Night Live on the Plaza, $2,000; Cloverdale Performing Arts-2018/2019 Season, $5,000; Courtney's Pumpkin Patch- 2018 Pumpkin Patch, $1,500; Kiwanis Club of Cloverdale-Oktoberfest, $750; Russian River Keeper- 32nd Annual Russian River Watershed Clean up, $1,000; Windsor Educational Foundation-Scarecrow Days on the Green, $1,500.

Executive Summary:

Community Non-Profit Grants for Local Events, Organizations, and Economic Development Grants of the Community Investment Fund Policy provides grant allocations to each Supervisor, to be distributed at the Supervisor's discretion. The Fourth District has reviewed the applications and wishes to recommend the following FY 2018-2019 grant awards:

1.) Cloverdale Arts Alliance for advertising and promotion of Friday Night Live on the Plaza; grant award of $2,000.
2.) Cloverdale Performing Arts for advertising and promotion of the 2017/2018 Season; grant award of $5,000.
3.) Courtney's Pumpkin Patch for the advertising and promotion of the pumpkin patch; grant award of $1,500.
4.) Kiwanis Club of Cloverdale for the advertising and promotion of Oktoberfest, $750.
5.) Russian River Keeper for the advertising and promotion of the 32nd Annual Russian River Watershed Clean up, $1,000.
6.) Windsor Educational Foundation for the advertising and promotion of Scarecrow Days on the Green, $1,500.

Discussion:

The Sonoma County Community Investment Fund grant program utilizes a portion of the Transient Occupancy Tax (TOT) to encourage tourism, economic development, and community engagement through a variety of grant award and funding avenues. The program provides various grants to community non-profits for advertising and economic development events and the county as a visitor destination with the goal of advancing economic growth through tourism. Additionally, the program provides grants to promote agricultural promotion as well as address impacts on safety due to tourism. The program provides funding to the Regional Parks Department as well as the Economic Development Department and a number of other county department activities, all with the focus of encouraging tourism and awareness of Sonoma County.

The Community Investment Fund Policy is divided into different categories. The Board established the Local Events, Organizations, and Economic Development category to assist small cultural, artistic, and countywide events and organizations as well as events occurring during the off peak tourism season (November 15 through April 15) with funding for advertising and economic development efforts that promote Sonoma County and encourage visitors to frequent the county throughout the entire year. Funding for these events and organizations is provided at the discretion of each Supervisorial District based on an overall allocation of $250,000 divided equally across each district. Events and organizations make requests throughout the year to the Supervisorial District in which their event/organization exists.

Funds will be distributed upon approval of these awards by the Board of Supervisors and execution of the Community Investment Fund grant agreement (contract) by the entity. The contracts will be executed by the County Administrator, or designee. The contracts will require the County seal on promotional materials produced using the grant award and will require submission to the County Administrator's Office of advertising and promotional activity receipts up to the total amount of the grant award.

Activities performed utilizing Community Investment Program grants provided to non-profits will be consistent with Government Code Section 26277.

Prior Board Actions:

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Grant funds allow non-profit partners to advertise and grow local events and encourage tourism thereby promoting economic development and growth.

8:31 A.M. CALL TO ORDER

Supervisors Present: David Rabbitt, Shirlee Zane, Lynda Hopkins

Supervisors Absent: Susan Gorin, James Gore

Staff Present: Sheryl Bratton, County Administrator and Bruce Goldstein, County Counsel

PLEDGE OF ALLEGIANCE

I. APPROVAL OF THE AGENDA (Items may be added or withdrawn from the agenda consistent with State law)

There was an agenda addendum adding item 28A to the closed session calendar:
28A. The Board of Supervisors will consider the following in closed session: Conference with Real Property Negotiators – Negotiator for the County: Caroline Judy, Director, General Services Department; Negotiator for the Potential Tenant: Lawrance Florin, Chief Executive Officer, Burbank Housing. Under Negotiation: Terms and conditions of possible lease of County-owned property at Aston and Hendley Streets, Santa Rosa, CA. (Government Code Section 54956.8.)

There was a late change made to the resolution attached to item 16, and that hard copies are available on the table at the back of the chambers.

Board Action: Approved as Amended
AYES: Rabbitt, Zane, Hopkins
ABSENT: Gorin, Gore

To:	Board of Supervisors
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	Board of Supervisors
Staff Name and Phone Number:	Supervisor David Rabbitt (707) 565-2241
Supervisorial District(s):	Second
Title:	Original Jurisdiction for Use Permit Modification– Roblar Road Rock Quarry – UPE16-0058

Recommended Actions:

Adopt a Resolution exercising original jurisdiction over the modification of the surface mining Use Permit application for the Roblar Road Rock Quarry located at 7175 Roblar Road Petaluma; APNs 027-080-010; PRMD File No. UPE16-0058.

Executive Summary:

The Use Permit application proposes modification of a use permit for a new rock quarry at a site is located on an approximately 72-acre parcel at 7601 Roblar Road, approximately five miles west of Cotati in southern Sonoma County, California (APN 027-080-009). Additional activities associated with quarry development would occur on an approximately 127-acre parcel (APN 027-080-010) that surrounds the quarry site. The project site is bounded on the north by Roblar Road and the County-owned, closed Roblar Landfill; on the west by Roblar Road; on the south by Ranch Tributary (a tributary to Americano Creek); and on the east by privately owned land. One December 14, 2014 the Board of Superviosrs certified the Final EIR for the Roblar Road Quarry and approved a 20-year Use Permit for the project. The applicant has filed an application to modify certain conditions of that granted permit.

Supervisor Rabbitt has requested that the Board of Supervisors take original jurisdiction pursuant to sections 26A-07-015 and 26-92-155 of the County Code. The request must be considered by the full Board at a public and noticed meeting. The Sonoma County Code states that a request to exercise original jurisdiction need not state the reasons for the request.

Prior Board Actions:

12/14/10: The Board of Supervisors certified the Final EIR for the Roblar Road Quarry and approved a 20-year Use Permit for the project.
04/04/2017: The Board of Supervisors authorized the Director of the Permit and Resource Management Department (Permit Sonoma) to execute an agreement with Environmental Science Associates (ESA) for

an amount not to exceed $272,073 for preparation of a subsequent CEQA document for the Roblar Road Quarry Project.

County of Sonoma
State of California

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Exercising Original Jurisdiction Over the Modification of the Surface Mining Use Permit For The Construction And Operation Of The Roblar Road Rock Quarry; Located At 7175 Robalr Road Petaluma ; APNs 027-080-010; PRMD FILE No. UPE16-0058;

Whereas, the Use Permit application proposes operation of a new rock quarry at a site is located on an approximately 72-acre parcel at 7601 Roblar Road, approximately five miles west of Cotati in southern Sonoma County, California (APN 027-080-009). Additional activities associated with quarry development would occur on an approximately 127-acre parcel (APN 027-080-010) that surrounds the quarry site. The project site is bounded on the north by Roblar Road and the County-owned, closed Roblar Landfill; on the west by Roblar Road; on the south by Ranch Tributary (a tributary to Americano Creek); and on the east by privately owned land;

Whereas, on December 14, 2014 the Board of Supervisors certified the Final EIR for the Roblar Road Quarry and approved a 20-year Use Permit for the project.

Whereas, the applicant has filed an application to amend the use permit, and Supervisor Rabbitt requests for the Board to exercise original jurisdiction over the amendment application, in accordance with Sonoma County Code Sections 26-92-155 and 26A-07-015. The request must be considered by the full Board at a public and noticed meeting. The Sonoma County Code states that a request to exercise original jurisdiction need not state the reasons for the request.

Now, Therefore, Be It Resolved that the Board of Supervisors hereby exercises original jurisdiction over the amendment application, UPE 16-0058.

Authorize the County Clerk-Recorder-Assessor to execute an agreement with Dominion Voting Systems Inc. to provide equipment, licensing, maintenance, and support services for the Democracy Suite version 5.2 voting system for the period August 7, 2018 through June 30, 2026 in an amount not to exceed $2,300,000.
B. Adopt a Resolution adjusting the FY 2018-2019 Budget increasing appropriations to the Clerk-Recorder-Assessor Department by $500,000 in order to purchase a modern voting system and accessory equipment needed for implementation.

Executive Summary:

The Registrar of Voters Office (ROV) issued a Request for Proposals (RFP) for a Modern Voting System on March 22, 2018. The RFP solicited proposals that would provide a comprehensive solution to replace current voting systems with new hardware, software, and election support services that include polling place equipment, ballot printing equipment, ballot tabulation equipment, project implementation and election support services, and ongoing license, warranty and maintenance for the term of the contract. Three proposals were submitted; Dominion Voting Systems Inc. was selected as the most responsive, complete solution based on criteria listed in the RFP. The County Clerk-Recorder-Assessor seeks authorization to execute an agreement with Dominion Voting Systems Inc. (Attachment A) so that preparation may proceed and implementation of the new voting system may occur in 2019.

To facilitate the purchase of a modern voting system and to initiate implementation in 2019, the County Clerk-Recorder-Assessor requests a budgetary adjustment of $500,000 to the Clerk-Recorder-Assessor Department's FY 2018-2019 budget to purchase and/or lease specified hardware, software, license and warranties, project implementation services, and support services including training, election preparation, and maintenance for the term of the contract. The budgetary adjustment will be used to finance Year 1 of the contract and for expenses incurred during the transition to adapt current infrastructure, operations, and supplies to accommodate the new voting system.

Discussion:

Since 1983, Sonoma County has used Mark-A-Vote, a paper-based, optical scan voting system. In 2006, the County supplemented Mark-A-Vote with one eSlate Disabled Access Unit (DAU) in each polling place for voters with disabilities in order to comply with the federal Help America Vote Act (HAVA). Mark-A-Vote is the County's primary voting system; at 35 years old, it is antiquated, no longer manufactured, and replacement parts are almost non-existent. There is only one known qualified (and semi-retired) technician to maintain the ballot counting hardware; software is no longer supported by manufacturers, and state law prohibits any changes to the system. Because only minimal DAU equipment was purchased in 2006, the DAU cannot be used as an alternative to Mark-A-Vote. In 2017, the following circumstances underscored that the ideal timing to replace the voting system was imminent: new systems had become certified (approved) for use in California; California's legislature and Governor appeared ready to provide money to counties to modernize their voting systems; there was time for voter outreach and education before the next major election year; and escalating costs, increasing complexity of elections, and impending mandates hastened the need for technologies that would not only facilitate compliance with the law but also greatly improve efficiencies. These factors compelled the County Clerk-Recorder-Assessor/Registrar of Voters to pursue replacing the voting system in 2019.

The Voting System Replacement Project began in late 2017, and quickly focused on two priorities: issue an RFP, and educate voters about the need to replace the voting systems. In March 2018, the Registrar of Voters Office launched a new voting system webpage, circulated flyers, and released an online Voting Systems Survey to gather voter feedback on their priorities for selecting a new system. On April 12, 2018, vendors were invited to participate in "Demo Day" and demonstrate their modern voting systems to local media and community stakeholders. Attendees included County Supervisors' staff, the County Administrator, Assistant County Counsel, City Clerks, members and guests of ROV's Voter Accessibility Advisory Committee, and representatives of local political parties. Voter feedback and preferences obtained from outreach efforts were incorporated into the RFP selection process.

On March 22, 2018, the Registrar of Voters Office issued a Request for Proposals (RFP) for a Modern Voting System. Three proposals were received by the deadline, May 3, 2018. Proposals were evaluated by a panel consisting of seven (7) primary members and one (1) alternate from the Clerk-Recorder-Assessor, Auditor-Controller-Treasurer-Tax Collector, and Information Systems Departments. The evaluation panel scored proposals based on 20 criteria: demonstrated ability to perform services described; experience, qualifications, expertise; quality of work as verified by references; costs relative to scope of services; demonstrated history of providing similar services; willingness to accept the County's contract terms; and locality of proposer. Election-specific criteria included: quality; conformance and responsiveness of proposal; hardware and software design, architecture and approach; quality and breadth of an Implementation Plan; customer support, warranty and maintenance; Secretary of State certification (i.e. approved for use in California); functionality; scope of services; security; accessibility; transparency; results reports; and adaptability.

The proposal submitted by Dominion Voting Systems Inc. for the Democracy Suite version 5.2 voting system was ranked highest based on the evaluation criteria listed in the RFP. California law requires local elections officials use a voting system certified by the California Secretary of State. Democracy Suite version 5.2 meets this requirement (certified October 16, 2017) as well as the County's basic requirements to utilize a paper-based system, central count tabulation, interoperability with the current

Election Information Management System, commercial off-the-shelf hardware, multiple-language formatting, multi-layered security features, and user-friendly voting machinery. Replacing the current voting systems with Democracy Suite 5.2 allows the Registrar of Voters Office to conduct elections using the most modern, secure technologies that also streamline processes, reduce operating costs, and eliminate risks associated with the current outdated, aging voting system that can no longer be maintained or supported. Voters will realize benefits that include continued use of paper ballots (preferred by 75% of Survey respondents), faster delivery to military/overseas voters, audit trails that increase transparency and security (ranked #1 priority by Survey respondents), user-friendly (ranked #4 priority by Survey respondents), updates throughout the canvass, and faster release of final results. The County also benefits from increased automation that eliminates time- and labor-intensive manual procedures, increased efficiency, decreased extra-help and overtime costs, decreased printing costs and waste, redundancy in vendor resources and support, and flexible rental options that avoid long-term costs of ownership.

The County Clerk-Recorder-Assessor is requesting the Board of Supervisors authorize the County Clerk-Recorder-Assessor to execute an agreement with Dominion Voting Systems Inc. to provide equipment, licensing, maintenance, and support services for the Democracy Suite version 5.2 voting system for the period August 7, 2018 through June 30, 2026 in an amount not to exceed $2,300,000. As indicated in the agreement pricing summary (Attachment A, Exhibit C), the value of the 8-year contract is $2,009,779.11. The contract has two major components:

1. A Managed Services component including costs for the initial purchase of equipment, vendor implementation services, licensing, and ongoing support in the amount of $1,558,994, with a projected tax amount of $113,332 paid in yearly installments over the eight year contract, and a credit for equipment of $6,000 taken in the first year.
2. Rental charges for polling place equipment for a total amount of $318,750 and projected tax of $24,703 over the 3 year agreement, with an option to renew for an additional 2 years. The County has the option to renew the rental in Years 4-5 for an additional $106,250.00 (plus tax) per year, increasing the contract Rental total to $531,250 with total associated taxes of $41,172.

If the County exercises the option to renew the rental in Years 4-5 for an additional $106,250.00 (plus tax) per year, the potential total cost over eight (8) years will be $2,238,747.85.

The County Clerk-Recorder-Assessor is also requesting the Board of Supervisors adopt a Resolution adjusting the FY 2018-2019 budget increasing appropriations to the Clerk-Recorder-Assessor Department by $500,000 from funds previously set aside in order to acquire a modern voting system and accessory equipment needed for implementation. The budgetary adjustment will finance Year 1 of the contract ($317,525.12); the remaining funds ($182,474.88) will be used during the transition to adapt current infrastructure and operations, and purchase new supplies to accommodate the new voting system (e.g. remodel or furnish the secure ballot counting room; upgrade electrical or telecommunications capacity; purchase new polling place supplies such as ballot boxes, security locks and seals, and signage; conduct voter outreach and create educational materials).

Funds for a new voting system have been set aside by the Board as follows:

FY 14-15 Supplementals	$	500,000
FY 15-16 Supplementals		1,133,511
FY 16-17 1st Quarter Consolidated Budget Adjustments		250,000
Interest Earned		55,367
Total Contributions and Interest	$	1,938,878

To date, $170,000 of these funds have been spent on salaries and benefits for the Special Projects Director position that is overseeing the acquisition and implementation of the new system. An additional $370,000 in salaries and benefits is estimated for fiscal years 2018-2019 and 2019-2020, leaving a balance of $1,398,878 to be used to finance the contract over the eight year term. In addition to funds set aside by the Board of Supervisors, the Clerk-Recorder-Assessor department will finance the contract with anticipated revenues from state matching funds made possible by AB 1824 and appropriated in the state's FY 18-19 budget. Soon, the Secretary of State will allocate $134M to counties by a formula yet to be announced; based on prior allocation methodology, reimbursement of 50% of the yearly external costs is expected for a total of $1,004,890.

Fiscal Year	Beginning Fund Balance	Projected State AB 1824 Revenue*	Contract	Implementation Costs	Projected End of Year Fund Balance
2017-18	1,938,878			170,000	1,768,878
2018-19	1,980,115	158,763	317,525	370,000	1,451,353
2019-20	1,451,353	161,763	323,525	370,000	919,590
2020-21	919,590	161,763	323,525		757,828
2021-22	757,828	104,520	209,041		653,307
2022-23	653,307	104,520	209,041		548,787
2023-24	548,787	104,520	209,041		444,267
2024-25	444,267	104,520	209,041		339,746
2025-26	339,746	104,520	209,041		235,226

* Formula for disbursement of AB 1824 Revenues pending, projections based on past allocation methodology

The County Clerk-Recorder-Assessor will conduct voter outreach to educate voters about the new voting system; this will be part of a comprehensive Project Implementation Plan once the contract is approved. The system may be used as early as the first established Election Day in 2019 (March 5) but no later than

November 5, 2019, when ROV will conduct governing board elections. The Registrar of Voters Office intends to evaluate implementation activities prior to and after first use, and will return to the Board in 2019 to provide a status report.

Prior Board Actions:

FY 2014-2015 Supplementals – the Board set aside $500,000 for voting system replacement.
FY 2015-2016 Supplementals – the Board set aside $1,133,511 for voting system replacement.
FY 2016-2017 1st Quarter Consolidated Budget Adjustment set aside $250,000 for voting system replacement.
8-22-17 Resolution 17-0304 adding 1.0 full time Special Projects Director to oversee the acquisition and implementation of a new voting system.

Strategic Plan Alignment Goal 3: Invest in the Future

Replacing the current voting systems with Democracy Suite 5.2 allows the Registrar of Voters Office to conduct elections using the most modern, secure technologies that also streamline processes, reduce operating costs, and eliminate risks associated with the current outdated, aging voting system that can no longer be maintained or supported.

Fiscal Summary

Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses		$323,526	$323,526
Additional Appropriation Requested	$500,000		
Total Expenditures	**$500,000**	**$323,526**	**$323,526**
Funding Sources			
General Fund/WA GF			
State/Federal			
Fees/Other			
Use of Fund Balance	$500,000	$323,526	$323,526
Contingencies			
Total Sources	**$500,000**	**$323,526**	**$323,526**

Narrative Explanation of Fiscal Impacts:

Additional appropriations are needed for license, support, and maintenance of the new voting system. Funds have been set aside by the Board for this purpose. The current balance in the voting system fund is $1,768,878 of which $500,000 is requested for a FY2018-2019 budget adjustment to begin Year 1 implementation. $370,000 will be used to fund salary and benefits for the Special Projects Director who is overseeing the acquisition and implementation of the new system. The balance of set aside funds ($1,398,878) will be used to cover costs over the eight (8) year term of the contract. In addition, anticipated revenues from the state will supplement the set aside funds; the Governor's budget includes

$134 million in one-to-one matching funds for counties to purchase new voting systems. The formula for how these funds will be allocated to counties should be available later this year. If the County's allocation of state matching funds is less than the projected 50% of expenses, the department will seek alternative funding sources to reduce any General Fund impact.

Staffing Impacts

Position Title (Payroll Classification)	**Monthly Salary Range** (A – I Step)	**Additions** (Number)	**Deletions** (Number)

Narrative Explanation of Staffing Impacts (If Required):

None.

AGREEMENT FOR PROFESSIONAL SERVICES

This agreement ("Agreement"), dated as of August 7, 2018 (“Effective Date”) is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Dominion Voting Systems, Inc. (hereinafter "Contractor").

R E C I T A L S

WHEREAS, Contractor represents that it is a duly qualified voting system company, experienced in the design, manufacture, installation, maintenance and support of voting systems and related services; and

WHEREAS, in the judgment of the Sonoma County Clerk-Recorder-Assessor, it is necessary and desirable to employ the services of Contractor for production, installation, maintenance and support of a voting system.

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

A G R E E M E N T

1. Scope of Services.

1.1 Contractor's Specified Services**.** Contractor shall perform the services described in Exhibit “A,” attached hereto and incorporated herein by this reference (hereinafter "Scope of Work"), and within the times or by the dates provided for in Exhibit “A” and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit “A”, the provisions in the body of this Agreement shall control.

1.2 Cooperation With County. Contractor shall cooperate with County and County staff in the performance of all work hereunder.

1.3 Performance Standard. Contractor shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Contractor's profession. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor’s work by County shall not operate as a waiver or release. If County determines that any of Contractor's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Contractor to meet with County to review the quality of the work and resolve matters of concern; (b) require Contractor to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.4 Assigned Personnel.

a. Contractor shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Contractor to perform work hereunder, Contractor shall remove such person or persons immediately upon receiving written notice from County.

b. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Contractor shall not remove, replace, substitute, or otherwise change any key personnel without mutual agreement of County and Contractor. Notwithstanding the foregoing, County may unilaterally require the immediate removal and replacement of any Contractor personnel assigned to this Agreement in the event that County receives a complaint of misconduct by such Contractor personnel—including, but not limited to, claims of sexual harassment, hostile work environment, discrimination, threats of violence—that requires County to conduct an investigation.

c. In the event that any of Contractor's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Contractor's control, Contractor shall be responsible for timely provision of adequately qualified replacements.

2. Payment. For all services and incidental costs required hereunder, Contractor shall be paid in accordance with the schedule set forth in Exhibit C, provided however, that total payments to Consultant shall not exceed $2,300,000.00, without the prior written approval of County.

Unless otherwise noted in this Agreement, payments shall be made within the normal course of County business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Contractor for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Contractor does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

If Contractor does not qualify, County requires that a completed and signed Form 587 be provided by the Contractor in order for payments to be made. If Contractor is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the Contractor

agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Contractor has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement. The term of this Agreement shall commence on August 7, 2018, and continue in full force and effect through and including June 30, 2026, unless terminated earlier in accordance with the provisions of Article 4 below.

4. Termination.

4.1 Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving 5 days written notice to Contractor.

4.2 Termination for Cause. Notwithstanding any other provision of this Agreement, should Contractor fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Contractor written notice of such termination, to the extent any such failure or violation remains uncured thirty (30) days after Contractor was first notified in writing of such failure or violation.

4.3 Delivery of Work Product and Final Payment Upon Termination.

In the event of termination, Contractor, within 14 days following the date of termination, shall deliver to County all reports, original drawings, graphics, plans, studies, and other data or documents, in whatever form or format, assembled or prepared by Contractor or Contractor's subcontractors, consultants, and other agents in connection with this Agreement and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.4 Payment Upon Termination. Upon termination of this Agreement by County, Contractor shall be entitled to receive as full payment for all services satisfactorily rendered and reimbursable expenses properly incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Contractor bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Contractor shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Section 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Contractor.

4.5 Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or Clerk-Recorder-Assessor Department Head, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification. To the fullest extent permitted by law, Contractor shall indemnify, defend, including with counsel reasonably acceptable to County, and hold harmless County, its governing Board, officers, directors, officials, employees, and authorized volunteers and agents (collectively "Indemnified Parties"), from and against any and all claims, demands, actions, losses, liabilities, damages, and all expenses and costs incidental thereto (collectively "Claims"), including cost of defense, settlement, arbitration, and reasonable attorneys' fees, resulting from injuries to or death of persons, damage to or destruction of property, or loss of use or reduction in value thereof, infringement of intellectual property rights, breach of confidentiality, unauthorized use or disclosure of data, breach of statutory or regulatory law, or other breach of its specifically defined obligations under this Agreement by Contractor, its employees, Contractor's subcontractors at any tier, or any other party for which Contractor is legally liable under law, arising out of, pertaining to, or relating to the negligence, recklessness or willful misconduct of Contractor, excepting only such Claims to the extent a court of competent jurisdiction determines were caused by the negligence of an Indemnified Party. Contractor shall not be liable for Claims caused by the sole negligence or willful misconduct of an Indemnified Party. Notwithstanding the foregoing, in no event shall Contractor's liability under this Section 5 exceed the total compensation that Contractor is entitled to receive under this Agreement, as specified in Section 2 herein. Contractor acknowledges that the foregoing cap on liability applies only to Contractor's out-of-pocket liability and does not limit the amount of Claims covered by the insurance maintained by Contractor pursuant to Section 6 herein. Contractor further expressly acknowledges and agrees that the foregoing cap on liability shall not apply to any Claims caused by Contractor's gross negligence or willful misconduct or to any Claims that result in bodily injury or death.

6. Insurance. With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in Exhibit D, which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work. The execution of this Agreement shall constitute Contractor's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Contractor's performance of this Agreement shall be extended by a number of days equal to the number of days Contractor has been delayed.

8. Extra or Changed Work. Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Changes which do not exceed the delegated signature authority of the Department may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors or Purchasing Agent must authorize all other extra or changed work which exceeds the delegated signature authority of the Department Head. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Contractor to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Contractor shall be entitled to no compensation whatsoever for the performance of

such work. Contractor further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Contractor.

9.1 Standard of Care. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release.

9.2 Status of Contractor. The parties intend that Contractor, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Contractor is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Contractor expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3 No Suspension or Debarment. Contractor warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Contractor also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration. If the Contractor becomes debarred, contractor has the obligation to inform the County.

9.4 Taxes. Contractor agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Contractor agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Contractor's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Contractor agrees to furnish County with proof of payment of taxes on these earnings.

9.5 Records Maintenance. Contractor shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Contractor shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6 Conflict of Interest. Contractor covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under

state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Contractor further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Contractor shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Contractor's or such other person's financial interests.

9.7 Statutory Compliance/Living Wage Ordinance. Contractor agrees to comply with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Contractor expressly acknowledges and agrees that this Agreement may be subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.8 Nondiscrimination. Without limiting any other provision hereunder, Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis, including without limitation, the County's Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.9 AIDS Discrimination. Contractor agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.10 Assignment of Rights. Contractor assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Contractor in connection with this Agreement. Contractor agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Contractor's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County. Contractor shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.11 Ownership and Disclosure of Work Product. Ownership and use of all software, reports, ballots, data, or other documents produced pursuant to or with the software described in this Agreement shall be governed by the terms set forth in the software license attached hereto as Exhibit B.

9.12 Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Contractor.

10. Demand for Assurance. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation. Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice, Submitting Bills and Making Payments. All notices, bills, and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail or courier service. Notices, bills, and payments shall be addressed as follows:

TO: COUNTY:	Clerk-Recorder-Assessor Attn: Accounting 585 Fiscal Drive, Room 104 Santa Rosa, CA 95403
TO: CONTRACTOR:	Dominion Voting Systems, Inc. Attn: Contracts Administrator 1201 18th St., Suite 210 Denver, CO 80202

When a notice, bill or payment is given by a generally recognized overnight courier service, the notice, bill or payment shall be deemed received on the next business day. When a copy of a notice, bill or payment is sent by facsimile or email, the notice, bill or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills and payments shall be effective upon receipt by the

recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1 No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2 Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Contractor and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Contractor and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3 Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4 No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5 Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6 Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7 Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8 Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9 Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

1. Introduction

In this managed services agreement, Contractor support will be provided throughout the life of the contract. This Scope of Work ("SOW") describes activities and products related to the initial phases of the project as well as ongoing support.

2. Project Management

2.1. Phase I

"Phase I" will occur during the full system implementation of the Dominion Voting system for the first scheduled election not later than the 2019 November Election. A Dominion Project Manager will be appointed and dedicated to this project and will be on-site as needed to support the county as work-flow dictates and available commencing when the contract is signed through the completion of Phase I. Dominion's Project Manager will be responsible for arranging all meetings, visits and consultations between the Parties and for all administrative matters such as invoices, payments and amendments. The Dominion Project Manager shall have the requisite skills and experience to provide the services required for the implementation including without limitation: complete knowledge of election technology, elections support, project management, excellent verbal and written communications skills, strong organizational skills to include multi-tasking and time management skills, and ability to manage detail-oriented projects with fixed deadlines. Contractor shall make commercially reasonable efforts to provide a Project Manager familiar with the election operations of Sonoma County and the election rules and regulation of the State of California.

The Dominion Project Manager shall communicate with County as to the status of information, milestones, procedures and progress on the tasks as set out in this Agreement and to advise County forthwith upon the occurrence of any event requiring a material change in such plans, and request Customer's written consent to any such material change. In addition, the following Project management resources will be dedicated on an as need basis through Phase I.

2.1.1. Product Specialist. Shall provide technical support through Phase I. This resource is responsible for the installation, operation, repair, and maintenance of all Dominion Voting Systems hardware and software, scheduling and supervising resources for all hardware and software related matters, providing election support services and customer training, and interfacing directly with customers, co-workers and election officials.

2.1.2. Implementation Manager. Shall work with the County's elections staff, as well as County's IT staff, to install the certified EMS and adjudication

system hardware. As part of this role, the systems configuration manager will evaluate the current environment at the County and provide recommendations for any changes required for configuration.

2.1.3. Training and Documentation Manager. Will coordinate with Contractor and County project managers to develop and customize all training documentation and supervise all training related activity.

2.1.4. Election Programmers. Responsible for all aspects of election event definition, including without limitation to following components: Importing of data files into the EMS system, defining election project parameters and assigning templates, assigning tabulators (ICC, tablet, mobile ballot printing), defining ballot structures, creating proofing ballot, creating official ballots, and creating election files and the security keys for the ImageCast®.

2.1.5. Ballot Printer Certification Manager. Shall conduct activities required to qualify County's certified printer as described in section six of this SOW.

2.1.6. Other. Additional Acceptance and Readiness Testing, Pre-Logic and Accuracy, Early and Election Day Voting Personnel, and Post-Election activity (recount and canvass) as further described in this SOW.

County shall appoint a project manager ("County Project Manager"), who shall be responsible for review, analysis and acceptance of the Dominion System and the coordination of County personnel, equipment, and facilities. The County Project Manager shall be empowered to make decisions on behalf of County with respect to this SOW including the allocation of required resources. The County Project Manager shall also have direct access to the Registrar of Voters' top management at all times for purposes of problem resolution.

The County Project Manager shall have the requisite skills and experience to provide the services required for the implementation including without limitation: elections management, project management, excellent verbal and written communications skills, strong organizational skills to include multi-tasking and time management skills, and ability to manage detail-oriented projects with fixed deadlines.

Along with the County Project Manager, Dominion's Project Manager (collectively the "Project Management Team") will assist in coordinating County's work including planning, communication and direction of the systems implementation. Dominion's Project Manager shall be responsible for providing the direction, expertise and leadership for project planning of all tasks required for successful implementation of the voting systems project through a single County

Project Manager. The completion of these tasks shall be cooperatively managed by Dominion's Project Manager and County Project Manager.

County Project Manager and Dominion's Project Manager will meet weekly, and include other team members as appropriate. The meeting will be a forum to discuss and manage the project's progress, which will include tracking milestones (completed or missed), resources expended, evaluating the status of issues and identifying any actions needed to meet deadlines. The County Project Manager will document items discussed and distribute the minutes to designated team members.

Dominion's Project Manager is the key project person, identifying the level and allocation of specific resources for the Project. County reserves the right to request a change in Contractor's representation if, at County's sole discretion, assigned personnel are not adequately satisfying County requirements. Dominion's Project Manager will be the primary contact for all project change requests.

2.2. Phase II

Phase II of Project Management will continue through the remainder of the Agreement. After the completion of Phase I, a Customer Relations Manager will work directly with County (both on and off site), but will have other responsibilities outside of the Agreement. In addition, account management and technical phone support shall be available through the contract term at no additional costs.

In the event County decides it requires additional election programming, product specialist, or other support beyond what is described in phase 1 of this section and Exhibit A, County shall have the option to purchase additional services at the prices identified in Exhibit C. Contractor reserves the right to amend Exhibit C throughout the agreement term, however, any increase in pricing will be based on changes in the Consumer Price Index. Services described in Exhibit C (or modified equivalent services) shall be available throughout the Agreement term.

3. Implementation Plan and Schedule

Dominion's Project Manager and County Project Manager shall provide an Implementation Plan specifying the details for all tasks necessary to successfully complete the project, working cooperatively to set hard and soft deadlines. Each task identified will include a start and end date and the responsible parties involved. The detailed Implementation Plan will include, but will not be limited to, product delivery with implementation; Acceptance Testing Plan; System Readiness Plan; a Training Plan specifying training dates and curriculum to parties requiring training; as well as a

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

Communication Plan. Please see a draft Implementation Plan attached hereto as Exhibit A-1.

The draft Implementation Plan developed for this Agreement represents the sample based upon initial discussions with County. Upon execution of the Agreement, the Parties shall develop an initial implementation plan including a training and delivery schedule. The Parties agree that during the course of the implementation, changes to the project schedule may be required. Any changes to the project schedule must be mutually agreed to by both Parties and such agreement shall not be unreasonably withheld.

During Phase I, the Dominion Project Manager is on-site and available to provide an immediate response to general project related inquiries. For technical matters, the following table represents the response times to be expected:

Phase	Type of Support	Initial Response	Estimation Response	Resolution
Outside an election period	On-site, telephone, and video.	Up to one business day.	Up to 2 business days	Up to 10 to 15 business days.
During creation of the election and ballots	On-site and telephone.	Up to next business day.	Up to next business day	Up to 2 business days.
From mailing of ballots to election day (45 days preceding election day)	On-site and telephone.	Up to 12 hours.	Up to next business day	Up to 2 business days.
On election day	On-site	Immediate	60 minutes	Within 1 hour.
From election day until election is certified	If required, on-site.	Up to 6 hours.	Up to next business day	Up to 1 business day.
During a recount	If required, on-site.	Up to 6 hours.	Up to next business day	Up to 1 business day.

4. System Transition Review

The initial transition meetings between Contractor and County will review current County processes and provide information to County on the overall system, related configurations, ballots, reporting, etc. Transition meetings will include, but not be limited to the following:

- Ballot Templates. Used to create specific ballot designs for different election content including headers, ballot target positioning, contest and candidate width and height, County logos, instructional information, etc.
- Reporting. Includes a full review of County's existing reporting requirements, as well as output to provide a comparison to the new system's analogous reporting functionality.

- California Use Procedures. Review of the California Use Procedures for the Dominion System including Contractor's summary documentation.
- Configurable System Settings. The Dominion system has a number of optional system settings which are prescribed in the California Use Procedures. This portion will describe each setting and the effects of the current configuration on the election.
- Ambiguous Zone Thresholds. When a ballot is fed into an ICC, a complete duplex image is created and then analyzed for tabulation by evaluating the pixel count of a voter mark. The pixel count of each mark is compared with two thresholds (which are defined in the California Use Procedures) to determine what constitutes a vote. If a mark falls above the upper threshold, it's a valid vote. If a mark falls below the lower threshold, it will not be counted as a vote. However, if a mark falls between the two thresholds, this is known as the ambiguous zone.
- Ballot Printing. Shall include a review of the requirements of ballot certification in California, provide a list of all current certified printers and discuss the importance of paper sourcing as well as other variables.
- EIMS Integration. Shall include a description of the Dominion Election Data Translator and it's compatibility with County's current DFM EIMS "Dominion" export. In addition, this discussion will include some of the items which will need to be modified as part of the import process.

5. Acceptance and Readiness Testing

Pursuant to the California Use Procedures (in effect at the time of Acceptance Testing) for the Dominion Democracy Suite® System (http://votingsystems.cdn.sos.ca.gov/dominion-voting/dem-suite-use-procedures.pdf), County is required to conduct both Acceptance Testing and System Readiness Testing. The process outlined in Chapters 3 and 4 California Use Procedures identify the tests necessary to demonstrate compliance with the requirements of the California State Voting Systems Certification and County requirements. The Parties may augment, to the extent permitted by state law, the testing procedures, but County must, at minimum, complete the steps in the California Use Procedures. In the event that there is a conflict between the proposed new testing procedures and the California Use Procedures, the California Use Procedures shall govern. In support of Acceptance and System Readiness Testing Dominion shall provide to County:

- The Acceptance Testing and System Readiness Testing election databases.
- All completed Ballot pdfs (County shall be responsible for printing ballots through their certified ballot printer).
- On-site technical support.

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

- All required manuals and documentation.
- All required forms and Testing Log Sheets.

5.1. General Acceptance Testing Terms

Dominion Software or Dominion Hardware. Throughout the term of the Agreement, after delivery of Dominion Software or Dominion Hardware, County will conduct acceptance testing of such components. Such acceptance testing shall occur at a time mutually agreed upon by the Parties, but no later than thirty (30) business days after installation.

Rejection. If defects are uncovered during testing that result in an unsuccessful test, the affected system component(s) will be rejected and County will send a notice to Contractor indicating the issues and reason for rejection. Upon receipt of notice, Contractor will have fifteen (15) business days to repair or replace the affected system component(s).

5.2. Dominion ICX BMD Acceptance Testing

Contractor shall assist County in creating an Acceptance Testing Log Sheet, to be used as a control sheet showing which ICX machines have been received, tested and accepted. This form will be completed individually for each unit, noting any physical damage, and shall contain the results of each test conducted. Any external physical damage shall be reported on the Bill of Lading, provided by the shipper. In the event that County has any shipping problems or discrepancies, County will make the driver aware of any issues, note on the Bill of Lading along with the name and number of the shipper's agent for claim resolution.

County shall provide Contractor with records that identify units that did not successfully pass acceptance testing and will return a copy of any test form for units that failed for any reason.

County will inspect all cartons or packaging for external damage, inspect the outside of the machine and casework for damage and check the Serial Number of the ICX against the Bill of Lading and record on County's receiving form.

The following Acceptance Testing steps are prescribed in the California Use Procedures:

1. Unpack the ImageCast X tabulator unit and place it on an assembled table.
2. Unpack the BMD printer and place on an assembled table next to the ImageCast X.
3. Insert the USB stick with test election data provided with the ImageCast X tabulator unit.

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

4. Connect the ATI (Audio Tactile Interface) to the ICX using the USB to RJ-45 cable provided.
5. Plug the power supply into a suitable 120 volt AC power source, and connect the power supply to the ImageCast X device.
6. Open the bottom security door and press the power button. Hold the power button until it lights up green.
7. The ImageCast X will begin the power-up sequence, and the LCD will display a number of messages at each stage of the sequence.
8. If ICX app is not opened by default after a power up, swipe to enter into the menu and open ICX application. The ICX application will prompt for the Smart Card to be applied to the Smart Card Reader.
9. Insert the Tech Smart Card into the Smart Card Reader. Wait for the login screen to appear.
10. On the Authorization screen, enter a valid PIN in order to log in. In the event that the PIN is incorrect, the screen will clear the text and provide a new opportunity to enter the correct PIN. After 8 attempts, the Smart Card will lock and you will have to obtain a new Smart Card.
11. The user is presented with Technical Administration screen.
12. Once logged in, confirm or modify the date and time.
13. Plug in the USB stick with election data into an available USB port.
14. Select the load settings button on Technical Administration page to get the prompt with the election data on the USB.
15. Copy the election files (.dat) onto the device. Wait until the election files are copied.
16. Remove the USB stick with election data.
17. Navigate to "Android Settings."
18. Select "Battery."
19. Check that the battery is 100% Full and that it is not discharging (meaning the unit is running on AC power).
20. Remove the Tech Smart Card.
21. Insert the Poll Worker Smart Card into the Smart Card Reader. Wait for the login screen appears on the touchscreen.
22. On the Authorization screen, enter a valid PIN in order to log in. In the event that the PIN is incorrect, the screen will clear the text and provide a new opportunity to enter the correct PIN. After 8 attempts, the Smart Card will lock and you will have to obtain a new Smart Card.
23. Wait for the election files to decrypt.
24. Make sure the required tabulator is present in the tabulator list.

25. In addition to the steps described above, the ICX unit has multiple procedures available for polling place verification:
    a. The election's identification data available on-screen.
        i. The information is available as part of the "Ballot info" screen shown to every voter after successful ballot activation.
    b. Identification of the unit available on-screen only.
        i. Log in as Technician - See steps 8 and 9 in ImageCast X Acceptance Testing.
        ii. From "Settings" section, select the button "Hardware Details."
        iii. ICX device details are shown as part of "ICX Device" section.
        iv. To exit the menu, select "OK" button.
        v. Remove the Technician card.

5.3. Dominion ICC Acceptance Testing

Contractor shall assist County in creating an Acceptance Testing Log Sheet, to be used as a control sheet showing which ICC system have been received, tested and accepted. Acceptance testing for the ICC scanner is simply a matter of confirming that the physical and electromechanical components are functioning properly and have not been damaged during transport, and that certain internal parameters have been programmed correctly. Performing this test will ensure the integrity of the installed firmware within the voting machines.

The following Acceptance Testing steps are prescribed in the California Use Procedures:

1. Unpack the ICC scanner and place it on the desired workstation surface.
2. Attach the cabling from the scanner to the PC workstation.
3. Plug the scanner and the PC workstation into a suitable 120V AC power source.
4. Power up the scanner and PC workstation.
5. Insert the memory card into the memory card port.
6. Log onto the computer.
7. Run the ICC application from the computer.
8. Insert the iButton security key and enter the passcode. The application will verify the iButton security key against the election files in the memory card port. Errors at this point indicate that the iButton security key has not been programmed correctly, and a replacement key may need to be ordered. Otherwise, the application will commence internal diagnostics testing before going into User's Mode.

9. If the ICC profile has been provided, and the settings match, then there is no need to re-create or re-save the profile. Simply use the one provided.

5.4. Dominion EMS Acceptance Testing

Contractor shall provide on-site technical support for EMS system installation, configuration and Acceptance Testing. The following Acceptance Testing steps are prescribed in the California Use Procedures:

Pre-Voting Phase

1. Open the EMS Election Event Designer application
2. Create the Election Project
3. Open the Project
4. Set the Ballot Style and Ballot Style Parameters
5. Define District Types
6. Define the District
7. Define the Precincts and associate Precinct to Districts
8. Create Political Party
9. Create Office, Define Office Settings, and Associate Elector Group Types to Offices, set Rotations
10. Import District Rotations
11. Create Contest, Override Office/Contest Settings
12. Define Choice to Contest, Associate Political Parties to Choice
13. Import Template Keywords
14. Define Ballot Manifestation
15. Preview Ballot Types
16. Preview Ballot Manifestation
17. Create Ballot Header
18. Create Contest Headings
19. Create Proofing Ballots
20. Create (Official) Ballots
21. Creating Polling Places
22. Define Tabulators, Assign Polling Places to Tabulators, Assign Precinct to Tabulators
23. Import DCF/MBS Files
24. Define Configuration Files
25. Associate Configuration File to Tabulator
26. Generate Election Files

27. Program Memory Card
28. Program iButton Security Key
29. Create EMS Results Tally & Reporting User

Post-Voting Phase

1. Open the EMS Election Event Designer application
2. Open Project
3. Login
4. Load Result Files
5. Load Result Images
6. Load Log file
7. List all result Files
8. Select Results Files
9. Preview Result Files
10. Validate and Publish Result Files
11. Create Reports

5.5. System Readiness Testing

Upon completing the component accepting testing, County will conduct System Readiness Testing at a time mutually agreed upon by the Parties, but no later than thirty (30) business days after the completion of component acceptance testing. System Readiness Testing consists of end to end system test that helps to ensure that the system has been configured properly and that all parts of it function correctly.

The test consists of pre-voting, voting and post-voting phases. Pre-voting phase consists of restoring and, if necessary, modifying the election project to be used for Readiness Testing as well as preparing all other necessary material for testing such as iButtons, Security Keys, test decks etc. Voting phase consists of scanning the test decks on all physical tabulators and post-voting involves loading results and analyzing the reports. System Readiness Testing Procedures are outlined in Chapter 4 of the California Use Procedures. As with Acceptance Testing, Contractor shall provide on-site assistance to County in creating the Readiness Testing election, support infrastructure and forms.

6. Printing Facilities Certification

Contractor shall provide the following services related to ballot printer certification consistent with the laws and regulations of California including California Code of Regulations Title II, Division 7, Chapter 4. Ballot Printing:

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

6.1. Provide technical specification requirements for printer certification.

6.2. Perform on-site quality control on initial test run of ballots from printers including multiple tabulation sessions.

6.3. The certified printing facility must agree to source the paper used for ballots with the ImageCast® from a paper manufacturer approved by Contractor, such paper manufacturer having met Contractor's technical paper specifications.

7. Training

Contractor's training shall focus on providing the election administration staff the necessary knowledge, as determined by the Project Management Team, and as outlined in sections 7.1 through 7.3, for successful implementation and effective operation of the voting system. Contractor's training shall be tailored, using various formats, implementing adult learning principles, and proper course pacing. Training customization begins with tailoring the courses to a specific jurisdiction's needs. Contractor's training courses cover hardware and software system operations, pollworker train the trainer and voter outreach. Contractor will provide training on and off-site, and coordinate all scheduling with County.

Training is the primary tool for organizational change integration. The voting system solution will require all levels of election staff and poll workers to learn a new suite of hardware, software, and procedures. Contractor's training materials (documents, presentation, guides, reference cards, web resources, and self-paced learning) all contribute to integrating the new solution into the day-to-day routine of the organization.

Contractor shall prepare training materials including training manuals, website training videos (please see sample of previous implementation at https://www.youtube.com/playlist?list=PLsiDPMsLSeoA-0np94JYdI63QwDxn4-gS , and technical reference manuals. Training and curriculum particular to the resources, staff, and needs of County will be developed as part of the implementation meetings.

7.1. Staff Training Outline

- System
  - All system software and hardware components supplied by Contractor (proprietary and COTS)
  - ImageCast Central
  - MBP Printers
  - ImageCast X BMD
  - ImageCast Remote: UOCAVA /RAVBM
  - Rank Choice Voting

  - Election Night Reporting
- Courses type, (executive, administrative, super user, user, County Technician)
  - Executive
    - Key reports and what the reports mean
  - Administrative / Super User
    - Ability to troubleshoot software
    - Reporting
    - Hands on Training
    - Reporting for Admin / super user
  - Basic User
    - Hands on Training
  - County technician
    - Repair and replacement
    - Hands On training
    - Report training understanding for County Technician
- Video Training / tutorials

7.2. Poll Worker Training

Contractor will work with County in developing a Poll Worker Training. Content will include Election Day procedures and how to handle special voting situations that may arise. Such a change in voting systems requires a change in polling place forms and procedures and as such, Contractor will provide manuals from previous implementations and will assist in redesigning manuals and procedures accordingly.

In addition, Contractor will assist in the development of Poll Worker literature and training videos. An instruction manual will be provided in the Training the Trainer Program. Contractor shall observe County's initial Poll Worker Training and provide any necessary feedback on both documentation and presentation.

7.3. Training Curriculums

The following are sample training curriculums. The number of attendees is not a limitation, but a suggestion in order to provide the best hands-on training.

SONOMA COUNTY

8. Election Setup

8.1. Election Definition

Contractor's Democracy Suite Election Management System shall have the capability of importing election data from County's DFM election database to generate ballot layout used to conduct an election. Contractor shall provide election definition services for the duration as specified in Exhibit C. In the event County requests additional election definition services from Contractor,

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

Contractor shall provide those services according to the prices identified in Exhibit C.

County shall review and approve or identify issues in all Contractor deliverables, with particular attention to ballot proofs and audio files. In the event County discovers an issue, it shall provide written notice to Contractor following the discovery of any issue and Contractor shall rectify the issue within 24-hours at no additional cost to County. In the event County approves the final ballot proofs and audio files and subsequent to such approval, requests that a change be made to the deliverable, Contractor may provide the change according to the service pricing identified in Exhibit C.

8.2. Ballot Layout

Contractor's Ballot Layout/Generation System will support English in both written and audio format; and, have the ability to add new languages.

Contractor's System has the ability to import data in all languages via direct importation to appropriate files or cut and paste. County shall be able to edit all ballot layout files in all languages.

Contractor's System will create all ballots, (precinct, vote center, vote by mail, and audio) from a single Election Management System. Contractor's Ballot Layout/Generation System must have audio capability utilizing human voice recordings as well as voice simulation program.

Contractor's Democracy Suite election management system supports single input of customer profile data such as voting locations, precincts, political subdivisions, offices, parties and machines; use this data to simultaneously manage multiple elections by multiple users.

Contractor will work with County and the certified printer used by County to create a simple method of transferring ballot information to the printer for production.

Contractor has the ability to import the candidate/contest information directly from the DFM Election Information Management System and create the vote by mail ballot, and precinct ballot from the same imported file. Contractor's System shall be capable of importing audio and text files (all languages).

The EMS must generate full-sized press-ready ballots in industry standard PDF format. The EMS must have options to control fonts, line weights, the number of columns, multiple languages, multi-card or double-sided, portrait-style, and colored headers. The ballot is 8.5" wide and can vary between 11"-22" in length.

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

The System shall have the ability to handle characters (such as solid diamond) placed before a candidate's name, without interfering with the randomized alphabet or rotation.

8.3. Pre-Election Logic and Accuracy Test

On completion of election definition and ballot layout, the ballots are generated. Ballot proofs and electronic ballot image files are generated and provided to County. County carefully reviews each ballot. When County is satisfied that the ballots are correct, they initial each ballot, and when they are satisfied that all ballots, audio and reports are correct, they sign-off on their accuracy, and the image files are provided to the printer.

Ballot printing and distribution are the responsibility of the certified printer and County. Contractor will provide a recommended ballot inspection process that should be followed to ensure that all ballots produced are of sufficient quality. The receipt of test ballots from the certified ballot printer is the milestone that triggers the beginning of Pre-Election Logic and Accuracy Testing ("Pre-LAT"), a simulation of the voting process under which the System will operate.

Election files are transferred from the EMS to memory cards and USB Sticks which are created for each ICX ballot marking devices and the ICC system. After loading the election files onto the units, Pre-LAT must be performed on all System components before deployment.

With a paper-based tabulation system, Pre-LAT is performed on the ImageCast X BMD and ImageCast Central tabulators though the use of ballot test decks, rather than simulation scripts. Generally, the Pre-LAT procedure involves programming all voting machines with the final election definition and scanning hand-marked or pre-marked (computer generated) test decks through each tabulator. This provides verification of both the quality of the printed ballots as well as the correctness of each tabulator's programming. After test decks have been scanned and the results report tapes have been verified, test results may be uploaded directly to the EMS Server using EMS Results Tally and Reporting. This results transfer test verifies that all parameters for each tabulator have been correctly configured.

County officials will conduct Pre-LAT, using processes, procedures, and support provided by Contractor. Contractor's project team will be available throughout the Pre-LAT process available to assist.

9. Results, Tally and Reporting

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

Contractor's ICX, & ICC system shall use the same results, tally and reporting system, meaning one election database for the entire system.

The Results Tally and Reporting module enables election officials to use election data and report in styles and formats required by the Secretary of State.
The Results Tally & Reporting module of the EMS shall provide reports with customizable queries, including the reporting of partial election returns throughout Election night, final unofficial election returns, and Canvass reports.

The EMS system supports multiple reports formats for export including Excel, PDF, JSON and xml. Results Tally & Reporting features a one-click .csv export that can be transferred to the Secretary of State for reporting. The CVR (Cast Vote Record) report is exported using JSON format. This report includes the original and adjudicated records for each mark, for every ballot in the election. In addition, the system is capable of providing cast vote record data to support County's "vote for N" post-election external reporting requirements.

9.1. Adjudication

Adjudication is the digital tool which allows for efficient and reliable multi-user adjudication of ballots with customer-defined out-stack conditions. The module allows one or more teams to review out-stacked ballot images as they are being scanned by the ICC. County shall utilize multiple Adjudication stations to allow for an expanded capacity to review ballots.

The County/State defines which out-stack conditions should be reviewed in Adjudication, including blank ballots, overvotes, undervotes, marginal marks, and write-ins.

Each ballot scanned by the system is appended with an AuditMark. When a ballot is adjudicated, a log is created and an Adjudication AuditMark is securely appended to the original image with the original AuditMark. Anyone reviewing the ballots will be able to see how the voter marked their ballot, how the scanner interpreted the intent, and how the ballot was adjudicated. The Adjudication module allows review teams to resolve voter intent on a ballot-by-ballot basis on-screen and send the results directly to tally, thus eliminating the additional costs, time and resources associated with duplicating and re-scanning ballots.

9.2. Marginal Marks

When a ballot is fed into an ImageCast® tabulator a complete duplex image is created and then analyzed for tabulation by evaluating the pixel count of a voter mark. The pixel count of each mark is compared with two thresholds (which are defined in the California Use Procedures) to determine what constitutes a vote. If

a mark falls above the upper threshold, it's a valid vote. If a mark falls below the lower threshold, it will not be counted as a vote. However, if a mark falls between the two thresholds (known as the "ambiguous zone"), it will be deemed as a marginal mark and the ballot will be returned to the voter (in precinct voting) or sent to Adjudication (for central count) for corrective action.

9.3. AuditMark

Contractor's AuditMark technology will allow County to provide greater transparency in the electoral process. Every ballot in the election is imaged and appended with Contractor's patented AuditMark, a record of how the system interpreted the voter's intent. The system captures a full ballot image, including a clear image of all text, ballot identifiers, contests, candidates and voter markings, as well as the AuditMark.

When scanned on the ICC, the ballot's AuditMark also includes a notation showing which batch the ballot belongs to and when it was scanned, making auditing by batch simpler and more efficient. Each image is labeled with the tabulator, batch and sequence number within the batch which corresponds to the physical ballot in the stack.

The AuditMark is the only technology that provides a clear and fully auditable single vote cast record for every ballot cast. This ballot-level audit trail allows election officials and other stakeholders to review not only the ballot images, but also the tabulator's interpretation of each ballot. Democracy Suite shall produce cast vote record date which can be used by County to perform risk limiting audits.

10. Post Election

Canvass - Contractor will assist County in creating procedures for the conduct of the canvass and any necessary recounts. The system shall provide canvass reports including, but not limited to Interim, Semi-Final Official, Final Official, and the Statement of Vote reports. Contractor will be available to assist County's staff in the conduct of the canvass and for any recounts through the 2019 Election Cycle. Contractor shall provide sample procedures and recommendations for County's canvass process.

One Percent Manual Tally - Contractor will assist County in creating procedures for a 1% manual tally.

Recount - The system must be able to provide for a manual recount process that would utilize either the physical ballot or ballot image with AuditMark, Cast Vote Record and EMS SOV reports. Dominion will assist the County in creating procedures for a recount.

11. Warehouse Logistics Planning

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

Contractor will assist County in planning the necessary upgrades and modifications needed for the storage and processing of the voting equipment. Contractor shall provide a written list of all tools, equipment, transportation carts, electrical requirements for outlets, and any other Dominion items, which are required to deploy the system.

12. <u>Removal of County's Existing Elections Equipment</u>

Contractor will assist County in planning the necessary removal of existing elections equipment and provide all removal services should County request that assistance. The cost for removal will be shared with County.

SONOMA COUNTY
EXHIBIT A
SCOPE OF WORK

EXHIBIT A-2 PRODUCT DESCRIPTION

1. **ImageCast® Central Scanners** Dominion shall provide the ImageCast® Central Scanner for use by The Customer. The ImageCast® Central Scanner is commercial off-the-shelf digital scanners configured to work with the ImageCast® Central Software for high speed ballot tabulation. Each ImageCast® Central Scanner includes the following components:
    a. Canon DR-G1130 high speed document scanner.
    b. All-in-One Desktop Workstation with pre-loaded software and monitor.
    c. One (1) iButton Reader/Writers used with Democracy Suite to transfer security and election information to the iButtons for use with the ICC.

2. **Central Scanner Software** This Agreement includes software licenses for the ImageCast® Central software pursuant to the Software license terms attached as Exhibit B.

3. **ImageCast® X Ballot Marking Device (BMD)** The ImageCast® ICX BMD is a commercial off-the-shelf Android tablet connected to a commercial off-the- shelf printer. The ICX BMD is fully integrated into the Democracy Suite platform and features the latest advancements in touchscreen voting technology. The ImageCast X BMD has an intuitive 21" touchscreen interface with various features for accessibility, and connects to a printer that prints the voter's choice summary ballot directly in the voting booth. Once the choice summary ballot is printed, it can be returned to the central office for tabulation on the ImageCast Central system. The ImageCast® ICX BMD kit includes the following components
    a. ICX Firmware
    b. 21 inch Tablet
    c. ATI Accessible Voting Kit for ICX USB
    d. ICX Pollworker Smartcard, ICX Technician Smartcards and Printer.

4. **Democracy Suite EMS Software** platform is a set of applications tailored for all pre-voting and post-voting activities. The Democracy Suite EMS consists of the following components:
    a. Election Event Designer (EED) Client Application is the primary application used for the definition and management of election event. EED is responsible for the definition of election projects. Each election project is represented as an instance of the election domain database with associated set of election project file based artifacts. The definition of the election project can be initiated by importing the election data from external systems or simply by defining all election project entities without importing external data. It is important to note that an election

project initiated by importing data can be further modified within the EED Client Application.

The system can generate two types of paper ballots:

i. Proofing ballots – ballots produced to allow election project stakeholders to proof ballot content and styling. These ballots cannot be processed by the ImageCast® as they don't have proper ballot barcodes. These ballots are overprinted with the text "Proofing Ballots – date/time"

ii. Official ballots – represent production ready, press ready ballots in PDF format with barcodes and without any overprinting.

b. Results Tally and Reporting (RTR) Client Application is the application used for the tally, reporting and publishing of election results

c. ImageCast® Adjudication Application is a client and server application used to review and adjudicate ImageCast® Central Scanner ballot images. The application uses tabulator results files and scanned images to allow election administrators to make adjudications to ballots with auditing and reporting capabilities. The Adjudication Application examines such voter exceptions as overvotes, undervotes, blank contests, blank ballots, write-in selections, and marginal marks. The application works in two basic modes: election project setup and adjudication. The Adjudication Application can be used in a multi-client environment. Adjudication Application eliminates the need to physically rescan ballots.

5. **EMS System Hardware** Dominion will provide the following for EMS System hardware required for operating the Democracy Suite Software system:
   a. EMS Servers
   b. EMS workstations
   c. Adjudication workstations
   d. Compact Flash Reader/Writers used to upload ballot information to Compact Flashes used with both scanner types. These can also be used to transfer election results data to Democracy Suite
   e. iButton Reader/Writers used to transfer security and election information to the iButtons for use with the ICE and ICC
   f. Dell Switch 24 port
   g. Network Cables CAT6 UTP Patch Cables (12 Units)
   h. SQL Server License for defined System configuration
   i. EMS Report Printers P1260dn
   j. Synthesize Speech License Multiple Languages
   k. Smart UPS 1500
   l. 24" Computer Monitors

EXHIBIT B

SOFTWARE LICENSE TERMS AND CONDITIONS

This Exhibit B is part of the Agreement between Dominion and County to which it is attached.

1. Definitions. Capitalized terms used herein have the meaning given in the Agreement unless otherwise defined herein.

1.1. "Agreement" means the agreement between the Parties for the use of the licensed Software to which this Exhibit B is attached and incorporated into.

1.2. "Licensee" means County, as the term is defined in the Agreement.

1.3. "Licensor" means Dominion Voting Systems, Inc.

1.4. "Software" means Dominion Software.

1.5. "Specifications" means descriptions and data regarding the features, functions and performance of the Software, as set forth in user manuals or other applicable documentation provided by Licensor.

1.6. "Third-Party Products" means any software or hardware obtained from third-party manufacturers or distributers and provided by Licensor hereunder.

2. License Terms.

2.1. License Limitations. Licensee's use of the Software pursuant to the License granted in the Agreement is subject to the terms herein. Licensee may only use the Software for its own internal business purposes and conducting elections and solely in conjunction with the EMS Hardware. The License shall only be effective during the Term and cannot be transferred or sublicensed.

2.2. Print Copyright License. Subject to the Print Copyright License terms and conditions as defined in Schedule A attached hereto, Licensor grants to Licensee a non-exclusive, non-transferable print copyright license as defined in Schedule A.

2.3. Third-Party Products. When applicable, Licensor hereby sublicenses any software that constitutes or is contained in Third-Party Products, in object code form only, to Licensee for use during the Term.

2.4. No Other Licenses. Other than as expressly set forth herein, (a) Licensor grants no licenses, expressly or by implication, and (b) Licensor's entering into the Agreement will not be deemed to license or assign any intellectual property rights of Licensor to Licensee or any third party. Licensee agrees not to use the Software as a service bureau for elections outside the Licensee's jurisdiction and agrees not to reverse engineer or otherwise attempt to derive the source code of the Software. The Licensee shall have no power to transfer or grant sub-licenses for the Software. Any use of all or any portion of the Software not expressly permitted is strictly prohibited.

2.5. Intellectual Property Infringement Indemnification. If a third party claims that the Software or System infringes any United States patent, copyright, trade secret or similar

intellectual property right, Dominion shall defend Licensee against such claim at Dominion's expense and pay all damages that a court finally awards against Licensee. If such a claim is made or appears possible, Dominion shall, within sixty (60) days of such claim, and at its option: (a) secure for Licensee the right to continue to use the infringing portion of the Software or System; or (b) modify or replace the Software and System so that it is non-infringing but retains equivalent functionality. If neither of the foregoing options is reasonably available, Dominion shall require Licensee to return the Software or System, and Dominion shall refund Licensee amounts calculated pursuant to the Software License fee, on a pro-rata basis. The foregoing notwithstanding, Dominion shall have no obligation to indemnify Licensee for any infringement claim based on Licensee's modification or misuse of the Software, if the claim would have been avoided had the Software not been modified or misused.

3. Payment. In consideration of the grant of the license, the Licensee shall pay the license fees set forth in the Agreement and Exhibit C of the Agreement.

4. Upgrades and Certification. During the Term, Licensor may provide upgrades to Licensee under the following terms and conditions.

4.1. Upgrades. In the event that Licensor, at its sole discretion, certifies a Software upgrade under the applicable laws and regulations of the State of California, Licensor shall make the certified Software upgrade available to the Licensee at no additional cost.

4.2. Certification Requirement. Notwithstanding any other terms of this Agreement, Licensor shall not provide, and shall not be obligated to provide under this Agreement any upgrade, enhancement or other software update that has not been certified under the applicable provisions of the election laws and regulations of the State of California.

5. Prohibited Acts. The Licensee shall not, without the prior written permission of Licensor:

5.1. Transfer or copy onto any other storage device or hardware or otherwise copy the Software in whole or in part except for purposes of system backup;

5.2. Reverse engineer, disassemble, decompile, decipher or analyze the Software in whole or in part;

5.3. Alter or modify the Software in any way or prepare any derivative works of the Software or any part of parts of the Software;

5.4. Alter, remove or obstruct any copyright or proprietary notices from the Software, or fail to reproduce the same on any lawful copies of the Software.

6. Return of Software. Upon termination or expiration of this Agreement, Licensee shall forthwith return to Licensor all Software in its possession or control, or destroy all such Software from any electronic media, and certify in writing to Licensor that it has been destroyed.

7. Warranties. The following warranties will apply to all Software during the Term.

7.1. Software Warranty Terms. Licensor warrants that the Software will function substantially in accordance with the Specifications during the Term. The Licensor also warrants that the Software shall comply with the State of California certification requirements and election laws (collectively the "Requirements") in effect as of the date the Software is certified by the State of California. This provision applies to the initially installed Software as well as any subsequent upgrades pursuant to Section 4 herein. However, the Licensor will not be required to make modifications to the Software or System as a result of changes in the Requirements. The foregoing warranty will be void in the event of the Software (i) having been modified by any party other than Licensor or (ii) having been used by the Licensee for purposes other than those for which the Software was designed by Licensor. If Licensor establishes that a failure of the foregoing warranty that is reported by Licensee is not covered by the foregoing warranty, the Licensee shall be responsible for the costs of Licensor's investigative and remedial work at Licensor's then current rates.

7.2. Corrections. If the Licensee believes that the Software is not functioning substantially in accordance with the Specifications or Requirements, the Licensee shall provide Licensor with written notice of the material failure within thirty (30) days of discovering the material failure, provided that the Licensee can reproduce the material failure to Licensor. The Licensor shall correct the deficiencies, at no additional cost to the Licensee and incorporate such corrections into the next version certified by the State of California.

7.3 Third-Party Products. The warranties herein do not apply to any Third-Party Products. However, to the extent permitted by the manufacturers of Third-Party Products, Licensor shall pass through to Licensee all warranties such manufacturers make to Licensor regarding the operation of such Third-Party Products.

7.4. NO OTHER WARRANTIES. EXCEPT AS SET FORTH IN THE AGREEMENT AND HEREIN, LICENSOR DISCLAIMS ALL OTHER REPRESENTATIONS AND WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY BASED ON A COURSE OF DEALING, COURSE OF PERFORMANCE OR USAGE OF TRADE.

SCHEDULE A

PRINT COPYRIGHT LICENSE TERMS AND CONDITIONS

1. Definitions. For the purposes of this Agreement, the following are defined terms:

1.1. "Derivative Works" means any work that is based upon or derived from the Licensor's voting systems' ballots, including without limitation, sample ballots and voting booklets.

1.2. "Voting Systems' Ballots" means any ballot created for use with any voting system owned or licensed by the Licensor.

2. Print Copyright License and Use.

2.1. Copyright License Grant. Licensor grants to the Licensee a non-exclusive, non-transferable copyright license to print, reproduce, distribute or otherwise copy the Licensor's Voting Systems' Ballots and any Derivative Works (collectively the "Materials") pursuant to the terms and conditions of this Schedule A. Without limiting the generality of the foregoing, Licensor and Licensee acknowledge and agree that Licensee is a public entity subject to the California Public Records Act (Cal. Gov. Code §§ 6250 *et seq.*). Nothing in this Schedule A shall be construed to limit or prohibit Licensee from producing Materials in response to a request under the California Public Records Act. Licensee's obligations to disclose Materials under the California Public Records Act shall survive termination of this Agreement.

2.2. Copyright License Use. Other than as expressly set forth herein, (a) Licensor grants no other licenses, expressly or by implication, and (b) Licensor's entering into and performing the Agreement will not be deemed to license or assign any intellectual property rights of Licensor to Licensee or any third party, (c) the copyright license granted herein cannot be transferred or sublicensed and the Voting Systems' Ballots or Derivative Works cannot be reproduced by any third party without the prior written consent of the Licensor, including without limitation:

(i) any commercial or non-commercial printer
(ii) any third party vendor using ballot on demand system.

2.3. Rights and Interests. All right, title and interest in the Material, including without limitation, any copyright, shall remain with the Licensor. Notwithstanding the foregoing, termination of this Agreement shall not be construed to limit or prohibit Licensee from printing, reproducing, distributing, or otherwise copying Materials to fulfill any statutory obligation or request from the State or to respond to any formal litigation or subpoena requiring the disclosure or production of such Materials.

3. No Copyright Warranties. EXCEPT AS SET FORTH HEREIN, LICENSOR DISCLAIMS ALL REPRESENTATIONS AND WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY BASED ON A COURSE OF DEALING, COURSE OF PERFORMANCE OR USAGE OF TRADE.

EXHIBIT C

PRICING SUMMARY AND DELIVERABLES DESCRIPTION

1. Pricing/Payment Summary and Descriptions for Managed Services

1.1 **Pricing Summary**. The total annual managed service contract pricing shall equal $194,874.25/year for a total of eight (8) years. The total annual rental pricing shall equal $106,250.00/year for a total of three (3) years. County has an option to renew the rental on an annual basis for additional two years (2022 and 2023). County shall provide sixty (60) days prior written notice of its intent to renew the rental portion of this Agreement.

1.2 **Payment Summary**. The following is the invoicing schedule for County's annual payments. County shall pay invoices in a timely manner and no later than thirty (30) calendar days from receipt of a Dominion invoice. All payments shall be made in U.S. Dollars. All invoices (Managed Services and rental) will be issued on January 1st of the corresponding year.

	Year 1	Year 2	Year 3	Year 4
Description	**2019**	**2020**	**2021**	**2022**
Managed Service	$194,874.25	$194,874.25	$194,874.25	$194,874.25

3. Detailed Deliverables Description

3.1 ***ImageCast® Central Scanner (ICC)***. Contractor shall provide the ImageCast® Central Scanner for use by County. The ImageCast® Central Scanner is commercial off-the-shelf digital scanners configured to work with the ImageCast® Central Software for high speed ballot tabulation. Each ImageCast® Central Scanner includes the following components:

3.1.1 Canon DR-G1130 high speed document scanner.

3.1.2 ImageCast® Central Software including third party Twain software.

3.1.3 OptiPlex 7440 All-in-One Series with pre-loaded software.

3.1.4 iButton Security Key.

3.1.5 iButton Programmer and iButton Key Switch & Cat5 RJ 45 Cables used with Democracy Suite to transfer security and election information to the iButtons for use with the ICC.

3.2 ***ImageCast® Software***. The Parties will enter into software licenses for the ImageCast software, substantially in the form of Exhibit B to this Agreement. The Dominion software includes, without limitation:

3.2.1 AuditMark®. For each ballot that is scanned and accepted into the unit, a corresponding ballot image is created and stored for audit purposes. The image consists of two parts described below.

- The top portion of the image contains a scanned image of the ballot.
- The bottom portion consists of a machine-generated type-out showing each mark that the unit interpreted for that particular ballot. This is referred to as an AuditMark®.

3.1 ***ImageCast® X ("ICX").***

3.1.1 Application: ImageCast X BMD is a touchscreen in-person voting device and ballot marking device. Voting sessions are initiated on the tablet by either a smart card or the entry of a numeric code based on activation. The ballot is loaded directly onto the standalone device. All voting activity is performed at the tablet, including accessible voting. Accessible voting interfaces connect to the tablet via an Audio Tactile Interface or ATI. For all modes of voting, after the voter reviews the ballot selections, a paper ballot is created for the voter from a printer in the voting booth. The printed ballot contains a written summary of the voter's choices, as well as a 2D barcode which is read by Dominion's ImageCast Precinct or Central tabulator. No votes are stored on the ImageCast X-BMD unit. All votes can be tabulated and stored both the ImageCast Central and Precinct Tabulators

3.1.2 Components: ImageCast X BMD is composed of a 21" Avalue touchscreen, Android OS 4.4.4, DC 19V input, HP LaserJet Pro M402dne laser printer, 6' cable. 5 smart cards, and 8GB flash drive.

3.2 ***Democracy Suite Light Software*** consists of the following components

3.2.1 Election File and iButton Creation County is authorized to create Election Files and iButtons from EED to load on the ICX, ICVA and ICC units.

3.2.2 Results, Tally and Reporting (RTR) Client Application is the application used for the tally, reporting and publishing of election results.

3.3 ***ImageCast® Adjudication Application*** is a client and server application used to review and adjudicate ImageCast® Central Scanner ballot images. The application uses tabulator results files and scanned images to allow election administrators to make adjudications to ballots with auditing and reporting capabilities. The Adjudication Application examines such voter exceptions as overvotes, undervotes, blank contests, blank ballots, write-in selections, and marginal marks. The application works in two basic modes: election project setup and adjudication. The Adjudication Application can be used in a multi-client environment.

3.4 ***Mobile Ballot Printing*** is an application used to search, preview and print ballots via a local printer device. The application makes use of ballot information and PDFs produced by the Election Event Designer application and information provided through the customer voter registration system.

3.5 ***ImageCast Remote Voting UOCAVA/RAVBM System*** offers a secure and efficient means for overseas and military voters, as well as voters with disabilities to receive, mark, print and return their ballot to their local elections office. The ImageCast Remote UOCAVA/RAVBM system ensures the security and transparency of the balloting process while preserving the privacy of UOCAVA voters and voters with disabilities. The ImageCast Remote UOCAVA/RAVBM system utilizes the same database or election project used for all other ballots. Ballots returned by ImageCast Remote UOCAVA/RAVBM voters can be processed on ImageCast Central, eliminating the need to duplicate ballots or process ballots on a separate system.

3.6 ***Implementation Services and Training.*** Contractor will provide the following training as described herein.

3.6.1 Project Management Support. Contractor will provide project management support to oversee the general operations of the project through the Agreement Term. The project manager shall be responsible for arranging all meetings, visits and consultations between the parties and for all administrative matters such as invoices, payments and amendments. The Parties shall develop and finalize a project implementation plan including a training and delivery schedule. The Parties agree that during the course of the implementation, changes to the project schedule may be required. Any changes to the project schedule must be mutually agreed to by both Parties and such agreement shall not be unreasonably withheld.

3.6.2 ImageCast® X – This training introduces the ImageCast® X system with an emphasis on the operation of the hardware. Students can expect to learn general operations, logic and accuracy testing, Election Day setup and operation, and troubleshooting.

3.6.3 ImageCast® ICC – This training introduces the ImageCast® ICC with an emphasis on the operation of the hardware. Students can expect to learn general operations, logic and accuracy testing, ballot scanning operation, and troubleshooting.

3.6.4 EMS Server Installation, Configuration & Testing. Dominion will provide a minimum total of one (1) day of direct onsite support for EMS Server installation, configuration & testing.

3.6.5 Democracy Suite® EMS System– This training covers the restoring election project backups, creating ICX, ICC and ICXVA files, tally and reporting.

3.6.6 System Acceptance Testing Support. Dominion will provide direct onsite training and support during the System Acceptance Testing period.

3.6.7 Pollworker Train the Trainer – This provides training to the Customer staff on operations of a polling location including the ImageCast® X, ICX Card activation, testing and troubleshooting.

3.6.8 On-Site Election Day Support. Dominion will provide three (3) days (inclusive of travel) of direct onsite election support for 2 Elections.

3.7 ***Election Ballot Definition Setup.*** Contractor shall provide election setup services and support for the election database creation and ballot review for 10 Elections during the term. County will identify which 10 elections. Any additional elections will be charged at the then current rate, with a minimum ballot setup fee of $3,500 per election. Ballot definition services will be provided in English only. Additional languages will be charged at the then current rate. Ballot setup includes the following: Democracy Suite Election project creation, delivery of .pdf artwork for ballot types, creation of audio setup for audio voting using a synthesizer and the creation of test deck files in .pdf format. Any outside recording charges would be at the County's expense.

3.8 ***Travel and Expenses included.*** All costs of Contractor's transportation, lodging and meal expenses are included during the Agreement Term.

3.9 ***Ongoing telephone support***. Telephone support shall be available for County during the Term of the Agreement at no additional costs.

3.10 ***Other Services, Consumables or Equipment.*** Any other services, consumables or equipment not specifically identified in this Agreement are available for purchase by the County at the then current Contractor list price.

Exhibit D

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. **Workers Compensation and Employers Liability Insurance**
   - **a.** Required if Consultant has employees as defined by the Labor Code of the State of California.
   - **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   - **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   - **d.** *Required Evidence of Insurance*: Certificate of Insurance.

   If Consultant currently has no employees as defined by the Labor Code of the State of California, Consultant agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

2. **General Liability Insurance**
   - **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   - **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Consultant.
   - **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Consultant is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the County.
   - **d.** County of Sonoma, its Officers, Agents and Employees shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between the additional insureds and Consultant and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. *Required Evidence of Insurance:*

i. Copy of the additional insured endorsement or policy language granting additional insured status; and

ii. Certificate of Insurance.

3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limits may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

4. Professional Liability/Errors and Omissions Insurance

a. Minimum Limits: $2,000,000 per claim or per occurrence; $2,000,000 annual aggregate.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County.

c. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by Consultant in this agreement and shall include, but not be limited to, claims involving infringement of intellectual property, including but not limited to infringement of copyright, trademark, trade dress, invasion of privacy violations, information theft, damage to or destruction of electronic information, release of private information, alteration of electronic information, extortion and network security. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses with limits sufficient to respond to these obligations.

d. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

e. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.

f. *Required Evidence of Insurance*: Certificate of Insurance specifying the limits and the

claims-made retroactive date.

5. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

6. Documentation

a. The Certificate of Insurance must include the following reference: Voting System.

b. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Consultant agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1 – 4 above.

c. The name and address for Additional Insured endorsements and Certificates of Insurance is: County of Sonoma, its Officers, Agents and Employees, 585 Fiscal Drive, Room 104, Santa Rosa, CA 95403.

d. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

e. Consultant shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

f. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

7. Policy Obligations

Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

8. Material Breach

If Consultant fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Consultant resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Consultant, County may deduct from sums due to Consultant any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

MODERN VOTING SYSTEM

Registrar of Voters Office (ROV)

To learn more about the Voting System Replacement Project, visit: http://sonomacounty.ca.gov/voting-system

NEW VOTING SYSTEM SELECTED!

The proposal by Dominion Voting System Inc. for the Democracy Suite version 5.2 voting system was ranked highest among all proposals using selection criteria including received State certification, which is granted by the CA Secretary of State after rigorous functional, security, and accessibility testing.

Democracy Suite 5.2 is a comprehensive solution that is California-certified, accessible, and possesses features that will modernize voting and election administration.

With Democracy Suite 5.2, voters personally mark a paper ballot or use a Ballot Marking Device (tablet) to mark choices before printing out their ballot.

Voters were invited to share preferences and priorities that were considered before creating the selection criteria. ROV hosted a vendor demonstration for key stakeholders, created a new website and literature, and released an online survey. Voter feedback was incorporated into selection criteria used by ROV; voter preferences are reflected in the system selected.

VOTER FEEDBACK REFLECTED IN SELECTION

Sonoma County voters weighed in on their preferences and priorities, which were incorporated into the selection process.

A Voting System Replacement Survey was conducted March through April, 2018. Voters shared opinions and top concerns:

Support Replacement – 67%

Prefer paper ballots – 75%

Top 4 selection criteria – Security; Accuracy; Able to check ballot before casting; User-friendly.

Top 2 priorities for the new voting system – paper-based system (uses paper ballots); prevent hacking.

Voting System Brings New Benefits

Dominion's Democracy Suite version 5.2 offers several modern features. Democracy Suite 5.2 will process ballots more efficiently, and produce election results faster.

Democracy Suite 5.2 Benefits for Voters:

- Paper ballots personally cast by voters
- Faster delivery to military and overseas voters
- Single ballot card for most elections
- Audit trails throughout process
- Results updated throughout canvass
- Certify/release results faster

Democracy Suite 5.2 Benefits for Elections Officials:

- Automate "stuffing" vote by mail ballot envelopes
- Print ballots "on demand"
- Eliminate manual duplication of damaged/defective ballots
- Eliminate procedures, extra-help, and OT costs
- Reduce supply/paper waste
- Adaptable for other models of voting (e.g. Vote Centers)

Dominion's Democracy Suite 5.2 has modern features that will allow tally updates, and produce election results faster.

All

Title: Tourism Impact Grant Funding Agreement Renewals

Recommended Actions:

1. Authorize the County Administrator, or designee, to delegate authority to renew agreements to extend the term to June 30, 2019 and make minor modifications to allow more time to non-profit partners Russian Riverkeeper on behalf of Clean River Alliance, Mark West Chamber of Commerce, Binational Health, Luther Burbank Memorial Foundation DBA Luther Burbank Center, Bodega Bay Fire Protection District, Coast Life Support District, and City of Sebastopol as well as the Department of Transportation and Public Works to complete grant work financed with FY 2017-2018 Tourism Impact for a total of $161,322.95;
2. Authorize the County Administrator, or designee, to amend this agreement to lengthen the time schedules and make minor modifications to the allowed uses that do not increase the amount awarded under the agreement; and
3. Adopt a Budget Resolution amending the Community Investment Fund Fiscal Year 2018-2019 by $161,322.95 to rebudget prior year awarded but unused Tourism Impact Measure L Funds.

Executive Summary:

Today's Actions would authorize the County Administrator, or designee, to renew a total of $161,322.95 in funding agreements with non-profit grantees to complete projects, and carry forward into the FY 2018-2019 budget unused prior year Tourism Impact funds by the same amount of $161,322.95.

Activities performed utilizing Community Investment Program funds are consistent with Government Code Section 26277.

Discussion:

Transient Occupancy Tax Funding

The Transient Occupancy Tax (Hotel/Motel Tax or Bed Tax) is levied at a rate of 12% in unincorporated Sonoma County. In 2016, voters approved Measure L, which authorized a 3% increase to the tax – from 9% to 12%. The first 9% of TOT is divided with 33% of revenues received going into the General Fund.

The remaining funds, including the Measure L funds, are allocated according to the Community Investment Fund Policy. The policy includes an allowance to finance programs that address tourism impacts.

Tourism Impact Funds
The Community Investment Fund utilizes a portion of funding to mitigate the impacts of Tourism with a program called the "Tourism Impact Fund." The Tourism Impact Fund was established after Measure L was approved, and distributes 10% of revenue from Measure L among the Supervisorial Districts, according to the percentage of TOT revenue collected in each District during the previous fiscal year. The Tourism Impact Fund was established to meet unique and urgent needs of areas within unincorporated Sonoma County that are most impacted by tourism.

Funds in this category may be used for activities such as safety improvements (e.g. lighted and/or marked crosswalks, traffic calming devices), environmental impact mitigation (e.g. removing trash from beaches, waterways, and areas with high tourist traffic), public safety (e.g. Fire Services), and other tourism mitigation activities, such as parking enforcement in heavily trafficked areas. Unused funds in a single fiscal year will be accounted for and available in following years.

On June 5, 2018 the Board awarded District 4 and 5 grants to the entities listed below. However, not all funds were expended before the end of the grant agreement term of June 30, 2018. Therefore, renewal of awards and associated agreements is needed to allow partners to complete the grant funded projects. Details of the proposals may be found in Attachment B.

District Four Funds: **$36,786**

Project	**Organization/ Department**	**Amount**
Russian River Clean up	Russian Riverkeeper on behalf of Clean River Alliance	$25,000
Rebuild Initiative	Mark West Chamber of Commerce	$6,000
Farm/Hospitality Worker Health Care	Binational Health	$2,000
Yearly Refresh	Luther Burbank Memorial Foundation DBA Luther Burbank Center	$3,786
	Sub-Total	**$36,786**

District Five Funds: **$124,536.95**

Project	**Organization/ Department**	**Amount**
Stryker Power Loading system for ambulance & rope rescue equipment	Bodega Bay Fire Protection District	$35,000
EMT/EMR training classes for TSR and CLSD	Coast Life Support District	$12,000
Clean River Alliance program funding	Russian Riverkeeper	$27,536.95

Sebastopol/Bodega Highway Pedestrian improvements	City of Sebastopol	$25,000
Occidental sidewalk connection project	Transportation and Public Works	$25,000
	Sub-Total	**$124,536.95**
	Grand Total	**$161,322.95**

The contracts' renewal will be executed by the County Administrator, or designee. The contracts require the County seal on promotional materials produced using the grant award, and will require submission of receipts to the County Administrator's Office for the total amount of the grant award.

Due to the scope and nature of projects funded by the Tourism Impact Fund, the project may require modification and/or work may not be completed during the award year, necessitating an extension of time or modification of allowed uses for the organization to complete the project. Therefore it is recommended that the County Administrator, or designee, be authorized to amend the contracts to lengthen the time schedules and make minor modifications to the allowed uses that do not increase the amount awarded under the agreement.

Activities performed utilizing Community Investment Program grants provided to non-profits will be consistent with Government Code Section 26277.

Prior Board Actions:

June 5, 2018: Board approved Fiscal Year 2017-2018 Tourism Impact Fund Awards

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Grant funds allow non-profit partners to advertise and grow local events and encourage tourism thereby promoting economic development and growth.

County of Sonoma
State of California

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Authorizing Adjustments to the Board Adopted Budget for Fiscal Year 2018-2019 for the Community Investment Fund – Tourism Impact Fund.

Whereas, on October 3, 2017, the Board of Supervisors established the Tourism Impact Fund to meet unique and urgent needs of areas within unincorporated Sonoma County that are most impacted by tourism; and

Whereas, as stated in the Community Investment Fund Policy, unused Tourism Impact Funds in a single fiscal year will be accounted for and available in following years.

Now, Therefore, Be It Resolved that the Board of Supervisors hereby authorize an increase of $161,322.95 to the Community Investment Fund – Tourism Impact Fund for the Fiscal Year 2018-2019 Adopted Budget.

COMMUNITY INVESTMENT FUND POLICY

I. SOURCE OF FUNDS

The Transient Occupancy Tax (Hotel/Motel Tax or Bed Tax) is authorized under State Revenue and Taxation Code Section 7280 as an additional source of non-property tax revenue to local government. This tax is levied in Sonoma County at a rate of 12%. The code does not require any specific use of the Transient Occupancy Tax (TOT). Funds developed as a result of the TOT may be utilized for General Fund, Community Investment Fund, or other purposes. Activities performed utilizing Community Investment Fund grants provided to non-profits must also be consistent with Government Code Section 26227.

II. POLICY STATEMENT

The Board of Supervisors wishes to invest in the community by supporting economic and workforce development, community non-profit grants, community services and safety, and program integrity and administration. The Board of Supervisors also wishes to encourage tourism in the County by supporting a series of promotional, community, and cultural activities through the use of Community Investment funds for: regional and national advertising, support of the community's spirit and its art/cultural programs, and promotion of other special events as deemed, by the Board, consistent with this Policy.

Funding levels will be established annually based on collections. In 2016, voters approved Measure L which authorized a 3% increase to the tax, bringing the total TOT rate to 12%. Measure L funds shall be tracked separately as described below. The Board of Supervisors has established a policy that 33% of the first 9% of TOT funds are designated to the General Fund, and the remaining funds will be used for community investments within this policy.

Entities who receive funding through the Community Investment Fund will be required to include the County of Sonoma logo and/or statement indicating sponsorship and/or support on all printed and online promotional materials, unless otherwise requested or agreed upon with the County.

III. ACTIVITIES ELIGIBLE FOR COMMUNITY INVESTMENT FUND GRANT AWARDS

A. Economic and Workforce Development

The Board desires to designate available funds towards projects and initiatives that stimulate and expand the county's economic vitality.

1. **Chambers of Commerce:**
   Funding may be provided to Chambers of Commerce serving unincorporated areas of Sonoma County or who provide countywide services. Chambers located in the unincorporated area of the county and those serving the entire county will be given priority and fully funded prior to funding consideration of municipal Chambers of Commerce. Allocation of funds will be based upon an up to 10% match of membership dues and private cash contributions that are discretionary revenue to the chamber and are not associated with a particular event, function or position. A maximum of $40,000 per year may be made available for Chambers of Commerce. Requests for funding can be made annually to the Economic Development Board.

2. **Visitors Centers:**
   Funding for Visitor Centers within the county may be considered at the discretion of the Board of Supervisors. For purposes of funding, Visitors Centers will be distinct from the Tourism Marketing Program. Requests for funding can be made annually to the Economic Development Board.

3. **Economic Development Board:**
   The Board of Supervisors has designated the Economic Development Board (EDB) to provide business assistance services to enable local businesses to maintain or expand their operations. The EDB will request funds annually through the budget process and will be considered at the discretion of the Board of Supervisors.

4. **Tourism Marketing Program:**
   As determined by the Board of Supervisors, the County will provide TOT funds for advertising and promotional efforts as provided by the Sonoma County Tourism Bureau (SCTB). Commencing with Fiscal Year 2018-19, the County's TOT contribution to SCTB shall be a sum equivalent of the first 1.25% of the 9% of TOT collected in the unincorporated Sonoma County. The county's TOT contribution is disbursed through the EDB budget.

5. **Visitor Way Finding and Signage:**
   Funding may be provided for permanent signage related to visitor way finding and area identification. These funds are intended for the installment and maintenance of permanent identification signs, not temporary or event promotion signs. Visitor Way Finding and Signage projects located in the unincorporated area of the county will be prioritized. A maximum of $100,000 per year may be made under this category. Requests for funding can be made annually to the Economic Development Board.

6. **Workforce Development and Scholarships:**
   Acknowledging that a qualified workforce is essential to the growing needs of the tourism industry as well as the overall health of the community, the Board of Supervisors has designated funds to support workforce development and to increase access to educational opportunities through scholarships. Workforce Development and Scholarships projects serving the entire county will be given priority. A maximum of $500,000 per year may be made under this category. Requests may be made annually for multi-year grants.

B. Community Services and Safety

The Board is committed to using a portion of TOT funds to improve community services as well as to mitigate the impacts of tourism in communities.

1. **Parks, Recreation, and Event Facilities:**
   The Board of Supervisors desires to provide TOT funds to County departments for recreational activities that benefit local tourism activities and the tourist industry, including, but not limited to, the Regional Parks Department and the Fairgrounds and Exposition, Inc., and Veterans Halls (under contract or managed by the General Services Department). Funding provided to the Regional Parks Department is allocated for operations and maintenance of existing park facilities only. Requests for TOT funds from County departments will be reviewed annually on a case-by-case basis and will be considered at the discretion of the Board of Supervisors.

2. **Fire Services:**
   The Board of Supervisors is committed to addressing potential impacts on visitors' and residents' safety as a result of high-impact tourism within the unincorporated areas of the county. See Section E(3) below which dedicates a total of 20% of Measure L revenue to be distributed to Fire Services within the unincorporated area annually.

3. **Affordable Housing and Homeless Services:**
   The Board of Supervisors recognizes that vacation rentals and other impacts from tourism result in an increased need in affordable housing. See Section E(4) below which dedicates a total of 13% of Measure L revenue to be distributed for affordable and workforce housing partnerships within the unincorporated area for housing and rent stabilization as well as for homeless services. Funds shall be allocated to the existing County Fund for Housing (CFH) as well as to homeless services needs, administrated by the Community Development Commission.

4. **Roads Funding:**
   To mitigate the impact of increased vehicles on roads in the unincorporated area of Sonoma County, the Board of Supervisors commits a total of 20% of Measure L revenue to Transportation and Public Works (TPW) for improvements to local roads. Funding will support projects included in the annual TPW Roads Plan. See Section E(1) below.

5. **Tourism Impact Fund:**
   This fund has been established to meet unique and urgent needs of areas within unincorporated Sonoma County who are most impacted by tourism. A total of 10% of Measure L revenue will be distributed to mitigate the impacts of tourism in communities. The Board of Supervisors will consider these needs on an ongoing basis throughout the year. Unused funds in a single fiscal year will be accounted for and available in following years. See examples of use in Section E(7) below.

C. Community Non-Profit Grants

The Board of Supervisors wishes to invest in the community by supporting non-profit grants to promote arts and cultural activities, agricultural industry, historical preservation activities, promotional activities which enhance tourism and industry, and/or local community events which encourage a sense of community.

Community Investment Fund grant awards will be based upon an evaluation of all application materials, with a focus on the return on investment and benefit to be gained, including potential tourism and business revenue, from providing financial support to the event/organization. Events and organizations who demonstrate ability to receive and/or contribute match funding or grants as the result of receipt of Community Investment Funds will be given priority consideration in the application review process and in consideration of amount of grant award. County funds are not to be used for individual business promotion or advertisement.

The following grant opportunities are available:

1. **Agricultural Promotion**
   The Board of Supervisors desires to support advertising campaigns and promotional activities directed by Sonoma County agricultural industries. Funds will be used to support advertising and promotional efforts of diverse organizations within the agricultural sector.
   Requests for funding can be made annually by non-profits entities and a maximum of $185,000 per year may be made available under this category.

2. **Historical Commissions**
   The Board of Supervisors desires to support historical preservation of the county's culture and historical records and architecture. A maximum of $60,000 per year may be made available for this category.

   The County has designated the Sonoma County Landmarks Commission to advise on the distribution of funds for preservation and restoration of historically significant buildings. Funding may be provided to this Commission to accept grant applications for the renovation, restoration and/or preservation of historical facilities.

   The Board has designated a Historical Records Commission to review and make recommendations regarding the maintenance and destruction and retention of records, which may be of historical significance. Funding under this category may be provided for these activities.

3. **Local Events, Organizations, and Economic Development Grants**
   The Board has established this category to assist small cultural, artistic, and countywide events and organizations as well as events occurring during the off peak tourism season (November 15 through April 15) with funding for advertising and economic development efforts that promote Sonoma County and encourage visitors to frequent the county throughout the entire year. Funds can also be allocated for activities that

support community organizations and will be made at the discretion of each Supervisorial District. Events and organizations will make requests annually to the Supervisorial District in which their event/organization exists.

$250,000 has been allocated for this category and will be divided equally among supervisorial districts to be used at the discretion of each district.

4. **Major County Events and Organizations**
The Board of Supervisors desires to promote major events and cultural and artistic organizations which draw countywide, regional, state and national interest as evidenced by widespread media promotion and which can demonstrate a significant population of participants and visitors from outside the county. A maximum of $300,000 per year may be made available for advertising and promotion of major events and organizations within this category.

The following general guidelines apply to this category:

a. Must demonstrate overall attendance either at a single event or through a series of events in excess of 15,000, with significant (20% or more) demonstrated attendance from out of the county.

a. Must demonstrate extent of out-of-county attendance and demonstrate link to overnight stays from attendees.

b. Must demonstrate advertising expenses exceeding $25,000, of which the Advertising funds being requested must not exceed 50% of total advertising expenses for the event or organization.

c. Must demonstrate a major advertising campaign plan focused outside of the county.

d. Must demonstrate the extent to which the event, season series, exhibit, or marketing effort will support the county's economic development in the form of local job promotion, local education contribution, and/or local business-chambers of commerce-visitors centers partnerships.

e. In addition to advertising and promotional efforts, funds may also be used to support Sonoma County based documentary films that document and promote or maintain a historical record of the region, culture, community and arts. The following general guidelines will apply:

    - Must demonstrate historical, current social issues, cultural, regional or specific human experiences in Sonoma County that raise awareness and create an impact upon the viewing audience.
    - Must have real, factual situations and circumstances which leave audiences better informed.
    - Must provide detail of advertising/promotional campaign activities, including the type of advertising and region(s) of promotion.

- Must be able to demonstrate that the film will be exhibited publicly, including but not limited to broadcast and cable television, and Internet transmission.
- Applicant must provide a production timeline including release date of film and the cost of the activity in relation to the amount of grant funds requested.

The maximum advertising fund contribution which can be applied for is $50,000. Funds are only to be used for advertising and promotion of the events and not towards the cost of event production.

The following will be requested as part of the application process for all events and organizations who apply for advertising funds under this category. This information is not required and failure to provide will not result in disqualification, however, the information will be used to determine grant awards and amounts based on demonstrated ability to most effectively promote tourism, agricultural, and/or economic development.

a. A complete Community Investment Fund grant application (form provided by the County);

b. A completed post-program/event report containing results and benefits of prior year activities and events, if the entity received Community Investment Funds in the previous fiscal year (form provided by the County);

c. Detail the advertising/promotional campaign for which advertising funds are being requested, including the type of advertising and region(s) of promotion;

d. Detail how these activities will promote attendance, including expected attendance, overnight stays, and visitor spending; and

e. Detail how the County of Sonoma organization will be promoted as an organization/event sponsor in advertising materials, available event/booth attendance, and other such activities. Information should also be provided on available sponsorship packages.

f. Must include details of other funding support from local organizations or local government entities.

5. Seasonal and Off Peak Programs

The Board of Supervisors desires to promote seasonal programs, events, and cultural and artistic organizations as well as events that occur during the off peak tourism season (November 15 through April 15) which draw countywide and regional interest and which can demonstrate participants and visitors from within and/or outside the county. The program will pay for the direct cost of advertising. A maximum of $50,000 per year may be made available under this category.

The maximum advertising fund contribution which can be applied for is $5,000. The following general guidelines apply to this category:

a. Must detail overall attendance from in and/or outside of the county.

b. Must demonstrate local and/or out of county advertising campaign plan.

c. Must demonstrate the extent to which the event, seasonal program, exhibit, or marketing effort will support the County's economic development in the form of local job promotion, local education contribution, and/or overnight stays from attendees.

d. Must provide a budget of total advertising expenses in relation to the amount of grant funds being applied for.

e. Must include details of other funding support from local organizations or local government entities.

D. Program Integrity and Administration

The Board of Supervisors desires to provide Community Investment funds for certain county departmental activities that benefit local tourism activities and the tourist industry, and which preserve and promote Sonoma County history. Community Investment funds may be used for salaries of County employees when participating in activities funded by Community Investment funds. Administrative costs (including collection, audit, program coordination, consultant, and legal services) should not exceed 10% of the estimated and/or budgeted TOT revenues.

Request for Community Investment funds from departments will be reviewed annually on a case-by-case basis.

1. **Collections/Audit Services:**
   Revenue and tax collection services and program and grantee audit services are provided for this Program. Funding shall be recommended by the County Administrator's Office annually to fund these activities.

2. **Legal Services:**
   Legal guidance, advice, interpretation and other related services are provided for this Program. Funding shall by recommended be the County Administrator's Office annually to fund these activities.

3. **Program Administration Services:**
   Administration of this Program, including policy management and review, budget management and review, application review and recommendation, contract management, claims processing, and other related activities are provided by the County Administrator's Office. Funding shall by recommended be the County Administrator's Office annually to fund these activities.

E. Measure L Revenue

The Board of Supervisors will track and distribute the 3% "Measure L increase" to TOT separately. The categories established for Measure L funding distribution are based on the educational information provided to voters as part of the Measure L campaign. Amendments to these funding commitments will be considered at the discretion of the Board of Supervisors.

1. **Roads Repair and Improvement, 20%**
   To mitigate the impact of increased vehicles on roads in the unincorporated area of Sonoma County, the Board of Supervisors commits a total of 20% of Measure L revenue to Transportation and Public Works (TPW) for improvements to local roads. Funding will support projects included in the annual TPW Roads Plan.

2. **Regional Parks, 20%**
   A total of 20% of Measure L funds will be used to fund Regional Parks, effective for Fiscal Year 2017-18 and Fiscal Year 2018-19. Funding in this area for the Regional Parks Department will be prioritized to increase public access and support the development of new park facilities.

3. **Fire Services, 20%**
   It is in the interest of the county to provide for the safety and emergency care of residents and visitors. The tourism industry, while beneficial for the health and economy of the county, can strain the agencies responsible for emergency response. To help alleviate this strain and to encourage greater regional consolidation within the county's fire system, funds will be directed at the discretion of the Board of Supervisors to the Fire and Emergency Services Department for distribution. The Department will make recommendations for investment in the county fire and emergency response system based on input from the Fire Services Advisory Council and county-wide needs. The Board of Supervisors will prioritize recommendations that further regional consolidation, provide equipment and personnel support in high risk areas, and provide increased response coverage in underserved/high risk areas of the county.

4. **Affordable Housing, 13%**
   The Board of Supervisors recognizes that vacation rentals and other impacts from tourism result in an increased need in affordable housing. A total of 13% of Measure L revenue will be distributed for affordable and workforce housing partnerships, for housing and rent stabilization, and for homeless services. Funds shall be allocated to the existing County Fund for Housing (CFH) as well as to homeless services needs, administrated by the Community Development Commission.

5. **Code Enforcement and Operator Compliance, 8%**
   A total of 8% of Measure L funds will be used to enhance administration of this Program, including revenue and tax collection services and program and grantee audit services as well as code enforcement and operator compliance related activities. Funding shall be recommended by the County Administrator's Office within the annual budget process to fund these activities.

6. **Event Facilities Improvements, such as Veteran's Halls, 9%**
   The Board of Supervisors desires to provide 9% of Measure L funds to County owned facilities that enhance recreational activities that benefit local tourism and the tourist industry, including, but not limited to Veterans Halls (under contract or managed by the General Services Department).

7. **Tourism Impact Fund, 10%**
   This fund has been established to meet unique and urgent needs of areas within unincorporated Sonoma County that are most impacted by tourism. A total of 10% of Measure L revenue will be distributed to mitigate the impacts of tourism in communities. The Board of Supervisors will consider these needs on semi-annual basis. Funds will be allocated to each Supervisorial District proportionate to the amount of TOT collected by the District in the previous fiscal year. Unused funds in a single fiscal year will be accounted for and available in following years.

   Funds in this category may be used for activities such as safety improvements (e.g. lighted and/or marked crosswalks, traffic calming devices), environmental impact mitigation (e.g. removing trash from beaches, waterways, and areas with high tourist traffic), public safety (e.g. Fire Services), and other tourism mitigation activities, such as parking enforcement in heavily trafficked areas. Requests for funding will be processed through the County Administrator's Office on a semi-annual basis. Staff will present recommendations for funding to the Board of Supervisors for approval.

Title: Federal Advocacy Professional Service Agreements

Recommended Actions:

Authorize the County Administrator to execute agreements for federal advocacy services:

A) Van Scoyoc Associates for a term of July 1, 2018 – December 31, 2020 at a rate of $5,000 per month to provide federal legislative advocacy related to health services, transportation, and tribal issues, and to include overall legislative coordination and strategy; and
B) Alcalde & Fay for a term of July 1, 2018 – December 31, 2020 at a rate of $4,500 per month to provide federal legislative advocacy related to general needs and to include overall legislative coordination and strategy.

Executive Summary:

Federal legislative advocacy has been critical to the County's recent recovery efforts in addition to maintaining and generating new sources of federal funding for Sonoma County. Federal revenue for Sonoma County priority areas is under increased threat from legislative or programmatic reductions. Continued legislative advocacy efforts are critical to advancing key issues and programs.

The County currently has contracts with Alcalde & Fay and Van Scoyoc Associates which were awarded after a solicitation process in 2013. In 2013, a request for proposals was released by the County Administrator's office to a comprehensive list of firms. Five proposals were received in response to the request and a decision was made to award to three firms in order to leverage specific areas of expertise including Alcalde & Fay and Van Scoyoc Associates. The third agreement, with Bluewater Strategies has not been renewed.

In response to the October 2017 wildfires, the County's legislative advocacy focus shifted largely to the County's recovery efforts. Given the ongoing advocacy efforts for recovery and recent staff changes in legislative affairs, it is recommended that we maintain existing agreements with contractors that are familiar the county's federal advocacy history and the recent activities related to wildfire recovery efforts.

Discussion:

Van Scoyoc Associates

Van Scoyoc Associates (VSA) is an independent full-service government affairs firm in Washington, D.C. and uses affiliated firm Capital Decisions, Inc. (CDI) to support County efforts. VSA/CDI is focused on three federal issues for the County: health care, transportation, and tribal issues.

CDI provides federal advocacy to the County on health care related issues. During this legislative session, CDI has provided consistent updates related to the County priorities in addition to providing input to the County's federal legislative platform. CDI also supports the County's advocacy efforts in Washington, D.C. by arranging and participating in meetings with key federal policymakers on priority issues related to health care.

CDI has actively advocated for the Affordable Care Act. While congressional repeal and replace efforts were unsuccessful in 2017, the effort by the current Administration to undo the law by regulation continues and CDI will support the County's efforts to monitor and guide our advocacy on this issue.

CDI advocacy efforts this session include:

- Reauthorization of The Maternal, Infant, and Early Childhood Home Visiting Program as part of the Bipartisan Budget Act of 2018
- Portions of the Trauma-Informed Care for Children and Families Act are included in the Opioid Crisis Response Act, S. 2680, which was unanimously approved by the Senate Health, Education, Labor and Pensions (HELP) Committee in April. S. 2680 may be voted on by the full Senate as part of a legislative package to address the opioid misuse and overdose epidemic

CDI is participating in the development of the Sonoma County 2019-2020 Legislative Platform by providing federal legislative updates related to health care.

VSA provides federal advocacy to the County on transportation related issues. During this legislative session, VSA has provided consistent updates related to the County priorities in addition to providing input to the County's federal legislative platform. VSA also supports the County's advocacy efforts in Washington, D.C. by arranging and participating in meetings with key federal policymakers on priority issues related to transportation and tribal issues.

Recent transportation advocacy in key priority areas include providing the County with information on new Administration nominations which impact transportation efforts, in addition to consistent communications on federal appropriations and grant opportunities.

VSA transportation advocacy efforts this session include:

- FY 2018 and FY 2019 Department of Transportation appropriations summaries
- Federal Aviation Administration Reauthorization bill summary
- One Federal Decision Memorandum of Understanding (MOU) which established a coordinated process for environmental reviews of major infrastructure projects
- Grant information on Transportation Investment Generating Economic Recovery and Transit Bus grant opportunities

VSA has also actively engaged County transportation staff by providing transportation updates via email and discussing relevant updates via conference calls, in addition to guiding efforts to seek support from local delegation members.

VSA also provides federal advocacy to the County on tribal related issues. During this legislative session, VSA has provided consistent updates related to the County tribal related priorities in addition to providing input to the County's federal platform.

VSA tribal updates include:

- Policy updates on the fee-to-trust application process, placing decision-making authority with the Deputy Secretary
- Mark up of the Lytton Rancheria Homelands Act H.R. 597
- Bureau of Indian Affairs appointments

VSA continues to seek opportunities to inform legislative advocacy in support of the County's recovery and resiliency efforts. VSA is currently participating in the development process of the Sonoma County 2019-2020 Legislative Platform by providing federal legislative update related to transportation and tribal related issues.

Alcalde & Fay

Alcalde & Fay, an independent advocacy firm, has served as the County's primary advocate on general legislative issues. Alcalde & Fay has a proven track record of serving the County, by advocating for funding within the Army Corps of Engineers budget for dredging of Bodega Bay and the Petaluma River, two priority projects for the County. Alcalde & Fay has also been a primary advocate in supporting recent recovery efforts.

During this legislative session, Alcalde & Fay has advocated to federal agencies on our behalf to increase appropriations in programs of direct impact to the County in addition to providing updates in County priority areas. Alcalde & Fay continues to monitor the Emergency Management Performance Grants (EMPG), Family Violence/Battered Women's Shelters, Geothermal Royalties, Section 8 Housing Choice Voucher Program, and Homeless Assistance Grants.

Alcalde & Fay updates include:

- Continued monitoring of EMPG as it was not increased in FY 18 and the Administration has sought a $71 million cut to the program in FY 2019
- Family Violence/Battered Women's Shelters program increase of $9 million as part of the FY 2018 Omnibus appropriations bill and the Administration did not seek to return to FY 17 funding level in FY 2019
- Geothermal royalties to counties eliminated in FY 2019 Administration proposed budget; however, the proposal was rejected by both the House and Senate in their Interior spending bills and currently undergoing conference negotiations
- Section 8 Housing Choice Voucher Program inclusion in the FY 2018 Appropriations bill and included an increase of $1.2 billion for voucher renewals. The FY 2018 omnibus included an increase of $130 million from FY 2017

Alcalde & Fay is participating in the development of the Sonoma County 2019-2020 Legislative Platform by providing federal legislative updates on general county issues.

Staff recommends the approval of federal advocacy services agreements with current firms through December 31, 2020 to continue federal legislative advocacy related to fire recovery and to allow for the development of a legislative platform informed by recent efforts with current Administration. Request for proposals for federal advocacy services will be released in the fall of 2020 to allow for potential contractor transitions at the end of the 2020 legislative session.

Prior Board Actions:

June 24, 2014: Board awarded contracts for federal advocacy services with Van Scoyoc Associates, Alcalde & Fay, and Bluewater Strategies after a Request for Proposals process
November 3, 2009: Board awarded contracts for federal advocacy services with Madison Government Affairs, Inc. and Alcalde & Fay after a Request for Proposals process
November 20, 2012: Board extended the contracts for 1 year with direction to conduct a competitive solicitation in 2013

Strategic Plan Alignment Goal 4: Civic Services and Engagement

Fiscal Summary

Expenditures	**FY 17-18 Adopted**	**FY 18-19 Projected**	**FY 19-20 Projected**
Budgeted Expenses	114,000		
Additional Appropriation Requested			
Total Expenditures	**114,000**		
Funding Sources			
General Fund/WA GF	114,000		
State/Federal			
Fees/Other			
Use of Fund Balance			
Contingencies			
Total Sources	**114,000**		

Narrative Explanation of Fiscal Impacts:

This amount is budgeted from General Fund resources. These advocacy agreements allow the County to strengthen Board and Department led efforts in protecting and enhancing state and federal revenues. The County receives approximately between $470-500 million in intergovernmental revenues annually. These sources are often at risk from federal and state policy changes.

Title: Recovery Update

Recommended Actions:

Receive update from the Office of Recovery and Resiliency on the status of recovery operations, planning, seeking of funding opportunities, community engagement and status of recovery plan.

Executive Summary:

The aftermath of the October 2017 Sonoma Complex Fires presents ongoing risks to the residents, property, and environment of Sonoma County. Office of Recovery and Resiliency staff provides the Board regular updates on recovery efforts, including debris removal and other structural developments; external funding efforts; relevant legislation; ongoing community engagement; and status of the Recovery & Resiliency Plan being prepared by the Office.

Discussion:

In the early morning hours of October 9, 2017, County staff activated the Emergency Operations Center in response to the Sonoma Complex Fires, which burned 173 square miles and destroyed over 7,000 structures, including 5,300 homes. During the response phase, the County began planning for the recovery from the fires. On December 19, 2017, the Board of Supervisors established the Office of Recovery and Resiliency (Office) with the mission to develop a strategy that addresses the immediate and long-term recovery and resiliency efforts needed to help Sonoma County rebuild and recover from the wildfires. This Office continues to actively pursue recovery efforts, and to work with other County departments, agencies, and districts to assist Sonoma County residents in the process of rebuilding.

In an effort to keep the Board and community informed about the most current developments in the County's recovery efforts, the Office prepares a standing agenda item for each Board meeting, typically included on the consent calendar. Each update includes information on: (1) Ongoing Recovery Efforts and Structural Changes; (2) Recovery Related External Funding Opportunities; (3) Legislative Update; and (4) highlights of activities on the horizon (Looking Forward). New items and updated counts and figures are in bold.

1. Ongoing Recovery Efforts and Structural Changes

A. <u>Debris Removal</u>

1. Debris removal is in the final stages for both the Government-Sponsored Program and the Alternative Program (private debris removal). About 25 percent of property owners who lost homes opted to use a private contractor for debris removal.
2. Government-Sponsored Program:
   A. Active properties: **3,689**
   B. Properties cleared by Army Corps of Engineers: **3,689**
   C. Properties returned to owners by County to start rebuilding: **3,689**
3. Private Debris Removal:
   A. County: **763** residential properties accepted; **717** certified as finished and ready to rebuild
   B. City: **450** properties accepted; **433** finished and ready to rebuild
4. USACE Hotline:
   A. The U.S. Army Corps of Engineers in May stopped accepting new debris removal complaints on its hotline for Sonoma County. The Office of Recovery & Resiliency has assumed the role of receiving new debris complaints via a new number (707-565-1222).
5. Over-Excavation Program:
   The California Office of Emergency Services is working with the City of Santa Rosa and County to address over-excavation issues that occurred as part of the Government-Sponsored Debris Removal Program. Cal OES is assessing properties. For properties that meet over-excavation criteria, the State's contractor is working to replace soil to appropriate elevations. As of July 27, **586 requests for site assessments have been received; 252 have been ruled eligible for backfill program; 12 sites are pending eligibility; backfilling of 102 sites has been completed.**
6. Free chipping service:
   A free chipping program to assist with removal of burned vegetation debris and to help residents create defensible space around homes and reduce vegetation along access routes is being offered through Sonoma County Fire and Emergency Services. County crews will come to homes and chip for three hours for free. For more information, including how to apply, use this link: https://sonomacounty.ca.gov/FES/Fire-Prevention/Curbside-Chipper-Program/
7. Burned trees/vegetation along County roads
   A. Transportation and Public Works has awarded a contract to Piazza Construction to have brush and felled trees removed on Bennett Valley Road. Contracts to have brush and felled trees removed on Lawndale and Schultz roads will be awarded soon, with all work starting in August.
   B. TPW is working with County Fire and Emergency Services and PG&E on vegetation management within the road right-of-way.
   C. TPW will be bringing an item to your Board to approve a contract for guard rail installation to replace the posts and guardrails burned during the fires.

8. Two cameras installed, quickly used to battle wildfires

Two fire cameras were recently installed and are now operational in Sonoma and Lake counties through a partnership between Sonoma Water and the University of Nevada, Reno.

The first camera was installed on Pine Mountain in Cloverdale on July 27. Cal Fire as incident commander made use of the new tool almost immediately. On August 5, another fire camera was installed at Mount Konocti in Lake County. Cal Fire again quickly took control of the camera to assist in fighting the Mendocino Complex Fires. The state-of-the-art system uses near-infrared technology for night vision, and allows fire officials to take control of the cameras during wildfire emergencies to monitor fire and weather activity. The two cameras are part of a larger pilot project approved for funding on August 7, 2018, by your Board to install a wider network of fire cameras that will monitor Lake Sonoma and surrounding areas. Sonoma Water's leadership in initiating the project is a successful first step in collaborating with partners to improve the County's situational awareness and protect the drinking water supply for more than 600,000 residents in Sonoma and Marin counties. The project is a collaboration among numerous agencies, including Sonoma Water, Sonoma County Fire and Emergency Services, Sheriff's Office, County Information Services Department, County General Services Department, Pepperwood Preserve, Fairfield Osborn Preserve, Sonoma State University, The Regents of the University of California, Scripps Institution of Oceanography (UC San Diego), and the AlertWildfire consortium of universities. Members of the public can monitor both cameras and others as they become active on the University of Nevada, Reno - Nevada Seismological Laboratory website at www.alertwildfire.org/northbay/ The first hour of footage from Mount Konocti is available at www.youtube.com/watch?v=zjE6MPLM3QY.

B. Renewal Enterprise District and Build/Rebuild Ad Hoc Update

The Renewal Enterprise District (RED) is being proposed by the Build/Rebuild Ad Hoc committees of the County and City of Santa Rosa to provide financing and regulatory certainty for housing projects and supportive infrastructure within targeted development areas of Sonoma County. Your Board authorized moving forward with development of a Joint Powers Authority (JPA) between the County and the City of Santa Rosa on June 13, 2018; similar direction from the City Council was given on July 10, 2018.

Members of the Ad Hocs have identified that current regulatory, land use and financing systems create barriers to the development of new housing, and this situation is severely compounded by the loss of some 5,300 homes in the wildfires. A new regional construct that lowers cost and reduces development risk is required to enable Sonoma County communities not only to rebuild lost housing, but also address the severe, already existing shortage. To tackle these issues, RED seeks to regionalize housing production, pool and leverage financing and funding, share risks and benefits of development in new ways, streamline environmental review while providing confidence in good projects, and put equity, affordability and climate solutions in the center of our local economic strategies.

As being drafted, RED will have a governance structure that gives it broad authority to pool and leverage financing and will enable streamlined environmental review for local plans and projects that meet goals for density, use of climate-smart and resilient technologies, protection of community separators, and affordability and equity. RED will build on existing regional planning

efforts, and focus its regulatory and financial incentives on developments within locally designated employment investment and priority development areas.

Next steps for RED:

1) Form Joint Powers Authority
   a) Work with Ad Hocs to develop JPA
   b) JPA will come back to Board for approval, along with start-up budget
2) Track and support legislation
3) Continue to facilitate development projects that meet RED objectives
   a) Formalize RED criteria
   b) Actively pursue new capital sources to incentivize target development types
   c) Prepare County-owned property for development
4) Deepen collaboration with array of public and private partners
   a. Work with Ad Hocs to articulate two-year work plan

C. Rebuilding Permits

1. County has issued **408 building permits for homes**; **3 homes have been finished; 227 permits are in process**. For latest numbers, go to http://sonomacounty.ca.gov/PRMD/Administration/Rebuilding-Permits-Data/
2. City of Santa Rosa has issued **620 building permits for homes**; **7 homes have been finished; 316 permits are in process**. For latest numbers, go to https://www.srcity.org/2675/Rebuilding

2. Recovery-Related External Funding Opportunities

A. Disaster Recovery Consulting Services Agreement

On July 10, 2018 your Board authorized the County Administrator to execute the Agreement for Consulting Services with Horne, LLP (Consultant) for as-needed disaster recovery consulting services and grants management support for Federal disaster funding for a term of three years, with the option for two 1-year extensions. Your Board also authorized the County Administrator, or designee(s), to issue and execute Task Orders per disaster recovery funding stream, up to total amounts not to exceed those specified in the Agreement. Each Task Order will reflect specifics of programming and projects and other circumstances, allowing the County to scale up or down as disaster recovery needs are identified and evolve. Individual Task Orders will be issued by the Office of Recovery and Resiliency for respective programs, projects, grant applications, or other disaster recovery-specific services, as authorized and overseen by the County Administrator. The Office of Recovery and Resiliency is currently developing the first Task Orders for the following activities:

1. CDBG-DR General Pre-Award Activities (capacity assessment, unmet needs assessment, attend community meetings, meet with key leaders and staff, provide trainings, coordinate with State)
2. FEMA HMGP Application Development

Consultant will likely assist with FEMA Public Assistance in upcoming Task Orders, and they may assist with other recovery-related external funding needs as well. Your Board will receive a presentation from the Consultant in September.

B. Community Development Block Grant – Disaster Recovery

Announcement of $212 million: On April 10, 2018 the U.S. Department of Housing and Urban Development (HUD) issued a press release stating that California would be receiving $212 million to support long-term disaster recovery through the Community Development Block Grant – Disaster Recovery (CDBG-DR) program. This allocation is a portion of the total $28 billion that HUD set aside for disaster recovery efforts in nine states, Puerto Rico, and the U.S. Virgin Islands. The $212 million appropriated to California consists of two awards: $124 million for unmet disaster recovery needs, and $88 million for preparedness and mitigation.

Eligible Uses of Funds: Eligible uses of these funds often include new housing construction and housing rehabilitation, preparedness and mitigation measures to reduce costs of future disasters (including use of fire resistant materials, design and location), repair or replacement of damaged infrastructure and public facilities, economic revitalization, and long-term recovery. To be eligible, projects and programs must demonstrate that they serve a need not being met by other funding sources. Eligible recipients of funds are state and local governments. These funds do not provide individual cash assistance to fire survivors, but rather fund projects and programs that benefit impacted households and businesses. All funded activities must clearly address an impact of the October fires. Funds are targeted to benefit low and moderate income persons, to prevent and eliminate slums and blight, and to meet urgent needs.

Current Status: The April 10, 2018 announcement is the official notice regarding these funds. These funds were allocated by congress to HUD. HUD is to follow the allocation with publication of a Federal Register Notice allocating the funds to grantees and outlining and waivers and alternative requirements for the CDBG-DR funds. The Federal Register Notice has not yet been released. Assuming the yet-to-be-released Federal Register Notice is similar to other recent notices issued, the grantee will likely be the State of California, and the program will be administered by the California Department of Housing and Community Development (HCD). The Federal Register will likely lay out the following set timelines for the grantee (likely to be HCD) to submit required documents:

1. Grantees have 60 days from the release of the Federal Register Notice to submit Financial Management and Grant Certifications Checklist and the Implementation Plan and Capacity Assessment to HUD.
2. Grantees have 120 days from the release of the Federal Register Notice to submit an Action Plan, which includes an unmet needs analysis, method of distribution, proposed programs, and other administrative requirements outlined in the Federal Register Notice.

While it remains to be determined by HUD, State HCD anticipates that the Federal Register Notice regarding the $124 million for unmet disaster recovery needs will be published first, and the Federal Register Notice for the $88 million in mitigation to be posted separately. This is entirely dependent on HUD, however. This funding will not be available for projects within

Sonoma County until 2019 or later, although significant work will be undertaken leading up to that.

Activities To Date: The Office of Recovery and Resiliency and the Community Development Commission are actively collaborating with one another, the City of Santa Rosa, other partners, and State HCD regarding next steps. The County and the City of Santa Rosa continue to provide HCD with data for the disaster recovery unmet needs analysis. The unmet needs analysis should include information on all sectors of unmet needs: housing, economy, safety net, social services, environmental, infrastructure, etc. This information will inform development of the Statewide Action Plan. The Office of Recovery and Resiliency and Community Development Commission are working with County departments and partners, such as Rebuilding Our Community Sonoma County, to identify and collect appropriate data for the unmet needs analysis.

C. FEMA Hazard Mitigation Grant Program

Background: County Departments and Districts submitted Notices of Interest to the California Governor's Office of Emergency Services (Cal OES) for the Federal Emergency Management Agency's (FEMA) Hazard Mitigation Grant Program (HMGP) on January 30, 2018 for DR-4344, March 15, 2018 for DR-4353, and June 15, 2018 for round 2 of DR-4344. FEMA HMGP can fund up to $5 million or 75% of total project costs (whichever is less) for projects that eliminate or reduce damage from future natural disasters. Cal OES estimates that there is approximately $333 million statewide in available funds from the October fires, also known as DR-4344, and approximately $56 million statewide from the December Southern California fires, known as DR-4353. In California, these funds are administered by the Cal OES HMGP Grants Management Unit. The funding is open and competitive statewide for both DR-4344 and DR-4353. The HMGP can be used to fund projects to protect either public or private property, and can be to mitigate any natural hazard, not only wildfires.

Current Status: The County, along with the Sonoma County Water Agency, and the Sonoma County Agricultural Preservation and Open Space District are working to develop 20 potential HMGP applications, with a deadline for submittal to CalOES by September 4, 2018. The list of potential HMGP applications is attached to this Board item. Your feedback is welcome on these potential projects.

The countywide Grant Steering Committee has been working with Departments and Districts to determine and prioritize feasible grant applications based on success criteria, match funding sources, and leadership priorities. The Grant Steering Committee has met regularly since April to review and strategize pursuing eligible HMGP projects, and will continue to do so as needed. The list of applications in development changes weekly based on match funding sources, project developments, and capacity. Each application requires approximately 200 hours of labor, thus they are costly and must be pursued strategically. Additionally, each application competes against the others – even with the significant funding this is anticipated to be highly competitive, and all Sonoma County applications will compete against one another. We anticipate the list of final applications submitted to continue to evolve. For those

applications that are not moving forward under FEMA HMGP, the Grant Steering Committee is seeking appropriate alternative funding sources.

DR-4344 Round 1 HMGP Applications Submitted on July 2

- 8 applications submitted
  - $17.4 million in total project costs ($13.1 million in federal share, $4.3 million in local match). $500,000 in general fund match.
  - Applications submitted by Community Development Commission (1), General Services (1), Sonoma County Water Agency (3), and Transportation and Public Works (3)

DR-4353 HMGP Applications In Development for September 4

- 2 applications being considered for development

DR-4344 Round 2 HMGP Applications In Development for September 4

- 18 applications being considered for development

Between DR-4353 and DR-4344 Round 2, due on September 4, 2018, there remains a total of 20 NOIs being considered for development. These are from Fire and Emergency Services (4), General Services (4), Information Systems Department (2), Regional Parks (1), Permit Sonoma (4), Open Space District (1), Sonoma County Water Agency (1), Transportation and Public Works (3). The current totals for these potential HMGP applications are: $61.9 million ($32.6 million in federal share, $29.3 million in local share), with $27.4 million in potential general fund local share. Updated NOI lists are attached. Members of your Board are invited to comment on the lists.

After meeting the July 2 and September 4 deadlines, Cal OES will then review the applications and determine which will be submitted to FEMA for review and final approval. All projects receiving HMGP grant funding must be completed within three years.

D. <u>FEMA Public Assistance</u>

The Disaster Finance Team (consisting of participants from the Auditor-Controller Treasurer-Tax Collector, County Administrator's Office, and County Counsel) is working with FEMA and Cal OES to prepare 22 project worksheets to claim reimbursement for response and recovery costs associated with the October 2017 fires, as well as repair/replacement costs for damages sustained to County property that are not covered by the County's insurance policies. These claims are being submitted through the FEMA Public Assistance Program.

As of July 27, 2018, the Disaster Finance Team estimates the County's total disaster related costs qualifying for FEMA's Public Assistance Program will be approximately $37M, of which we anticipate the County will be reimbursed approximately $36M over the next 2 to 5 years. FEMA has obligated 13 of the 22 projects and the County has received $9.1M in expedited reimbursement funding and $246K for small permanent projects managed by Regional Parks and Transportation and Public Works.

The Disaster Finance Team is in the process of collecting and reviewing supporting documentation for approximately $13M ($1.9M paid out) in Mutual Aid/Assistance provided

by 85 law enforcement agencies, 17 EMMA jurisdictions, 12 shelters, and 12 agencies through the Department of Health during the fires and continues to work with FEMA, CAL-OES and County Departments to finalize the remaining **9** project worksheets. Claims for reimbursement will be filed with FEMA as additional disaster related costs are incurred and documentation is compiled. The Disaster Finance Team is also in the process of reviewing labor reports and personnel activity logs, and working with County Departments to reconcile approximately $6M in fire related labor costs that may be eligible for reimbursement.

E. Economic Development Administration – Disaster Supplemental Funding

Economic Development Administration (EDA) has an open funding opportunity to award grants to eligible entities to address economic challenges in disaster-impacted areas. Multiple County departments are considering potential projects, including the following four. Other projects are also being explored for eligibility.

1. Project 1 - Revolving Loan Fund: Sonoma County Economic Development Board as lead applicant. Revolving loan fund to provide credit to Sonoma County entrepreneurs who are traditionally excluded or denied loans from mainstream financial institutions.
2. Project 2 – Broadband Expansion: Sonoma County as lead applicant. The EDB is working with the Office of Recovery and Resiliency, Department of Transportation and Public Works, and Information Systems Department to develop a project for the design/engineering and potential installation of broadband in rural areas of the County that serve local businesses, promote job creation/retention, and economic resiliency.
3. Project 3 - Regional Construction and Trades Training Center: Santa Rosa Junior College as lead applicant. The EDB is working closely with EDA officials, local construction/trades stakeholders, and Santa Rosa Junior College to propose building a Construction Training Center to train the county's construction workforce of the future.
4. Project 4 - AgTech Incubator: Santa Rosa Junior College as lead applicant. The EDB has engaged in preliminary talks with Benjamin Goldstein, Dean of Agriculture/Natural Resources & Culinary Arts at SRJC. The project goal would be to create a business incubator at the SRJC to develop a possible "talent pipeline" for local agriculture and food/beverage manufacturing. This project concept has support from the SRJC and EDA.

F. **CAL FIRE Grants for Fire Prevention**

On June 6, 2018, two grants were submitted by County departments to the CAL FIRE Fire Prevention grant program. The CAL FIRE Fire Prevention grant program, funded by the California Climate Investments (CCI) fund, aims to reduce the risk of wildland fires to habitable structures and communities, while maximizing carbon sequestration in healthy wildland habitat and minimizing the uncontrolled release of emissions emitted by wildfires. Grant applications were due June 6, 2018. $195 million was available between this program and the CAL FIRE Forest Health grant program (application period for this closed in Spring 2018). The projects submitted by County departments on June 6, 2018, are:

1. **Northwest Roadway Safety, Fuels Reduction, and Community Chipper and Engagement Project (Transportation and Public Works [TPW] is lead, in partnership with Fire and Emergency Services [FES] and Fire Safe Sonoma, Inc.)**
    a. **Total: $1,237,541; CAL FIRE $1,082,969; Match: $154,572**

b. **Match source: $131,300 is from General Fund FY 2018 set aside; $23,272 from in-kind volunteer labor tracked by Fire Safe Sonoma**

2. Sonoma County Parks and Open Space Fire Resilience Planning (Regional Parks is lead, in partnership with Open Space District).
    a. Total: $593,537; CAL FIRE: $511,920; Match: $81,618
    b. Match source: Open Space staff time

On August 3, 2018, CAL FIRE informed TPW that their CAL FIRE Fire Prevention application is selected for funding. The full grant agreement is expected in late September. TPW and FES are partners on the project, and will work closely to complete the required grant agreement documents and implement the project. The County Administrator's Office is working on a Press Release to announce this significant development. A determination has not yet been received on the Regional Parks application.

G. <u>California Employment Development Department - Emergency Dislocated Worker Additional Assistance Grant</u>

The Sonoma County Workforce Investment Board (WIB) applied for and has been awarded an Emergency Dislocated Worker Additional Assistance Grant from the California Employment Development Department to assist dislocated workers affected by the October wildfires. The grant award is $3,258,473.41 for eighteen months beginning March 1, 2018. The grant funding will allow the WIB and Job Link to provide 1) Quick, business-focused assistance in response to layoffs and/or businesses closing, including layoff prevention; and 2) re-employment assistance for workers who have lost their jobs because their employers' businesses have been destroyed and/or otherwise impacted by the fires. This funding will support staffing for the anticipated increase in the needs of local business as well as providing basic and individualized career services for approximately 700 of the 4,751 disaster-related unemployment claimants. In addition, the grant will provide staffing, training, and supportive services needed to provide 200 Dislocated Workers with reemployment assistance, including a concerted effort to train and employ at least 30 of these Dislocated Workers in the Building and Trades Industry.

H. <u>Crisis Counseling Assistance and Training Program Grant</u>

The Crisis Counseling Assistance and Training Program (CCP) is administered in Sonoma County through the County Department of Health Services, Behavioral Health Division (DHS-BHD). The CCP helps individuals and communities recover from natural and human-caused disasters through community outreach, counseling, and access to mental health services for survivors of these disasters. This program is funded from a variety of sources. The initial recovery work is being supported by short-term disaster relief grants from FEMA for $4.3M, awarded in two phases after the DR-4344 presidential disaster declaration. The CCP grant from FEMA ends in January 2019, and the Sonoma County DHS recognizes that the scope of this disaster will require continuation of CCP efforts to support ongoing recovery well beyond 2018. Sonoma County DHS applied to Kaiser Permanente for $1M, which would be leveraged to secure an additional $2M, all of which will continue CCP up to September 2019.

I. Coordinate other Recovery-Related Grant and External Funding Opportunities

The Office of Recovery and Resiliency is tracking, investigating, and coordinating other grant opportunities for recovery-related priorities as well. When new opportunities are announced, Grant Summaries and targeted information is provided to County Departments. A comprehensive list of recovery-related external funding opportunities is being developed within the County Administrator's Office, and the status of actions taken is being tracked.

3. Legislative Update

A. **Legislative Advocacy**

The Board of Supervisors and County Administrator's Office continue to update the local delegation on fire recovery efforts and advocate for resources to support full recovery and resiliency. **A current list of disaster response and recovery bills is attached**.

4. Looking Forward

A. **Recovery and Resiliency Framework**

1) Community Engagement

The Office of Recovery and Resiliency Staff continues to engage with key community partners through participation in community meetings, partnering on data gathering efforts, and utilization of partner input to shape the recovery planning process. Community members are encouraged to submit recovery related feedback, input, and questions to info@sonomacountyrecovers.org. Community members can also submit input through an online survey available on the Office of Recovery and Resiliency's website: https://sonomacounty.ca.gov/ORR.

In addition, the Office will use these community engagement components to gain feedback and input to inform the Framework, including:

(i) Recovery Planning Community Meetings: The Office will hold Recovery Planning Community Meetings to obtain feedback on the Draft Framework and expand a public discussion to gain insight and identify critical changes to the Draft Framework. The first five sessions were held on:
Tuesday, July 10: County Office of Education in Santa Rosa. About 65 members of the public participated in small group discussions and provided input.
Wednesday, July 11: Sebastopol Center for the Arts in Sebastopol. About 60 members of the public participated in small group discussions and provided input.
Wednesday, July 25: Petaluma Community Center. About 40 members of the public participated in small group discussions and provided input.
Thursday, August 2: Finley Community Center, Santa Rosa. About 70 members of the public participated in small group discussions and provided input.
Wednesday, August 8: Sonoma Veterans Building, Sonoma.

Two additional forums will be held in Spanish:

Tuesday, August 28, 6-8pm: Lawrence Cook Middle School, 2480 Sebastopol Rd., Santa Rosa
Wednesday, September 5, 6-8pm: La Luz Center, 17560 Greger St., Sonoma

For logistics and planning purposes, the Office of Recovery and Resiliency requests that community members RSVP by emailing recoveryinfo@sonoma-county.org. Additional information, including meeting materials, in English and Spanish are available on the Sonoma County Office of Recovery website at https://sonomacounty.ca.gov/ORR/.
Members of the public are invited to complete an online survey to provide input into the draft Recovery and Resiliency Framework: Survey
For information regarding Sonoma County's overall recovery efforts, visit www.sonomacountyrecovers.org.

(ii) Office staff are proactively reaching out to stakeholders throughout the community seeking opportunities to update them on County recovery activities as well as receiving input to inform recovery planning.
Here is a sampling of groups, businesses, nonprofits, stakeholders and outside agencies and governments that Office staff have met with since early June 2018:
Blue Forest Conservation
Burbank Housing
Cal Fire
California Department of Fish and Wildlife
California Human Development
Catholic Charities of Santa Rosa
Chandi Hospitality Group
City of Cloverdale
City of Healdsburg
City of Petaluma
City of Santa Rosa
Community Action Partnership of Sonoma County
Community Foundation
Crop Performance
District 1 Block Captains
District 3 Block Captains
District 4 Block Captains
Emergency Council
FEMA Office of Civil Rights & Liberties
Graton Day Labor
Green Belt Alliance
HALTER Project
Hanna Boys Center
Hispanic Chamber of Commerce
Kaiser Permanente
Keysight
Laguna de Santa Rosa Foundation
LandPaths
Los Cien

Matt Greene Forestry
Medtronic
NOAA Fisheries
North Bay Labor Council
North Bay Leadership Council
North Bay Trades Council
North Coast Builders Exchange
North Coast Regional Water Quality Control Board
Pacific Gas & Electric
Pepperwood Preserve
Preserve Rural Sonoma County
Rebuild Northbay Foundation
Rebuilding Our Community Sonoma County
San Diego County
San Francisco Bay Regional Water Quality Control Board
Santa Rosa Junior College Faculty
Santa Rosa Metro Chamber
Sierra Club
SoCo Rises
Sonoma County Alliance
Sonoma County Conservation Action
Sonoma County Forest Working Group
Sonoma Media
Sonoma Valley Unified
Town of Windsor
UC Berkeley
United Way of the Wine Country
University of California Cooperative Extension
Urban Land Institute
Wildlands Conservancy

Upcoming Recovery engagement:
August 17, Ag Innovations, Fire Smart Lake Sonoma event
August 24, UCCE, Before Fire Strikes seminar

(iii) **Recovery Board Workshops:** The Board of Supervisors completed the fifth in a series of Board Workshops focused on each of the critical areas of recovery. On August 7, 2018, the Department of Health Services, Human Services Department, and the Office of Recovery and Resiliency, provided an update on Safety Net Services Recovery community needs and information on county and community services that are being provided to meet these needs. The Workshop included presentations from community organizations, including Sonoma County Office of Education, SoCo Rises, ROC Sonoma County, North Bay Organizing Project, Wildfire Mental Health Collaborative, and the Community Foundation Sonoma County.

In February and March, 2018, the Board held workshops on the other four critical areas of recovery, including Housing, Community Preparedness and Infrastructure, Economy, and Natural Resources.

2) Timeline: Community Input into the Recovery and Resiliency Framework is being accepted through August 10, 2018. The Framework will be brought to your Board for consideration in September 2018.

Prior Board Actions:

August 7, 2018 – Recovery Update on the status of recovery operations, planning, seeking of funding opportunities and community engagement.
August 7, 2018 – Renewal of Emergency proclamations.
July 24, 2018 –

A) Recovery Update on the status of recovery operations, planning, seeking of funding opportunities and community engagement.
B) Receive an update from California Office of Emergency Services on debris removal progress.

July 10, 2018 – Renewal of Emergency proclamations.
June 13, 2018 – Received presentation on Draft Plan.
June 11, 2018 – Renewal of Emergency proclamations.
May 22, 2018 – Recovery Update on the status of recovery operations, planning, and seeking of funding opportunities.
May 8, 2018 – Renewal of Emergency proclamations.
March 20, 2018 – Renewal of Emergency proclamations; disaster fiscal update; authorized appropriations of $9.5 million to the Disaster Response & Recovery Fund.
February 13, 2018 – Renewal of Emergency proclamations
February 6, 2018 – Established the Office of Recovery & Resiliency staffing; authorized appropriations of $2 million to the Disaster Response & Recovery Fund.
December 19, 2017 – Disaster fiscal update and creation of Sonoma County Office of Recovery and Resiliency.

Fire Recovery

Bill ID/Topic	Location	Summary
AB 425 Caballero D Timber harvesting plans: exemptions: temporary roads.	SENATE INACTIVE FILE 9/13/2017 - Ordered to inactive file at the request of Senator Hertzberg.	The Z'berg-Nejedly Forest Practices Act of 1973 prohibits a person from conducting timber operations, as defined, unless a timber harvesting plan prepared by a registered professional forester has been submitted to the Department of Forestry and Fire Protection. The act authorizes the State Board of Forestry and Fire Protection to exempt from some or all of those provisions of the act a person engaging in specified forest management activities, including the cutting or removal of trees in compliance with existing law relating to defensible space. In this regard, the act authorizes, until January 1, 2021, the Forest Fire Prevention Pilot Project Exemption if specified conditions are met, including that only trees less than 26 inches in stump diameter, measured at 8 inches above ground level, shall be removed, no new road construction or reconstruction shall occur, and the activities shall be conducted in specified counties. This bill would expand the exemption to allow the construction or reconstruction of temporary roads on slopes of 40% or less if certain conditions are met, including that a registered professional forester designates temporary road locations, landing locations, associated class III watercourse crossings, unstable areas, and connected headwall swales, including convergent slopes, on specified maps. The bill would require, on or before December 31, 2020, the department and the board to review and submit a report to the Legislature on the trends in the use of, compliance with, and effectiveness of, the exemption, including an assessment of the construction or reconstruction of temporary roads. **Last Amended on 4/4/2017**
AB 1283 Rodriguez D Mutual aid: reimbursements: volunteer firefighters.	SENATE INACTIVE FILE 9/5/2017 - Withdrawn from committee. Ordered to second reading. Ordered to inactive file at the request of Senator Bradford.	(1)Existing law, the California Emergency Services Act, requires the Governor to coordinate the State Emergency Plan and any programs necessary for the mitigation of the effects of an emergency in this state, as specified. The act authorizes the Governor, with advice of the Office of Emergency Services, to divide the state into mutual aid regions for the more effective application, administration, and coordination of mutual aid and other emergency-related activities. The act requires the Office of Emergency Services, in consultation with relevant local and state agencies, to develop and adopt a state fire service and rescue emergency mutual aid plan as an annex to the State Emergency Plan.This bill would require a nonprofit or public fire department that has volunteer firefighters and receives reimbursement from the federal, state, or local government through a mutual aid request, if the applicable fire agreement is intended to reimburse for personnel costs for work performed associated with firefighting in which the volunteer firefighters of the fire department have participated, to pass through to those volunteers specific reimbursement. The bill would require a fire department that utilizes the services of volunteer firefighters to maintain documentation of reimbursements and allow access to those records as prescribed. The bill would require a fire department to cease using the services of any volunteer firefighter to provide mutual aid response pursuant to the fire agreement who has received pass-through reimbursements that exceed during the fiscal year 20% of the statewide average amount that otherwise would be required to hire a permanent employee to provide the same services and would prohibit such a volunteer from engaging in mutual aid response for the fire department until the following fiscal year. The bill would authorize a volunteer to pursue reimbursement in a civil action if the fire department fails to reimburse the volunteer firefighter in accordance with the bill. By increasing the duties of local officials, this bill would impose a state-mandated local program. This bill contains other existing laws. **Last Amended on 8/28/2017**

AB 1772 **Aguiar-Curry D** Fire insurance: indemnity.	SENATE INACTIVE FILE 6/21/2018 - Ordered to inactive file at the request of Senator McGuire.	Existing law defines the measure of indemnity for a loss under an open fire insurance policy and specifies time limits under which an insured must collect the full replacement cost of the loss. In the event of a loss relating to a state of emergency, as defined, existing law establishes a minimum time limit of not less than 24 months from the date that the first payment toward the actual cash value is made during which the insured may collect the full replacement cost of the loss, subject to the policy limit, as specified.This bill would extend the minimum time limit during which an insured may collect the full replacement cost of a loss relating to a state of emergency to 36 months. The bill would require that additional extensions of 6 months be provided to policyholders for good cause under that circumstance. The bill would also require that policy forms issued by an insurer be in compliance with these changes on and after July 1, 2019. The bill would also make technical changes. **Last Amended on 6/19/2018**
AB 1797 **Levine D** Residential property insurance.	ASSEMBLY CONCURRENCE 7/5/2018 - Read third time. Passed. Ordered to the Assembly. In Assembly. Concurrence in Senate amendments pending. May be considered on or after August 3 pursuant to Assembly Rule 77. 8/6/2018 #45 ASSEMBLY CONCURRENCE IN SENATE AMENDMENTS	Existing law requires a named insured on a residential property insurance policy be provided with a copy of the California Residential Property Insurance Disclosure which sets forth a description of certain types of insurance coverage, such as actual cash value coverage and guaranteed replacement cost coverage, as specified. Existing law also requires every California Residential Property Insurance Disclosure be accompanied by a California Residential Property Insurance Bill of Rights.This bill would require an insurer that provides replacement cost coverage to provide, on an every other year basis, at the time an offer to renew a policy of residential property insurance is made to the policyholder, an estimate of the cost necessary to rebuild or replace the insured structure that complies with specified existing regulations. The bill would exempt an insurer from this requirement if either the policyholder has requested, within the 2 years prior to the offer to renew the policy, and the insurer has provided, coverage limits greater than the previous limits that the policyholder had selected, or if the insurer has made specified offers to the policyholder. The bill would state its provisions are not intended to change existing law with respect to the duty of a policyholder or applicant to select the coverage limits for a policy of residential property insurance. The bill's provisions would become operative July 1, 2019. **Last Amended on 6/19/2018**
AB 1800 **Levine D** Fire insurance: indemnity.	SENATE INACTIVE FILE 7/2/2018 - Ordered to inactive file at the request of Senator Glazer.	Existing law defines the measure of indemnity for a loss under an open fire insurance policy and specifies time limits under which an insured must collect the full replacement cost of the loss. Existing law prohibits, in the event of a total loss of the insured structure, a fire insurance policy issued or delivered in the state from limiting or denying payment of the replacement cost of property if the insured decides to rebuild or replace the property at a location other than the insured premises. Existing law requires the measure of indemnity to be based upon the replacement cost of the insured property and prohibits it from being based upon the cost to repair, rebuild, or replace at a location other than the insured premises.This bill would instead prohibit, in the event of a total loss of an insured structure, a fire insurance policy issued or delivered in this state from containing a provision that limits or denies, on the basis that the insured has decided to rebuild at a new location or to purchase an already built home at a new location, payment of the building code upgrade cost or the replacement cost, including any extended replacement cost coverage, to the extent those costs are otherwise covered by the terms of the policy or any policy endorsement. The bill would prohibit the measure of indemnity from exceeding, rather than requiring it to be based upon, the replacement cost, as specified. The bill would require all policy forms issued on and after July 1, 2019, to contain these provisions. **Last Amended on 6/19/2018**

AB 1875 **Wood D** Residential property insurance.	SENATE APPR. 7/2/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law generally regulates classes of insurance, including residential property insurance. Under existing law, the California FAIR (fair access to insurance requirements) Plan Association, a joint reinsurance association in which all insurers licensed to write basic property insurance participate, administers a program for the equitable apportionment of basic property insurance for persons who are unable to obtain that coverage through normal channels. Existing law requires the association to establish and maintain an Internet Web site and a toll-free telephone number through which a person may receive assistance in applying for basic property insurance. Existing law requires an insurer member of the plan to provide the Internet Web site address and toll-free telephone number to an applicant who is denied coverage.This bill would require the Department of Insurance to establish the California Home Insurance Finder on its Internet Web site to help homeowners connect with an insurance agent or broker for residential property insurance. The bill would require the department to annually survey agents, brokers, and insurers about inclusion in the finder, and post participants' names, addresses, phone numbers, and Internet Web sites, if available, to the finder on or before July 1, 2020. The bill would require the commissioner to use social media and other tools to promote the finder, and to create materials in the most common languages used in California. The bill would require an insurer that does not offer, cancels, or declines to renew a policy of residential property insurance to disclose specified information to a homeowner, including, on or after July 1, 2020, information about the finder. The bill would require an insurer that offers replacement cost coverage, as specified, but does not offer, or declines to offer, specified extended replacement cost coverage to disclose specified information to a homeowner, including the Internet Web site address of the department's Homeowners Coverage Comparison Tool. The bill would require a residential property insurer to notify the department on or before February 1 of each year of the amount of extended replacement cost coverage it offers in California, and would require the department to use this information to annually update the Homeowners Coverage Comparison Tool. **Last Amended on 7/2/2018**
AB 1877 **Limón D** Office of Emergency Services: communications: translation.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 12. Noes 0.) (June 26). Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	The California Emergency Services Act establishes the Office of Emergency Services within the Governor's office under the supervision of the Director of Emergency Services and makes the office responsible for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies. Existing law requires the Governor to coordinate a State Emergency Plan, which is in effect in each political subdivision of the state, and requires the governing body of each political subdivision, as defined, to take actions necessary to carry out the provisions of that plan. Existing law defines an "operational area" as an intermediate level of the state emergency services organization, consisting of a county and all political subdivisions within the county area.This bill would require the Office of Emergency Services and the governing body of each political subdivision, including each operational area, to translate any emergency communication to the public into the most commonly spoken language other than English in the impacted county or counties, or, at the option of a county, into one or more languages other than English spoken in the county pursuant to an individualized language assessment of that county. By imposing additional duties on local agencies, the bill would impose a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 5/25/2018**
AB 1919 **Wood D**	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 13. Noes 0.) (June 26). Re-referred to	Under existing law, upon the proclamation of a state of emergency, as defined, declared by the President of the United States or the Governor, or upon the declaration of a local emergency, as defined, by the executive officer of any county, city, or city and county, and for a period of 30

Price gouging: state of emergency.	Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	days following that declaration, it is a misdemeanor with specified penalties for a person, contractor, business, or other entity to sell or offer to sell certain goods and services, including housing, for a price that exceeds by 10% the price charged by that person immediately prior to the proclamation of emergency, except as specified. Existing law, the California Emergency Services Act, establishes the Office of Emergency Services and vests the office with responsibility for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies, as specified.This bill would additionally, upon the proclamation or declaration of an emergency as described above, make it a misdemeanor for a person, business, or other entity to increase the rental price, as defined, advertised, offered, or charged for housing to an existing or prospective tenant by more than 10%. The bill would extend the prohibition with regards to housing for any period that the proclamation or declaration is extended. The bill would additionally make it a misdemeanor for a person, business, or entity to evict a housing tenant after the proclamation of a state of emergency and then rent or offer to rent to another person at a rental price higher than the evicted tenant could be charged. By creating a new crime, this bill would create a state-mandated local program. The bill would require the Office of Emergency Services, upon the proclamation of an emergency by the Governor, to include information about these provisions and guidance to property owners, as specified, on an appropriate Internet Web site.This bill contains other related provisions and other existing laws. **Last Amended on 6/12/2018**
AB 1928 McCarty D California Conservation Corps: contracts.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 9. Noes 0.) (June 26). Re-referred to Com. on APPR.	Existing legislative findings and declarations state that the California Conservation Corps offers California a unique opportunity to meet both the goal of increasing understanding and appreciation of the environment and the goal of helping youths become productive adults. Existing law provides that the Legislature reaffirms its intent that the corps' mission includes increasing awareness of and improving our natural resources, and instilling basic skills and a healthy work ethic in California youth, building their character, self-esteem, and self-discipline, and establishing within them a strong sense of civic responsibility and understanding of the value of a day's work for a day's wages.This bill would authorize the California Conservation Corps to enter into a contract with an individual or collective of certified community conservation corps for a specified type of project or program that is in furtherance of those legislative findings and declarations. The bill would require the California Conservation Corps to file a report on the success of the programs or projects with the Legislature before January 1, 2023. **Last Amended on 6/14/2018**
AB 1954 Patterson R Timber harvest plans: exemption: reducing flammable materials.	SENATE CONSENT CALENDAR 7/3/2018 - Read second time. Ordered to Consent Calendar. 8/6/2018 #183 SENATE SEN CONSENT CALENDAR SECOND LEGISLATIVE DAY	The Z'berg-Nejedly Forest Practices Act of 1973 prohibits a person from conducting timber operations, as defined, unless a timber harvesting plan prepared by a registered professional forester has been submitted to the Department of Forestry and Fire Protection. The act authorizes the State Board of Forestry and Fire Protection to exempt from some or all of those provisions of the act a person engaging in specified forest management activities, including a person engaged in forest management whose activities are limited to the cutting or removal of trees on the person's property in compliance with existing laws relating to defensible space, as provided, and requires the board to adopt regulations to implement this exemption no later than January 1, 2016. Existing law requires the department evaluate the effects of this above exemption and report its recommendations to the Legislature based on that evaluation, as provided. Existing law makes the above exemption inoperative 3 years after the effective date of regulations adopted by the board or no later than January 1, 2019.This bill would extend the inoperative date to January 1, 2022, and would delete the reporting requirement. **Last Amended on 4/16/2018**

AB 1956 Limón D Fire prevention activities: local assistance grant program.	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/13/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law requires the director of the Department of Forestry and Fire Protection to establish a working group, consisting of specified members, to identify potential incentives for landowners to implement prefire activities, as defined, in state responsibility areas and urban wildland communities and to identify all federal, state, or local programs, private programs, and any other programs requiring a cost share that involves prefire activities. This bill would repeal this law.This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
AB 2091 Grayson D Fire prevention: prescribed burns: insurance pool.	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	(1)Existing law establishes in the Department of Forestry and Fire Protection the State Board of Forestry and Fire Protection consisting of specified members who are selected and approved for appointment on the basis of their educational and professional qualifications and their general knowledge of, interest in, and experience with, among other things, forest management practices.This bill would rename the board the State Board of Forestry and Fire Prevention and Protection.This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
AB 2102 Rodriguez D State of emergency: out-of-state aid: reciprocity.	SENATE APPR. 6/28/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 9. Noes 0.) (June 27). Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, establishes the Emergency Medical Services Authority and provides for the certification of emergency medical personnel, as specified. The authority is responsible for the coordination and integration of all statewide activities concerning emergency medical services. Existing law, the California Emergency Services Act establishes the Office of Emergency Services and directs the office to serves as the State Disaster Council for the purposes of the California Disaster and Civil Defense Master Mutual Aid Agreement. The act authorizes state agencies to provide mutual aid, including personnel, equipment, and other available resources, to assist political subdivisions during a local emergency or in accordance with mutual aid agreements or at the direction of the Governor. This bill would require the authority to establish training standards and licensing reciprocity procedures for out-of-state paramedic personnel who are requested through the California Disaster and Civil Defense Master Mutual Aid Agreement to render aid in this state during a declared state of emergency. **Last Amended on 6/18/2018**
AB 2126 Eggman D California Conservation Corps: forestry corps program.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 9. Noes 0.) (June 26). Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law establishes the California Conservation Corps in the Natural Resources Agency and requires the corps to implement and administer the conservation corps program. Existing law requires the Governor to appoint a director to act as the administrative officer of the corps. Existing law authorizes the director to employ special corps members without regard to their ages so that the corps may draw upon their special skills that may contribute to the attainment of the objectives of the program. Existing law provides that these special members may be assigned to headquarters, as well as field positions. This bill would require the director, no later than July 1, 2019, to establish a forestry corps program to accomplish certain objectives including developing and implementing forest health projects, as provided, and establishing forestry corps crews. The bill would require the director to partner with certified community conservation corps in implementing the forestry corps program, where feasible. The bill would require the director, no later than January 1, 2020, to establish 2 forestry corps crews, one to be based in the Central Valley and the other in the Inland Empire, as specified.This bill contains other related provisions. **Last Amended on 6/14/2018**
AB 2238 Aguiar-Curry D	SENATE APPR. 6/20/2018 - From committee: Do pass and re-refer to Com.	(1)Existing law, the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, provides the authority and procedures for the initiation, conduct, and completion of changes of organization and reorganization of cities and districts. The act specifies the factors that a local

Local agency formation: regional housing need allocation: fire hazards: local health emergencies: hazardous and medical waste.	on APPR. with recommendation: To Consent Calendar. (Ayes 7. Noes 0.) (June 20). Re-referred to Com. on APPR.	agency formation commission is required to consider in the review of a proposal for a change of organization or reorganization, including, among other things, per capita assessed valuation and the proposal's consistency with city or county general and specific plans.This bill would instead require the commission to consider the assessed valuation rather than per capita assessed valuation. The bill would additionally require the commission to consider information contained in a local hazard mitigation plan, information contained in a safety element of a general plan, and any maps that identify land as a very high fire hazard zone or maps that identify land determined to be in a state responsibility area if it is determined that such information is relevant to the area that is the subject of the proposal. By adding to the duties of local agency formation commissions in reviewing a change of organization or reorganization, this bill would impose a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 6/12/2018**
AB 2252 Limón D State grants: state grant administrator.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 13. Noes 0.) (June 26). Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	The Grant Information Act of 1999 authorizes state agencies to make available on the Internet a listing of all grants administered by that agency, that includes specified information and provides instructions on filing grant applications electronically, or on the manner in which to download, complete, and mail grant applications to the state agency, or both. The act also authorizes each state agency to make available on the Internet any printed grant application form used by the agency to award grants that are administered by that agency.This bill would enact the Grant Information Act of 2018. The bill would require the Government Operations Agency, on or before July 1, 2020, to create a funding opportunities web portal that provides a centralized location for grant seekers to find state grant opportunities. The bill would additionally require each state agency, on or before July 1, 2020, to register every grant the state agency administers with the Government Operations Agency prior to commencing a solicitation or award process for distribution of the grant, as specified. The bill would require each state agency, on or before July 1, 2020, to provide for the acceptance of electronic applications for any grant administered by the state agency. **Last Amended on 6/14/2018**
AB 2333 Wood D Office of Emergency Services: behavioral health response.	SENATE APPR. 7/2/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	The California Emergency Services Act establishes the Office of Emergency Services within the Governor's office under the supervision of the Director of Emergency Services and makes the office responsible for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies. Existing law authorizes the Governor, or the director when the governor is inaccessible, to proclaim a state of emergency under specified circumstances.This bill would establish a behavioral health deputy director within the Office of Emergency Services to ensure individuals have access to necessary mental and behavioral health services and supports in the aftermath of a natural disaster or declaration of a state of emergency and would require the deputy director to collaborate with the Director of Health Care Services to coordinate the delivery of trauma-related support to individuals affected by a natural disaster or state of emergency. The bill would require the Director of Health Care Services, in collaboration with the Office of Emergency Services, to immediately request necessary federal waivers to ensure the provision of health care services, as specified, during a natural disaster or declared state of emergency. **Last Amended on 7/2/2018**
AB 2346 Quirk D Public utilities: rates: wildfire	SENATE APPR. 7/5/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/13/2018 10 a.m. - John L. Burton Hearing Room	Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations. Existing law authorizes the commission to fix the rates and charges for every public utility, and requires that those rates and charges be just and reasonable. Existing law requires the commission to authorize public utilities to establish catastrophic event memorandum accounts and to record certain costs in those accounts. This bill

expense memorandum accounts.	(4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	would authorize the commission to permit each electrical corporation and gas corporation to establish a wildfire expense memorandum account for incremental unreimbursed costs relating to California wildfires that occur on or after January 1, 2015, and to record certain costs in those accounts. The bill would require the recovery in rates of those costs to be subject to review by, and the determination of, the commission, as specified. The bill would require an electrical corporation or gas corporation to notify the commission by letter within 30 days after the electrical corporation or gas corporation begins recording costs in its wildfire expense memorandum account.This bill contains other related provisions and other existing laws. **Last Amended on 7/5/2018**
AB 2380 Aguiar-Curry D Fire protection: privately contracted private fire prevention resources.	SENATE APPR. 7/2/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law provides that fire companies in unincorporated and incorporated towns may be organized, as provided, and be subject to specified provisions and requirements. Existing law provides that the city council of an incorporated city may, by ordinance, regulate the formation and continued existence of fire companies providing service within its city. Existing law establishes in state government, within the office of the Governor, the Office of Emergency Services. Existing law requires the office to be responsible for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies, including responsibility for activities necessary to prevent, respond to, recover from, and mitigate the effects of emergencies and disasters to people and property.This bill would require the office, in collaboration with the Department of Forestry and Fire Protection, to develop standards and regulations for any privately contracted private fire prevention resources operating during an active fire incident in the state, and to develop regulations to govern the use of equipment used by privately contracted private fire prevention resources during an active fire incident, as provided. The bill would authorize the office to levy a fine not to exceed $5,000 for any violation of the above provisions or regulations adopted thereto, as provided. **Last Amended on 7/2/2018**
AB 2518 Aguiar-Curry D Innovative forest products and mass timber.	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law establishes the Department of Forestry and Fire Protection in the Natural Resources Agency. Existing law declares that a thriving in-state forest products sector provides public benefits, including employment opportunities in both rural and urban areas, and economic development for rural communities. Existing law requires the Secretary of the Natural Resources Agency to establish a working group on expanding wood product markets, as provided.This bill would require, on or before January 31, 2020, the department, in consultation with the State Board of Forestry and Fire Protection, to identify barriers to in-state production of mass timber and other innovative forest products, as those terms are defined, and develop solutions that are consistent with the state's climate objectives on forest lands. The bill would require the department to collaborate with the working group described above, other state agencies, and independent experts, including with apprenticeship programs of organized labor, community colleges, and others with similar expertise, on innovative forest products and mass timber workforce training and job creation.This bill contains other related provisions. **Last Amended on 7/3/2018**
AB 2551 Wood D Forest and Wildland Health Improvement and	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room	Existing law requires the Department of Forestry and Fire Prevention to implement various fire prevention programs intended to protect forest resources and prevent uncontrolled wildfires.This bill would require the department to establish, implement, and administer the Forest and Wildland Health Improvement and Fire Prevention Program, as prescribed. The bill would require the department to take specified actions to implement and administer programs that are intended to promote forest and wildland health, restoration, and resilience, and improve fire

Fire Prevention Program: joint prescribed burning operations: watersheds.	(4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	outcomes, prevention, and preparedness throughout the state. The bill would also require the department, to the extent feasible, to collaborate with the Department of Corrections and Rehabilitation to utilize correctional officers and conservation crews for vegetation management and fire prevention activities.This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
AB 2576 Aguiar-Curry D Emergencies: health care.	SENATE APPR. 6/27/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	(1)Existing law, the California Emergency Services Act, authorizes the Governor to proclaim a state of emergency, and local officials and local governments to proclaim a local emergency, when specified conditions of disaster or extreme peril to the safety of persons and property exist, and authorizes the Governor or the appropriate local government to exercise certain powers in response to that emergency. Existing law authorizes the Governor, during a state of emergency, to direct all state agencies to utilize and employ state personnel, equipment, and facilities to perform activities that are designed to prevent or alleviate actual and threatened damage due to that emergency. Existing law authorizes a state agency so directed to expend any of the moneys that have been appropriated to it in order to perform that activity.This bill would authorize the Governor, during a state of emergency, to direct all state agencies to utilize, employ, and direct state personnel, equipment, and facilities for the performance of any and all activities that are designed to allow community clinics and health centers to provide and receive reimbursement for services provided during or immediately following the emergency. The bill would authorize any agency directed by the Governor to perform those activities to expend any of the moneys that have been appropriated to it in order to perform those activities, irrespective of the particular purpose for which the moneys were originally appropriated.This bill contains other related provisions and other existing laws. **Last Amended on 6/27/2018**
AB 2594 Friedman D Fire insurance.	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR.	Existing law generally regulates fire insurance and county mutual fire insurers. Existing law prescribes the standard form for a fire insurance policy or county fire insurance policy. Existing law imposes a 12-month statute of limitations in which to bring suit under a fire insurance policy or a county fire insurance policy after a loss. Existing law makes it a misdemeanor for an insurer or agent to countersign or issue a fire policy that varies from the California standard form of policy.This bill would revise the standard forms of policy and extend the period in which to bring suit to 24 months after the inception of the loss if the loss is related to a state of emergency, as specified. By expanding the scope of an existing crime, the bill would impose a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
AB 2645 Patterson R Greenhouse Gas Reduction Fund: forestry and fire prevention.	ASSEMBLY NAT. RES. 4/23/2018 - In committee: Set, first hearing. Hearing canceled at the request of author.	The California Global Warming Solutions Act of 2006 designates the State Air Resources Board as the state agency charged with monitoring and regulating sources of emissions of greenhouse gases. The act authorizes the state board to include use of market-based compliance mechanisms. Existing law requires all moneys, except for fines and penalties, collected by the state board as part of a market-based compliance mechanism to be deposited in the Greenhouse Gas Reduction Fund and to be available upon appropriation. Existing law continuously appropriates 35% of the annual proceeds of the fund for transit, affordable housing, and sustainable communities programs and 25% of the annual proceeds of the fund for certain components of a specified high-speed rail project.This bill, beginning in the 2019–20 fiscal year, would continuously appropriate $74,805,000 from the fund annually to the Department of Forestry and Fire Protection for purposes of fire prevention activities that reduce greenhouse gas emissions. This bill also, beginning in the 2019–20 fiscal year, would continuously appropriate $450,000,000 from the

		fund annually to the Department of Forestry and Fire Protection for state and local healthy forest and fire prevention programs and projects that improve forest health and reduce greenhouse gas emissions, for vegetation management projects of local entities that will reduce greenhouse gas emissions and maximize certain cobenefits, for the implementation of memorandums of understanding regarding federal lands for vegetation management that will reduce greenhouse gas emissions and maximize certain cobenefits, and for resource management, to be allocated as specified.This bill contains other existing laws.
AB 2687 Quirk-Silva D Office of Small Business.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 9. Noes 0.) (June 25). Re-referred to Com. on APPR.	Existing law establishes the Office of Small Business Advocate within the Governor's Office of Business and Economic Development, also known as GO-Biz, and prescribes the duties and functions of the Small Business Advocate, who is also the Director of the Office of Small Business Advocate. Among these duties, the director is to serve as the principal advocate in the state on behalf of small businesses and to represent the views and interests of small businesses before other state agencies policies and activities of which may affect small businesses. This bill would require the Small Business Advocate to collaborate with the Office of Small Business and Disabled Veteran Business Enterprise Services in their activities under the Small Business Procurement Act and to post a variety of information related to small business activities on the GO-Biz Internet Web site or the advocate's Internet Web site. Among other things, the bill would require the advocate to be prepared for designation by the Office of Emergency Services to serve as an official liaison between small businesses impacted by a state of emergency and other government and nonprofit service providers and to assist in the state emergency recovery, response, and preparedness efforts related to small businesses. The bill would eliminate the duty of the Office of Small Business Advocate to post information on its Internet Web site regarding small business financial development and the efficient use of energy, as specified. **Last Amended on 6/7/2018**
AB 2889 Caballero D Timber harvesting plans: guidance and assistance.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 9. Noes 0.) (June 26). Re-referred to Com. on APPR.	Existing law prohibits a person, as defined, from conducting timber operations, as defined, unless a timber harvesting plan that meets specified requirements and is prepared by a professional forester for those operations has been submitted to the Department of Forestry and Fire Protection. Existing law requires the department to review, approve, or require the modification of, timber harvesting plans in accordance with prescribed procedures.This bill would require the department to provide guidance and assistance to ensure the uniform and efficient implementation of processes and procedures regulating the filing, review, approval, required modification, completion, and appeal of decisions relating to timber harvesting plans, as provided. The bill would also require the department to issue guidance to achieve greater timber harvesting plan review accuracy and efficiency and to avoid duplication of efforts, as provided. **Last Amended on 4/30/2018**
AB 2898 Gloria D Emergency services: local emergencies.	SENATE THIRD READING 6/27/2018 - Read second time. Ordered to third reading. 8/6/2018 #90 SENATE SEN THIRD READING FILE - ASM BILLS	Existing law, the California Emergency Services Act, establishes the Office of Emergency Services and vests the office with responsibility for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies, as specified. The act also prescribes a process for the declaration of a local emergency and permits a local emergency to be proclaimed only by the governing body of a city or county or by an official designated by ordinance adopted by that governing body. Existing law requires the governing body to review the need for continuing the local emergency at least once every 30 days until the governing body terminates the local emergency. This bill would instead require review of a local emergency by the governing body, as described above, to occur at least once every 60 days.

AB 2911 Friedman D Fire safety.	SENATE APPR. 7/3/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/13/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	(1)Existing law requires, no later than January 1, 2005, the State Fire Marshal, in consultation with the Director of Forestry and Fire Protection and the Director of Housing and Community Development, to recommend building standards that provide for comprehensive site and structure fire risk reduction to protect structures from fires spreading, as provided. This bill would require the State Fire Marshal, no later than January 31, 2020, in consultation with the Director of Forestry and Fire Protection and the Director of Housing and Community Development, to recommend updated building standards that provide for comprehensive site and structure fire risk reduction to protect structures from fires spreading, as specified, based on lessons learned from the wildfires of 2017 and to develop a list of low-cost retrofits that provide for comprehensive site and structure fire risk reduction, as provided. This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
AB 2915 Caballero D Workforce development boards: mutual disaster aid assistance: memorandum of understanding.	SENATE APPR. 6/28/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 5. Noes 0.) (June 27). Re-referred to Com. on APPR. 8/6/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	Existing law, the California Workforce Innovation and Opportunity Act, establishes the California Workforce Development Board as the body responsible for assisting the Governor in the development, oversight, and continuous improvement of California's workforce investment system and the alignment of the education and workforce investment systems to the needs of the 21st century economy and workforce. That act prescribes specific tasks with which the board assists the Governor, including the development and updating of comprehensive state performance accountability measures, to assess the effectiveness of the core programs in the state as required under specific federal law. That act also requires the establishment of a local workforce development board in each local workforce development area of the state to, among other things, develop effective linkages with employers in the region to support employer utilization of the local workforce development system and to support local workforce investment activities.The bill would require, by July 1, 2020, the California Workforce Development Board to develop, in conjunction with the Employment Development Department and with input from local workforce development boards, a policy regarding mutual aid agreements between and among local workforce development boards to enable them to effectively respond to disasters and that is consistent with applicable state and federal law. **Last Amended on 6/21/2018**
AB 2941 Berman D Health care coverage: state of emergency.	SENATE THIRD READING 7/3/2018 - Read second time. Ordered to third reading. 8/6/2018 #160 SENATE SEN THIRD READING FILE - ASM BILLS	Existing law, the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene), provides for the licensure and regulation of health care service plans by the Department of Managed Health Care, and makes a willful violation of the act a crime. Existing law provides for the regulation of health insurers by the Department of Insurance. Existing law requires the Department of Managed Health Care and the Insurance Commissioner to adopt regulations to ensure enrollees and insureds have access to needed health care services in a timely manner, and requires a health care service plan contract or health insurance policy to provide information to an enrollee or insured regarding the standards for timely access to care.This bill would require a health care service plan or health insurer to provide its enrollees or insureds who have been displaced by a state of emergency, as defined, access to medically necessary health care services, as specified. The bill would require a health care service plan or health insurer, within 48 hours of a declaration of emergency by the Governor that displaces or has the immediate potential to displace enrollees or insureds, to file a notification with the appropriate department, containing specified information regarding how the plan or insurer is addressing the needs of its enrolles or insureds during the state of emergency. Because a willful violation of the bill's requirements relative to health care service plans would be a crime, the bill would impose a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 6/19/2018**

AB 3257 Committee on Natural Resources Natural resources.	SENATE APPR. 6/26/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To Consent Calendar. (Ayes 9. Noes 0.) (June 26). Re-referred to Com. on APPR. 8/13/2018 10 a.m. - John L. Burton Hearing Room (4203) SENATE APPROPRIATIONS, PORTANTINO, Chair	(1)Existing law, the Surface Mining and Reclamation Act of 1975, prohibits a person, with exceptions, from conducting surface mining operations unless, among other things, a permit is obtained from, a specified reclamation plan is submitted to and approved by, and financial assurances for reclamation have been approved by the lead agency, as defined, for the operation of the surface mining operation. The act requires that the State Mining and Geology Board submit to the Legislature each year a report on the actions taken under the act during the preceding fiscal year, and requires the Division of Mine Reclamation in the Department of Conservation, at a minimum, to quarterly publish in the California Regulatory Notice Register, or otherwise make available upon request to the Department of General Services or any other state or local agency, a list identifying specified information pertaining to surface mining operations for which a report is required.This bill would revise the information to be included in that list, and would require identification of all surface mining operations subject to the act that are newly permitted, active, or idle and not reported pursuant to a specified provision.The act requires every lead agency to adopt ordinances for the review and approval of reclamation plans, financial assurances, and surface mining operation permits. Existing law requires that within 90 days of a surface mining operation becoming idle, as defined, the operator submit to the lead agency for review and approval an interim management plan, and requires the lead agency within 60 days of receipt of the interim management plan, or a longer period mutually agreed upon by the lead agency and the operator, to review and approve the plan in accordance with its ordinance and notify the operator in writing, or otherwise proceed as provided.This bill would instead require the lead agency, within 45 days of receipt of the interim management plan, to review the plan in accordance with its ordinance, and if the plan satisfies specified requirements under the act, to forward the plan to the Supervisor of Mine Reclamation for comment. The bill would also revise certain procedures and requirements for the review and approval of interim management plans by the supervisor, as prescribed.The act requires the lead agency to cause surface mining operations to be inspected at intervals of no more than 12 months, solely to determine whether the surface mining operation is in compliance with the act, and to, among other things, provide a notice of completion of inspection to the supervisor specifying, as applicable, certain information about aspects of the surface mining operation and a statement of the lead agency's intended response to any aspects of the surface mining operation found to be inconsistent with the act.This bill would additionally require that the notice of completion of inspection include a statement as to whether the surface mining operation is out of compliance with an order to comply or stipulated order to comply issued by the lead agency. The bill would make related changes.This bill would delete obsolete references in these provisions.This bill contains other related provisions and other existing laws. **Last Amended on 6/18/2018**
ACA 24 Waldron R Property taxation: transfer of base year value: disaster relief.	ASSEMBLY REV. & TAX 6/28/2018 - Referred to Com. on REV. & TAX.	The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution, in the case of property that is substantially damaged or destroyed, as defined, by a disaster, as declared by the Governor, requires the Legislature to provide for the transfer of base year value, to a comparable property within the same county that is acquired or newly constructed as a replacement for the substantially damaged or destroyed property, and authorizes the Legislature, if a county ordinance so providing has been adopted, to provide for the transfer of base year value to comparable replacement property of equal or lesser value that is located within another

		county.This measure would additionally require the Legislature to provide for the transfer of base year value of property that is substantially damaged or destroyed by a disaster, as declared by the Governor, occurring on or after January 1, 2017, to July 1, 2018, to comparable property located within the same or a different county that is acquired or newly constructed as a replacement for the substantially damaged or destroyed property. The measure would limit this provision to intercounty transfers of base year value that occur on or after the effective date of the measure.
SB 819 **Hill D** Electrical and gas corporations: rates.	ASSEMBLY APPR. 6/27/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations. Existing law authorizes the commission to establish rules for all public utilities, subject to control by the Legislature. Existing law authorizes the commission to fix the rates and charges for every public utility and requires that those rates and charges be just and reasonable. Existing law prohibits a gas corporation from recovering any fine or penalty in any rate approved by the commission.This bill would additionally prohibit an electrical corporation from recovering a fine or penalty through a rate approved by the commission and would make related nonsubstantive changes.This bill contains other related provisions and other existing laws. **Last Amended on 6/27/2018**
SB 821 **Jackson D** Emergency notification: county jurisdictions.	ASSEMBLY THIRD READING 6/26/2018 - Read second time. Ordered to third reading. 8/6/2018 #86 ASSEMBLY THIRD READING FILE - SENATE BILLS	The California Emergency Services Act establishes the Office of Emergency Services in the office of the Governor and provides that the office is responsible for the state's emergency and disaster response services for natural, technological, or manmade disasters and emergencies, including activities necessary to prevent, respond to, recover from, and mitigate the effects of emergencies and disasters to people and property. This bill would authorize each county, including a city and county, to enter into an agreement to access the contact information of resident accountholders through the records of a public utility or other agency responsible for water service, waste and recycling services, or other property-related services for the sole purpose of enrolling county residents in a county-operated public emergency warning system. The bill would specify that any county that enters into such an agreement would be required to include procedures to enable any resident to opt out of the warning system and a process to terminate the receiving agency's access to the resident's contact information. The bill would prohibit the use of the information gathered for any purpose other than for emergency notification.This bill contains other existing laws. **Last Amended on 6/25/2018**
SB 824 **Lara D** Insurers: declared disaster: homeowners' insurance policies.	ASSEMBLY APPR. 6/28/2018 - Read second time and amended. Re-referred to Com. on APPR.	(1)Existing law requires an insurer to comply with certain procedures relating to the cancellation of insurance policies, except as specified, in the case of a total loss to the primary insured structure under a residential policy. Among other requirements, an insurer may not cancel coverage while the primary insured structure is being rebuilt, as specified, nor use the fact that the primary insured structure is in damaged condition as a result of the total loss as the sole basis for a decision to cancel the policy, and must offer, at least once, to renew the policy, as specified, if the total loss to the primary insured structure was caused by a disaster.This bill would prohibit, subject to certain exceptions, an insurer from canceling or refusing to renew a policy of residential property insurance for one year after the declaration of a state of emergency based solely on the fact that the insured structure is located in an area in which a wildfire has occurred, with respect to an insured property located within or adjacent to the fire perimeter, as specified.This bill contains other related provisions and other existing laws. **Last Amended on 6/28/2018**
SB 833 **McGuire D**	ASSEMBLY APPR. 7/5/2018 - Read second time and amended. Re-referred to	The California Emergency Services Act establishes the Office of Emergency Services (OES) in the office of the Governor and provides that OES is responsible for the state's emergency and

Emergency alerts: evacuation orders: operators.	Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	disaster response services for natural, technological, or manmade disasters and emergencies. The act also provides for systems for the public dissemination of alerts regarding missing children, attacks upon law enforcement officers, and missing persons who are 65 years of age or older, among others, and requires the Department of the California Highway Patrol to activate these systems and issue alerts upon the request of a law enforcement agency if certain conditions are met. This bill would require that mass notifications and the communication of protective actions be conveyed broadly or to a targeted population based on the conditions and risk assessment of he responsible local government and specify options for notification. The bill would further require, on or before January 1, 2019, OES to establish guidelines and best practices for public alerts and warnings and the use of mass notification systems, as provided. On or before July 1, 2019, the bill would require OES to both ensure that each emergency management office within a county or city shall become a registered IPAWS WEA operator and has up-to-date IPAWS software and equipment. The bill also would require OES to ensure that emergency management personnel trained on the WEA system receive yearly training in IPAWS and WEA software and equipment operation.This bill contains other related provisions and other existing laws. **Last Amended on 7/5/2018**
SB 894 **Dodd D** Property insurance.	ASSEMBLY SECOND READING 7/5/2018 - Read second time and amended. Ordered to second reading. 8/6/2018 #1 ASSEMBLY SECOND READING FILE -- SENATE BILLS	Existing law requires an insurer, in the case of a total loss to the primary insured structure under a policy of residential property insurance, to offer to renew the policy at least once if the loss to the primary insured structure was caused by a disaster, as defined, and was not also due to the negligence of the insured, except as specified.This bill would instead, under specified circumstances, require the insurer to offer to renew the policy for at least the next 2 annual renewal periods or 24 months, whichever is greater.This bill contains other related provisions and other existing laws. **Last Amended on 7/5/2018**
SB 901 **Dodd D** Electrical corporations: local publicly owned electric utilities: electrical cooperatives: wildfire mitigation plans and measures.	SENATE CONFERENCE COMMITTEE 7/6/2018 - Assembly Members Holden (Co-chair), Dahle, Mayes, Reyes, and Wood appointed to Conference Committee. 8/7/2018 2 p.m. - John L. Burton Hearing Room (4203) SENATE CONFERENCE COMMITTEE ON SB 901, HOLDEN AND DODD, Chairs8/9/2018 Upon Adjournment of Assembly and Senate Session - John L. Burton Hearing Room (4203) SENATE CONFERENCE COMMITTEE ON SB 901, HOLDEN AND DODD, Chairs8/6/2018 #125 ASSEMBLY IN CONFERENCE8/6/2018 #14 SENATE SEN IN CONFERENCE	Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations, while local publicly owned electric utilities and electrical cooperatives are under the direction of their governing boards. Existing law requires each electrical corporation, local publicly owned electric utility, and electrical cooperative to construct, maintain, and operate its electrical lines and equipment in a manner that will minimize the risk of catastrophic wildfire posed by those electrical lines and equipment. Existing law requires each electrical corporation to annually prepare a wildfire mitigation plan and to submit its plan to the commission for review, as specified. Existing law requires the commission to review and comment on the submitted plan, as specified. Existing law requires the governing board of a local publicly owned electric utility or electrical cooperative to determine whether any portion of the geographical area where the utility's overhead electrical lines and equipment are located has a significant risk of catastrophic wildfire resulting from those electrical lines and equipment and, if so, requires the utility, at an interval determined by its board, to present to its board for approval those wildfire mitigation measures the utility intends to undertake to minimize the risk of its overhead electrical lines and equipment causing a catastrophic wildfire.This bill would require a wildfire mitigation plan prepared by an electrical corporation, and wildfire mitigation measures prepared by a local publicly owned electric utility or electrical cooperative, to include a description of the factors the preparing entity uses to determine when it may be necessary to deenergize its electrical lines and deactivate its reclosers, including meteorological and fire threat conditions, and an assessment of risks to the health and welfare of customers who may lose power. The bill would also require a wildfire mitigation plan and wildfire mitigation measures to include appropriate and feasible procedures for notifying customers, including, as a

		priority, critical first responders, health care facilities, and operators of telecommunications infrastructure, who may be impacted by the deenergizing of electrical lines.This bill contains other related provisions and other existing laws. **Last Amended on 7/2/2018**
SB 917 **Jackson D** Insurance policies.	ASSEMBLY THIRD READING 7/3/2018 - Read second time. Ordered to third reading. 8/6/2018 #111 ASSEMBLY THIRD READING FILE - SENATE BILLS	Existing law regulates insurance and the business of insurance in the state. Under existing law, an insurer is liable for a loss of which a peril insured against was the proximate cause, although a peril not contemplated by the contract may have been a remote cause of the loss. Under existing law, an insurer is not liable for a loss of which the peril insured was only the remote cause.This bill would require coverage to be provided if a loss or damage results from a combination of perils, one of which is a landslide, mudslide, mudflow, debris flow, or other similar earth movement, if an insured peril is the efficient proximate cause of the loss or damage and coverage would otherwise be provided for the insured peril. The bill would require coverage to be provided under the same terms and conditions as would be provided for the insured peril. The bill would state that it does not constitute a change in, but is declaratory of, existing law, and that it does not alter or abrogate any defenses, either in contract or law, that existed prior to January 1, 2019. **Last Amended on 7/2/2018**
SB 929 **McGuire D** Special districts: Internet Web sites.	ASSEMBLY THIRD READING 7/2/2018 - From consent calendar on motion of Assembly Member Calderon. 8/6/2018 #107 ASSEMBLY THIRD READING FILE - SENATE BILLS	The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 provides the exclusive authority and procedure for the initiation, conduct, and completion of changes of organization and reorganization for special districts, as specified. The California Public Records Act requires a local agency to make public records available for inspection and allows a local agency to comply by posting the record on its Internet Web site and directing a member of the public to the Web site, as specified.This bill would, beginning on January 1, 2020, require every independent special district to maintain an Internet Web site that clearly lists contact information for the special district, except as provided. Because this bill would require local agencies to provide a new service, the bill would impose a state-mandated local program.The California Constitution requires local agencies, for the purpose of ensuring public access to the meetings of public bodies and the writings of public officials and agencies, to comply with a statutory enactment that amends or enacts laws relating to public records or open meetings and contains findings demonstrating that the enactment furthers the constitutional requirements relating to this purpose.This bill would make legislative findings to that effect.This bill contains other existing laws. **Last Amended on 3/6/2018**
SB 969 **Dodd D** Automatic garage door openers: backup batteries.	ASSEMBLY THIRD READING 7/5/2018 - Read second time. Ordered to third reading. 8/6/2018 #115 ASSEMBLY THIRD READING FILE - SENATE BILLS	Existing law requires an automatic garage door opener that is manufactured for sale, purchased, sold, offered for sale, or installed in a residence to comply with specified safety requirements, including that the automatic garage door opener have an automatic reverse safety device. This bill, beginning July 1, 2019, would also require an automatic garage door opener that is manufactured for sale, sold, offered for sale, or installed in a residence to have a battery backup function that is designed to operate when activated because of an electrical outage. The bill would make a violation of those provisions subject to a civil penalty of $1,000. The bill would, on and after July 1, 2019, prohibit a replacement residential garage door from being installed in a manner that connects the door to an existing garage door opener that does not meet the requirements of these provisions. **Last Amended on 6/14/2018**
SB 1040 **Dodd D** In-home	ASSEMBLY APPR. 6/27/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 7. Noes 0.) (June 27). Re-referred to Com. on APPR.	(1)Existing law establishes the In-Home Supportive Services (IHSS) program, administered by the State Department of Social Services and counties, under which qualified aged, blind, and disabled persons are provided with supportive services, as defined, in order to permit them to remain in their own homes. The California Emergency Services Act authorizes the Governor to

supportive services: natural disaster.	8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	declare a state of emergency under specified conditions and requires a county, including a city and county, to update its emergency plan to address, among other things, how the access and functional needs population, as defined, is served by emergency communications, evacuation, and sheltering.This bill would require a county to use a void and reissue warrant process for any provider who lost or had damaged an uncashed warrant because of a natural disaster resulting in a state of emergency. The bill would require a county, including a city and county, at the next update to its emergency plan, to integrate and require the assessment and provision of supportive services to IHSS recipients.This bill contains other related provisions and other existing laws. **Last Amended on 6/19/2018**
SB 1076 Hertzberg D Emergency preparedness: electrical utilities: electromagnetic pulse attacks and geomagnetic storm events.	ASSEMBLY APPR. 7/5/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	The California Emergency Services Act creates within the office of the Governor the Office of Emergency Services, which is responsible for the state's emergency and disaster response services, as specified. Existing law requires the office to update the State Emergency Plan on or before January 1, 2019, and every 5 years thereafter.This bill would require the office to update the State Emergency Plan to include cost-effective preparedness recommendations to feasibly harden the critical infrastructure of electrical utilities against an electromagnetic pulse attack, geomagnetic storm event, or other potential cause of a long-term outage. **Last Amended on 7/5/2018**
SB 1079 Monning D Forest resources: fire prevention grants: advance payments.	ASSEMBLY THIRD READING 7/2/2018 - Read second time. Ordered to third reading. 8/6/2018 #103 ASSEMBLY THIRD READING FILE - SENATE BILLS	Existing law authorizes the Director of Forestry and Fire Protection to provide grants to entities, including, but not limited to, private or nongovernmental entities, Native American tribes, or local, state, and federal public agencies, for the implementation and administration of projects and programs to improve forest health and reduce greenhouse gas emissions. The Budget Act of 2017 appropriated moneys to the Department of Forestry and Fire Protection for purposes of, among other things, providing local assistance grants, grants to fire safe councils, and grants to qualified nonprofit organizations with a demonstrated ability to satisfactorily plan, implement, and complete a fire prevention project for these same purposes, as provided.This bill would, until January 1, 2024, authorize the director to authorize advance payments to a nonprofit organization, a local agency, a special district, a private forest landowner, or a Native American tribe from the grant awards specified above. The bill would prohibit a single advance payment from exceeding 25% of the total grant award. The bill would place specified requirements on the grantee of the advance payment, including that the grantee file an accountability report with the department, as provided. The bill would require the department to provide a report to the Legislature on or before January 1, 2023, on the outcome of the use of the advance payments.This bill contains other related provisions. **Last Amended on 6/28/2018**
SB 1088 Dodd D Safety, reliability, and resiliency planning: general rate case cycle.	ASSEMBLY RLS. 7/5/2018 - Re-referred to Com. on RLS. pursuant to Assembly Rule 96.	Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations. Existing law authorizes the commission, after a hearing, to require every public utility to construct, maintain, and operate its line, plant, system, equipment, apparatus, tracks, and premises in a manner so as to promote and safeguard the health and safety of its employees, passengers, customers, and the public. Existing law requires electrical corporations to annually prepare and submit a wildfire mitigation plan to the commission for review. Existing law requires the commission to establish standards for disaster and emergency preparedness plans, as specified, and requires an electrical corporation to develop, adopt, and update an emergency and disaster preparedness plan, as specified.This bill would require the office, in consultation with specified public entities, by September 30, 2019, to

		adopt standards for reducing risks from a major event, as defined. The bill would require those standards to include model policies that may be undertaken by local governments regarding, among other things, defensible space, and actions that may be undertaken by an electrical or gas corporation, a local publicly owned electric or gas utility, or a water utility to reduce the risk of fire occurring during a major event. The bill would require the office to update the standards at least once every 2 years.This bill contains other related provisions and other existing laws. **Last Amended on 7/3/2018**
SB 1181 **Hueso D** Emergency services: certified community conservation corps.	ASSEMBLY APPR. 6/21/2018 - From committee: Do pass and re-refer to Com. on APPR. with recommendation: To consent calendar. (Ayes 19. Noes 0.) (June 20). Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	Existing law, the California Emergency Services Act, grants the Governor certain powers to be exercised in accordance with the State Emergency Plan and programs for the mitigation of the effects of an emergency. Existing law creates the Office of Emergency Services within the Governor's office and commits to the office the responsibility for the state's response services for natural, technological, or manmade disasters and emergencies.This bill would authorize the Office of Emergency Services to enter into an agreement directly with one or more certified community conservation corps, as defined, to perform emergency or disaster response services as the office deems appropriate.
SB 1205 **Hill D** Fire protection services: inspections: compliance reporting.	ASSEMBLY APPR. 7/2/2018 - From committee: Do pass and re-refer to Com. on APPR. (Ayes 21. Noes 0.) (June 28). Re-referred to Com. on APPR. (Received June 29 pursuant to Joint Rule 61(b)(13)). 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	Existing law requires the chief of any city or county fire department or district providing fire protection services and his or her authorized representatives to inspect every building used as a public or private school within his or her jurisdiction, for the purpose of enforcing specified building standards, not less than once each year, as provided. Existing law requires every city or county fire department or district providing fire protection services that is required to enforce specified building standards to annually inspect certain structures, including hotels, motels, lodging houses, and apartment houses, for compliance with building standards, as provided.This bill would require every city or county fire department, city and county fire department, or district required to perform the above-described inspections to report annually to its administering authority, as defined, on the department's, or district's, compliance with the above-described inspection requirements, as provided. The bill would require the administering authority to acknowledge receipt of the report in a resolution or a similar formal document. To the extent this bill would expand the responsibility of a local agency, the bill would create a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 6/20/2018**
SB 1260 **Jackson D** Fire prevention and protection: prescribed burns.	ASSEMBLY APPR. 7/2/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	(1)Existing law requires a local agency to designate, by ordinance, very high fire hazard severity zones in its jurisdiction, as provided in connection with a state program for fire prevention.This bill would require the local agency to transmit a copy of the adopted ordinance to the State Board of Forestry and Fire Protection within 30 days of adoption. By imposing a new duty on a local agency, the bill would impose a state-mandated local program.This bill contains other related provisions and other existing laws. **Last Amended on 7/2/2018**
SB 1263 **Portantino D** Ocean Protection Council: Statewide	ASSEMBLY APPR. 6/28/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room	The California Ocean Protection Act establishes the Ocean Protection Council in state government and prescribes the functions and duties of the council with regard to the protection and conservation of coastal waters and ocean ecosystems.This bill would require the council, to the extent funds are available from bonds or other sources, to adopt and implement a Statewide Microplastics Strategy related to microplastic materials that pose an emerging concern for ocean health and that includes specified components, as provided. The bill would authorize the council,

Microplastics Strategy.	4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	in collaboration with the State Water Resources Control Board, the Office of Environmental Health Hazard Assessment, and other interested entities, to enter into one or more contracts with marine research institutes in the state for the provision of research services that would contribute directly to the development of the Statewide Microplastics Strategy. The bill would require the council, subject to the availability of funding, to submit the Statewide Microplastics Strategy to the Legislature on or before December 31, 2021, and to report to the Legislature on the implementation and findings of the Statewide Microplastics Strategy, and on recommendations for policy changes or additional research, on or before December 31, 2025. **Last Amended on 6/28/2018**
SB 1305 **Glazer D** Emergency medical services providers: dogs and cats.	ASSEMBLY APPR. 6/27/2018 - Read second time and amended. Re-referred to Com. on APPR.	Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act (the act), establishes the Emergency Medical Services Authority to coordinate and integrate all state activities concerning emergency medical services, including, among other duties, establishing training standards for specified emergency services personnel. The act provides a qualified immunity for public entities and emergency rescue personnel providing emergency services. The act provides other exemptions from liability for specified professionals rendering emergency medical services.This bill would authorize an emergency medical services provider, as defined, to provide basic first aid to dogs and cats, as defined, to the extent that the provision of that care is not prohibited by the provider's employer. The bill would limit civil liability for specified individuals who provide care to a pet or other domesticated animal during an emergency by applying existing provisions of state law. The definition of "basic first aid to dogs and cats" for purposes of these provisions would specifically include, among other acts, administering oxygen and bandaging for the purpose of stopping bleeding.This bill contains other existing laws. **Last Amended on 6/27/2018**
SB 1339 **Stern D** Electricity: microgrids: tariffs.	ASSEMBLY APPR. 7/5/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	(1)Under existing law, the Public Utilities Commission (PUC) has regulatory authority over public utilities, including electrical corporations, while local publicly owned electric utilities, as defined, are under the direction of their governing boards. Existing law authorizes the commission to fix the rates and charges for every public utility and requires that those rates and charges be just and reasonable.This bill would require the PUC, in consultation with the State Energy Resources Conservation and Development Commission and the Independent System Operator, to take specified actions by January 1, 2020, to facilitate the commercialization of microgrids for distribution customers of electrical corporations. The bill would prohibit the PUC from permitting a microgrid that uses diesel backup or gas-combustion generation. The bill would require a local publicly owned electric utility that serves more than 700,000 customers to develop a process for interconnection of customer-supported microgrids and to make this process available by January 1, 2020. The bill would prohibit these local publicly owned electric utilities from permitting a microgrid that uses diesel backup or gas-combustion generation.This bill contains other related provisions and other existing laws. **Last Amended on 7/5/2018**
SB 1415 **McGuire D** Housing.	ASSEMBLY THIRD READING 6/28/2018 - Read second time. Ordered to third reading. 8/6/2018 #95 ASSEMBLY THIRD READING FILE - SENATE BILLS	(1)Existing law requires the State Fire Marshal, the chief of any city, county, or city and county fire department or district providing fire protection services, or a Designated Campus Fire Marshal, and their authorized representatives, to enforce in their respective areas building standards relating to fire and panic safety adopted by the State Fire Marshal and published in the California Building Standards Code, and other regulations that have been formally adopted by the State Fire Marshal for the prevention of fire or for the protection of life and property against fire or panic. Existing law also authorizes a city, county, or city and county fire department or fire protection district to adopt more stringent or restrictive regulations. This bill would require

		each entity responsible for enforcing building standards and other regulations of the State Fire Marshal, as specified, to inspect, every 5 years, all structures within the entity's responsibility that are in the Factory Industrial Group F, High-Hazard Group H, and Storage Group S occupancy classifications, as described, for compliance with those standards and regulations, or, if applicable, more stringent or restrictive local regulations. The bill would authorize an entity that inspects a structure pursuant to these provisions to charge and collect a fee from the owner of the structure to recover the costs of the inspection or related fire and life safety activities. This bill contains other related provisions and other existing laws. **Last Amended on 5/25/2018**
SB 1416 **McGuire D** Local government: nuisance abatement.	ASSEMBLY THIRD READING 7/2/2018 - Read second time. Ordered to third reading. 8/6/2018 #105 ASSEMBLY THIRD READING FILE - SENATE BILLS	Existing law authorizes the legislative body of a city or county to establish a procedure to use a nuisance abatement lien or a special assessment to collect abatement costs and related administrative costs.This bill would authorize, until January 1, 2024, the legislative body of a city or county to also collect fines related to the nuisance abatement using a nuisance abatement lien or a special assessment. The bill would require any fines or penalties related to nuisance abatement that are recovered pursuant to these provisions to be used for specified purposes relating to supporting local enforcement of state and local building and fire code standards. **Last Amended on 4/4/2018**
SB 1453 **McGuire D** Statutes of limitations.	ASSEMBLY SECOND READING 7/5/2018 - Read second time and amended. Ordered to second reading. 8/6/2018 #4 ASSEMBLY SECOND READING FILE -- SENATE BILLS	Existing law provides that civil actions can only be commenced within prescribed periods, based on the nature of the action. Existing law prescribes a limitations period of one year for, among other things, an action upon a statute for a forfeiture or penalty to the people of the state. Under existing law, this one-year period is applicable to an action to petition a court to impose a civil penalty for an intentional, knowing, or negligent violation of the Z'berg-Nejedly Forest Practice Act of 1973 (FPA) or any rules or regulations of the State Board of Forestry and Fire Protection.This bill would instead provide that such an action is subject to a 3-year limitations period, if the action is for a violation of specified provisions of the FPA or a specified regulation of the board and is related to the conversion of timberland to nonforestry-related agricultural uses. The bill would provide that the limitations period for this cause of action does not begin until discovery by the Department of Forestry and Fire Protection. **Last Amended on 7/5/2018**
SB 1477 **Stern D** Low-emissions buildings and sources of heat energy.	ASSEMBLY APPR. 7/5/2018 - Read second time and amended. Re-referred to Com. on APPR. 8/8/2018 9 a.m. - State Capitol, Room 4202 ASSEMBLY APPROPRIATIONS, GONZALEZ FLETCHER, Chair	Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations and gas corporations. Existing law authorizes the commission to allocate up to 15% of the revenues received by an electrical corporation as a result of the direct allocation of greenhouse gas allowances to electrical distribution utilities for clean energy and energy efficiency projects established pursuant to statute that are administered by the electrical corporation, or a qualified third-party administrator as approved by the commission, and that are not otherwise funded by another funding source. This bill would require the commission to develop and administer the Technology and Equipment for Clean Heating (TECH) Initiative, a statewide market development initiative, to require gas corporations to advance the state's market for low-emission space and water heating equipment for new and existing residential and nonresidential buildings. The bill would require the commission, as a part of the initiative, to identify and target key low-emission space and water heating equipment technologies that are in an early stage of market development and that would assist the state in achieving its greenhouse gas emissions reduction goals. The bill would require the commission to develop guidelines and evaluation metrics, implement outreach strategies for hard-to-reach customers, and provide for job training and employment opportunities, in administering the TECH Initiative.This bill contains other related provisions and other existing laws. **Last Amended on 7/5/2018**

Sonoma County Recovery and Resiliency Plan Update
August 14, 2018

	Recovery & Resiliency Activity Update (not a comprehensive list)	Housing	Community Preparedness	Natural Resources	Economic Recovery	Safety Net
	Significant Completed Activities					
1	Housed close to 70 at-risk residents out of emergency shelters in one week	X				
2	Installed 43 miles of wattles in burn areas to prevent erosion			X		
3	Cleared 3,789 lots of fire debris under government program	X			X	
4	Protected hundreds of mile of streams and creeks from toxic runoff			X		
5	Conducted over 100 recovery related community meetings to support fire survivors	X	X			X
6	$3.25M emergency state grant received for dislocated workers				X	
7	2,400 subscribers to Sonoma County Recovers email newsletter	X	X	X	X	X
8	Rain warning postcards sent to 4,000 property owners in burn areas		X			
9	Flood Prevention Map and warning system created by Watershed Task Force		X	X		
10	10,700 burned trees identified that pose risks to county roads		X	X		
11	Resiliency Permit Center opened: 2700+ visitors/2000+ calls to date	X			X	
12	Rain/stream gauge network installed in burn areas with public website		X	X		
13	Created #GoSoCo campaign				X	
14	Established SBA Business Recovery Center				X	
15	40 financial institutions convened by Federal Reserve Bank of San Francisco to plan for capital needs	X				
16	Requested and Received disaster waivers from HUD	X				
17	Closed homeless encampment at Roseland Village and offered housing/services to all occupants to make way for new housing construction	X				
18	Committed $4.5 million for construction of new affordable housing properties	X				
19	Secured $250,000 from a NGO grant to build capacity of CDC as the County's lead housing agency	X				
20	Established a Streamlining Tools to Ease Permitting (STEP) taskforce with industry	X			X	
21	Job Link assisted 4,700 with disaster unemployment insurance					X
22	Urgency housing ordinances passed enabling use of RVs, rental of guest houses	X				
23	Housing Taskforce worked with FEMA to provide 120 spaces at fairgrounds	X				
24	Permit Sonoma held meetings to streamline private bridge repair and reconstruction	X				
25	Created Sonoma County Recovers – a one-stop online resource for the community	X	X	X	X	X
26	Supported block captain meetings and ongoing efforts	X	X	X	X	X
27	8 free residential landscape templates created for fire rebuild	X		X		

Sonoma County Recovery and Resiliency Plan Update
August 14, 2018

	Recovery & Resiliency Activity Update (not a comprehensive list)	Housing	Community Preparedness	Natural Resources	Economic Recovery	Safety Net
28	County staff trained in new Integrated Public Alert Warning System		X			
29	Created 90 character limit Wireless Emergency Alert message templates		X			
30	Created and recorded evacuation messages using SoCoAlert templates		X			
31	Completed After Action Report on October wildfires		X			
32	Increased size, adjust the minimum lot size, and reduce fees for certain Accessory Dwelling Units (ADU) to make delivery of affordable housing in both residential and rural areas more attractive	X				
33	Defered collection of certain Impact Fees until after building permits have been issued to allow lower carrying costs for the project and to create the option for these fees to be rolled into permanent financing for the project	X				
34	Allowed staff approval of innovative proposals through the Alternative Equivalent Proposals process when they meet established criteria	X				
35	Modifed the Single Room Occupancy (SRO) facilities provisions to allow small SROs by right and remove the size cap for larger SROs by use permit	X				
	Significant Activities In Progress					
36	Legislative advocacy on regional, state and federal level	X	X	X	X	X
37	Fire Camera pilot project at Lake Sonoma		X	X

92	Facilitate hardened construction techniques for rebuilding homes through consultation and project planning assistance from the County Fire Marshal's prevention office		X			
93	Facilitate opportunities for new construction worker housing through use of RV sites	X			X	
94	Explore public-private partnerships for ride sharing programs to create affordable transportation solutions				X	X
95	Explore opportunities to leverage SMART and expand, adjust, and discount bus routes, especially for displaced residents				X	X

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 24
(This Section for use by Clerk of the Board Only.)

To:	Board of Supervisors
Board Agenda Date:	August 14, 2018
Vote Requirement:	Majority
Department or Agency Name(s):	General Services, Economic Development Board, Board of Supervisors, Information Systems
Staff Name and Phone Number:	Shane Lewis (ISD) 565-6031, Kay Lowtrip (BOS) 565-3747, Debbie Fox (EDB) 565-7298
Supervisorial District(s):	All
Title:	Video Production Services Agreement

Recommended Actions:

Authorize the Chair of the Board to execute an Agreement with Culture Pop Films for Video Production Services for a three year period from September 1, 2018 to August 31, 2021 for an amount not to exceed $258,354.

Authorize the Chair of the Board the option to execute two extensions for a period of one year each.

Executive Summary:

In June 2018 a Request For Proposals was issued seeking Video Production Services for the Board of Supervisors general public meetings, the Economic Development Board's annual State of the County address, and various other videography needs by other County departments. The County received two proposals from qualified vendors. After a thorough, weighted evaluation of the proposals, conducted by a review team comprised of staff from General Services, Information Systems, Economic Development Board, and Board of Supervisors departments, the review team recommends that we enter into an agreement with Culture Pop Films.

Discussion:

The Request For Proposals that was recently concluded sought out qualified video production service providers to capture, record and distribute various County events including its Board of Supervisors regular, weekly meetings and State of the County annual event sponsored by the Economic Development Board.

Culture Pop Films is the current vendor providing Video Production Services to the Board of Supervisors, Economic Development Board and other County departments in accordance with a contract that was awarded on September 1, 2015.

BOARD OF SUPERVISORS

The Board of Supervisors has been streaming meetings for the general public since 2009. Audio and video content are currently produced by Culture Pop Films, a local production company, using the County's broadcasting production booth. A digital recording is uploaded to a third party automated hosted solution for live viewing and available for on-demand access via an archival repository. County owns a copy of all archives (since 2010) which reside on a County owned premise server. In compliance with the Americans with Disabilities Act, all significant audio content is transcribed in real-time (closed captioning) and integrated through the streamed video solution.

The list of services that will be provided include:

a) Video and audio recording of County events, public addresses, and trainings;
b) Capture includes sending the live video signal to County's streaming media third party vendor;
c) Operation of the camera in the control room;
d) Provision of professional recording staff and recording equipment;
e) Conversion of recordings to digital masters;
f) Distribution of recordings as requested through live webcasts, web streaming, and local public access television;
g) Post production editing services;
h) Provision one (1) DVD immediately following the Board of Supervisors meetings; and
i) Provision of multiple additional DVDs, not to exceed five (5), to media centers designated by the Board of Supervisors.

ECONOMIC DEVELOPMENT BOARD

For more than ten years, the Economic Development Board has produced the State of the County address whereby the Chair of the Board of Supervisors presents the County's annual report to the community at an off-site location typically in the large ballroom of a local hotel.

The list of services that will be provided include:

a) Production management;
b) Pre-production planning, consultation and graphic preparation;
c) Location setup & teardown services;
d) Live digital video capture of the event;
e) Presentation of PowerPoint in separate feed from presenters vacillating between PowerPoint and presenter; and
f) Post-production editing, DVD mastering, processing and uploading files to YouTube with full caption of all uploaded videos.

g) Provide 3 DVD masters of the full event and an upload of the finished program to YouTube with the addition of participant name keys, production credits and acknowledgements. If necessary, in 3 or 4 segments.

Prior Board Actions:

8/25/2015 – Item No. 18 Board approved an agreement with Santa Rosa Community Media Access Center, Inc. in an amount not-to-exceed $117,900 for a three year period from July 1, 2015 to June 30, 2018 and Culture Pop Films, Inc. on an as needed basis for a three year period from September 1, 2015 to August 31, 2018

6/10/2014 – Item No. 49 Board approved an agreement with CMC in the amount of $55,000

6/4/2013 – Item No. 42 Board approved an agreement with CMC

5/22/2012 – Item No. 34 Board approved an agreement with CMC in the amount of $50,000

12/13/2011 - Board authorized the first amendment with CMC agreement increasing the amount to $50,000

9/29/2009 – Item No. 29 Board approved an agreement with Community Media Center (CMC) to film Board meetings and the "Sonoma County Today" show

Strategic Plan Alignment Goal 4: Civic Services and Engagement

This service agreement will enable the Board of Supervisors, Economic Development Board and other county departments to provide live streaming video of Board meetings and annual state of the County address to encourage citizen participation in County government.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	86,118	86,118	86,118
Additional Appropriation Requested			
Total Expenditures	**86,118**	**86,118**	**86,118**
Funding Sources			
General Fund/WA GF	67,500	67,500	67,500
State/Federal			
Fees/Other	18,618	18,618	18,618
Use of Fund Balance			
Contingencies			
Total Sources	**86,118**	**86,118**	**86,118**

Narrative Explanation of Fiscal Impacts:

The County receives approximately $1.4 million in franchise fees from cable operators' activities, of which $67,500 has been budgeted annually for filming and video production services of Board of Supervisors' public meetings, this is budgeted within the special projects unit managed by Transportation and Public Works. The EDB's annual cost for services is $4,398 per year funded with Transient Occupancy Tax funds allocated to the department. The remainder of $14,220 is anticipated to be available in other departmental budgets, should they need to use the services.

Revision G – June 2016

AGREEMENT FOR PROFESSIONAL SERVICES

This agreement ("Agreement"), dated as of _____, 2018 ("Effective Date") is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Daydreamer Cinema, LLC dba Culture Pop Films (hereinafter "Consultant").

R E C I T A L S

WHEREAS, Consultant represents that it is a duly qualified Video Production Service Provider, experienced in capturing, recording and distributing video and related services; and

WHEREAS, in the judgment of the County of Sonoma, it is necessary and desirable to employ the services of Consultant for video production and distribution.

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

A G R E E M E N T

l. Scope of Services.

1.1 Consultant's Specified Services**.** Consultant shall perform the services described in Exhibit "A," attached hereto and incorporated herein by this reference (hereinafter "Scope of Work"), and within the times or by the dates provided for in Exhibit "A" and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit "A", the provisions in the body of this Agreement shall control.

1.2 Cooperation With County. Consultant shall cooperate with County and County staff in the performance of all work hereunder.

1.3 Performance Standard. Consultant shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Consultant's profession. County has relied upon the professional ability and training of Consultant as a material inducement to enter into this Agreement. Consultant hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Consultants work by County shall not operate as a

waiver or release. If County determines that any of Consultant's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Consultant to meet with County to review the quality of the work and resolve matters of concern; (b) require Consultant to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.4 Assigned Personnel.

a. Consultant shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Consultant to perform work hereunder, Consultant shall remove such person or persons immediately upon receiving written notice from County.

b. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Consultant shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of County.

c. In the event that any of Consultant's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Consultant's control, Consultant shall be responsible for timely provision of adequately qualified replacements.

2. Payment.

For all services and incidental costs required hereunder, Consultant shall be paid on a time and material/expense basis in accordance with the rates set forth in Exhibit A, provided, however, that total payments to Consultant shall not exceed Two Hundred Fifty Eight Thousand Three Hundred Fifty Four dollars ($258,354), without the prior written approval of County. Consultant shall submit its bills in arrears on a monthly basis in a form approved by County's Auditor and the Head of the County Department receiving the services. The bills shall show or include: (i) the task(s) performed; (ii) the time in quarter hours devoted to the task(s); (iii) the hourly rate or rates of the persons performing the task(s); and (iv) copies of receipts for reimbursable materials/expenses, if any. Expenses not expressly authorized by the Agreement shall not be reimbursed.

Unless otherwise noted in this Agreement, payments shall be made within the normal course of County business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Consultant for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Consultant does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

If Consultant does not qualify, County requires that a completed and signed Form 587 be provided by the Consultant in order for payments to be made. If Consultant is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the Consultant agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Consultant has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement. The term of this Agreement shall be from September 1, 2018 to August 31, 2021 unless terminated earlier in accordance with the provisions of Article 4 below.

3.1 Extension Options: County shall have two (2) options to extend the term of this agreement for an additional one (1) year each, which shall include all the provisions within Exhibit A, following the expiration of the initial term, by providing written notice to contractor at least thirty (30) days prior to the expiration of the initial term.

4. Termination.

4.1 Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving 5 days written notice to Consultant.

4.2 Termination for Cause. Notwithstanding any other provision of this Agreement, should Consultant fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Consultant written notice of such termination, stating the reason for termination.

4.3 Delivery of Work Product and Final Payment Upon Termination.
In the event of termination, Consultant, within 14 days following the date of termination, shall deliver to County all reports, original drawings, graphics, plans, studies, and other data or documents, in whatever form or format, assembled or

prepared by Consultant or Consultant's subcontractors, consultants, and other agents in connection with this Agreement and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.4 Payment Upon Termination. Upon termination of this Agreement by County, Consultant shall be entitled to receive as full payment for all services satisfactorily rendered and reimbursable expenses properly incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Consultant bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Consultant shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Section 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Consultant.

4.5 Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or Information Systems Department Head, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification. Consultant agrees to accept all responsibility for loss or damage to any person or entity, including County, and to indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Consultant, that arise out of, pertain to, or relate to Consultant's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Consultant agrees to provide a complete defense for any claim or action brought against County based upon a claim relating to such Consultant's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Consultant's obligations under this Section apply whether or not there is concurrent or contributory negligence on County's part, but to the extent required by law, excluding liability due to County's conduct. County shall have the right to select its legal counsel at Consultant's expense, subject to Consultant's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Consultant or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance. With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in Exhibit B, which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work. The execution of this Agreement shall constitute Consultant's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Consultant's performance of this Agreement shall be extended by a number of days equal to the number of days Consultant has been delayed.

8. Extra or Changed Work. Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes, which do not exceed the delegated signature authority of the Department Head and which do not significantly change the scope of work or significantly lengthen time schedules may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors must authorize all other extra or changed work. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Consultant to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Consultant shall be entitled to no compensation whatsoever for the performance of such work. Consultant further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Consultant.

9.1 Standard of Care. County has relied upon the professional ability and training of Consultant as a material inducement to enter into this Agreement. Consultant hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Consultant's work by County shall not operate as a waiver or release.

9.2 Status of Consultant. The parties intend that Consultant, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Consultant is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Consultant expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3 No Suspension or Debarment. Consultant warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Consultant also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration. If the Consultant becomes debarred, consultant has the obligation to inform the County

9.4 Taxes. Consultant agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Consultant agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Consultant's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Consultant agrees to furnish County with proof of payment of taxes on these earnings.

9.5 Records Maintenance. Consultant shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Consultant shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6 Conflict of Interest. Consultant covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Consultant further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Consultant shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Consultant's or such other person's financial interests.

9.7 Statutory Compliance/Living Wage Ordinance. Consultant agrees to comply with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Consultant expressly acknowledges and agrees that this Agreement is subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.8 Nondiscrimination. Without limiting any other provision hereunder, Consultant shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis, including without limitation, the County's Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.9 AIDS Discrimination. Consultant agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.10 Assignment of Rights. Consultant assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Consultant in connection with this Agreement. Consultant agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Consultant's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County. Consultant shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.11 Ownership and Disclosure of Work Product. All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Consultant or Consultant's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of County. County shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Consultant shall promptly deliver to County all such documents, which have not already been provided to County in such form or format, as County deems appropriate. Such documents shall be and will remain the property of County without restriction or limitation. Consultant may retain copies of the above- described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of County.

9.12 Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Consultant.

10. Demand for Assurance. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When

reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation. Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice, Submitting Bills and Making Payments. All notices, bills, and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail or courier service. Notices, bills, and payments shall be addressed as follows:

TO: COUNTY:

Board of Supervisors
575 Administration Dr.
Room 100A
Santa Rosa, CA 95403

Economic Development Board
141 Stony Circle, Suite 110
Santa Rosa, CA 95401

Information Systems Department
2615 Paulin Dr.
Santa Rosa, CA 95403

General Services Department
2300 County Center Dr. #A200
Santa Rosa, CA 95403

TO: CONSULTANT:

Culture Pop Films
111 5th Street
Santa Rosa, CA 95401

When a notice, bill or payment is given by a generally recognized overnight courier service, the notice, bill or payment shall be deemed received on the next business day. When a copy of a notice, bill or payment is sent by facsimile or email, the notice, bill or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1 No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2 Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Consultant and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Consultant and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3 Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4 No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5 Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6 Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7 Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9 Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

Exhibit B

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. **Workers Compensation and Employers Liability Insurance**
   - **a.** Required if Consultant has employees as defined by the Labor Code of the State of California.
   - **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   - **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   - **d.** *Required Evidence of Insurance*: Certificate of Insurance.

   If Consultant currently has no employees as defined by the Labor Code of the State of California, Consultant agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

2. **General Liability Insurance**
   - **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   - **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Consultant.
   - **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Consultant is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the County.
   - **d.** County of Sonoma, its Officers, Agents and Employees shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between the additional insureds and Consultant and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. *Required Evidence of Insurance:*

i. Copy of the additional insured endorsement or policy language granting additional insured status; and

ii. Certificate of Insurance.

3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limits may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

4. Professional Liability/Errors and Omissions Insurance

a. Minimum Limits: $1,000,000 per claim or per occurrence; $1,000,000 annual aggregate.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County.

c. If Consultant's services include: (1) programming, customization, or maintenance of software: or (2) access to individuals' private, personally identifiable information, the insurance shall cover:

i. Breach of privacy; breach of data; programming errors, failure of work to meet contracted standards, and unauthorized access; and

ii. Claims against Consultant arising from the negligence of Consultant, Consultant's employees and Consultant's subcontractors.

d. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

e. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.

f. *Required Evidence of Insurance*: Certificate of Insurance specifying the limits and the claims-made retroactive date.

5. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

6. Documentation

a. The Certificate of Insurance must include the following reference: Video Production Services.

b. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Consultant agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1 – 4 above.

c. The name and address for Additional Insured endorsements and Certificates of Insurance is: County of Sonoma, its Officers, Agents and Employees.

d. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

e. Consultant shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

f. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

7. Policy Obligations

Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

8. Material Breach

If Consultant fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Consultant resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Consultant, County may deduct from sums due to Consultant any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

COUNTY OF SONOMA

VIDEO PRODUCTION SERVICES

Request for Proposals (RFP)

The County of Sonoma is pleased to invite you to respond to a Request for Proposals for Video Production Services.

Proposals must be received no later than 2:00 p.m. on Friday, July 13, 2018.

Rev. C
Rev. Date 03/06/2017

A. Introduction/Purpose

The County of Sonoma is seeking a vendor to provide video production services to County departments primarily to serve the Board of Supervisors during general public meetings and the Economic Development Board's annual State of the County address.

1. Project Background and Description

The County of Sonoma is requesting proposals for a duly qualified video production service provider to capture, record and distribute various County events including its Board of Supervisors regular, weekly meetings and State of the County annual event sponsored by the Economic Development Board. Video production services may also be requested by other County departments with varying business requirements not known at the time of this issuance.

I. BACKGROUND

BOARD OF SUPERVISORS

The Board of Supervisors has been streaming meetings for the general public since 2009. Audio and video content are currently produced by a local production company using the County's broadcasting production booth. A digital recording is uploaded to a third party automated hosted solution for live viewing and available for on-demand access via an archival repository. County owns a copy of all archives (since 2010) which reside on a County owned premise server. In compliance with the American Disabilities Act, all significant audio content is transcribed in real-time (closed captioning) and integrated through the streamed video solution.

The County of Sonoma owns the following equipment in support of streaming public meetings. County prefers vendor use County's equipment, however, use of Vendor's equipment would be subject to consideration.

- Board of Supervisors Chambers
  - 4 cameras
  - 14 microphones strategically located at the dais, staff table, and lectern.

- Electrical Closet
- Cisco ASA 5520 firewall
- Shure ULXP4 wireless microphone amplifier
- QMOD-SDI modulator
- DelvCam monitor 2LCO-7XLRM
- AMX control for lighting, microphones, recording, audio conferencing, presentation controls

- Broadcast PIX – recording
- QSC Cameras
- RANE distribution amplifier
- QSC – core 250i for cameras
- ALTEC Lansing Furman power conditioning
- Sun Room
- Broadcast production booth

ECONOMIC DEVELOPMENT BOARD
For more than ten years, the Economic Development Board has produced the State of the County address whereby the Chair of the Board of Supervisors presents the County's annual report to the community at an off-site location typically in the large ballroom of a local hotel.

2. Desired Goals/Objectives/Outcomes

BOARD OF SUPERVISORS
The successful Vendor will provide high quality video production services for the Board of Supervisors general public meetings, there are approximately thirty-six (36) meetings are held per year predominantly on Tuesdays.

ECONOMIC DEVELOPMENT BOARD
The successful Vendor will provide high quality video production services for the annual State of the County event.

B. Statement of Requirements - Services Required of Successful Proposer

BOARD OF SUPERVISORS

The successful Vendor will provide high quality video production services for the Board of Supervisors general public meetings. Approximately thirty-six (36) meetings are held per year predominantly on Tuesdays. Services to include:

a) Vendor will be proficient in using County-owned equipment;
b) Video and audio recording of County events, public addresses, and trainings;
c) Capture includes sending the live video signal to County's streaming media third party vendor;
d) Operation of the camera in the control room;
e) Provision of professional recording staff and recording equipment;
f) Conversion of recordings to digital masters;
g) Distribution of recordings as requested through live webcasts, web streaming, and local public access television; and
h) Post production editing services.

DELIVERABLES

a) Provision one (1) DVD immediately following the Board of Supervisors meetings; and
b) Provision of multiple additional DVDs, not to exceed five (5), to media centers designated by the Board of Supervisors.

ECONOMIC DEVELOPMENT BOARD

The successful Vendor will provide high quality video production services for the annual State of the County event. Services to include:

a) Production management;
b) Pre-production planning, consultation and graphic preparation;
c) Location setup & teardown services;
d) Live digital video capture of the event;
e) Presentation of PowerPoint in separate feed from presenters vacillating between PowerPoint and presenter; and
f) Post-production editing, DVD mastering, processing and uploading files to YouTube with full caption of all uploaded videos.

DELIVERABLES

a) Provide 3 DVD masters of the full event and an upload of the finished program to YouTube with the addition of participant name keys, production credits and acknowledgements. If necessary in 3 or 4 segments.

OTHER SERVICES

No other services have been identified at this time; however, we ask Vendors to provide a standard cost of services price list to meet this requirement.

VENDOR QUALIFICATIONS

a) Vendor shall have at least five (5) years' experience as a video production services provider at the time of the Proposal due date;
b) Vendor agrees to take full responsibility for delivering the video production output files;
c) Vendor shall have sufficient support staff to ensure 100% availability and service coverage for ALL Board of Supervisors meetings;

d) Vendor shall meet the County's Insurance requirements; and
e) Vendor shall be financially stable.

C. *Local Preference*

It is the policy of the County to promote employment and business opportunities for local residents and firms on all contracts and give preference to local residents, workers, businesses and consultants to the extent consistent with the law and interests of the public. A Local Service Provider is defined as a business or consultant who has a valid physical address located within Sonoma County from which the supplier or consultant operates or performs business on a day-to-day basis, and holds a valid business license if required by a city within the jurisdiction of Sonoma County.

For quantitative evaluations of proposals, the locality of the service provider shall be included as an evaluation criterion in RFPs. Extra percentage weighting of 5% shall be provided in the total rating score for local service providers. For qualitative evaluations of proposals, Departments shall consider the locality of consultants or businesses and their sub-consultants along with other criteria identified in the RFP. If there is more than one service provider being considered and the providers are competitively matched in terms of other criteria, local service providers should be selected. If hiring sub-consultants, the County strongly encourages using local service providers. More information about the County's purchasing policies can be found on:

Local Preference Policy for Services

D. *Schedule*

The following schedule is subject to change. Except as provided below, changes will only be made by written amendment to this Request for Proposals, which amendment shall be issued to all parties by the Department issuing this proposal.

Date	**Event**
Thursday, June 21, 2018	Release Request for Proposals
Thursday, June 28, 2018	Proposer's Questions Due by 5:00 p.m.
Thursday July 5, 2018	County's Responses to Questions Due
Thursday, July 12, 2018	Proposals Due by 2:00 p.m.
Wednesday, July 18, 2018	Proposals Evaluated by County
Friday, July 20, 2018	Notice of Intent to Award (*subject to delay without notice to proposers*)

Tuesday, August 14, 2018	Board of Supervisors Awards Contract (*subject to delay without notice to proposers*)

E. Questions

Proposers will be required to submit any all questions in writing per the schedule in order for staff to prepare written responses to all consultants. Written answers will be shared with all potential bidders through an addendum on the County's Supplier Portal and email notification. Questions should be sent via e-mail directly to **VideoRFP@sonoma-county.org**. Questions will not be accepted by phone.

F. Corrections and Addenda

1. If a proposer discovers any ambiguity, conflict, discrepancy, omission, or other error in this RFP, the proposer shall immediately notify the contact person of such error in writing and request clarification or modification of the document. Modifications will be made by addenda as indicated below to all parties in receipt of this RFP.

2. If a proposer fails to notify the contact person prior to the date fixed for submission of proposals of a known error in the RFP, or an error that reasonably should have been known, the proposer shall submit a proposal at their own risk, and if the proposer is awarded a contract they shall not be entitled to additional compensation or time by reason of the error or its subsequent correction.

3. Addenda issued by the County interpreting or changing any of the items in this RFP, including all modifications thereof, shall be incorporated in the proposal. The proposer shall submit the addenda cover sheet with the proposal or deliver them to the name and address of department provided in Section G if the proposer has previously submitted a proposal to the Department. Any oral communication by the County's designated contact person or any other County staff member concerning this RFP is not binding on the County and shall in no way modify this RFP or any obligations arising hereunder.

G. Proposal Submittal

1. Form: Proposers must submit one (1) electronic copy to the County of Sonoma's Supplier Portal. The link to the Supplier Portal is: Sonoma County Supplier Portal.

   Note: Proposers must be registered to submit electronic submittals. See registration instructions on the Supplier Portal link above.

   Additionally proposers must submit (1) signed original, and four (4) copies of the signed proposal per the schedule or as revised by addendum. Proposals must be enclosed in a sealed envelope or package and clearly marked **"RFP: VIDEO PRODUCTION SERVICES"** Proposals shall be submitted to:

Danielle Letourneau
Department Analyst
Information Systems Department
2615 Paulin Drive
Santa Rosa, CA 95403

2. Due Date: Proposals must be received no later than the date and time listed in the schedule, or as revised by addendum. The proposal due date is subject to change. If the proposal due date is changed, all known recipients of the original RFP will be notified of the new date.

3. General Instructions: To receive consideration, proposals shall be made in accordance with the following general instructions:

    a) The completed proposal shall be without alterations or erasures.

    b) No oral or telephonic proposals will be considered.

    c) The submission of a proposal shall be an indication that the proposer has investigated and satisfied him/herself as to the conditions to be encountered, the character, quality and scope of the work to be performed, and the requirements of the County, including all terms and conditions contained within this RFP.

4. Proposal Format and Contents: For ease of review and to facilitate evaluation, the proposals for this project should be organized and presented in the order requested as follows:

    a) **Section I - Organizational Information**:

    Provide specific information concerning the firm in this section, including the legal name, address and telephone number of your company and the type of entity (sole proprietorship, partnership, or corporation and whether public or private). Include the name and telephone number of the person(s) in your company authorized to execute the proposed contract. If two or more firms are involved in a joint venture or association, the proposal must clearly delineate the respective areas of authority and responsibility of each party. All parties signing the Agreement with the County must be individually liable for the completion of the entire project even when the areas of responsibility under the terms of the joint venture or association are limited.

    b) **Section II - Qualifications and Experience**:

Provide specific information in this section concerning the firm's experience in the services specified in this RFP, preferably within the State of California. Examples of completed projects, as current as possible, should be submitted, as appropriate. **References are required.** Please provide names, addresses, and telephone numbers of contact persons within three (3) client agencies for whom similar services have been provided.

Debarment or Other Disqualification

Proposer must disclose any debarment or other disqualification as a supplier or vendor for any federal, state or local entities. Proposer must describe the nature of the debarment/disqualification, including where and how to find such detailed information

c) **Section III - Project Approach and Work Schedule**:

Provide a description of the methodology developed to perform all required services. This schedule should contain specific milestones and dates of completion which will be used to set schedules. Also identify the extent of County personnel involvement deemed necessary, including key decision points at each stage of the project. Information as to the type of any software that is anticipated to be used in the planning process should also be discussed.

Include your response to the Statement of Requirements as referenced in Section B., beginning on page 1.

d) **Section IV - Cost of Service**:

The proposal shall clearly state ALL of the costs associated with the project, broken down by category of products and services, and all on-going costs for recommended or required products and services, such as maintenance.

The project costs must be broken out and include all expenses that will be charged to the County, including but not limited hourly rates for labor, software costs, software maintenance costs, implementation fees, shipping, insurance, communications, documentation reproduction, and all expenses, including travel, meal reimbursement, hotel per diems, taxes, etc. Failure to clearly identify all costs associated with the proposal may be cause for rejection of the Consultant’s proposal.

e) **Section V – Identification of subcontractors:**

Proposers shall identify all subcontractors they intend to use for the proposed scope of work. For each subcontractor listed, proposers shall indicate (1) what products and/or services are to be supplied by that subcontractor and, (2) what percentage of the overall scope of work that subcontractor will perform.

f) **Section VI - Insurance**:

The selected proposer will be required to submit and comply with all insurance as described in the attached Sample Agreement. Securing this insurance is a condition of award for this contract.

g) **Section VII - Additional Information**:

Include any other information you believe to be pertinent but not required.

h) **Section VIII – Contract Terms:**

Proposers must include a statement acknowledging their willingness to accept the sample contract terms (Attachment A) or identify specific exceptions to the sample agreement.

H. Selection Process

1. All proposals received by the specified deadline will be reviewed by the County for content, including but not limited to fee, related experience and professional qualifications of the bidding consultants.
2. County employees will not participate in the selection process when those employees have a relationship with a person or business entity submitting a proposal which would subject those employees to the prohibition of Section 87100 of the Government Code. Any person or business entity submitting a proposal who has such a relationship with a County employee who may be involved in the selection process shall advise the County of the name of the County employee in the proposal.
3. Proposals may be evaluated using the following criteria (note that there is no value or ranking implied in the order of this list):
   a) Demonstrated ability to perform the services described;
   b) Experience, qualifications and expertise;
   c) Quality of work as verified by references;
   d) Costs relative to the scope of services;
   e) A demonstrated history of providing similar services to comparable entities;
   f) Willingness to accept the County's contract terms; and

g) Any other factors the evaluation committee deems relevant. (When such criteria are used for evaluation purposes, the basis for scoring will be clearly documented and will become part of the public record.).

h) The locality of the Proposer;

4. The County Department Head in consultation with the Purchasing Agent reserves the right, in their sole discretion, to take any of the following actions at any time before Board approval of an award: waive informalities or minor irregularities in any proposals received, reject any and all proposals, cancel the RFP, or modify and re-issue the RFP. Failure to furnish all information requested or to follow the format requested herein may disqualify the proposer, in the sole discretion of the County. False, incomplete, misleading or unresponsive statements in a proposal may also be sufficient cause for a proposal's rejection.

5. The County may, during the evaluation process, request from any proposer additional information which the County deems necessary to determine the proposer's ability to perform the required services. If such information is requested, the proposer shall be permitted three (3) business days to submit the information requested.

6. An error in the proposal may cause the rejection of that proposal; however, the County may, in its sole discretion, retain the proposal and make certain corrections. In determining if a correction will be made, the County will consider the conformance of the proposal to the format and content required by the RFP, and any unusual complexity of the format and content required by the RFP. If the proposer's intent is clearly established based on review of the complete proposal submittal, the County may, at its sole option, correct an error based on that established content. The County may also correct obvious clerical errors. The County may also request clarification from a proposer on any item in a proposal that County believes to be in error.

7. The County reserves the right to select the proposal(s) which in its sole judgment best meets the needs of the County and to award to only one or multiple qualified submittals. ***The lowest proposed cost is not the sole criterion for recommending contract award.*** The County also makes no guarantee of any or equal amounts of work.

8. All firms responding to this RFP will be notified of their selection or non-selection after the evaluation committee has completed the selection process.

9. Generally, the firm selected by the Evaluation Committee will be recommended to the Board of Supervisors for this project, but the Board is not bound to accept the recommendation or award the project to the recommended firm.

I. Finalist Interviews

After initial screening, the evaluation committee may select those firms deemed most qualified for this project for further evaluation. Interviews of these selected firms may be conducted as part of the final selection process. Interviews may or may not have their own separate scoring during the evaluation process.

J. General Information

1. Rules and Regulations

   a) The issuance of this solicitation does not constitute an award commitment on the part of the County, and the County shall not pay for costs incurred in the preparation or submission of proposals. All costs and expenses associated with the preparation of this proposal shall be borne by the proposer.

   b) Sonoma County reserves the right to reject any or all proposals or portions thereof if the County determines that it is in the best interest of the County to do so.

   c) The County may waive any deviation in a proposal. The County's waiver of a deviation shall in no way modify the RFP requirements nor excuse the successful proposer from full compliance with any resultant agreement requirements or obligations. Sonoma County reserves the right to reject any or all proposals, or to waive any defect or irregularity in a proposal. The County further reserves the right to award the agreement to the proposer or proposers that, in the County's judgment, best serves the needs of Sonoma County.

   d) All proposers submit their proposals to the County with the understanding that the recommended selection of the review committee is final and subject only to review and final approval by the Department Director (via delegation), the County Purchasing Agent or the Board of Supervisors.

   e) Upon submission, all proposals shall be treated as confidential documents until the selection process is completed. Once the notice of intent to award is issued by the County, all proposals shall be deemed public record. In the event that a proposer desires to claim portions of its proposal exempt from disclosure, it is incumbent upon the proposer to clearly identify those portions with the word "Confidential" printed on the top right hand corner of each page for which such privilege is claimed, and to clearly identify the information claimed confidential by highlighting, underlining, or bracketing it, etc. Examples of confidential materials include trade secrets. Each page shall be clearly marked and readily separable from the proposal in order to facilitate public inspection of the non-confidential portion of the proposal. The County will consider a proposer's request for exemptions from disclosure; however, the County will make its decision based upon applicable laws. An assertion by a proposer that the entire proposal, large portions of the proposal, or a significant element of the proposal, are exempt from disclosure will not be honored and the proposal may be rejected as non-responsive. Prices, makes and models or catalog

numbers of the items offered, deliverables, and terms of payment shall be publicly available regardless of any designation to the contrary.

f) The County will endeavor to restrict distribution of material designated as confidential to only those individuals involved in the review and analysis of the proposals. Proposers are cautioned that materials designated as confidential may nevertheless be subject to disclosure. Proposers are advised that the County does not wish to receive confidential or proprietary information and those proposers are not to supply such information except when it is absolutely necessary. If any information or materials in any proposal submitted are labeled confidential or proprietary, the proposal shall include the following clause:

    a. [Legal name of proposer] shall indemnify, defend and hold harmless the County of Sonoma, its officers, agents and employees from and against any request, action or proceeding of any nature and any damages or liability of any nature, specifically including attorneys' fees awarded under the California Public Records Act (Government Code §6250 et seq.) Arising out of, concerning or in any way involving any materials or information in this proposal that [legal name of proposer] has labeled as confidential, proprietary or otherwise not subject to disclosure as a public record.

2. Nonliability of County

The County shall not be liable for any precontractual expenses incurred by the proposer or selected contractor or contractors. The County shall be held harmless and free from any and all liability, claims, or expenses whatsoever incurred by, or on behalf of, any person or organization responding to this RFP.

3. Proposal Alternatives

Proposers may not take exception or make material alterations to any requirement of the RFP. Alternatives to the RFP may be submitted as separate proposals and so noted on the cover of the proposal. The County reserves the right to consider such alternative proposals, and to award an agreement based thereon if it is determined to be in the County's best interest and such proposal satisfies all minimum qualifications specified in the RFP. Please indicate clearly in the proposal that the proposal offers an alternative to the RFP.

4. Lobbying

Any party submitting a proposal or a party representing a proposer shall not influence or attempt to influence any member of the selection committee, any member of the Board of Supervisors, or any employee of the County of Sonoma, with regard to the acceptance of a proposal. Any party attempting to influence the RFP process through ex-parte contact may be subject to rejection of their proposal.

5. Form of Agreement

a) No agreement with the County shall have any effect until a contract has been signed by both parties. Pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to waive or modify agreement requirements.

b) A sample of the agreement is included as Attachment A hereto. Proposers must be willing to provide the required insurance and accept the terms of this sample agreement. With few exceptions, the terms of the County's standard agreement will not be negotiated. *Indemnification language will not be negotiated.*

c) Proposals submitted shall include a statement that (i) the proposer has reviewed the sample agreement and will agree to the terms contained therein if selected, or (ii) all terms and conditions are acceptable to the proposer except as noted specifically in the proposal. A proposer taking exception to the County's sample agreement must also provide alternative language for those provisions considered objectionable to the proposer. Please note that any exceptions or changes requested to the Agreement may constitute grounds to reject the proposal.

d) Failure to address exceptions to the sample agreement in your proposal will be construed as acceptance of all terms and conditions contained therein.

e) Submission of additional contract exceptions after the proposal submission deadline may result in rejection of the consultant's proposal.

6. Duration of Proposal; Cancellation of Awards; Time of the Essence

a) All proposals will remain in effect and shall be legally binding for at least ninety (90) days.

b) Unless otherwise authorized by County, the selected consultant will be required to execute an agreement with the County for the services requested within sixty (60) days of the County's notice of intent to award. If agreement on terms and conditions acceptable to the County cannot be achieved within that timeframe, or if, after reasonable attempts to negotiate such terms and conditions, it appears that an agreement will not be possible, as determined at the sole discretion of the County, the County reserves the right to retract any notice of intent to award and proceed with awards to other consultants, or not award at all.

7. Withdrawal and Submission of Modified Proposal

a) A proposer may withdraw a proposal at any time prior to the submission deadline by submitting a written notification of withdrawal signed by the proposer or his/her authorized agent. Another proposal may be submitted prior to the deadline. A proposal may not be changed after the designated deadline for submission of proposals.

K. Protest Process

Any and all protests must be in writing and must comply with the timelines and procedures set forth at: ***Protests and Appeals for Goods and Professional Services Procurements***

L. Living Wage

The contractor/franchisee/economic development assistance recipient shall comply with any and all federal, state, and local laws – including, but not limited to the County of Sonoma Living Wage Ordinance – affecting the services provided by this contract/franchise agreement. Without limiting the generality of the foregoing, the contractor/franchisee/economic development assistance recipient expressly acknowledges and agrees that this contract/franchise/economic development assistance agreement is subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the contract/franchise/economic development assistance agreement will be considered a material breach and may result in termination of the contract/franchise/economic development assistance agreement or pursuit of other legal or administrative remedies.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 25
(This Section for use by Clerk of the Board Only.)

To:	Sonoma County Board of Supervisors
Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s):	General Services' Facilities Development and Management
Staff Name and Phone Number:	**Supervisorial District(s):**
Toni Holland: 707-565-3425	County Wide
Title:	Information Systems Department Revision to Funded Project in Capital Improvement Plan

Recommended Actions:

Adopt a Resolution authorizing the transfer of $500,000 funds from Capital Improvement Project R190001-Information Systems Department Space Reconfiguration to Capital Improvement Project R180017-Information Systems Department Reprographics Space Repurpose to meet critical department space needs.

Executive Summary:

The Sonoma County Recommended Budget 2018-2019 was adopted on 6/14/18 with approved capital funding for the R190001-Information Systems Department Space Reconfiguration project at 2615 Paulin Drive. The Information Systems Department would like the Board to consider redirecting this funding to the R180017-Information Systems Department Reprographics Space Repurposing project at 455 Fiscal Drive.

The priority for the Information Systems Department is to complete the Reprographics Space Repurpose project ahead of the Space Reconfiguration project. The R180017-Information Systems Department Reprographics Space Repurpose project at 455 Fiscal Drive will allow the department to consolidate operations, increase staff synergy and effectiveness while freeing up on-campus office space.

Discussion:

This Reprographics Space Repurpose project will accommodate ongoing operations and represents a more critical need than the Space Reconfiguration project. This project will determine the best use to repurpose the Reprographics space to meet Department needs for additional warehouse and office space, and to meet current staffing and inventory needs. The annual Capital Improvement Plan (CIP) ranking listed the Reprographics Space Repurpose project as a lower priority than the 2615 Paulin Drive project. The CIP ranks the priority of projects based upon Board adopted criteria as described in Policy 5-2. The Board approved CIP listed the 2615 Paulin Drive project as number 37 out of 58, and 455 Fiscal Drive project as number 46 of 58. However, after the CIP had been published, the Department provided

additional information regarding their needs for space and requested the 455 Fiscal Drive project to be advanced to the CAO for approval and inclusion in the Fiscal Year (FY) 18-19 Capital Plan.

The 2615 Paulin Drive Annex was vacated and demolished in 2018 after being condemned due to non-repairable structural deficits and extensive water damage. On a temporary basis, staff were relocated to workstations that were available due to vacancies at 370 Administration Drive, a facility shared by Probation and Information Systems. Information Systems in consultation with General Services evaluated all available Information Systems spaces and identified alternatives to best accommodate Administrative staff displaced by the demolition. It was determined that the most cost effective solution to recover lost staffing space was to repurpose the old Reprographics space located at 455 Fiscal Drive to allow for warehouse and office space needs that is directly adjacent to the main Information Systems building at 2615 Paulin Drive. Completing this project will allow all Administrative employees to move back together in a common facility for improved efficiencies within a reasonable proximity to the 2615 Paulin Drive facility.

The originally planned project R190001-Information Systems Department Space Reconfiguration, which was lowered in priority after the Annex demolition, intended to reconfigure the 2615 Paulin building by removing several walls to create a more open work environment relieving over-crowding of fixed wall offices in a manner that would better accommodate associated technical teams. This investment will increase efficiencies associated with improved team work and flexibility offered with open office standards. This is especially important as project vendors and internship programs continue to be critical to technology operations. If funding becomes available, this is still a highly desirable adjustment to allow the building to stay functional for existing operations.

When both of these projects are completed, Information Systems intends to consolidate staff from 2300 Professional into three facilities (2615 Paulin, 455 Fiscal, and 370 Administration). This action will free up the 2300 Professional building spaces for other County/General Services priorities.

Board action is needed to enable the transfer of funding from the Paulin Drive approved Capital Budget project to the higher priority project at 455 Fiscal Drive.

Prior Board Actions:

The Sonoma County Recommended Budget 2018-2019 which was adopted on 6/14/18.

Strategic Plan Alignment	Goal 3: Invest in the Future

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	500,000		
Additional Appropriation Requested			
Total Expenditures	**500,000**		
Funding Sources			
General Fund/WA GF	500,000		
State/Federal			
Fees/Other			
Use of Fund Balance			
Contingencies			
Total Sources	**500,000**		

Narrative Explanation of Fiscal Impacts:

The funds are included in the FY 18-19 capital projects budget, fund and account, therefore no additional appropriation is required. However, Budget Policy 3-1 requires Board majority approval to transfer appropriations between Capital Improvement Projects.

Project Description

Remodel the space at 455 Fiscal Drive to create an office and warehouse space. This plan will bring the second Information Systems Department warehouse space in close proximity to the Paulin Drive warehouse for efficiencies. Will also create needed office space for Information Systems Department staff space needs. This project is to accommodate ongoing operations. Information Systems Department is in the planning stage to re-purpose the Reprographics space within close proximity to our 2615 Paulin Operations and emerging imaging program requirements. Information Systems is in the assessment phase in determining the best use to repurpose the Reprographics space to meet Department need for additional warehouse and office space, and to meet current staffing and inventory needs.

Board of Supervisors Focus Areas:

Project Description

Remove non-bearing walls between offices to create 4 large work group spaces, 1 small conference space, and to open up space for related service delivery teams.
Current support teams are situated in multiple office spaces. The current conditions have required placing multiple people in an office not built for purposes, and breaking teams up. Collaboration and general team work has become less efficient. This plan will create 4 large work areas configured to co-locate team members in the same space, and allow for the inclusion of shared work bench area, increasing collaboration and efficiency. Removal of walls will also allow for further consolidation of spaces

Title: License Agreement with North Sonoma Coast Fire Protection District for the Annapolis Fire Station

Recommended Actions:

A) Authorize the General Services Director to execute a license agreement with the North Sonoma Coast Fire Protection District, for use of County property located at 32700 Annapolis Road, Annapolis, for use as the Annapolis Fire Station: for a term of ten (10) years, commencing on April 1, 2016 and expiring on March 31, 2026, with one, 10-year option to extend the term; and to execute future amendments and associated documents, as reasonably requested by General Services staff, and in consultation with County Counsel, which are not inconsistent with the essential terms of the license agreement; and

B) Make findings as required by Government Code Section 26227, that the proposed license agreement is necessary in the furtherance of the public safety needs of the County and is therefore in the public interest, and that the County shall not need the Premises during the term of the license agreement.

Executive Summary:

On April 1, 2016 the North Sonoma Coast Fire Protection District (District) was formed out of portions of County Service Area #40 served by the Annapolis and Sea Ranch Volunteer Fire Companies. As part of the Tax Share Agreement between the County and the District, it was established that the District should have continued use of Annapolis Fire Station to ensure the public safety in this area.

The proposed agreement would formalize the use of the County-owned Annapolis Fire Station by the North Sonoma Coast Fire Protection District for a term of ten (10) years, retroactively commencing April 1, 2016 and expire on March 31, 2026, with one, 10-year option to extend the term.

Staff requests that your Board authorize the General Services Director to execute the proposed Agreement to allow the District the continued use of the Premises; and to execute future amendments, and associated documents, as reasonably requested by General Services staff, in consultation with County Counsel and Transportation and Public Works, which are consistent with the essential terms of the Agreement.

Staff also requests that your Board make a finding pursuant to Government Code 26227 that the proposed agreement is necessary to meet the needs of the population of the County in the areas of public safety and welfare, and that the County does not need the Premises during the term of the license agreement.

Discussion:

On June 25, 2013, the County of Sonoma completed construction of the 1,920 square foot Annapolis Fire Station on land at 32700 Annapolis Road managed by the Sonoma County Transportation and Public Works Department (TPW) as a Road Maintenance Yard. On December 8, 2015 a Tax Share Agreement was executed in anticipation of the formation of the North Sonoma Coast Fire Protection District out of areas of County Service Area #40 served by the Annapolis and Sea Ranch Volunteer Fire Companies. In addition to providing for an allocation of tax revenue dedicated to fire and adjusted in accordance with State law, the agreement included provisions for the transfer of certain County assets used exclusively by the volunteer fire companies in question to the new district. Because the Annapolis fire station is located on a site used by TPW, this facility could not be transferred and the agreement provided that, following formation of the North Sonoma Coast Fire Protection District (District), a separate agreement would be made for the continued use of the Annapolis Fire Station by the District. Because the facility would have transferred to the District were it not on land used by a County Department, it was understood that there would be no charge for use of the facility, and that the District would be responsible for utilities, maintenance, and other costs associated with upkeep of the fire station on the facility.

In fulfillment of the Tax Share Agreement this matter concerns a proposed license agreement (Agreement) between the County of Sonoma and the North Sonoma Coast Fire Protection District (District) for District use County real property consisting of the 1,920-sq. ft. metal building, a concrete entrance pad, and County-owned land located at 32700 Annapolis Road in Annapolis (Premises), together with a non-exclusive permission for access from Annapolis Road to the Premises. The Premises are currently used by the District as the Annapolis Fire Department station for the purpose of providing fire protection services to the general public. This facility is a volunteer fire station utilized by the District, and will be a component of the County Fire and Emergency Services' Staffing Model (Silver Plan), to be presented to your Board in August by Fire and Emergency Services.

The term of the license agreement would commence retroactively from April 1, 2016 and expire on March 31, 2026, with one, 10-year option to extend the term. The proposed Agreement will allow the District to continue to use the Annapolis Fire Station to store vehicles and equipment and to assemble volunteers to respond to local emergencies. The County's Transportation and Public Works Department

(TPW) acknowledges there is sufficient space on the Premises to accommodate District use of this structure. TPW further acknowledges the benefit of the proposed Agreement to the surrounding community in terms of fire protection and public safety.

Staff requests that your Board authorize the General Services Director to execute the proposed Agreement to allow the District the continued use of the Premises; and to execute future amendments, and associated documents required for the operation of the Agreement, as reasonably requested by General Services staff, in consultation with County Counsel and Transportation and Public Works, which are consistent with the essential terms of the Agreement and which do not extend the term of the Agreement.

Staff also requests that your Board make a finding pursuant to Government Code 26227 that the proposed agreement is necessary to meet the needs of the population of the County in the areas of public safety and welfare, and that the County does not need the Premises during the term of the license agreement.

Funding. The proposed Agreement provides for the District to pay for any utilities separately metered or sub-metered to the Premises, and to reimburse County for any damages incurred by its use. Any equipment installation required will occur with prior written consent, and associated costs will be borne by the District.

License Agreement. Staff has prepared a license agreement with the following terms:

Term:	Ten (10) Years, commencing on April 1, 2016 and expiring on March 31, 2026, with one, 10 year option to extend the term.
Premises:	County real property consisting of a 1,920 sq. ft. metal building and County-owned land at 32700 Annapolis Road in Annapolis.
Consideration:	No monetary consideration is charged for the Agreement. Please see Public Benefit section below.

Public Benefit. Section 26227 of the Government Code allows the County to enter into the proposed Agreement, provided the Board makes a finding that the Agreement is necessary to meet the needs of the population of the County and that it will not substantially conflict or interfere with the use of the property by the County. Staff suggests that the provision of this Agreement is in furtherance of public safety and welfare, as the Premises are used by the District, which provides fire protection services to the general public. There is no other proposed use for the Premises at this time or during the term of the proposed Agreement.

Prior Board Actions:

March 29, 2016 - Authorize the General Services Director to enter into an agreement with the North Sonoma Coast Fire Protection District for continued use of the Annapolis Fire Station

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Locating and maintaining fire vehicles and equipment at a structure located on County property within the Annapolis community will benefit the North Sonoma Coast Fire Protection District by providing an

accessible location for volunteer fire fighters, contributing to public safety needs in the Annapolis and surrounding areas.

Related Items "On File" with the Clerk of the Board:

LICENSE AGREEMENT FOR USE OF COUNTY FACILITIES

This License Agreement ("Agreement"), made and entered into on **April 1, 2016** ("Effective Date"), is by and between the **COUNTY OF SONOMA**, a political subdivision of the State of California ("County"), and the **NORTH SONOMA COAST FIRE PROTECTION DISTRICT**, an independent local government agency ("Licensee"). County and Licensee are sometimes collectively referred to herein as the "parties" and singularly, a "party."

R E C I T A L S

WHEREAS, on June 25, 2013, County completed construction of the Annapolis Fire Station, a public safety facility for the benefit of the Sonoma County community; and

WHEREAS, on December 8, 2015 the Tax Share Agreement between the County and Licensee, which broadly described how funds will be transferred to the new District was approved, and

WHEREAS, on December 9, 2015, the Sonoma County Local Area Formation Commission approved formation of the North Sonoma Coast Fire Protection District pending a public protest hearing scheduled for February 3, 2016, and no protest being heard, formation of the North Sonoma Coast Fire Protection District was approved with an effective date of April 1, 2016.

NOW, THEREFORE, in consideration of the Premises and of the agreements of the respective parties herein set forth, it is mutually agreed as follows:

A G R E E M E N T

1. License. County hereby grants Licensee a license, subject to all the terms and conditions of this Agreement, to use that portion of County real property described in Section 2 below.

2. Premises. Licensee is hereby permitted to use the County real property as specifically shown or described in **Exhibit A** attached hereto and made a part hereof ("Premises"), consisting of the Annapolis Fire Station located at **32700 Annapolis Road, Annapolis, California**.

3. Non-exclusive License. The license herein granted is non-exclusive. County continues to maintain and control the Premises including, without limitation, leasing, sub-leasing and granting of additional licenses.

4. Term. The initial term of this Agreement ("Initial Term") shall commence on **April 1, 2016**, and expire at midnight on **March 31, 2026**, unless earlier terminated in accordance with Section 23 below.

   4.1 Option to Extend Term. Licensor grants to Licensee one (1) option to extend the Term of the License ("Extension Option") for a period of ten (10) years ("Option Term"), subject to the conditions described in this Section 4.

4.2 Conditions of Option. The Extension Option may be exercised only by written notice delivered by Licensee to County as provided in Subsection 4.3 and only if, as of the date of delivery of the notice, Licensee is not in material default under this License after the expiration of any applicable cure periods. If Licensee properly exercises the Extension Option, the Initial Term shall be extended for the Option Term.

4.3 Exercise of Extension Option. If Licensee wishes to exercise its Extension Option, Licensee shall deliver written notice to Landlord no less than thirty (30) days before the expiration of the Initial Term.

5. Consideration. As consideration for the use of the Premises, Licensee shall provide fire protection services to the Sonoma County community.

6. Not Applicable.

7. Use. Licensee's use of the Premises shall be limited to and solely for providing fire protection services. No other use shall be permitted. The rules and regulations attached hereto as **Exhibit B**, as well as such rules and regulations as may be adopted by County and provided to Licensee for the safety, care and cleanliness of the Premises and the building of which they are a part and the preservation of good order thereon are hereby expressly made a part hereof, and Licensee hereby agrees to comply with them.

8. Utilities/Repairs/Maintenance. Licensee shall be responsible for the payment of any utilities separately metered or sub-metered to the Premises. Licensee shall reimburse County for the cost of any repair(s) needed to the Premises, as a result of Licensee's negligence or willful acts. Reimbursements due to County for the cost of any repair that is needed as a result of Licensee's negligence or willful acts shall be paid to County within thirty (30) days of receipt of invoice by Licensee for said repairs. Licensee shall be solely responsible for any cost or expense for any and all maintenance and/or repairs required by County or by County's Permit & Resource Management Department, including without limitation, alterations or repairs necessitated by the Americans with Disabilities Act.

9. Equipment Installation and Operation. Licensee shall install the equipment, described in **Exhibit C**, at its sole cost and expense, subject to the prior written approval of County of its location and connection methods. Licensee's equipment shall be installed, operated and maintained in accordance with the highest standards now or hereafter generally employed for similar equipment. In the event the installation, operation or maintenance of said equipment causes any direct or indirect interference with the operation of County's facilities, equipment or the equipment of County's tenants, or other licensees, Licensee shall correct said interference, at its sole cost and expense, to the satisfaction of County. In the event said interference cannot be corrected, Licensee shall promptly remove said equipment.

10. Taxes. Licensee agrees to pay any and all lawful taxes, assessments, or charges which may at any time be levied by any public entity upon any improvements made as a result of this Agreement.

11. Possessory Interest. Licensee expressly recognizes and understands that this Agreement may create a possessory interest subject to property taxation and that Licensee may be subject to the payment of property taxes levied on such interest.

12. Compliance with Laws. Licensee has represented to County and hereby warrants that Licensee has complied with all laws applicable to the acceptance and use of the license herein granted. Licensee shall observe and comply at all times with all applicable federal, state and county statutes and ordinances, rules, regulations, directives, and orders of governmental agencies now in force or which may hereinafter be in force relating to or affecting the use of the license herein granted.

12.1 Certified Access Specialist Disclosure. Pursuant to California Civil Code Section 1938, the subject property has not been inspected by a "Certified Access Specialist".

13. Waste; Nuisance. Licensee shall not commit, suffer, or permit the commission by others of: (i) any waste or nuisance on the Premises; (ii) any action or use of the Premises which interferes or conflicts with the use of the Premises by County or any authorized person; or (iii) any action on the Premises in violation of any laws or ordinances.

14. Inspection. County shall be permitted to enter and inspect the licensed Premises at any and all times.

15. Extent of Grant of License. This Agreement and the license herein granted are valid only to the extent of County's jurisdiction as a land owner or tenant of the Premises. Acquisition of any other necessary permits or entitlements for use are the responsibility of Licensee. NOTHING CONTAINED IN THIS AGREEMENT SHALL BE CONSTRUED AS A RELINQUISHMENT OF ANY RIGHTS NOW HELD BY COUNTY.

16. Deposit Refund. Licensee agrees that the deposit, if any be required, made upon execution by Licensee of this Agreement shall not be refundable for any reason unless County, in its absolute discretion, determines such a refund in whole or in part, to be warranted.

17. Bankruptcy. In the event of bankruptcy of Licensee or writ of attachment of execution against Licensee, this Agreement shall, at the option of the County, immediately terminate.

18. Non liability of County. County, its officers, agents, and employees shall not be liable to Licensee for any loss or damage to Licensee or Licensee's property from any cause. Licensee expressly waives all claims against County, its officers, agents, and employees, unless such injury or damage is caused by or due to the sole negligence or willful misconduct of County, its officers, agents, and employees. Licensee hereby agrees to accept the Premises in its "as-is" physical condition and its "as-is" state of repair.

19. Indemnification. Licensee agrees to accept all responsibility for loss or damage to any person or entity, including but not limited to County, and to defend, indemnify, hold harmless, reimburse and release County, its officers, agents, and employees, from and against any and all actions, claims, damages, disabilities, liabilities and expense, including but not limited to attorneys' fees and the cost of litigation incurred in the defense of claims as to which this indemnity applies or incurred in an action by County to enforce the indemnity provisions herein, whether arising from personal injury, property damage or economic loss of any type, that may be asserted by any person or entity, including Licensee, arising out of or in connection with any of the circumstances described in Sections 19.1, 19.2, 19.3 and 19.4, whether or not there is concurrent negligence on the part of County, but, to the extent required by law, excluding liability due to the sole or active negligence or due to the willful misconduct of County. If there is a possible obligation to indemnify, Licensee's duty to defend exists regardless of whether it is ultimately determined that there is not a duty to indemnify. County shall have the right to select its own legal counsel at the expense of Licensee, subject to Licensee's approval, which approval shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Licensee or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

19.1 Use of Premises. Use of the Premises in any manner by Licensee, its agents, employees, invitees, subtenants, licensees and contractors, and the agents, employees, patrons, contractors and invitees of subtenants, including any use of the Premises not allowed under this Agreement.

19.2 Breach by Licensee. Any breach by Licensee of the terms, covenants or conditions herein contained.

19.3 Approval of Agreement. The approval of this Agreement by County.

19.4 Other Activities. Any other activities of Licensee, its agents, employees and subtenants.

20. Insurance. With respect to the rights granted hereunder, Licensee shall maintain and shall require all of its subcontractors to maintain insurance as described in **Exhibit D** attached hereto and made a part hereof.

21. Liability for Loss or Damage to County Property. Licensee shall be liable to County for any loss or damage to the Premises arising from or in connection with Licensee's performance hereunder or any of its officers, agents, and employees.

22. Nondiscrimination. In the performance of this Agreement, Licensee shall comply with all applicable federal, state and local laws, rules and regulations regarding nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, sexual orientation, marital status, age, medical condition or disability.

23. Termination by County. County may terminate this Agreement for any reason whatsoever upon thirty (30) days prior written notice to Licensee.

24. License is Personal. The license herein granted is personal to Licensee and no right hereunder may be assigned, sublet, or otherwise transferred in whole or in part without the prior written consent of County, and any attempt to assign, sublet or transfer shall be of no force or effect whatsoever unless and until County shall have given its written consent thereto. County may withhold its consent for any reason.

25. Provisions are Conditions of Use/Occupancy. Each provision of this Agreement shall be deemed a condition of the right of Licensee to use or continue to occupy the Premises. Notwithstanding anything stated to the contrary herein, if Licensee fails to perform any provision of this Agreement at the time and in the manner herein provided, County may at its option immediately terminate this Agreement; this right to terminate shall be cumulative to any other legal right or remedy available to County.

26. Licensee to Act in Independent Capacity. Licensee, its officers, agents, and employees shall act in an independent capacity and shall not represent themselves to be or be construed to be officers, agents, or employees of County.

27. License Not a Lease. This Agreement does not constitute a lease, but constitutes a mere license and Licensee is limited to the use of the Premises expressly and specifically described above. If access routes are not specifically described in Section 2 of this Agreement, Licensee shall be entitled to use only the access route(s) designated by the County. Licensee shall have no right or privilege in any respect whatsoever to use any other part of the property of County for any purpose whatsoever. Licensee disclaims any interest that when coupled with the license herein granted would render it irrevocable.

28. Notice. Any notice required or permitted to be given under this Agreement shall be in writing. Delivery of such written notice shall be conclusively taken as sufficiently given forty-eight (48) hours after deposit in the United States Mail, registered or certified, return receipt requested, with the postage thereon fully prepaid, addressed as follows:

If to COUNTY: **COUNTY OF SONOMA**
General Services Department
Attn. Real Estate Manager
2300 County Center Drive, Suite A220
Santa Rosa, CA 95403

With a copy to: **COUNTY OF SONOMA**
Department of Transportation & Public Works
Attn: Director
2300 County Center Drive, Suite B100
Santa Rosa, CA 95403

If to LICENSEE: **NORTH SONOMA COAST FIRE PROTECTION DISTRICT**
Attn: Fire Chief
Post Office Box 386
The Sea Ranch, CA 95497

Either party may at any time change its address for notices by giving written notice of such change to the other party in the manner provided in this Section 28.

29. No Continuing Waiver. The waiver by County of any breach of any of the provisions of this Agreement shall not constitute a continuing waiver of any subsequent breach of the same, or of any other provision of this Agreement.

30. Surrender. Upon the expiration or sooner termination of this Agreement, Licensee, at its sole cost and expense, shall remove, revise, or relocate such of its structures and equipment as are designated by County, restore the Premises to its original condition, and vacate the Premises. Should Licensee neglect to restore the Premises to a condition satisfactory to County, County may perform such work or have the work performed, and Licensee shall immediately reimburse County for all direct and indirect costs associated with such work upon receipt of a statement therefor.

31. General Provisions.

31.1 Time of Essence. Time is and shall be of the essence of this Agreement and of each and every provision contained in this Agreement.

31.2 Incorporation of Prior Agreements; Amendments. This Agreement contains all the agreements of the parties with respect to any matter mentioned herein. No prior agreement, or understanding pertaining to any such matter shall be effective. This Agreement may be modified in writing only, signed by the parties in interest at the time of the modification, and this sentence may not be modified or waived by any oral agreement, whether executed or unexecuted.

31.3 Binding Effect; Choice of Law. This Agreement shall be binding upon and inure to the benefit of the parties, their personal representatives, successors, and assigns. This Agreement shall be governed by the laws of the State of California and any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in the County of Sonoma.

31.4 Amount Due Payable in U.S. Money. All sums payable under this Agreement must be paid in lawful money of the United States of America.

31.5 No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

31.6 Construction of Agreement; Severability. To the extent allowed by law, the provisions in this Agreement shall be construed and given effect in a manner that avoids any violation of statute, regulation, or law. County and Licensee agree that in the event any provision in this Agreement is held to be invalid or void by any court of competent jurisdiction, the invalidity of any such provision shall in no way affect any other provision in this Agreement. Licensee and County acknowledge that they have each contributed to the making of this Agreement and that, in the event

of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Licensee and County further acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

31.7 Relationship. The parties intend by this Agreement to establish the relationship of licensor and licensee only, and do not intend to create a partnership, joint venture, joint enterprise, or any business relationship other than that of licensor and licensee.

31.8 Captions. The captions in this Agreement are for convenience only and are not a part of this Agreement. The captions do not in any way limit or amplify the provisions hereof, and shall have no effect upon the construction or interpretation of any part hereof.

LICENSEE HAS CAREFULLY READ AND CONSIDERED THE TERMS AND CONDITIONS SET FORTH IN THIS AGREEMENT AND HEREBY AGREES THAT LICENSEE SHALL BE BOUND BY ALL SAID TERMS AND CONDITIONS.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

METAL SHED OF APPROXIMATELY ONE THOUSAND NINE HUNDRED (1,920) SQUARE FEET, CONCRETE ENTRANCE PAD OF APPROXIMATELY SEVEN HUNDRED AND TWENTY (720) SQUARE FEET, AND COUNTY-OWNED LAND THEREON, TOGETHER WITH A NON-EXCLUSIVE EASEMENT FROM ANNAPOLIS ROAD TO THE PREMISES.

Exhibit B

RULES AND REGULATIONS

1. No sign, placard, picture, advertisement, name or notice shall be inscribed, displayed, printed or affixed on or to any part of the outside or inside of the building of which the Premises are comprised or are a part without the written consent of County first had and obtained, and County shall have the right to remove any such sign, placard, picture, advertisement, name or notice without notice to and at the expense of Licensee.

   All approved signs or lettering on doors shall be printed, painted, affixed or inscribed at the expense of Licensee by a person approved of by County.

   Licensee shall not place anything or allow anything to be placed near the glass of any window, door, partition or wall which may appear unsightly from outside the Premises. Licensee shall not, without prior written consent of County, sunscreen any window.

2. The sidewalks, halls, passages, exits, entrances, and stairways shall not be obstructed by Licensee or used for any purpose other than for ingress to and egress from the Premises.

3. Licensee shall not alter any lock or install any new or additional locks or any bolts on any doors or windows of the Premises.

4. The toilet rooms, urinals, wash bowls and other apparatus shall not be used for any purpose other than that for which they were constructed and no foreign substance of any kind whatsoever shall be thrown therein and the expense of any breakage, stoppage or damage resulting from the violation of this rule shall be borne by Licensee.

5. Licensee shall not overload the floor of the Premises or in any way deface the Premises or any part thereof.

6. No furniture, freight or equipment of any kind shall be brought into the Premises without the prior notice to County, and all moving of the same into or out of the building of which the Premises are comprised or are a part shall be done at such time and in such manner as County shall designate. County shall have the right to prescribe the weight, size and position of all safes and other heavy equipment brought into the Premises and also the times and manner of moving the same in and out of the Premises. Safes or other heavy objects shall, if considered necessary by County, stand on support of such thickness as is necessary to properly distribute the weight. County will not be responsible for loss of or damage to any such safe and property from any cause, and all damage done to the building by moving or maintaining any such safe or other property shall be repaired at the expense of Licensee.

7. Licensee shall not use, keep or permit to be used or kept any foul or noxious gas or substance in the Premises, or permit or suffer the Premises to be occupied or used in a manner offensive or objectionable to the County or other occupants of the building of which the Premises are comprised or are a part by reason of

noise, odors and/or vibrations, or interfere in any way with other occupants or those having business therein, nor shall any animals or birds be brought in or kept in or about the Premises. Disability assistance animals shall, however, be permitted in the Premises.

8. No cooking shall be done or permitted on the Premises by Licensee nor shall the Premises be used for the storage of merchandise, for washing clothes, for lodging, or for any improper, objectionable or immoral purposes.

9. Licensee shall not use or keep in the Premises any kerosene, gasoline or inflammable or combustible fluid or other hazardous material, or use any method of heating or air conditioning other than that supplied by County.

10. County will direct electricians as to where and how telephone and telegraph wires, if any, are to be introduced. No boring or cutting for wires will be allowed without the consent of County. The location of telephones, call boxes and other office equipment affixed to the Premises shall be subject to the approval of County.

11. County shall in no case be liable for damages for any error with regard to the admission to or exclusion from the building or Premises of any person. In case of invasion, mob, riot, public excitement or other commotion, County reserves the right to prevent access to the Premises during the continuance of the same by closing of the doors or otherwise, for the safety of the occupants and protection of property in the building and the building.

12. County reserves the right to exclude or expel from the Premises any person who, in the judgment of County, is intoxicated or under the influence of liquor or drugs, or who shall in any manner do any act in violation of any of these rules and regulations or the Agreement to which these rules and regulations are made a part.

13. Not applicable.

14. County shall have the right, exercisable without notice and without liability to Licensee, to change the name and street address of the building of which the Premises are comprised or are a part.

15. Licensee shall not disturb, solicit or canvass any occupant of the building of which the Premises are comprised or are a part and shall cooperate to prevent same.

16. Without the written consent of County, Licensee shall not use the name of the building of which the Premises are comprised or are a part in connection with or in promoting or advertising the business of Licensee except as Licensee's address.

17. County shall have the right to control and operate the public portions of the building of which the Premises are comprised or are a part and the public facilities and heating and air conditioning, as well as facilities furnished for the common use of the occupants, in such manner as it deems best for the benefit of the occupants generally.

18. All entrance doors shall be left locked when the Premises are not in use, and all doors opening to public corridors shall be kept closed except for normal ingress and egress from the Premises.

Exhibit C

[Licensee's Equipment]

None to be installed.

Exhibit D

[Insurance Requirements]

Licensee shall maintain and require its subcontractors and agents to maintain, during the term of this License or any extensions of the term, insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this License or failure to identify any insurance deficiency shall not relieve Licensee from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the term of this License.

1. **Workers Compensation and Employers Liability Insurance**
   - **a.** Required if Licensee has employees as defined by the Labor Code of the State of California.
   - **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   - **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   - **d.** The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against County.
   - **e.** *Required Evidence of Insurance*:
     - **i.** Subrogation waiver endorsement; and
     - **ii.** Certificate of Insurance.

   If Licensee currently has no employees as defined by the Labor Code of the State of California, Licensee agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this License or any extensions of the term.

2. **General Liability Insurance**
   - **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   - **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; the General Aggregate shall apply separately to each location. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Licensee maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Licensee.
   - **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Licensee is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Licensee has a claim against the insurance or is named as a party in any action involving the County.

d. **County of Sonoma, its Officers, Agents and Employees** shall be additional insureds for liability arising out of the Licensee's operations or premises rented to Licensee (ISO endorsement CG 20 26 or equivalent).

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against County.

g. The policy shall cover inter-insured suits between County and Licensee and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. *Required Evidence of Insurance*:

i. Copy of the additional insured endorsement or policy language granting additional insured status; and

ii. Certificate of Insurance.

3. Property Insurance for Business Personal Property and Tenants Improvements
(Required only during the Post-Construction Period)

a. Property insurance on a "special form" or "all risks" basis.

b. Minimum Limit: the full current combined replacement cost of Licensee's Business Personal Property and Licensee's improvements.

c. The insurance shall apply on a replacement cost basis, without deduction for depreciation.

d. Licensee shall disclose any deductible or self-insured retention in excess of $25,000 and such deductible or self-insured retention must be approved in advance by County. Licensee is responsible for any deductible or self-insured retention.

e. *Required Evidence of Insurance*: Certificate of Property Insurance or Evidence of Commercial Property Insurance.

4. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limit may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Licensee currently owns no autos, Licensee agrees to obtain such insurance should any autos be acquired during the term of this License or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

5. Increases in Limits of Insurance

County may periodically require higher policy limits if such increased limits are reasonably available in commercial insurance markets.

6. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance fund, shall have an A.M. Best's rating of at least A:VII.

7. **Documentation**
   - **a.** The Certificate of Insurance must include the following reference: **Licensed Premises located 32700 Annapolis Road, Annapolis, CA (Annapolis Fire Station, Sonoma County).**
   - **b.** All required Evidence of Insurance shall be submitted prior to the execution of this License. Licensee agrees to maintain current Evidence of Insurance on file with County for the required period of insurance.
   - **c.** The name and address for Additional Insured endorsements and Certificates of Insurance is: **County of Sonoma, its Officers, Agents and Employees**, in c/o the General Services Department, 2300 County Center Drive, Suite A220, Santa Rosa, CA. 95403.
   - **d.** Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.
   - **e.** Licensee shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.
   - **f.** Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

8. **Policy Obligations**
   Licensee's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

9. **Material Breach**
   If Licensee fails to maintain insurance which is required pursuant to this License, it shall be deemed a material breach of this License. County, at its sole option, may terminate this License and obtain damages from Licensee resulting from said breach. Alternatively, County may purchase such required insurance and Licensee shall immediately reimburse County for any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

PUBLIC NOTICE
OF INTENT OF COUNTY TO LICENSE REAL PROPERTY

NOTICE IS GIVEN pursuant to Government Code Section 25537 that the Sonoma County Board of Supervisors intends to authorize the Director of the Department of General Services, to enter into a License Agreement with the North Sonoma Coast Fire Protection District, for use of County property consisting of a 1,920 sq. ft. metal building together with a non-exclusive easement from Annapolis Road to the Premises located at 32700 Annapolis Road, Annapolis, for use as the Annapolis Fire Station for a term of ten (10) years, with one 10 year option to extend the term. Section 26227 of the Government Code allows the County to enter into the proposed Agreement and to waive monetary consideration, provided the Board makes a finding that the Agreement is necessary to meet the needs of the population of the County and that such use will not substantially conflict or interfere with the use of the property by the County. Staff suggests that the provision of this Agreement is in furtherance of public safety and welfare, as the Premises are used by the District, which provides fire protection services to the general public. There is no other proposed use for the Premises at this time or during the term of the proposed Agreement. Additional information regarding the proposed license is available for public review at the Office of the Director of the Sonoma County General Services Department, 2300 County Center Drive, Suite A200, Santa Rosa, California 95403.

Clerk of the Board of Supervisors

Public notice of the County's intention to lease the Property shall be published once a week for three successive weeks in accordance with Government Code Section 25350 and 6063.

Title: First 5 Sonoma County Early Childhood Education Facilities Grant Program and Fiscal Adjustments

Recommended Actions:

Authorize the Director of Health Services to execute agreements for the First 5 Sonoma County Early Childhood Education Facilities Grant Program in an amount not-to-exceed $600,000 through June 30, 2023 for projects that support the First 5 Sonoma County Commission's Strategic Plan outcomes.

Adopt a resolution adjusting the fiscal year 2018-2019 final budget by increasing revenues and expenditures in the Department of Health Services by $240,127 to support the First 5 Sonoma County Commission's Early Childhood Education Facilities Grant and Responsive Grant Programs. (4/5 vote required)

Executive Summary:

First 5 Sonoma County is requesting approval to execute grant agreements for the Early Childhood Education Facilities Grant Program totaling $600,000 during fiscal years 2018-2019 and 2019-2020. First 5 anticipates issuing four grants in the amount of $100,000 each in fiscal year 2018-2019, which will create 63 new infant toddler openings and will restore 60 pre-Kindergarten openings. All four grants will provide funding in areas impacted by the recent wildfires. Since the Early Childhood Education Facilities Grant Program was implemented in 2015, First 5 has funded twelve facilities grants totaling $503,439. These grants have provided for the creation of 206 additional openings for children age 0 to 5 to participate in preschool programs and the maintenance of 296 openings.

This item also requests approval of an adjustment to the fiscal year 2018-2019 final budget to allow for increased expenditures related to the Early Childhood Education Facilities Grant Program and the Responsive Grant Program, which address long-term impacts of the North Bay Wildfires on young children.

Discussion:

On March 28, 2011 the First 5 Sonoma County Commission ("Commission") approved a Strategic Plan covering years 2011 through 2020. The overarching goal of the plan is to have all children enter kindergarten ready to succeed. The goals areas are (1) Ensure the Health and Healthy Development of Children, (2) Ensure Families are Supported and Nurturing, (3) Ensure that Early Care and Education is High Quality, (4) Increase Integration of Systems to Better Serve Children and Families, and (5) Engage the Entire Community to Support Achievement of First 5 Sonoma County Goals.

Early Childhood Education Facilities Grant Program

First 5 Sonoma County is requesting approval to execute grant agreements for the Early Childhood Education Facilities Grant Program totaling $600,000 during fiscal years 2018-2019 and 2019-2020. At the First 5 Sonoma County Commission's June 25, 2018 meeting, the Commission approved four grants in the amount of $100,000 each for execution in fiscal year 2018-2019. These grants will create 63 new infant toddler openings and will restore 60 pre-Kindergarten openings. All four grants will provide funding in areas impacted by the recent wildfires. First 5 anticipates entering into additional grants totaling $200,000 in fiscal year 2019-2020.

Early Childhood Education Facilities Grant Program funding of $200,000 per year for the next three years was included in the First 5 Sonoma County Commission Strategic Plan 2018-2021 Update, which was accepted by the Board on June 5, 2018. To identify grant funding opportunities, First 5 conducted a competitive process and received six proposals. Grant applications were reviewed by a selection committee made up of First 5 Sonoma County Commission staff and partners and assessed for urgency of need, leveraged opportunities from school districts and municipalities, donations, and foundation support. As a result of the competitive process, First 5 identified a need to increase funding in fiscal year 2018-2019 to address recovery efforts related to the recent fires. As requested via the recommended budget adjustment resolution, an additional $200,000 in appropriations for fiscal year 2018-2019, for a total of $400,000 in fiscal year 2018-2019, is required to support the Early Childhood Education Facilities Grant Program. The Commission approved this budget adjustment at its June 25, 2018 meeting.

Since the Early Childhood Education Facilities Grant Program was approved by the Board and implemented in 2015, First 5 has funded twelve facilities grants totaling $503,439. These grants have provided for the creation of 206 additional openings for children age 0 to 5 to participate in preschool programs and the maintenance of 296 openings.

Responsive Grant Program

The First 5 Sonoma County Commission Strategic Plan 2018-2021 Update includes $250,000 per year for the next three years for the Responsive Grant Program. Authority to execute Responsive Grants in an amount not-to-exceed $750,000 through June 30, 2021 was approved by the Board at the June 5, 2018 Board meeting. To identify funding opportunities, First 5 conducted a competitive process and received eight proposals. Grant applications were reviewed by a selection committee made up of First 5 Sonoma County Commission staff and partners. As a result of the competitive process, First 5 identified a need to increase funding in fiscal year 2018-2019 to address recovery efforts related to the recent fires. As requested via the recommended budget adjustment resolution, an additional $40,127 in appropriations for fiscal year 2018-2019, for a total of $290,127, is required to support the Responsive Grant Program. The Commission approved this budget adjustment at its June 25, 2018 meeting.

The Sonoma County First 5 Commission is an agency of the County of Sonoma, which by law has independent authority over its strategic plan and local trust fund. As directed by the Board of Supervisors in the Commission's enabling ordinance, the Commission follows established County administrative procedures for processing its contracts through its administrative agent, the Department of Health Services.
Prior Board Actions:
On June 5, 2018 the Board 1) accepted the First 5 Sonoma County Commission Strategic Plan 2018-2021 Update and 2) approved agreements for the First 5 Sonoma County Responsive Grant Program in an amount not-to-exceed $750,000 through June 30, 2021 for projects and programs that address the Commission's Strategic Plan outcomes. On August 30, 2016 the Board approved an agreement with Wright School District to implement a community preschool program for the period August 30, 2016 to June 30, 2021 in an amount not to exceed $150,000. On February 2, 2016 the Board approved grant agreements with Sonoma Wine Country Weekend and Fort Ross Educational Foundation to accept a total of $53,000 in revenue to enhance the First 5 Sonoma County Preschool Facilities Grant Program. On May 19, 2015 the Board 1) authorized the Director of Health Services to implement the First 5 Sonoma County Preschool Facilities Grant Program and execute agreements in an amount not to exceed $655,000 through FY 15-16 and 2) adopted a resolution transferring $305,000 from General Fund Contingency to First 5 Sonoma County.
Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community
These programs align with the County Strategic Plan Goal Area 1 and First 5 Sonoma County Commission Strategic Plan goals.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	200,000	200,000	
Additional Appropriation Requested	240,127		
Total Expenditures	**440,127**	**200,000**	**0**
Funding Sources			
General Fund/WA GF	0	0	
State/Federal	0	0

Contingencies	0	0	
Total Sources	**440,127**	**200,000**	**0**

Narrative Explanation of Fiscal Impacts:

Additional appropriations for fiscal year 2018-2019 are required to support program needs. Proposition 10 is the funding source for the additional appropriations. It is anticipated that all Early Childhood Education Facilities Grant Program expenditures will be made during fiscal years 2018-2019 and 2019-2020, with grant terms extending beyond that period.

Resolution of the Board of Supervisors of the County of Sonoma, State of California, Authorizing Budgetary Adjustments to the Fiscal Year 2018-2019 Adopted Budget, Appropriating Revenues and Expenditures of $240,127 to Support the First 5 Sonoma County Commission's Early Childhood Education Facilities Grant and Responsive Grant Programs Within the Department of Health Services

Whereas, the Board of Supervisors has adopted the final budget for fiscal year 2018-2019 in accordance with Section 29088 of the Government Code of the State of California; and

Whereas, the Government Code allows for adjustments to the adopted budget during the 2018-2019 fiscal year.

Now, Therefore, Be It Resolved that the Board of Supervisors, County of Sonoma, State of California, does hereby authorize and direct the County Auditor-Controller to adjust the fiscal year 2018-2019 adopted budget for the increases listed in Exhibit A.

Title: Tobacco Retailer Licensing Ordinance

Recommended Actions:

Adopt a resolution introducing, reading the title of, and waiving further reading of a proposed ordinance amending Chapter 32A of the Sonoma County Code to lower the minimum age for persons selling tobacco from 21 to 18 years. (First Reading)

Executive Summary:

On April 19, 2016 the Board of Supervisors adopted an ordinance adding Chapter 32A to the Sonoma County Code to require the licensure of tobacco retailers within unincorporated Sonoma County. The goals of the ordinance are to assure more responsible tobacco retailing and to prevent the sale or distribution of tobacco and nicotine products to minors. The ordinance stipulated that those who sell tobacco products must be the same age or older than the legal age to purchase tobacco products in California, which at the time of ordinance passage was 18 years of age. In June 2016 the California legislature passed legislation making it illegal for tobacco retailers to sell tobacco products to anyone under 21 years of age (with an exception for persons 18 and over with valid military identification).

To ensure that tobacco retailers may legally allow cashiers who are 18 to 20 years old to sell tobacco products, the Department is proposing a change to Chapter 32A of the Sonoma County Code to specifically state the requirement to be a minimum of 18 years of age to engage in the sale of tobacco for a tobacco retailer. This age requirement is consistent with the alcohol sales age requirement and alleviates a hardship for retailers who are no longer able to hire young adults 18 to 20 years old as cashiers. Further, this change reduces the negative impact on young adult employment opportunities.

Discussion:

Chapter 32A (Licensure of Tobacco Retailers) of the Sonoma County Code requires licensure of tobacco retailers within unincorporated Sonoma County. The goals of the ordinance are to assure more responsible tobacco retailing and to prevent the sale or distribution of tobacco and nicotine products to minors.

Current ordinance language regarding the allowable minimum age to sell tobacco products is tied to the age established by state law for the purchase of tobacco products, which at the time of ordinance passage was 18 years of age. Since that time, the California legislature passed legislation making it illegal for tobacco retailers to sell tobacco products to anyone under 21 years of age (with an exception for persons 18 and over with valid military identification).

To ensure that tobacco retailers may legally allow cashiers who are 18 to 20 years old to sell tobacco products, the Department is proposing a change to Chapter 32A of the Sonoma County Code to specifically state the requirement to be a minimum of 18 years of age to engage in the sales of tobacco for a tobacco retailer. This age requirement is consistent with the alcohol sales age requirement, which allows alcohol sales by a person who is a minimum age of 18 years if under continuous supervision of a person at least 21 years of age. Allowing tobacco retailers to employ 18 to 20 year old cashiers also serves to alleviate a hardship for retailers who are no longer able to hire young adults. Further, this change reduces the negative impact on young adult employment opportunities.

This item proposes amending Chapter 32A, Section 32A-3, subsection (e) as follows:

Existing ordinance language: Minimum Age for Persons Selling Tobacco: No person who is younger than the minimum age established by state law for the purchase or possession of tobacco products shall engage in tobacco retailing.

Proposed new ordinance language: Minimum Age for Persons Selling Tobacco: No person who is younger than 18 years of age shall engage in tobacco retailing.

Prior Board Actions:

On July 10, 2018 the Board adopted an ordinance amending Chapter 32A of the Sonoma County Code to make necessary administrative clarifications regarding pricing related to packages of cigars and little cigars.

On April 19, 2016 the Board adopted an ordinance (as amended) adding Chapter 32A (Licensure of Tobacco Retailers) to the Sonoma County Code to require the licensure of tobacco retailers within unincorporated Sonoma County.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

The ordinance serves to reduce smoking among youth in Sonoma County. This effort aligns with the *Agenda for Action* section of *A Portrait of Sonoma County* (2014), which recommends redoubling anti-smoking efforts as a top strategy for reducing disparities in health.

Resolution of the Board of Supervisors of the County of Sonoma, State of California, Introducing, Reading the Title, and Waiving Further Reading of a Proposed Ordinance Amending Chapter 32A of the Sonoma County Code to Lower the Minimum Age for Persons Selling Tobacco from 21 to 18 Years

Whereas, a proposed ordinance entitled "An Ordinance of the Board of Supervisors of the County of Sonoma, State of California, Amending Chapter 32A of the Sonoma County Code to lower the minimum age for persons selling tobacco from 21 to 18 years" has been introduced and the title read.

Now, Therefore, Be It Resolved that further reading of the proposed ordinance is waived.

Be It Further Resolved that the Sonoma County Board of Supervisors will consider adoption of the proposed ordinance on or after August 28, 2018 in the Board of Supervisors Chambers, 575 Administration Drive, Room 102A, Santa Rosa, California.

Ordinance No. _____

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF SONOMA, STATE OF CALIFORNIA, AMENDING CHAPTER 32A OF THE SONOMA COUNTY CODE TO LOWER THE MINIMUM AGE FOR PERSONS SELLING TOBACCO FROM 21 TO 18 YEARS

The Board of Supervisors of the County of Sonoma, State of California, ordains as follows:

SECTION I. Chapter 32A, Section 32A-3, subsection (e) of the Sonoma County Code is amended to read:

(e) Minimum Age for Persons Selling Tobacco. No person who is younger than 18 years of age~~the minimum age established by state law for the purchase or possession of tobacco products~~ shall engage in tobacco retailing.

SECTION II. If any section, subsection, sentence, clause or phrase of this Ordinance is for any reason held to be unconstitutional and invalid, such decision shall not affect the validity of the remaining portion of this Ordinance. The Board of Supervisors hereby declares that it would have passed this Ordinance and every section, subsection, sentence, clause or phrase thereof, irrespective of the fact that any one or more sections, subsections, sentences, clauses or phrases be declared unconstitutional or invalid.

SECTION III. Adoption and implementation of this ordinance is exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15061(b)(3) of the State CEQA Guidelines because it can be seen with certainty that there is no possibility that this ordinance may have a significant effect on the environment. Adoption and implementation of the standards, license requirements, and other measures contained in the ordinance will not result in any direct physical change to the environment on their own. In the alternative, the adoption and implementation of this ordinance is exempt from CEQA pursuant to Section 15308 of the State CEQA Guidelines as an action taken to assure the maintenance, restoration, enhancement, and protection of environment where the regulatory process involves procedures for protection of the environment. The basis for this determination is that this ordinance does not in itself approve any construction activities, but instead establishes standards, license requirements, and other measures that regulate the licensure of tobacco retailers more stringently than existing codes. These standards, license requirements, and other measures will assure the protection of human health, which is an aspect of the environment under Public Resources Code Section 21083(b)(3), by strengthening existing standards for preventing the sale of tobacco to youth and establishing new limitations on tobacco retailer licensure. The Director of the Department of Health Services is directed to file a notice of exemption in accordance with CEQA and the State CEQA Guidelines.

SECTION IV. This ordinance shall be and the same is hereby declared to be in full force and effect from and after thirty (30) days after the date of its passage and shall be published once before the expiration of fifteen (15) days after said passage, with the names of the Supervisors

voting for or against the same, in *The Press Democrat,* a newspaper of general circulation published in the County of Sonoma, State of California.

In regular session of the Board of Supervisors of the County of Sonoma introduced on the 14th day of August 2018, and finally passed and adopted this _____ day of _____ 20_____, on regular roll call of the members of said Board by the following vote:

Supervisors:

Gorin:	Rabbitt:	Zane:	Hopkins:	Gore:
Ayes:	Noes:	Absent:	Abstain:

Title: Accept Archstone Expansion Grant Funding

Recommended Actions:

Authorize the Human Services Department to accept expanded grant funding in the amount of $375,000 for a three-year grant from the Archstone Foundation to address depression in low-income older adults.

Executive Summary:

The Sonoma Care Collaborative Project (SCCP) expansion is a three-year project funded by the Archstone Foundation which expands the collaborative care model to West County Health Centers and West County Community Services with a goal of serving an additional 100 older adults over a three-year grant period. This $375,000 grant expands on the existing Archstone grant between the Human Services Department and Petaluma Health Center that has provided support for more than 100 older adults who have symptoms of depression. The Human Services Department and Petaluma Health Center will act as backbone organizations for this expansion by providing local technical assistance to the two new partners to share best practices to implement the Collaborative Care model in West County.

Discussion:

The Sonoma Care Collaborative Project (SCCP), a partnership between the Human Services Department Adult and Aging Division and the Petaluma Health Center (PHC) that began in 2015, is effectively addressing depression in older adults. Applying the evidence-based Collaborative Care model of care developed at the University of Washington, the Sonoma Care Collaborative Project is an innovative model that embeds a community-based social worker from Adult and Aging into the care team at Petaluma Health Care. The social worker conducts home visits and uses the evidence-based program, Healthy IDEAS, to engage patients in positive behaviors. By integrating physical and behavioral health treatments, the treatment team can address the full range of each patient's needs. Most patients

participating in the program have shown a dramatic reduction in their depression symptoms and an increase in their well-being.

After the first three years of successfully implementing this model at the Petaluma Health Center, the Human Services Department applied for and was granted a new three year grant to expand the model to West County Health Centers (WCHC) using a community-based social worker from West County Community Services (WCCS) embedded in the primary care team at West County Health Centers.

The program will be developed with funding from Archstone Foundation leveraging the last 3 years of experience implementing the model at Petaluma Health Center. The total grant amount is $375,000 including the local match totals of $623,358. Of the $623,358. Human Services Adult & Aging is responsible for $6,500 in in-kind salaries/benefits, the remaining amount is contributing in-kind salaries/benefits from contracting partners. The start date of the grant funding is July 1, 2018 and will continue through July 1, 2021. There is no county general fund request. All program costs will be paid by grant funds and/or required Department match.

	Archstone Funding		
Agency	Year 1	Year 2	Year 3
West County Health Centers	$73,533	$73,533	$38,361
West County Community Services	$57,657	$57,657	$28,829
Adult & Aging	$13,310	$13,310	$7,810
Petaluma Health Center	$5,500	$5,500	$0
Totals	$150,000	$150,000	$75,000

Year 1: Fiscal Year 2018-19 will have grant funding of $150,000, with in-kind contributions from partnering Community-Based Organizations of $99,000 for a total of $249,000.

Year 2: Fiscal Year 2019-20 will have grant funding of $150,000 with in-kind contributions from partnering Community-Based Organizations of $99,000 for a total of $249,000.

Year 3: Fiscal Year 2020-21 will have grant funding of $75,000 with in-kind contributions from Community-Based Organizations of $50,358 for a total of $125,358.

Over the three-year span of the grant, funding will total $375,000, with in-kind contributions of $248,358 for a total of $623,358.

Prior Board Actions:

July 28, 2015: Board approved HSD agreement with Archstone Foundation and Sub-contract with Petaluma Health Center

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Continues and expands an innovative model to address depression in older adults by further expanding the model to include West County Community Services and embedding a social worker at West County Health Center, improving coordination and access to depression treatment for older adults.

Diane Kaljian
Adult and Aging Director
County of Sonoma, Human Services Department
Adult and Aging Division
3725 Westwind Blvd., Suite 101
Santa Rosa, CA 95403

Dear Ms. Kaljian:

On June 4, 2018, Archstone Foundation Board of Directors met and reviewed the proposal for funding of *Sonoma Care Collaborative Continuation Project*. It is my pleasure to inform you that the proposal submitted by the County of Sonoma, Human Services Department for $375,000 was selected for funding.

Enclosed are two copies of the Grant Agreement, which outline our commitments to support County of Sonoma, Human Services Department per the proposal submitted on February 28, 2018. If you are in accord with the stipulations of this agreement, please return one signed copy at your earliest convenience. The other copy is for your files. As soon as this document is returned, we will proceed with the disbursement process detailed in the Grant Agreement attachment.

In future correspondence, please refer to this grant by its identification number, 18-04-36.

We are pleased to support this worthwhile project and look forward to a successful undertaking. If you have any questions regarding the grant, please contact Laura Rath, Senior Program Officer.

Best Wishes,

Joseph F. Prevratil, JD
President and CEO

ARCHSTONE FOUNDATION

Grant Number 18-04-36

GRANT AGREEMENT

THIS GRANT AGREEMENT is made and entered into by and between ARCHSTONE FOUNDATION (the *Foundation*) and the County of Sonoma, Human Services Department (the *Grantee*).

RECITALS

A. The Foundation, a California Nonprofit Public Benefit Corporation, is organized for the purpose of aiding and assisting, through contributions and otherwise, improved health care, and desires to make a grant to the Grantee in furtherance of that purpose.

B. The Grantee is willing to accept such grant on the terms and conditions of this Agreement.

TERMS & CONDITIONS

In consideration of the facts recited above and the mutual covenants, conditions and representations set forth herein, the parties agree and covenant as follows:

1. Grant. Subject generally to the provisions of this Agreement and specifically to the terms of this Section, the Foundation hereby agrees to grant the sum of not more than $375,000 (the *Grant*) for the program and purposes set forth on Schedule A attached hereto (the *Program*). In accepting such Grant, the Grantee acknowledges and agrees that:

a. the Foundation shall have no obligation to segregate or set aside any funds or assets for the payment of the Grant;

b. the Grantee shall use the Grant solely for the purposes and for organizing, implementing and conducting the Program;

c. the Grant shall be used only for charitable and educational purposes qualifying under Section 170(c)(1) of the Internal Revenue Code of 1986, as amended (the *Code*);

d. neither the Grant nor the income there from may be used for purposes other than those described;

e. the Grant shall be payable as set forth on Schedule B attached hereto; subject always to the provisions of Paragraphs 3 and 8 herein;

f. all unexpended amounts of the Grant shall be held in interest-bearing bank accounts with

the bank or banks set forth on Schedule B attached hereto; and

g. In the event the Grantee shall, singly or in conjunction with any other person or persons, contest in any court the validity of this Grant, the terms or conditions of this Grant or the diminution, termination, or determination on the part of the Foundation not to renew or to pay all or any part of the Grant, or shall seek to obtain an adjudication in any proceeding in any court that this Grant or any of its provisions is void, or seek otherwise to void, nullify, or set aside this Grant or any of its provisions, then the right of that Grantee to take any interest given or granted by the Grant shall be determined as it would have been determined had the Grantee failed initially to qualify under the provisions of subparagraph c of Paragraph 1.

2. Program. As an inducement to the Foundation to make the Grant, the Grantee has previously submitted a written proposal ("the *Proposal*") to the Foundation, which includes a description of the Program. The Grantee acknowledges that the Grant is expressly made in reliance on the Proposal and a review of financial information and a final budget submitted by the Grantee. Accordingly, the Grantee shall notify the Foundation immediately, in writing, of any material change in the facts set forth in the Proposal or in any other information or document submitted to the Foundation. Without the advance written consent of the Foundation, the Grantee shall not expend any part of the Grant or interest thereon whether for any purpose or item in excess of the amount budgeted for such purpose or item on the final budget for the Program submitted by the Grantee to the Foundation.

3. Conditions to the Grant. Except as such conditions may be waived in writing by the Foundation, the Foundation's obligations to make the Grant and, if the Grant is payable in installments, to pay each installment thereof shall be subject to each of the following conditions:

a. All necessary approvals and consents to the payment of the Grant shall, to the satisfaction of the Foundation, have been obtained and not revoked.

b. No legal, administrative or other proceeding shall be pending that questions the legality of the Grant.

c. The Grantee continues to qualify under Code Section 170(c)(1), and its Program as having a charitable and educational purpose as provided in Paragraph 1.c., above, both in fact and by operation of Paragraph 1.d. hereof.

d. The Board of Directors of the Foundation shall have approved or not withdrawn approval of each payment or installment of the Grant.

4. Covenants of Grantee. The Grantee covenants with the Foundation as follows:

a. To repay any portion of the Grant which is not used for the purposes of the Grant.

b. To submit to the Foundation full and complete quarterly reports on the manner in which the Grant is spent and the progress made in accomplishing the purposes of the Grant.

c. To maintain records of receipts and expenditures and to make its books and records relating to the Grant available to the Foundation at reasonable times.

d. Not to use any of the Grant (i) to carry on propaganda, or otherwise to attempt, to influence legislation (within the meaning of Section 4945(d)(1) of the Code), (ii) to influence the outcome of any specific public election, or to carry on, directly or indirectly, any voter registration drive (within the meaning of Section 4945(d)(2) of the Code), (iii) to make any grant which does not comply with the requirements of Section 4945(d)(3) of (4) of the Code or (iv) to undertake any activity for any purpose other than one specified in Section 170(c)(1) of the Code.

e. In the performance of this Agreement and the expenditure of the Grant, the organization, implementation, and conduct of the Program will (i) comply with all applicable laws, regulations and union agreements to which it is bound and (ii) not discriminate on the basis of race, color, national origin, age, sex, sexual orientation, marital status, creed, religion, citizenship, ancestry or political affiliation.

f. Without the prior written approval of the Foundation, and except for salaries specifically identified in the Proposal, not to transfer or pay, whether or not for value, any portion of the Grant to (i) any person or entity who directly or indirectly controls, is controlled by or is under common control with the Grantee, (ii) any person or entity who is an officer, employee, partner or trustee of, or serves in a similar capacity with respect to, the Grantee or (iii) any person or entity of which the Grantee or any of its officers, employees, partners or trustees is the beneficial owner of 5% or more of the equity interests therein.

5. Representations of Grantee. The Grantee represents and warrants to the Foundation that:

a. The Grantee is a California Public Government Entity, located at Adult and Aging Division, 3725 Westwind Blvd., Suite 101, Santa Rosa, CA 95403, duly formed, validly existing and in good standing under the laws of the State of California, and has the legal power and authority to conduct its business, to own its properties, and to execute, deliver, and perform its obligations under this Agreement.

b. This Agreement has been duly authorized, executed and delivered by the Grantee, and constitutes a legal, valid and binding obligation of the Grantee for the benefit of the Foundation.

c. All proceedings legally required to be taken by the Grantee in connection with the authorization of this Agreement and of the transactions related thereto, and all approvals, authorizations, consents and other orders of public boards or bodies as may be legally required to be obtained by the Grantee prior to the date hereof with respect to all or any of such matters, have been taken or obtained.

d. The execution and delivery of the Agreement by the Grantee, and the performance by the

Grantee of its obligations hereunder, do not (i) violate any provisions of the Articles of Incorporation, Bylaws or other governing instrument of the Grantee, (ii) violate any law, rule or regulation having applicability to the Grantee or any order, writ, judgement, decree, determination or award to which the Grantee is a party or (iii) result in the breach of, or constitute a default under any agreement, lease or instrument to which the Grantee is a party or by which the Grantee is bound.

e. No audit, investigation, proceeding or other inquiry is pending by the Internal Revenue Service, the Franchise Tax Board or the Attorney General of any state with respect to the Grantee or any affiliated organization, and no legal, administrative or other proceeding is pending that questions the legality of the Grant.

6. Publicity. All promotional and advertising materials, including announcements, brochures, publications, films, videotapes, exhibitions and visual materials, produced or authorized by the Grantee relating to the Program shall, to the extent directed by the Foundation, give credit to the Foundation at least as prominent as that given to any other person or organization or entity which makes a grant or contribution of funds to the Grantee. The Foundation shall have the right, but not the obligation, to review in advance and approve the contents of all press announcements issued by the Grantee, the planning of all press events, and the contents of all promotional and advertising materials related to the Grant and the Program.

7. Reports and Records. The Grantee agrees to submit such reports, in addition to the reports required under Paragraph 4(b) hereof, as may be requested by the Foundation, in such form as the Foundation may prescribe at reasonable intervals, relating to the Grantee's performance of, or ability to fulfill, its obligations under this Agreement. Notwithstanding the foregoing, the Grantee shall timely submit such reports as are described on Schedule C attached hereto. The Grantee shall maintain complete, accurate and current records of all income and expenses relating to the Program and the Grant. During the term of this Agreement and at any time within two (2) years thereafter, the Grantee shall make such records available upon request to the Foundation for review, copying, and audit. In addition, the Grantee agrees to cooperate fully with the Foundation, and to allow the Foundation, and any person designated by it, full and complete access to the facilities, activities and operations of the Grantee, for the purpose of auditing, monitoring and evaluating the Program, the Grant and the compliance of the Grantee with the terms and conditions of the Agreement.

8. Termination. The Foundation shall have the right to terminate this Agreement and the Grant in the event the Foundation determines that the Grantee (a) has misrepresented any material fact or supplied false or misleading material information to the Foundation in the Proposal or otherwise in regard to this Agreement or the Grant, (b) has diverted any payments made under this Agreement to a purpose other than that permitted hereunder, (c) has failed to maintain or provide any material records or reports require to be maintained or provided hereunder, (d) has failed to abide by any other term or condition of this Agreement, (e) has terminated, abandoned, canceled or substantially altered, or is likely to terminate, abandon, cancel or substantially alter, the Program or (f) has initiated any of the actions set forth in Paragraph 1.d., above, or has failed to comply with the requirements of Paragraph 1.c., above in fact or by operation of Paragraph 1.d. Upon termination of this Agreement by the Foundation, the Foundation shall be relieved from

making any further payments to the Grantee in regard to the Grant and, if such termination is pursuant to clause (a), (b), (c) or (d) above, may require the Grantee to refund any or all payments of the Grant theretofore made. The foregoing remedies of the Archstone Foundation are in addition to any other remedies provided by law, and all such remedies shall be cumulative and not exclusive.

9. No Liability. The Grantee shall indemnify, defend and hold the Foundation harmless from and against any and all liability to any third party for or from loss, damage or injury to persons or property in any manner arising out of, or incident to, the performance of this Agreement or the planning, arranging, implementing, sponsoring or conducting of the Program or any other program or activity by the Grantee. IN NO CASE SHALL THE FOUNDATION BE LIABLE TO THE GRANTEE OR ANY THIRD PARTY FOR CONSEQUENTIAL DAMAGES. The Foundation shall have no liability for any debts, liabilities, deficits or cost overruns of the Grantee. It is expressly understood by the parties that no director, member, officer, employee or other representative of the Foundation shall incur any financial responsibility or liability of any kind or nature whatsoever in connection with this Agreement or any subsequent agreement between parties regarding the subject matter hereof. The parties agree that the liability of the Foundation hereunder shall be limited to the payment of the Grant pursuant to the terms and conditions of the Agreement. Any contracts entered into or other obligations or liabilities incurred by the Grantee in connection with the Program or otherwise relating to this Agreement shall be the sole responsibility of the Grantee, and the Foundation shall have no obligation or liability whatsoever thereunder or with respect thereto. The Grantee covenants that all contracts to which it shall become a party in regard to the Program and/or Grant shall include the following clause:

It is expressly agreed and understood that neither the Archstone Foundation (the "Foundation") nor any director, member, officer, employee or other representative of the Foundation shall incur any financial responsibility or liability of any kind or nature whatsoever in connection with the Agreement, and that the foregoing provisions concerning financial responsibility or liability shall be expressly included in and made part of any and all agreements between the parties subsequent to this Agreement.

10. Insurance. The Grantee represents and warrants that (a) it is, and will continue to be, adequately insured against all risks, including such risks as would be covered by fire and property damage, worker's compensation, automobile and comprehensive general liability insurance, with respect to the conduct of the Program and (b) the premises and facilities of third parties where the Grantee conducts and will conduct its programs and activities also are and will be so adequately insured. Upon demand of the Foundation, the Grantee shall furnish the Foundation the policy or policies of insurance or a certificate of insurance or other written evidence satisfactory to the Foundation, evidencing the insurance carried by or otherwise benefiting the Grantee. The Grantee covenants that it will cause the Foundation to be added as an additional insured on all relevant policies of insurance carried by the Grantee.

11. Prior Agreements. This Agreement and the Proposal together constitute the entire agreement of the parties with respect to the subject matter hereof, and the provisions hereof and thereof have superseded any and all prior and contemporaneous agreements or understandings relating to the matters specifically addressed herein or therein.

12. Other Provisions. Failure or inability of either party to enforce any right hereunder shall not waive any right with respect to any other or future rights or occurrences, nor shall waiver of any condition or right in any instance be deemed a waiver of any condition or right in any other instance. If any legal action or other proceeding is brought for the enforcement of this Agreement, or because of an alleged or actual dispute, breach, default, or misrepresentation in connection with any of the provisions of this Agreement, the successful or prevailing party shall be entitled to recover reasonable attorney's fees and other costs incurred in such action or proceeding in addition to any other relief to which it may be entitled. This Agreement and the Grantee's rights, duties and obligations hereunder may not be assigned by the Grantee without the prior written consent of the Foundation. Any attempt at assignment shall be void and a material breach of this Agreement by the Grantee. This Agreement has been negotiated, executed and delivered in the State of California and shall be governed by and construed in accordance with its laws. The Schedules attached hereto are incorporated herein by reference and made a part of this Agreement as if fully set forth herein.

13. Amendments and Modifications. This Agreement may be amended or modified only by a written instrument executed by the Foundation and by the Grantee. Notwithstanding the foregoing, modifications to the scope of the Program, alterations in the funding schedule, revisions to the Proposal and other changes to the terms and conditions of this Agreement set forth on the Schedules attached hereto may be effectuated by the substitution of replacement Schedule(s), provided that such replacement Schedule(s) are executed by both the Foundation and the Grantee.

14. Completion of Grant. The Grantee covenants to execute and deliver to the Foundation a final evaluation report (including summary of the project, all statistical data, evaluation results and accounting of expenditures per exhibit C, attached) as a condition precedent to receipt of the final installment payment of the Grant.

IN WITNESS WHEREOF, the parties have executed this Grant Agreement on:

SCHEDULE A

DESCRIPTION OF PROGRAM AND PURPOSES:

The Sonoma Care Collaborative Project (SCCP) will enroll 100 older adults in the SCCP expansion project. The population to be served and engaged through the proposed expansion of the SCCP comprises older adult (65+years) patients of the West County Health Centers who:

1. Screen positive for depression using a PHQ-2/PHQ-9;
2. Consent to services; and
3. Demonstrate the ability to constructively engage in medication compliance, psychotherapy, and community case management services.

The ability to constructively engage in services will be assessed based on patient history of compliance and engagement and through interviews with the WCHC primary care physician, WCCS Senior Case Manager, and/or psychiatric consultant. The SCCP will utilize community partnerships to seek alternative treatment for patients who do not meet the selection criteria for this project.

The goals of the project are to:

1. Enroll and treat a minimum of 100 older adults collectively from the West County Health Center clinics in the Collaborative Care model by the end of Project Year 3.
2. Reduce depressive symptoms for enrolled patients by developing and delivering treatment plans for patients within 10-12 weeks of enrollment.
3. Ensure that 90% of WCHC patients who are 65 years of age or older will have documentation of annual screening for depression in medical record on an ongoing basis throughout the grant period.
4. Provide Healthy IDEAS intervention through home visits from the Senior Case Manager at West County Community Services.
5. Improve the care depressed adults receive at WCHC and throughout the County by promoting a Collaborative Care model in more Sonoma County clinics.
6. Sonoma County Adult & Aging and Petaluma Health Center will provide local technical assistance as follows:
    a. Lead monthly phone conference calls with WCHC and WCCS staff to discuss progress on the goals of the grant;
    b. Hold quarterly face-to-face Care Collaborative Coalition meetings to share best practices between health centers and CBOs and to discuss challenges/successes; and
    c. Provide peer consultation as needed (for example, senior care manager from the CBO may consult on a challenging client to determine how to best utilize the collaborative care model.)

WCHC and WCCS will launch the expansion of SCCP on July 1, 2018. Patient identification by the Senior Case Manager, Primary Care Physician (PCP), Medical Assistant (MA), Care Team Registered Nurse (CTRN) and Behavioral Health (BH) Provider will determine patients in need of help with depression.

Depression screens by the MA and BH Provider will commence, with documentation showing annual screenings of 90% of patients 65 years of age and over. Clinical assessment data to support any potential depression diagnosis will be gathered, and PCP and/or the Behavioral Health Provider will provide the clinical diagnosis.

PCP, MA, CTRN, BH Provider and WCCS Senior Case Manager stationed at WCHC will educate the patient and family (as appropriate) about depression and treatment options; the treatment care plan will be developed and initiated by the Psychiatrist, PCP and BH Provider within 10-12 weeks of patient enrollment. To further engage the patient, the WCCS Senior Case Manager will gather additional information and develop an assessment of patient needs, desires and resources through a home visit with the client/family.

If indicated, the Psychiatrist and PCP will prescribe antidepressant medication and together with the CTRN and BH Provider, educate the patient about the medication and potential side effects. Patient self-management support and indicated behavioral interventions for all patients will be facilitated by the PCP, CTRN, BH Provider and Senior Case Manager.

The BH Provider will provide evidence-based psychotherapy and the Senior Case Manager and BH Provider will provide case management and/or refer to social and other support services. If indicated, the Psychiatrist, PCP, CTRN, and BH Provider will provide or refer to specialty mental health services outside primary care.

For Quality Assurance (QA) treatment outcomes will be tracked by the PCP, MA, BH Provider and Senior Case Manager using results from the PHQ-9 and other screening tools as required. For project process quality assurance, the PCP, MA, BH Provider and Senior Case Manager will track delivery of care management support and reach out to patients not engaging in treatment. The Psychiatrist, PCP and BH Provider will regularly check treatment response for possible need for changes, and the PCP Champion, PCP, Psychiatrist, BH Provider, Senior Case Manager and Project Manager will participate in weekly case reviews to identify patients who are not improving and provide any treatment recommendations. The Psychiatrist, PCP, BH Provider, and Senior Case Manager will ensure that treatment recommendations are enacted.

The CMO, PCP Champion, MA, Senior Case Manager, and Project Manager will provide project support. The CMO, Psychiatrist, BH Provider and Project Manager will provide program supervision. The Project Manager will also assist in coordinating meetings and reports, including monthly phone conference calls with HSD, PHC, WCHC, and WCCS staff to discuss progress on the goals of the grant, quarterly face to face Sonoma Care Collaborative Coalition meetings to identify best practices and use peer consults as needed.

Patient discharge and termination from the project will be determined by the team after appropriate successful course of treatment. Patients with ongoing concerns will continue to be treated and followed by the PCP, BH Provider and Senior Case Manager as needed.

SCHEDULE B

The funding schedule set forth below constitutes an estimate of the Grantee's need for funds based upon the Proposal and approved budget (see attachment). The amounts and timing of the payment of installments of the Grant as set forth in such funding schedule are subject to change, at the discretion of the Foundation, in the following circumstances:

1. Reports required by Paragraph 7 of the Grant Agreement and/or by Schedule C attached thereto are not submitted in a timely manner or with all required information.

2. The Program is modified, enhanced, reduced or otherwise altered in any substantive manner without the prior written approval of the Foundation.

3. The Foundation determines that cost savings may be achieved through utilization of other resources or the Foundation's purchase requisition procedures for equipment and other items required by the Program.

FUNDING SCHEDULE:

Payment Schedule for the above Grant:

July 1, 2018	$135,000.00	First 90% of Year One	Scheduled
July 1, 2019	$135,000.00	First 90% of Year Two	Contingent
September 15, 2019	$15,000.00	Final 10% of Year One	Contingent
July 1, 2020	$67,500.00	First 90% of Year Three	Contingent
September 15, 2020	$15,000.00	Final 10% of Year Two	Contingent
September 15, 2021	$7,500.00	Final 10% of Year Three	Contingent

Contingent payments require submission of Progress and Evaluation Reports to be reviewed and approved by Foundation prior to payment authorizations. The total grant funds released based on Grantee submitted Reports may be less than the approved grant, but in no case will the total payment exceed $375,000.

SCHEDULE C

REPORTS TO BE FURNISHED:

I. PROGRESS REPORTS. Progress Reports must include, at a minimum, a written narrative addressing the progress of all phases of program development and a detailed accounting of expenditures to date and any available statistics or evaluative data on the program.

II. EVALUATION REPORT. The Evaluation Report must be a complete review and report of the program including a summary of the project, all statistical data, evaluation results and accounting of expenditures. The grant period is scheduled to end July 1, 2021. The Final Evaluation report is due within two months of the end of the grant and should cover the entire grant period.

REPORTING SCHEDULE:

November 1, 2018	1st Quarter Progress Report	(covering July 1, 2018 – September 30, 2018)
February 1, 2019	2nd Quarter Progress Report	(covering October 1, 2018 – December 31, 2018)
May 1, 2019	3rd Quarter Progress Report	(covering January 1, 2019 – March 31, 2019)
August 1, 2019	4th Quarter Progress Report	(covering April 1, 2019 – June 30, 2019)
September 1, 2019	Year One Evaluation Report	
November 1, 2019	5th Quarter Progress Report	(covering July 1, 2019 – September 30, 2019)
February 1, 2020	6th Quarter Progress Report	(covering October 1, 2019 – December 31, 2019)
May 1, 2020	7th Quarter Progress Report	(covering January 1, 2020 – March 31, 2020)
August 1, 2020	8th Quarter Progress Report	(covering April 1, 2020 – June 30, 2020)
September 1, 2020	Year Two Evaluation Report	
November 1, 2020	9th Quarter Progress Report	(covering July 1, 2020 – September 30, 2020)
February 1, 2021	10th Quarter Progress Report	(covering October 1, 2020 – December 31, 2020)
May 1, 2021	11th Quarter Progress Report	(covering January 1, 2021 – March 31, 2021)
August 1, 2021	12th Quarter Progress Report	(covering April 1, 2021 – June 30, 2021)
September 1, 2021	Final Evaluation Report	

All Reports should be submitted electronically to reports@archstone.org.

Supervisorial District(s):
All

Title: HSD Contract with Workforce Alliance North Bay

Recommended Actions:

Authorize the Director of the Human Services Department to execute an agreement with Workforce Alliance of the North Bay (WANB) for $107,100 to carry out Regional Planning Implementation activities during the period August 15, 2018 through June 30, 2019. The implementation planning activities will promote upward income mobility for lower waged job seekers and ensure that the needs of the business community are being met.

Executive Summary:

The Workforce Innovation and Opportunity Act required Workforce Development Boards in the North Bay Planning Unit (Sonoma, Lake, Marin, Mendocino, Napa and Solano Counties) to develop a Regional Workforce Plan. The 2017-2020 Regional Plan was approved by the Board of Supervisors in March 2017. Approval of this item will authorize the Director of the Human Services Department to execute an agreement with Workforce Alliance of the North Bay (WANB) for Regional Planning Implementation activities for $107,100 for the period August 15, 2018 through June 30, 2019.

Discussion:

The *North Bay Regional Planning Unit*, comprised of Workforce Development Boards in Sonoma, Lake, Marin, Mendocino, Napa and Solano Counties, is required by the California Workforce Board to develop strategies to strengthen industry sector partnerships, to support career pathways and to provide workforce services to businesses. In order to implement the 2017-2020 Regional Plan, the California Workforce Board awarded the North Bay Planning Unit $415,000. These funds will allow the region to make improvements to its business services infrastructure, including maximizing business tools and ease of service delivery, and to support the next steps in workforce projects that have emerged from the various business-led Industry Sector Partnerships in health care, manufacturing and hospitality.

The funding has been allocated to the three Workforce Boards in the region based on approval by the California Workforce Development Board as follows: Workforce Alliance of the North Bay (WANB),

comprised of Napa, Lake, Mendocino, and Marin Counties -- $107,100; Solano County Workforce Development Board -- $47,600; and Sonoma County -- $260,300. Sonoma County Human Services Department has been appointed as the fiscal agent for the administration of these funds.

WANB will support the objectives and carry out applicable activities as outlined in the Regional Planning Implementation Grant Work Plan, including: the procurement of Industry Innovation projects on behalf of the region; the development of regional metrics to track business engagement; the establishment of an "Employer Advancement and Retention Network"; continuing to champion the Industry Recognized Credentials in Healthcare created by the Sonoma-Marin Healthcare Industry Sector Partnership to educators in Sonoma and Marin; and connecting with building and trades employers via business associations, unions, foundations, and other community partners .

HSD will also be contracting with the Solano County Workforce Development Board (WDB) as referenced above. Solano WDB will support the objectives and carry out applicable activities as outlined in the Regional Planning Implementation Grant Work Plan, including: the procurement of Industry Innovation projects on behalf of the region; the development of regional metrics to track business engagement; the creation of a new incumbent worker training program based on best practices in the region; convening and providing administrative support for established Industry Sector Partnerships in the region; and connecting with building and trades employers via business associations, unions, foundations, and other community partners.

In addition to acting as fiscal lead for the grant funds, the Human Services Department and the Sonoma County Workforce Investment Board (WIB) will support the objectives and carry out applicable activities as outlined in the Regional Planning Implementation Grant Work Plan, including: the procurement of Industry Innovation projects on behalf of the region; the development of regional metrics to track business engagement; researching and purchasing software that will lead to high quality labor market data; and connecting with building and trades employers via business associations, unions, foundations, and other community partners. HSD will procure and award contracts for the Industry Innovation Fund.

Approval of this item will authorize the Director of the Human Services Department to execute an agreement with Workforce Alliance of the North Bay (WANB) for Regional Planning Implementation activities for $107,100 for the period August 15, 2018 through June 30, 2019. A competitive procurement process was not required because the funds were allocated specifically to WANB by the California Workforce Development Board.

Prior Board Actions:

March 7, 2017: Approved the 2017-2020 Regional Workforce Innovation and Opportunity Act (WIOA) Workforce Plan for Sonoma, Marin, Lake, Mendocino, Napa, and Solano Counties.

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

WIOA helps prepare job seekers and youth for work as well as provides assistance to regional employers in finding qualified workers.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses			
Additional Appropriation Requested	$415,000

General Fund/WA GF			
State/Federal	$415,000		
Fees/Other			
Use of Fund Balance			
Contingencies			
Total Sources	**$415,000**		

Narrative Explanation of Fiscal Impacts:

Human Services will request appropriations at first quarter consolidated budget adjustments for this grant. There is no impact to General Fund. Revenue will be budgeted at $415,000 and expenditures will be budgeted as follows: $107,100 for the WANB contract; $47,600 for the Solano County Workforce Development Board contract; and $260,300 for Sonoma County Human Services Department.

The funding for HSD will support service contracts resulting from the Industry Innovation Fund procurement, the purchase of business services software, one existing staff position previously funded by the state Slingshot grant which has now ended, and operating and administrative expenses.
No additional staffing positions in support of this funding will be requested.

AGREEMENT FOR PROVISION OF SERVICES

This agreement ("Agreement"), dated as of August 15, 2018 ("Effective Date") is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Workforce Alliance of the North Bay, a Joint Powers Agency, (hereinafter "Contractor").

RECITALS

WHEREAS, the North Bay Regional Planning Unit (RPU), commonly referred to as the North Bay Employment Connection (NBEC), and hereafter referred to as the "NBEC RPU", is comprised of the Sonoma County Workforce Development Board, the Solano County Workforce Development Board, and Contractor, which represents Napa, Lake, Mendocino, and Marin Counties Workforce Boards as one Workforce Development Board; and

WHEREAS, the NBEC RPU received a Workforce Innovation Opportunity Act (WIOA) grant from the California Workforce Development Board (CWDB) and the Employment Development Department (EDD) for Regional Planning Implementation; and

WHEREAS, Contractor represents that it is duly qualified by reason of its partnership in the NBEC RPU, and its experience, and organization to provide the services contemplated by this Agreement; and

WHEREAS, in the judgment of the Board of Supervisors, it is necessary and desirable to employ the services of Contractor for Regional Planning Implementation services;

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

AGREEMENT

1. Scope of Services.

1.1. Contract Documents. The following documents, if checked, and the provisions set forth therein are attached hereto and incorporated herein, and shall be dutifully performed according to the terms of this agreement:

- ☒ **Exhibit A: Scope of Work**
- ☒ **Exhibit B: Fiscal Provisions/Budget**
- ☒ **Exhibit C: Insurance Requirements**
- ☒ **Exhibit D: Assurance of Compliance**
- ☒ **Exhibit E: Additional Federal Requirements**
- ☐ Exhibit F: Professional Licensure/Certification
- ☐ Exhibit G: Media Communications
- ☐ Exhibit H: Accessibility
- ☐ Exhibit I: Data System Requirements
- ☐ Exhibit J: Adverse Actions / Complaint Procedures

1.2. Contractor's Specified Services. Contractor shall perform the services described in "Exhibit A: Scope of Work" (hereinafter "Exhibit A"), attached hereto and incorporated herein by this reference, and within the times or by the dates provided for in Exhibit A and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit A, the provisions in the body of this Agreement shall control.

1.3. Cooperation With County. Contractor shall cooperate with County and County staff in the performance of all work hereunder.

1.4. Performance Standard. Contractor shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Contractor's profession. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release. If County determines that any of Contractor's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Contractor to meet with County to review the quality of the work and resolve matters of concern; (b) require Contractor to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

2. Payment.

For all services and incidental costs required hereunder, Contractor shall be paid on a cost reimbursement basis in accordance with the budget set forth in "Exhibit B: Fiscal Provisions/Budget" (hereinafter "Exhibit B"), attached hereto and incorporated herein by this reference. Contractor shall be paid an amount not to exceed One Hundred Seven Thousand One Hundred Dollars ($107,000.00), without the prior written approval of County. Expenses not expressly authorized by the Agreement shall not be reimbursed.

Unless otherwise noted in this agreement, payments shall be made within the normal course of county business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

2.1. Overpayment. If County overpays Contractor for any reason, Contractor agrees to return the amount of such overpayment to County at County's option, permit County to offset the amount of such overpayment against future payments owed to Contractor under this Agreement or any other agreement.

2.2. Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Contractor for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Contractor does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

2.2.1. If Contractor does not qualify, County requires that a completed and signed Form 587 be provided by the Contractor in order for payments to be made. If Contractor is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the contractor agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Contractor has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement.

The term of this Agreement shall be from 08/15/2018 to 06/30/2019 unless terminated earlier in accordance with the provisions of Article 4 below.

4. Termination.

4.1. Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving five (5) days written notice to Contractor.

4.2. Termination for Cause. Notwithstanding any other provision of this Agreement, should Contractor fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Contractor written notice of such termination, stating the reason for termination.

4.3. Change in Funding. Contractor understands and agrees that County shall have the right to terminate this Agreement immediately upon written notice to Contractor in the event that (1) any state or federal agency or other funder reduces, withholds, terminates or funds are not made available for which the County anticipated using to pay Contractor for services provided under this Agreement or (2) County has exhausted all funds legally available for payments due to become due under this Agreement.

4.4. Delivery of Work Product and Final Payment Upon Termination. In the event of termination, Contractor, within 14 days following the date of termination, shall deliver to County all materials and work product subject to Article 9.18 (Ownership and Disclosure of Work Product) and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.5. Payment Upon Termination. Upon termination of this Agreement by County, Contractor shall be entitled to receive as full payment for all services satisfactorily rendered and expenses incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Contractor bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Contractor shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Article 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Contractor.

4.6. Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or the Director of the Human Services Department, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification.

Contractor agrees to accept all responsibility for loss or damage to any person or entity, including County, and to indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Contractor, that arise out of, pertain to, or relate to Contractor's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Contractor agrees to provide a complete defense for any claim or action brought against County based upon a claim relating to such Contractor's or its agents', employees, contractors, subcontractors, or invitees performance or obligations under this Agreement. Contractor's obligations under this Section apply whether or not there is concurrent negligence on County's part, but to the extent required by law, excluding liability due to County's conduct. County shall have the right to select its legal counsel at Contractor's expense, subject to Contractor's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Contractor or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance.

With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in "Exhibit C: Insurance Requirements" (hereinafter "Exhibit C"), which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work.

The execution of this Agreement shall constitute Contractor's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Contractor's performance of this Agreement shall be extended by a number of days equal to the number of days Contractor has been delayed.

8. Extra or Changed Work.

Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes which do not significantly change the scope of work or significantly lengthen time schedules, and amendments to the Agreement which do not increase the amount of payment under the Agreement (taking into account all prior amendments) more than $25,000 from the original Agreement amount, may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors/Purchasing Agent must authorize all other extra or changed work. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without

authorization to order extra or changed work or waive Agreement requirements. Failure of Contractor to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Contractor shall be entitled to no compensation whatsoever for the performance of such work. Contractor further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Contractor.

9.1. Standard of Care. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release.

9.2. Status of Contractor. The parties intend that Contractor, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Contractor is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker’s compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Contractor expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3. Subcontractors. In the event the Contractor is allowed to subcontract, the County shall look to the Contractor for results of its subcontracts. The Contractor agrees to be responsible for all the subcontractor's acts and omissions to the same extent as if the subcontractors were employees of the Contractor. No subcontracts shall alter in any way any legal responsibility of the Contractor to the County. Whenever the Contractor is authorized to subcontract or assign, the terms of this Agreement shall prevail over those of any such subcontract or assignment.

9.4. No Suspension or Debarment. Contractor warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Contractor also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration. If the Contractor becomes debarred, Contractor has the obligation to inform the County.

9.5. Taxes. Contractor agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Contractor agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Contractor's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or

other applicable taxes, Contractor agrees to furnish County with proof of payment of taxes on these earnings.

9.6. Records Maintenance. Contractor shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Contractor shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6.1. Contractor shall, during normal business hours and as often as any agent of the county, state, or federal government may deem necessary, make available for examination and/or duplication all of its records with respect to all matters covered by this Agreement. Contractor acknowledges that the above-named entities shall have the right to observe, monitor, evaluate, audit, examine, and investigate all activities of Contractor and its subcontractors associated with this Agreement.

9.6.2. In compliance with 29 CFR 95.53 and 45 CFR 74.53: Retention and Access Requirements for Records, Contractor shall retain all records pertinent to this Agreement, including financial, statistical, property, and participant records and supporting documentation for a period of four (4) years from the date of final payment of this Agreement. If, at the end of four years, there is ongoing litigation or an outstanding audit involving those records, Contractor shall retain the records until resolution of the litigation or audit.

9.7. Monitoring, Assessment & Evaluation. Authorized state, federal and/or county representatives shall have the right to monitor, assess, and evaluate Contractor's performance pursuant to this Agreement. Said monitoring, assessment, and evaluation may include, but is not limited to, audits, inspections of project premises, inspection of food preparation sites as appropriate, interviews of project staff and participants, and review of all records. Contractor shall cooperate with County in the monitoring, assessment, and evaluation process, which includes making any program or administrative staff (fiscal, etc.) available during any scheduled process.

9.8. Conflict of Interest. Contractor covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Contractor further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Contractor shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Contractor's or such other person's financial interests.

9.9. Statutory Compliance/Living Wage Ordinance. Contractor agrees to comply, and to ensure compliance by its subconsultants or subcontractors, with all applicable federal, state and local laws, regulations, statutes and policies – including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Contractor expressly acknowledges and agrees that this Agreement may be subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the

term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.10. Nondiscrimination. Without limiting any other provision hereunder, Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment practices and in delivery of services because of race, color, ancestry, national origin (including limited English proficiency), religious creed, belief or grooming, sex (including sexual orientation, gender identity, gender expression, transgender status, pregnancy, childbirth, medical conditions related to pregnancy, childbirth or breast feeding, sex stereotyping), marital status, age, medical condition, physical or mental disability, genetic information, military or veteran status, or any other legally protected category or prohibited basis, including without limitation, the County's Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.10.1. Contractor understands and agrees that administrative methods and/or procedures which have the effect of subjecting individuals to discrimination or otherwise defeating the objectives of the applicable and aforementioned laws will be prohibited.

9.10.2. Contractor shall provide County with a copy of their Equal Employment Opportunity and Affirmative Action policies upon request and shall sign and submit to County an Assurance of Compliance, attached hereto as "Exhibit D: Assurance of Compliance" (hereinafter "Exhibit D"), and incorporated by this reference, in order to certify that contractor is in compliance with the State and Federal laws related to equal employment opportunity and delivery of services.

9.10.3. Contractor and subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

9.10.4. Any and all subcontracts to perform work under this Agreement shall include the nondiscrimination and compliance provisions of this article and subcontractors shall agree to, sign and submit to Contractor a copy of the Assurance of Compliance, Exhibit D. Contractor shall maintain copies of these Assurances and submit copies to County upon County's request.

9.11. AIDS Discrimination. Contractor agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.12. Confidentiality. Contractor agrees to maintain the confidentiality of information in accordance with all applicable State and federal laws and regulations.

9.13. Information Security. In addition to any other provisions of this agreement, Contractor shall be responsible for ensuring that electronic media containing confidential and sensitive data is protected from unauthorized access.

9.14. Political and Sectarian Activities. Contractor warrants as follows: (a) it shall comply with requirements that no program under this Agreement shall involve political or lobbying activities; (b) it shall not employ or assign participants in the program to any

sectarian facility, except as provided by federal and state law or regulation; (c) it shall not use funds made available under this Agreement for political or lobbying activities.

9.15. Drug-Free Workplace. Contractor will comply with the requirements of the Drug-Free Workplace Act of 1990 and will provide a drug-free workplace by complying with all requirements set forth in the Act.

9.16. Facilities. Contractor warrants that all of the Contractor's facilities: (a) will be adequately supervised, (b) will be maintained in a safe and sanitary condition, (c) will be available for monitoring by County and/or state and federal monitors, (d) are accessible to handicapped individuals if appropriate, and (e) are nonsectarian.

9.17. Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Contractor.

10. Demand for Assurance.

Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice and Making Payments.

All notices and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail. Notices and payments shall be addressed as follows:

TO COUNTY:	County of Sonoma, Human Services Department 3600 Westwind Boulevard Santa Rosa, CA 95403
TO CONTRACTOR:	Workforce Alliance of the North Bay 1546 First St. Napa, CA 94559

When a notice or payment is given by a generally recognized overnight courier service, the notice or payment shall be deemed received on the next business day. When a copy

of a notice or payment is sent by facsimile or email, the notice or payment shall be deemed received upon transmission as long as (1) the original copy of the notice or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1. No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2. Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Contractor and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Contractor and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3. Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4. No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5. Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6. Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7. Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9. Counterparts and Electronic Copies. The parties agree that, where applicable, this Agreement may be executed in counterparts, together which when executed by the requisite parties shall be deemed to be a complete original agreement. In the event that any handwritten signature is delivered by facsimile transmission (“Fax”) or by electronic mail (“email”) delivery of a portable document format ("pdf") data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such Fax or pdf signature page were an original thereof. An electronic copy, including Fax copy, email, or scanned copy of the executed Agreement or counterpart, shall be deemed, and shall have the same legal force and effect as, an original document.

13.10. Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

Exhibit A: Scope of Work

I. PROGRAM DESCRIPTION

As reflected in the North Bay Employment Connection (NBEC) regional strategic plan on behalf of the North Bay Regional Planning Unit (RPU), NBEC is committed to promoting upward income mobility for lower waged job seekers and ensuring that the system is driven by the needs of the business community.

The recently awarded Regional Planning Implementation grant will allow NBEC to build on prior initiatives to take its work to the next level by:

- Hiring an experienced outside facilitator to help the group define roles, responsibilities, relationships and the decision-making process around this common goal
- Improvements to business services infrastructure, including maximizing business tools and ease of service delivery.
- Further enhancement of next steps in projects that have emerged from the business leadership of Industry Sector Partnerships via the Industry Innovation Fund.

II. CONTRACTOR RESPONSIBILITIES

A. Contractor will support objectives and carry out applicable activities as outlined in Exhibit A-1: RPI Grant Work Plan.

B. Contractor will assist in the procurement of Industry Innovation projects, including providing technical assistance to grantees.

C. Contractor agrees to meet Deliverables as applicable and as outlined in Exhibit A-2: Project Deliverables.

D. Contractor will report progress on Deliverables quarterly and as requested by County/Regional Advisor.

E. Contractor will comply with all monitoring requirements of the grant.

III. COUNTY RESPONSIBILITIES

A. County will act as fiscal agent for NBEC and the RPI grant, including fiscal and quarterly reporting, monitoring, procuring, and subcontracting in compliance with both grant requirements and County requirements.

Exhibit A-1: Regional Planning Implementation Grant Work Plan

Objectives/Activities	Estimated Dates
Quarter 1 - Jan - Mar 2018	
Planning retreat with outside facilitator to develop vision and ground rules for working together as a region	COMPLETE
Develop an MOU based on meeting with facilitator	COMPLETE
Quarter 2 - Apr - Jun 2018	
Resubmit work plan forms to the state	5/15/2018
Develop an RFP for Industry Innovation Fund (IIF)	6/30/2018
Quarter 3 - Jul - Sept 2018	
Issue contracts to each WDB for business engagement infrastructure support	7/15/2018
Issue IIIF RFP and conduct competitive selection process	7/31/2018
Develop scopes of work and issue contracts to successful IIF bidders	8/31/2018
Share information about the Industry Innovation Fund with regional ISP's and help them to develop ideas for making use of the Fund in ways that would advance their goals.	8/31/2018
Provide technical assistance to potential bidders on the requirements of the RFP process	8/31/2018
Work with bidders to ensure success of their respective projects	6/30/2019
Each board will develop metrics to track business engagement, and will share and discuss as a group	6/30/2019
All boards' business engagement teams will reach out to more businesses, responding to their requests for service, establishing/nurturing relationships with key industry partners and promoting ease of service delivery for businesses.	6/30/2019
Based on the Workforce Alliance's Mar 2016 "Layoff Aversion/Business Retention…Guide," Alliance business reps will establish a "Employer Advancement and Retention Network" in each of the four counties - and share results with the region.	6/30/2019
Sonoma will research and purchase software that will lead to high quality labor market data; other WDBs will share info as part of research; Sonoma will share findings back to the group.	6/30/2019
Solano will create a new incumbent worker training program based off of best practices in the region; will share results back to the group.	6/30/2019
Continue to convene and provide administrative support for the established Slingshot ISPs in the region.	6/30/2019
All boards will continue to engage businesses in sector partnerships.	6/30/2019
Continue to champion the Industry Recognized Credentials in Healthcare already created by the Sonoma-Marin Healthcare ISP to educators.	6/30/2019
Sonoma will devote time at every WIB meeting to hear from local industry about the impact of the wildfires on their workforce. WIB staff will be using this time as an ongoing focus group to be poised for impacts on the horizon.	6/30/2019
All boards will participate in numerous venues to connect directly with building and trades employers via business associations, unions, foundations, and other community partners.	6/30/2019

Objectives/Activities	Estimated Dates
Quarter 4 - Oct - Dec 2018	
Work with bidders to ensure success of their respective projects	6/30/2019
Each board will develop metrics to track business engagement, and will share and discuss as a group	6/30/2019
All boards' business engagement teams will reach out to more businesses, responding to their requests for service, establishing/nurturing relationships with key industry partners and promoting ease of service delivery for businesses.	6/30/2019

Quarter 6 - Apr-Jun 2019	
Work with bidders to ensure success of their respective projects	6/30/19
Capture success stories and lessons learned from IIF projects in written document or other media to share with community	6/30/19
Contract activities complete and funds expended (Solano and WANB WDBs)	6/30/2019
Each WDB will have metrics to track business engagement.	6/30/2019
The number of businesses engaged with business services team will increase by 10% per WDB (baseline number locally determined by WDB)	6/30/2019
Kickoff meeting of the Employer Advancement and Retention Network in Marin, Napa, Mendocino, Lake Counties	6/30/2019
Sonoma will have purchased software for labor market data.	6/30/2019
Solano will have launched new incumbent worker training program (using WIOA allocation funds)	6/30/2019
Continue to convene and provide administrative support for the established Slingshot ISPs in the region.	6/30/2019
All boards will continue to engage businesses in sector partnerships.	6/30/2019
Healthcare Industry Recognized Credentials are published and championed by local educators and industry leaders.	6/30/2019
Analysis of discussion and reports from Sonoma WIB meetings. Analysis will form the basis for ongoing strategic planning.	6/30/2019
Increased number of requests from businesses and an increase in the number of job leads for region's job seekers in building and trades.	6/30/2019
Successes, failures, and lessons learned shared with the state	6/30/2019
Successful efforts to be scaled regionally	6/30/2019

Exhibit A-2: Project Deliverables

Strategy/Objective	Activity	Deliverables/Outcomes	Completion Date
Uphold the economic vitality of the region by supporting priority sectors and important business-driven initiatives.	Launch an Industry Innovation Fund with approximately $130,000 to seed innovative projects which will help to foster/grow jobs within priority industry sectors in the North Bay region.	Develop an RFP for the Industry Innovation Fund.	Jun-18
		Conduct a competitive selection process.	Jul-18
		Issue contracts to the selected entities.	Aug-18
		Work with projects to ensure that deliverables are achieved and lessons learned are shared through the greater community.	Jun-19
		Share lessons learned, including successes and failures with State	Jun-19
		Successful efforts scaled regionally	Jun-19
Provide support to each Workforce Development Board's business engagement infrastructure.	Sonoma will execute contracts with WANB and Solano WDBs to support business engagement infrastructure. Funds have been allocated to each board based on the number of businesses in each area. Funds may be used to support staff time for business engagement activities.	Contracts fully executed.	Jul-18
	Each board will develop metrics to track business engagement, and will share and discuss as a group.	Establish ability to measure outreach to and engagement with businesses	Jun-19
	All boards' business engagement teams will reach out to more businesses, responding to their requests for	The number of businesses engaged with business services team will increase by	Jun-19

Exhibit B: Fiscal Provisions/Budget

1. Fiscal Responsibilities

In consideration of the obligations to be performed by Contractor herein, Contractor shall be reimbursed for its actual costs, in accordance with the agreed upon budget included herein by reference. Notwithstanding the foregoing, the total amount to be paid to Contractor under the terms of this Agreement shall in no case exceed the amount stated in Article 2 of this agreement.

1.1. Claiming and Documentation. Contractor shall receive reimbursement for actual costs by submitting a cost report and an invoice by the tenth working day of each month. All costs reported by Contractor in its monthly and final cost reports, shall be supported by appropriate accounting documentation. The documentation shall establish that County is charged a fair and equitable portion of any indirect or shared costs attributable to services performed under this Agreement.

1.1.1. Invoices shall be submitted to:

County of Sonoma Human Services Department
Employment & Training Division
Attn: Cristin Tuider
ctuidor@schsd.org
2227 Capricorn Way, Ste 100
Santa Rosa, CA 95407

1.2. Allowable Costs. No amount or rate negotiated and included in the Contractor's program budget summary or budget backup shall be considered to be an allowable cost in and of itself; such amounts or rates are subject to final approval upon presentation of documentation establishing that actual costs were incurred and are allowable in accordance with Code of Federal Regulations Title 2 CFR Sections 200.420-475.

1.3. No Supplantation. Contractor must not claim reimbursement under this Agreement for expenditures reimbursed or financed by any other federal, state or local government source. No supplantation of program financing by Contractor is contemplated or allowed.

1.4. Financial Records. Contractor understands and accepts its obligation to establish and maintain financial records of all program expenditures.

1.4.1. County and its agents, designees or Auditors shall, during regular business hours, have the right to copy, review or audit all Contractor's accounting records and financial statements which relate to monies received under this Agreement.

1.5. Procurement. No procurement is authorized which is not specifically identified and approved herein. Procurement of all services, supplies, and equipment by purchase, lease or rental shall be performed in conformance with Code of Federal Regulations 2 CFR 200.318-326, General Procurement Standards. For purposes of this Agreement, procurement shall mean purchase, lease or rental of any item with a single value exceeding $5,000.

1.6. Funding Contingency. Notwithstanding anything contained in the Agreement to the contrary, Contractor acknowledges that any payments to be made to it

as provided herein shall be expressly contingent upon the receipt of sufficient funds by County. This contingency is for the express benefit of County and may be waived only by giving express written and executed notice to Contractor.

1.7. Modification of Funding. County reserves the right to modify levels of funding for programs and renegotiate Agreement budgets, if needed, due to increases or decreases in funding from the state. County also reserves the right to request changes in program design in order to accommodate changes made by the state. The County Human Services Director has authority to request and approve program design changes.

2. Advance of Funds and Closeout

2.1. Advance of Funds. Between June 1 and June 10 of each year, Contractor shall request an advance of funds to cover the remaining term of the Agreement. This advance will cover all anticipated expenses for the remaining term of the Agreement, provided that the total payments made hereunder will not exceed the funding amount as set forth in Article 2 of this Agreement. Failure to submit a timely request may result in a loss of funding to Contractor.

2.2. Closeout – Final Cost Report. Within forty-five (45) calendar days after the termination of this Agreement, Contractor shall submit to County a final cost report showing the actual allowable Agreement costs. If the cost report shows that the actual allowable costs for the term of the Agreement exceeded payments, the County will remit the difference to the Contractor provided that the remittance will not cause the total payments made hereunder to exceed the funding amount set forth in Article 2 of this Agreement. Such remittance will be made within thirty (30) days following the submission of Contractor's final cost report. If the cost report shows that the payments exceeded the actual allowable costs for the term of the Agreement, the Contractor shall enclose, with the cost report, funds equal to the difference between payments received and costs incurred.

3. Financial Management Systems

3.1. Generally-Accepted Accounting Principles. Contractor shall maintain a financial management system which ensures control over the use of funds received by Contractor in accordance with generally-accepted accounting principles. Contractor must comply with the provisions for cost allocations contained in Federal Office of Management and Budget 2 CFR Part 200, Subpart E. The inability of Contractor to demonstrate compliance will cause a corresponding reduction in reimbursement.

3.2. Separate Account. All funds under this Agreement are not required to be maintained in a separate account, but funds on deposit shall be accounted for separately in accordance with Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards [2 CFR Part 200].

3.3. Program Income. Program Income is revenue generated by the Contractor from contract-supported activities. If activities of program participants or of staff funded under this Agreement result in any income to Contractor, that income shall be reported to County for directions as to disposition in accordance with instructions received by County from the State of California. In the event Contractor receives any compensatory credits and refunds, such as those resulting from workers' compensation dividend checks and annual insurance reductions, for which County has previously reimbursed

Contractor, then Contractor shall remit such compensatory credits and refunds to County.

3.4. Indirect Cost Rate. Contractor is responsible for having an Agency indirect cost rate plan, when claiming indirect costs under this Agreement.

4. Audits.

4.1. Contractors who receive federal funding which taken together total over $750,000 in a single fiscal year are required to have a single agency audit in accordance with the Federal Office of Management and Budget, 2 CFR Part 200, Subpart F. A copy of this audit must be forwarded to the County by the auditor as soon as it is complete.

4.2. If Contractor expends less than $750,000 in federal awards in the fiscal year it may not charge the cost of an audit to the federal award.

5. Repayment.

5.1. Repayment Responsibility. Contractor is responsible for the repayment of all audit exceptions and disallowances taken by County, state, or federal agencies related to activities conducted by Contractor under this Agreement.

5.2. Unallowable Costs. Where unallowable costs have been claimed and reimbursed, they will be refunded to the program that reimbursed the unallowable cost using a cash refund or offset to a subsequent claim.

6. Funding.

6.1. All or part of this Agreement will be paid with Federal awards.

6.2. Federally awarded funds must be used in accordance with Federal statutes and regulations.

	PROGRAM BUDGET TOTALS:	**$ 107,100**

Exhibit C: Insurance Requirements

With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Contractor from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. **Workers Compensation and Employers Liability Insurance**
   a. Required if Contractor has employees as defined by the Labor Code of the State of California.
   b. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   c. Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   d. Required Evidence of Insurance**:** Certificate of Insurance.

   If Contractor currently has no employees as defined by the Labor Code of the State of California, Contractor agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

2. **General Liability Insurance**
   a. Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   b. Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Contractor maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Contractor.
   c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Contractor is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Contractor has a claim against the insurance or is named as a party in any action involving the County.
   d. **The County of Sonoma, its Officers, Agents and Employees** shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Contractor in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.
f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).
g. The policy shall cover inter-insured suits between the additional insureds and Contractor and include a "separation of insureds" or "severability" clause which treats each insured separately.
h. Required Evidence of Insurance**:**
   i. Copy of the additional insured endorsement or policy language granting additional insured status; and
   ii. Certificate of Insurance.

3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limit may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.
b. Insurance shall cover all owned autos. If Contractor currently owns no autos, Contractor agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.
c. Insurance shall cover hired and non-owned autos.
d. Required Evidence of Insurance**:** Certificate of Insurance.

4. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

5. Documentation

e. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Contractor agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1, 2 or 3 above.
f. The name and address for Additional Insured endorsements and Certificates of Insurance is:

   The County of Sonoma, its Officers, Agents and Employees
   3600 Westwind Boulevard
   Santa Rosa, CA 95403

   or pdf to:

   contracts@schsd.org

g. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.
h. Contractor shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are

reduced; or (3) the deductible or self-insured retention is increased.

i. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

6. Policy Obligations

Contractor's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

7. Material Breach

If Contractor fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Contractor resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Contractor, County may deduct from sums due to Contractor any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

Exhibit D: Assurance of Compliance

ASSURANCE OF COMPLIANCE WITH
NONDISCRIMINATION IN STATE AND FEDERALLY ASSISTED PROGRAMS

Contractor HEREBY AGREES THAT it will comply with Title VI and VII of the Civil Rights Act of 1964 as amended; Section 504 of the Rehabilitation Act of 1973, as amended; the Age Discrimination Act of 1975, as amended; the Food Stamp Act of 1977 as amended, and in particular Section 272.6; Title II of the Americans with Disabilities Act of 1990; California Civil Code, Section 51 et seq., as amended; California Government Code Section 11135-11139.5, as amended; California Government Code Section 12940 (c), (h) (1), (i), and (j); California Government Code, Section 4450; Title 22, California Code of Regulations 98000 – 98413; Title 24 of the California Code of Regulations, Section 3105A(e); the Dymally-Alatorre Bilingual Services Act; Section 1808 of the Removal of Barriers to Inter Ethnic Adoption Act of 1996 (California Government Code Section 7290-7299.8); Sonoma County Ordinance 4291, and other applicable federal, state and local laws, as well as their implementing regulations (including 45 Code of Federal Regulations (CFR) Parts 80, 84, and 91, 7 CFR Part 15, and 28 CFR Parts 35 & 42), by ensuring that employment practices and the administration of public assistance and social services programs are nondiscriminatory, to the effect that no person shall because of ethnic group identification, age, sex, color, disability, medical condition, including AIDS and/or HIV, national origin, race, ancestry, marital status, religion, religious creed or political belief be excluded from participation in or be denied the benefits of, or be otherwise subject to discrimination under any program or activity receiving federal or state financial assistance; and HEREBY GIVES ASSURANCE THAT it will immediately take any measures necessary to effectuate this agreement.

THIS ASSURANCE is given in consideration of and for the purpose of obtaining any and all federal and state assistance; and THE CONTRACTOR HEREBY GIVES ASSURANCE THAT administrative methods/procedures which have the effect of subjecting individuals to discrimination or defeating the objectives of the California Department of Social Services (CDSS) Manual of Policies and Procedures (MPP) Chapter 21, will be prohibited.

BY ACCEPTING THIS ASSURANCE, the contractor agrees to compile data, maintain records and submit reports as required, to permit effective enforcement of the aforementioned laws, rules and regulations and permit authorized CDSS and/or federal government personnel, during normal working hours, to review such records, books and accounts as needed to ascertain compliance. If there are any violations of this assurance, CDSS shall have the right to invoke fiscal sanctions or other legal remedies in accordance with Welfare and Institutions Code Section 10605, or Government Code Section 11135-11139.5, or any other laws, or the issue may be referred to the appropriate federal agency for further compliance action and enforcement of this assurance.

THIS ASSURANCE is binding on the contractor directly or through contract, license, or other provider services, as long as it receives federal or state assistance.

Date	Bruce Wilson, Executive Director

Exhibit E: Additional Federal Requirements

1. Environmental Standards. Contractor shall comply with mandatory state standards and policies related to energy efficiency, which are contained in the state energy conservation plan issued in compliance with the Energy Policy Conservation Act, PL 94-163.

   If Contractor receives more than $100,000 under this Agreement, Contractor shall comply with all applicable federal standards, orders, or requirements issued under Section 306 of the Clean Air Act, Section 508 of the Clean Water Act and Federal Water Pollution Control Act, Environmental Protection Agency Regulations [40 CRF, Part 15 and Executive Order 11738], and Public Contract Code Section 10295.3.

2. Union Organizing. Funds provided under this Agreement shall not be used to assist, promote, or deter union organizing.

3. Conflict of Interest. Contractor shall disclose to County in writing any potential conflict to County per 2 CFR 200.112 and 200.318(c).

4. Grievances and Complaint System. Contractor will establish and maintain a grievance and complaint procedure in compliance with Uniform Guidance 2 CFR Part 200, DOL Exceptions 2 CFR Part 2900, and all applicable Federal regulations and State statues, regulations and policies.

5. Incident Reporting. Contractor shall comply with the provisions of the Workforce Services Directive WSD12-18, regarding Incident Reporting issued on June 12, 2013, by the Employment Development Department of the State of California or any subsequent issuance related to incident reporting. Contractor will notify County of any incidence regarding information and complaints involving criminal fraud, waste, abuse or other criminal activity committed by staff, contractors or program participants within one working day of detection of the incidence. Failure to comply with the provisions of the directive shall be deemed a material breach of this Agreement.

6. Occupational Safety and Health. Contractor will comply with all applicable federal, state, municipal and local standards for health and safety, including all provisions and amendments of the Occupational Safety and Health Act of 1979.

7. Child Support Compliance Act. Contractor agrees to abide by requirements of the California Child Support Compliance Act of Part 5 of Division 9 of the Family Code and that it shall comply with the earnings assignment orders of all employees and is providing the names of all employees to the New Employee Registry maintained by the California Employment Development Department.

8. Healthy Workplaces, Health Family Act. Contractor agrees to abide by the requirements of the Healthy Workplaces, Healthy Family Act of 2014 regarding the provision of paid sick leave to eligible employees.

9. Affordable Care Act. Contractor agrees to abide by the requirements of the Affordable Care Act for eligible employees.

10. Priority Hiring Considerations. If this Agreement includes services in excess of $200,000, the Contractor shall give priority consideration in filling vacancies in positions funded by WIOA to qualified recipients of aid under Welfare and Institutions Section Code 11200 in accordance with California Public Contract Code Section 10353.

11. Salary and Bonus Limitations. In compliance with Public Law 109-234, none of the funds appropriated in Public Law 109-149 or prior Acts under the heading “Employment and Training”, shall be used by a Contractor of such funds to pay the salary and bonuses of an individual, either as direct costs or indirect costs, at a rate in excess of Executive Level II, except as provided under section 101 of Public Law 109-149.
12. Lobby Certification. If Contractor receives more than $100,000 under this Agreement, Contractor shall comply with regulations regarding Lobbying by signing Exhibit E-1, Certification Regarding Lobbying.
13. Debarment Certification. Contractor shall comply with the regulations implementing Executive Order 12549, Debarment and Suspension, Uniform Guidance 2 CFR Part 200, Appendix I by signing Exhibit E-2, Certification Regarding Debarment.
14. Drug Free Workplace. Contractor shall comply with the government-wide requirements for a drug-free workplace codified at 29 CFR Part 98 and as certified by Contractor in Exhibit E-3.
15. As a pass-through entity, the County is required to provide certain information regarding Federal award(s) to Contractor. County will provide required information regarding the Federal Award upon receipt of funding documents from the funding source.

Exhibit E-1: Lobbying Certification

CERTIFICATION REGARDING LOBBYING

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any persons for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, “Disclosure Form to Report Lobbying,” in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants and contracts under grants, loans, and cooperative agreements which exceed $100,000) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Exhibit E-3: Certification Regarding Drug Free Workplace

CERTIFICATION

The undersigned hereby certifies compliance with Government Code Section 8355 in matters relating to providing a drug free workplace. The undersigned will:

1. Publish a statement notifying employees that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees for violations, as required by Government Code Section 8355(a).

2. Establish a Drug-Free Awareness Program as required by Government Code Section 8355(b), to inform employees about all of the following:
   a) The dangers of drug abuse in the workplace;
   b) The person's or organization's policy of maintaining a drug-free workplace;
   c) An available counseling, rehabilitation and employee assistance programs;
   d) Penalties that may be imposed upon employees for drug abuse violations.

3. Provide as required by Government Code Section 8355(c) that every employee who works on the proposed contract.
   a) Will receive a copy of the drug free policy statement, and
   b) Will agree to abide by the terms of the statement as a condition of employment on the contract.

I hereby swear that I am duly authorized legally to bind this organization to the above described certification. I am fully aware that this certification is made under penalty of perjury under the laws of the State of California.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 31
(This Section for use by Clerk of the Board Only.)

To: Board of Supervisors

Board Agenda Date: August 14, 2018

Vote Requirement: Majority

Department or Agency Name(s): Human Services Department

Staff Name and Phone Number:

Paul Dunaway 565-3673
Gary Fontenot 565-5931
Gretchen Melendy 565-4248

Supervisorial District(s):

Title: Approve Human Services Department Contract Renewals with Council on Aging.

Recommended Actions:

Authorize the Director of the Human Services Department to execute the following agreements with the Council on Aging and execute future amendments to adjust for revenue changes:
1. Contract renewal to provide elder advocacy and care coordination for elder victims of crime with funding from the Victims of Crime Act (VOCA) grant in the amount of $154,015.00 for the term of July 1, 2018 to December 31, 2019.
2. Contract renewal for the Age-Friendly Communities Coordinator in the amount of $100,000 for the term of July 1, 2018 through June 30, 2019.

Executive Summary:

Council on Aging Elder Abuse advocacy contract:

In September 2016 the Human Services Department (HSD) was awarded $400,000 to implement the VOCA Elder Abuse (XE) program of the California Governor's Office of Emergency Services (CalOES). The grant period was July 1, 2016 – June 30, 2018. In January 2018 the Human Services Department was granted an extension by CalOES to continue the program through December 31, 2019. Funding will be used to serve older and dependent adult victims of crime. HSD has been contracting with Council on Aging for elder advocacy and care coordination for victims of elder abuse for 5 years.

Age-Friendly Initiative Coordinator

In April 2016 the *Aging Together Initiative Leadership Committee* received approval from the Board of Supervisors to submit an application to the World Health Organization (WHO) for Sonoma County to be accepted into the Age Friendly Communities network initiative. This initiative envisions Sonoma County as a healthy place for all ages to live, work and play, and as a place that supports all people to thrive across their lifespan and achieve their life potential. The Council on Aging was selected through a competitive bid process to provide program coordination services for the grant period ending June 30, 2018.

Discussion:

Council on Aging Elder Abuse advocacy contract:

The Council on Aging (COA) will provide a .50 Elder Advocate and 1.0 FTE Care Coordinator to serve 225 unduplicated older and dependent adults. The elder advocate and care coordinator will provide safety planning, advocacy, case management and victim support groups to elder and dependent adult abuse victims. The contract term is from July 1, 2018 through December 31, 2019.

Age-Friendly Initiative Coordinator:

In April 2016 the *Aging Together Initiative Leadership Committee* received approval from the Board of Supervisors to submit an application to the World Health Organization (WHO) for Sonoma County to be accepted into the Age Friendly Communities network initiative.

The *Aging Together* Initiative serves as a resource for cities in Sonoma County to exchange information and strategies for developing their own applications and fulfilling the World Health Organization's (WHO) Age-Friendly Cities membership requirements. At the conclusion of the project, Sonoma County and the cities will have fully assessed community needs and implemented strategies to assist older adults to age independently and as a part of their local communities. Older adults will be involved in civic engagement addressing issues of housing, transportation, health, learning, employment and community based services that integrate concern for senior independence and support.

On April 5, 2016 the Board of Supervisors supported the continuation of the effort by approving funding to complete the World Health Organization's (WHO) Age-Friendly Communities requirements by approving $50,000 in General Funds through FY 19/20 with the Human Services Department matching the funding with realignment funds of $50,000 to total $100,000 annually. HSD will return to the Board in early 2020 to request funding for FY 20/21, the final year of the Age Friendly Communities Coordinator contract commitment.

The Age-Friendly Coordinator has the responsibility to organize efforts to meet the World Health Organization's Age-Friendly Communities requirements.

To date, under the direction of the Age-Friendly Coordinator, the Age-Friendly Initiative has:

1. Recruited and established a countywide steering committee of older adult volunteers to lead the Age-Friendly Sonoma County effort, per the World Health Organization's (WHO) requirements. The committee includes representatives from Cloverdale, Healdsburg, Monte Rio, Petaluma, Santa Rosa, Sebastopol, Sonoma and Windsor. Volunteers from other cities and unincorporated areas are welcome.
2. Completed a county-wide needs assessment through surveys and focus groups and created an Age-friendly Sonoma County Needs Assessment Report of our community. The results of these activities are now being used to inform the creation of an action plan, with specific steps toward promoting and age-friendly/livable Sonoma County. According to the established timeline the plan is scheduled for completion in spring 2018. Presentations to community groups highlighting the assessment findings are in progress, and the assessment report is available for review.
3. Met with City Managers and Mayors of all of Sonoma County's nine incorporated cities to inform them about Age-Friendly Sonoma County and, for any that are interested, how to apply to the Global Network.
4. Enhanced the Age-Friendly Sonoma County website with information about meetings held with incorporated cities and some of the age-friendly activities and policies they have already enacted.
5. Steering Committee members have reached out in their cities to form local task forces. The most active groups are in Healdsburg, Petaluma and Santa Rosa; The Town of Sonoma task force is forming. These groups are conducting ongoing "Walkability Surveys" that involve small groups walking neighborhoods with an eye toward livable/walkable conditions that promote interaction with neighbors and merchants, and awareness of local activities. In addition, the task forces are identifying local partners to engage in the implementation of the action steps now being developed.

The following charts summarize the contract awarded to the Council on Aging and funding contributions supporting the initiative:

	FY 18-19	FY 19-20
General Fund	$50,000	$50,000
Match Funds	$50,000	$50,000
Total Funds	$100,000	$100,000

Prior Board Actions:

Council on Aging Elder Abuse advocacy contract:

January 24, 2017: Approved HSD to sign and execute an agreement with Senior Advocacy Services for $164,000 to fund an Elder Justice Coordinator for the contract period February 1, 2017 through June 30, 2018 for the Victims of Crime Act (VOCA) under the original grant funding.

Age-Friendly

October 18, 2016: Authorized the Director of Human Services Department to sign and execute an agreement with Council on Aging for $166,667 to fund an Age-Friendly Communities Coordinator for the contract period of November 1, 2016 through June 30, 2018.

April 5, 2016: Accepted an update from the Aging Together Sonoma County initiative; approved submission of an application to join the World Health Organization's Age-Friendly City and Community Network; agreed to provide $10,000 in General Funds for FY 15 – 16 and $50,000 per year for a two-year period effective FY 16-18 to support the initiative. This amount is to be matched by Human Services (HSD).

January 27, 2015: Accepted an update from Aging Together Sonoma County.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Promotes healthy aging within Sonoma County by supporting all people to thrive across the lifespan and achieve their life potential.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	$202,677	$ 151,338	
Additional Appropriation Requested			
Total Expenditures	**$202,677**	**$151,338**	
Funding Sources			
General Fund/WA GF	$50,000	$50,000	
State/Federal	$152,677	$101,338	
Fees/Other			
Use of Fund Balance			
Contingencies			
Total Sources	**$202,667**	**$151,338**	

Narrative Explanation of Fiscal Impacts:

All funds are in the FY18-19 budget.

VOCA

$102,677 is included in the FY18-19 Adopted Budget and the remaining $51,338 will be budgeted in FY19-20.

Age-Friendly

The FY18-19 Adopted Budget includes $100,000 for this contract, financed by $50,000 from General Fund and $50,000 from Realignment funds, consistent with prior board direction. The remaining $100,000 will be budgeted in FY19-20.

AGREEMENT FOR PROVISION OF SERVICES

This agreement ("Agreement"), dated as of July 1, 2018 (“Effective Date”) is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Council on Aging Services for Seniors, a California non-profit Corporation, (hereinafter "Contractor").

RECITALS

WHEREAS, the County’s Human Services Department (HSD) is the recipient of the California Governor’s Office of Emergency Services (CalOES) Elder Abuse (XE) Program’s Victim of Crime Act (VOCA) grant funds to provide a variety of crime victim assistance for elder and dependent adults; and

WHEREAS, Contractor represents that it is duly qualified by reason of training, experience, equipment, organization, staffing, and facilities to provide the services contemplated by this Agreement; and

WHEREAS, in the judgment of the Board of Supervisors and the Human Services Department it is necessary and desirable to employ the services of Contractor for Elder Victim Advocacy and Care Coordination and related services,

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

AGREEMENT

1. Scope of Services.

1.1. Contract Documents. The following documents, if checked, and the provisions set forth therein are attached hereto and incorporated herein, and shall be dutifully performed according to the terms of this agreement:

- ☒ **Exhibit A: Scope of Work**
- ☒ **Exhibit B: Fiscal Provisions/Budget**
- ☒ **Exhibit C: Insurance Requirements**
- ☒ Exhibit D: Assurance of Compliance
- ☒ **Exhibit E: Additional Federal Requirements**
- ☐ Exhibit F: Professional Licensure/Certification
- ☒ **Exhibit G: Media Communications**
- ☐ Exhibit H: Accessibility
- ☐ Exhibit I: Data System Requirements
- ☐ Exhibit J: Adverse Actions / Complaint Procedures

1.2. Contractor's Specified Services. Contractor shall perform the services described in "Exhibit A: Scope of Work" (hereinafter "Exhibit A"), attached hereto and incorporated herein by this reference, and within the times or by the dates provided for in Exhibit A and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit A, the provisions in the body of this Agreement shall control.

1.3. Cooperation With County. Contractor shall cooperate with County and County staff in the performance of all work hereunder.

1.4. Performance Standard. Contractor shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Contractor's profession. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release. If County determines that any of Contractor's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Contractor to meet with County to review the quality of the work and resolve matters of concern; (b) require Contractor to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.5. Assigned Personnel.

1.5.1. Contractor shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Contractor to perform work hereunder, Contractor shall remove such person or persons immediately upon receiving written notice from County.

1.5.2. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Contractor shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of County.

1.5.3. In the event that any of Contractor's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Contractor's control, Contractor shall be responsible for timely provision of adequately qualified replacements.

2. Payment.

For all services and incidental costs required hereunder, Contractor shall be paid on a cost reimbursement basis in accordance with the budget set forth in "Exhibit B: Fiscal Provisions/Budget" (hereinafter "Exhibit B"), attached hereto and incorporated herein by this reference. Contractor shall be paid an amount not to exceed One Hundred Fifty-

Four Thousand Fifteen Dollars ($154,015.00) without the prior written approval of County. Expenses not expressly authorized by the Agreement shall not be reimbursed.

Unless otherwise noted in this agreement, payments shall be made within the normal course of county business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

2.1. Overpayment. If County overpays Contractor for any reason, Contractor agrees to return the amount of such overpayment to County at County's option, permit County to offset the amount of such overpayment against future payments owed to Contractor under this Agreement or any other agreement.

2.2. Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Contractor for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Contractor does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

2.2.1. If Contractor does not qualify, County requires that a completed and signed Form 587 be provided by the Contractor in order for payments to be made. If Contractor is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the contractor agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Contractor has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement.

The term of this Agreement shall be from 07/01/2018 to 12/31/2019 unless terminated earlier in accordance with the provisions of Article 4 below.

4. Termination.

4.1. Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving five (5) days written notice to Contractor.

4.2. Termination for Cause. Notwithstanding any other provision of this Agreement, should Contractor fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Contractor written notice of such termination, stating the reason for termination.

4.3. Change in Funding. Contractor understands and agrees that County shall have the right to terminate this Agreement immediately upon written notice to Contractor in the event that (1) any state or federal agency or other funder reduces, withholds, terminates or funds are not made available for which the County anticipated using to pay Contractor for services provided under this Agreement or (2) County has exhausted all funds legally available for payments due to become due under this Agreement.

4.4. Delivery of Work Product and Final Payment Upon Termination. In the event of termination, Contractor, within 14 days following the date of termination, shall deliver to County all materials and work product subject to Article 9.18 (Ownership and Disclosure of Work Product) and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.5. Payment Upon Termination. Upon termination of this Agreement by County, Contractor shall be entitled to receive as full payment for all services satisfactorily rendered and expenses incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Contractor bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Contractor shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Article 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Contractor.

4.6. Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or the Director of the Human Services Department, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification.

Contractor agrees to accept all responsibility for loss or damage to any person or entity, including County, and to indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Contractor, that arise out of, pertain to, or relate to Contractor's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Contractor agrees to provide a complete defense for any claim or action brought against County based upon a claim relating to such Contractor's or its agents', employees, contractors, subcontractors, or invitees performance or obligations under this Agreement. Contractor's obligations under this Section apply whether or not there is concurrent negligence on County's part, but to the extent required by law, excluding liability due to County's conduct. County shall have the right to select its legal counsel at Contractor's expense, subject to Contractor's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Contractor or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance.

With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in "Exhibit C: Insurance Requirements" (hereinafter "Exhibit C"), which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work.

The execution of this Agreement shall constitute Contractor's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Contractor's performance of this Agreement shall be extended by a number of days equal to the number of days Contractor has been delayed.

8. Extra or Changed Work.

Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes, which do not increase the amount paid under the Agreement, and which do not significantly change the scope of work or significantly lengthen time schedules may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors/Purchasing Agent must authorize all other extra or changed work. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Contractor to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Contractor shall be entitled to no compensation whatsoever for the performance of such work. Contractor further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Contractor.

9.1. Standard of Care. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release.

9.2. Status of Contractor. The parties intend that Contractor, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Contractor is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker’s compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Contractor expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3. Subcontractors. No performance of this Agreement or any portion thereof, may be assigned or subcontracted without the express written consent of the County. Any attempt by the Contractor to assign or subcontract any performance of this Agreement without the express written consent of the County shall be invalid and shall constitute a breach of this Agreement.

9.3.1. In the event the Contractor is allowed to subcontract, the County shall look to the Contractor for results of its subcontracts. The Contractor agrees to be responsible for all the subcontractor's acts and omissions to the same extent as if the subcontractors were employees of the Contractor. No subcontracts shall alter in any way any legal responsibility of the Contractor to the County. Whenever the Contractor is authorized to subcontract or assign, the terms of this Agreement shall prevail over those of any such subcontract or assignment.

9.4. No Suspension or Debarment. Contractor warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Contractor also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration. If the Contractor becomes debarred, Contractor has the obligation to inform the County.

9.5. Taxes. Contractor agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Contractor agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Contractor's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Contractor agrees to furnish County with proof of payment of taxes on these earnings.

9.6. Records Maintenance. Contractor shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Contractor shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6.1. Contractor shall, during normal business hours and as often as any agent of the county, state, or federal government may deem necessary, make available for examination and/or duplication all of its records with respect to all matters covered by this Agreement. Contractor acknowledges that the above-named entities shall have the right to observe, monitor, evaluate, audit, examine, and investigate all activities of Contractor and its subcontractors associated with this Agreement.

9.6.2. In compliance with 29 CFR 95.53 and 45 CFR 74.53: Retention and Access Requirements for Records, Contractor shall retain all records pertinent to this Agreement, including financial, statistical, property, and participant records and supporting documentation for a period of four (4) years from the date of final payment of this Agreement. If, at the end of four years, there is ongoing litigation or an outstanding audit involving those records, Contractor shall retain the records until resolution of the litigation or audit.

9.7. Monitoring, Assessment & Evaluation. Authorized state, federal and/or county representatives shall have the right to monitor, assess, and evaluate Contractor’s performance pursuant to this Agreement. Said monitoring, assessment, and evaluation may include, but is not limited to, audits, inspections of project premises, inspection of food preparation sites as appropriate, interviews of project staff and

participants, and review of all records. Contractor shall cooperate with County in the monitoring, assessment, and evaluation process, which includes making any program or administrative staff (fiscal, etc.) available during any scheduled process.

9.8. Conflict of Interest. Contractor covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Contractor further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Contractor shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Contractor's or such other person's financial interests.

9.9. Statutory Compliance/Living Wage Ordinance. Contractor agrees to comply, and to ensure compliance by its subconsultants or subcontractors, with all applicable federal, state and local laws, regulations, statutes and policies – including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Contractor expressly acknowledges and agrees that this Agreement may be subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.10. Nondiscrimination. Without limiting any other provision hereunder, Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment practices and in delivery of services because of race, color, ancestry, national origin (including limited English proficiency), religious creed, belief or grooming, sex (including sexual orientation, gender identity, gender expression, transgender status, pregnancy, childbirth, medical conditions related to pregnancy, childbirth or breast feeding, sex stereotyping), marital status, age, medical condition, physical or mental disability, genetic information, military or veteran status, or any other legally protected category or prohibited basis, including without limitation, the County's Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.10.1. Contractor understands and agrees that administrative methods and/or procedures which have the effect of subjecting individuals to discrimination or otherwise defeating the objectives of the applicable and aforementioned laws will be prohibited.

9.10.2. Contractor shall provide County with a copy of their Equal Employment Opportunity and Affirmative Action policies upon request and shall sign and submit to County an Assurance of Compliance, attached hereto as "Exhibit D: Assurance of Compliance" (hereinafter "Exhibit D"), and incorporated by this reference, in order to certify that contractor is in compliance with the State and Federal laws related to equal employment opportunity and delivery of services.

9.10.3. Contractor and subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

9.10.4. Any and all subcontracts to perform work under this Agreement shall include the nondiscrimination and compliance provisions of this article and subcontractors shall agree to, sign and submit to Contractor a copy of the Assurance of Compliance, Exhibit D. Contractor shall maintain copies of these Assurances and submit copies to County upon County's request.

9.11. AIDS Discrimination. Contractor agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.12. Confidentiality. Contractor agrees to maintain the confidentiality of all client information in accordance with all applicable state and federal laws and regulations, including the requirement to implement reasonable and appropriate administrative, physical, and technical safeguards to protect all confidential information. Contractor shall be in compliance with all State and Federal regulations pertaining to the privacy and security of personally identifiable information (hereinafter "PII") and/or protected health information (hereinafter "PHI").

9.12.1. Contractor agrees to comply with the provisions of 45 Code of Federal Regulations 205.50, Section 10850 of the Welfare and Institutions Code, and Division 19 of the California Department of Social Services Manual of Policies and Procedures to assure that all records are confidential, and will not be open to examination for any purpose not directly connected with the administration of any public social services program.

9.12.2. Contractor shall protect from unauthorized disclosure, confidential, sensitive and/or personal identifying information, concerning persons receiving services pursuant to this Agreement, except for statistical information not identifying any client. The Contractor shall not use such information for any purpose not directly connected with the administration of the services provided herein. The Contractor shall promptly transmit to the County all requests for disclosure of such information not emanating from the client. The Contractor shall not disclose, except as otherwise specifically permitted by this Agreement or authorized by the client in writing, any such information to anyone other than the County without prior written authorization from the County. "Personal identifying information" shall include, but not be limited to: name, identifying number, social security number, state driver's license or state identification number, financial account numbers, and symbol or other identifying characteristic assigned to the individual, such as finger or voice print or a photograph.

9.12.3. No person will publish, disclose or use or permit or cause to be published, disclosed or used any confidential information pertaining to an applicant, recipient, or client.

9.12.4. Contractor agrees to inform all employees, agents and partners of the provisions and that any person knowingly and intentionally violating the provisions of this Article may be guilty of a misdemeanor.

9.12.5. Contractor understands and agrees that this Article shall survive any termination or expiration of this Agreement in accordance with 9.6 above.

9.13. Information Security. In addition to any other provisions of this Agreement, all parties to this Agreement shall be responsible for ensuring that electronic media containing confidential and sensitive client data is protected from unauthorized access. Contractor agrees that any security incidents or breaches of unsecured PHI, PII or other confidential information will be immediately reported to the County.

9.13.1. Contractor shall ensure that all computer workstations, laptops, tablets, smart-phones and other devices used to store and transmit confidential client data and information are: 1) physically located in areas not freely accessible to or in open view of persons not authorized to have access to confidential data and information, 2) protected by unique secure passwords, and 3) configured to automatically lock or timeout after no more than 30 minutes of inactivity. Contractor shall ensure that users of such computing devices log off or lock their device before leaving it unattended or when done with a session.

9.13.2. Contractor shall encrypt all confidential client data, whether for storage or transmission on portable and non-portable computing and storage devices using non-proprietary, secure, generally-available encryption software. Proprietary encryption algorithms will not be acceptable. Such devices shall include, but not be limited to, desktop, laptop or notebook computers, optical or magnetic drives, flash or jump drives, and wireless devices such as cellular phones and other handheld computing devices with data storage capability.

9.13.3. Contractor shall ensure all electronic transmission of confidential client data sent outside a secure private network or secure electronic device via email, either in the body of the email or in an attachment, or sent by other file transfer methods is sent via an encrypted method.

9.13.4. Contractor shall apply security patches and upgrades in a timely manner, and keep virus software up-to-date on all systems on which County data may be stored or accessed.

9.13.5. Contractor shall 1) perform regular backups of automated files and databases, and 2) destroy or wipe all confidential client data from all electronic storage media and devices in a manner that prevents recovery of any and all confidential client data in accordance with Article 9.6 above.

9.13.6. All information security requirements stated herein shall be enforced and implemented immediately upon execution of this agreement, and continue beyond the term of the Agreement in accordance with Article 9.6. above.

9.14. Political and Sectarian Activities. Contractor warrants as follows: (a) it shall comply with requirements that no program under this Agreement shall involve political or lobbying activities; (b) it shall not employ or assign participants in the program to any sectarian facility, except as provided by federal and state law or regulation; (c) it shall not use funds made available under this Agreement for political or lobbying activities.

9.15. Drug-Free Workplace. Contractor will comply with the requirements of the Drug-Free Workplace Act of 1990 and will provide a drug-free workplace by complying with all requirements set forth in the Act.

9.16. Facilities. Contractor warrants that all of the Contractor's facilities: (a) will be adequately supervised, (b) will be maintained in a safe and sanitary condition, (c) will be available for monitoring by County and/or state and federal monitors, (d) are accessible to handicapped individuals if appropriate, and (e) are nonsectarian.

9.17. Assignment of Rights. Contractor assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Contractor in connection with this Agreement. Contractor agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Contractor's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County. Contractor shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.18. Ownership and Disclosure of Work Product. All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Contractor or Contractor's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of County. County shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Contractor shall promptly deliver to County all such documents, which have not already been provided to County in such form or format, as County deems appropriate. Such documents shall be and will remain the property of County without restriction or limitation. Contractor may retain copies of the above- described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of County.

9.19. Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Contractor.

10. Demand for Assurance.

Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice and Making Payments.

All notices and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail. Notices and payments shall be addressed as follows:

TO COUNTY:	County of Sonoma, Human Services Department 3600 Westwind Boulevard Santa Rosa, CA 95403
TO CONTRACTOR:	Council on Aging Services for Seniors 30 Kawana Springs Road Santa Rosa, CA 95401

When a notice or payment is given by a generally recognized overnight courier service, the notice or payment shall be deemed received on the next business day. When a copy of a notice or payment is sent by facsimile or email, the notice or payment shall be deemed received upon transmission as long as (1) the original copy of the notice or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1. No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2. Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Contractor and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Contractor and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3. Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4. No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5. Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6. Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7. Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9. Counterparts and Electronic Copies. The parties agree that, where applicable, this Agreement may be executed in counterparts, together which when executed by the requisite parties shall be deemed to be a complete original agreement. In the event that any handwritten signature is delivered by facsimile transmission (“Fax”) or by electronic mail (“email”) delivery of a portable document format ("pdf") data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such Fax or pdf signature page were an original thereof. An electronic copy, including Fax copy, email, or scanned copy of the executed Agreement or counterpart, shall be deemed, and shall have the same legal force and effect as, an original document.

13.10. Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

Exhibit A: Scope of Work

1. Program Overview: Contractor's role in the Elder Victims of Crime Program consists of two positions: An Elder Advocate and an Elder Care Coordinator that will bring comprehensive care coordination to older adults age 65 and over and dependent adults age 18 to 64 years old who are victims of crime. Contractor and Legal Aid of Sonoma County are partnering with the Sonoma County Human Services Department (HSD) on this program.

2. Program Requirements: The Contractor's Elder Advocate and Elder Care Coordinator will provide case coordination to older and dependent adult victims of crime through the services indicated below. Contractor will receive referrals through existing hotlines or intake processes from the Legal Aid of Sonoma County's Elder Law Attorney and Legal Assistant, the FJCS, Adult Protective Services (APS), Ombudsman and appropriate community-based organizations for services for older and dependent adult victims of crime. These services will be available in Spanish for monolingual Spanish speakers.

   2.1 The Contractor is responsible for the following program services:

      2.1.1 Building rapport with client and assess client's psychosocial needs.

      2.1.2 Providing trauma-informed, client-centered services.

      2.1.3 Conducting support groups for clients (facilitated or peer).

      2.1.4 Providing crisis intervention and counseling, including 24-hour help/crisis line referrals.

      2.1.5 Implementing, coordinating, monitoring and evaluating a case management care plan that meets the individual's needs and goals.

      2.1.6 Providing clients with referrals to other victim service programs and other services, supports, and resources (includes legal, medical, faith-based organizations, address confidentiality programs, etc.).

      2.1.7 Directly advocating for individuals (e.g., for assistance in applying for public benefits, return of personal property or effects, etc.) to help clients receive needed support and/or services.

      2.1.8 In collaboration with the Elder Law Attorney and Legal Assistant from Legal Aid of Sonoma County, ensure the client receives necessary legal and other assistance by conducting home visits, when necessary, to isolated disabled and elderly individuals in rural and urban areas of Sonoma County.

3. Units of Service Requirements for Contracted Services:

   3.1 The Elder Advocate and the Elder Care Coordinator collectively will provide 2,924 hours of service during the term of this contract.

   3.2 The Elder Advocate and the Elder Care Coordinator collectively will serve 225 unduplicated elder and dependent adults.

4. Service Provider Meeting Requirements:

   4.1 Join and participate in the Sonoma County Elder Justice Coalition meetings to address elder safety and services throughout the county.

   4.2 Attend monthly meetings of the Sonoma County Elder and Dependent Adult Multi-Disciplinary Team meeting (MDT) in Santa Rosa and Petaluma.

   4.3 Participate in monthly contract monitoring meetings with representatives from the Human Services Department, Adult & Aging Services Division.

5. Service Provider Reporting Requirements

   5.1 Submit monthly fiscal reports that include the number of service hours provided by the Elder Advocate and the Elder Care Coordinator.

   5.2 Submit monthly program reports of client metrics that include:

   - The number of unduplicated elder and dependent adults served
   - The number of client referrals to other victim service programs
   - The number of client referrals to other services, supports, and resources (includes legal, medical, faith-based organizations, address confidentiality programs, etc.)
   - The number of support groups conducted for clients (facilitated or peer)
   - The number and type of individual advocacy provided (e.g., assistance in applying for public benefits, return of personal property or effects)

   5.3 Contractor may be required to submit additional reports and attain performance targets as required by the State.

   5.4 Contractor may also be required to directly input data into the U.S. Department of Justice's Office for Victims of Crime Performance Measurement database or provide data to the Human Services Department for State reports.

Exhibit B: Fiscal Provisions/Budget

1. Fiscal Responsibilities. In consideration of the obligations described herein, the Contractor shall be reimbursed under the terms of this Agreement. The Contractor shall be reimbursed for actual costs, in accordance with the agreed upon Budget included herein. The amount of reimbursement shall in no case exceed the funding amount as set forth in Article 2 of this Agreement.

1.1. Claiming and Documentation. Contractor shall receive reimbursement for its actual costs by submitting an invoice for reimbursement by the fifteenth (15th) day of the following month for all services provided to County's clients in the previous month. All costs reported by Contractor shall be supported by appropriate accounting documentation. The documentation shall establish that County is charged a fair and equitable portion of any indirect or shared costs attributable to services performed under this Agreement.

1.2. No Supplantation. Contractor must not claim reimbursement under this Agreement for expenditures reimbursed or financed by any other federal, state or local government source. No supplantation of program financing by Contractor is contemplated or allowed.

1.3. Indirect Cost Rate. Contractor is responsible for providing an approved Indirect Cost Rate in accordance with the Federal Office of Management and Budget, Title 2 CFR Part 200, Subpart E, and in Appendix IV to Part 200 for the Agreement year, when claiming indirect and/or administrative costs under this Agreement.

1.3.1. Contractor must submit an Indirect Cost Rate Proposal to County prior to execution of this Agreement unless Contractor has a current negotiated rate letter with another agency. In such case, Contractor must provide a copy of the negotiated rate letter within the above timeframe.

1.3.2. Indirect and/or administrative costs intended to be claimed under this Agreement will not be reimbursed without the provision of Contractor’s cost allocation plan for the Agreement year.

1.3.3. If Contractor does not have an approved indirect cost rate, Contractor must use a de minimis rate of 10% based on the Modified Total Direct Costs (MTDC) as defined in 2 CFR 200.68.

1.4. Financial Records. Contractor understands and accepts its obligation to establish and maintain financial records of all program expenditures.

1.4.1. Contractor shall make available for inspection and audit to representatives of county, federal, and/or state governments all books, financial records, program information, and other records pertaining to the overall operation of Contractor and this Agreement, and shall allow said representatives to review and inspect its facilities and program operation of this Agreement to assure compliance with all applicable local, state, and/or federal regulations. Contractor shall maintain the accounting records in conformity with generally accepted accounting principles and as directed by the Sonoma County Auditor-Controller.

1.4.2. If it should be determined during the term of this Agreement by the Area Agency on Aging (AAA), County Administrator, Auditor-Controller, and/or Board of Supervisors that funds are not being utilized by Contractor in accordance with this

Agreement, an audit may be ordered of Contractor's books, financial records, and program records. The cost of this audit shall be deducted from the total paid to Contractor through this Agreement.

1.4.3. Contractor shall maintain and preserve all records in its possession until they are released following audit of the AAA by state and/or federal representatives.

1.4.4. In the event that Contractor terminates its business activities, all records related to this Agreement shall be promptly delivered to County by Contractor. Contractor shall be liable for any and all attorneys' fees incurred by County in recovering records pursuant to this section.

1.5. Procurement. No procurement is authorized which is not specifically identified and approved herein. For purposes of this Agreement, procurement shall mean purchase, lease or rental.

1.6. Funding Contingency. Notwithstanding anything contained in the Agreement to the contrary, Contractor acknowledges that any payments to be made to it as provided herein shall be expressly contingent upon the receipt of sufficient funds by County.

2. Budget Adjustments.

2.1. Approval. County Human Services Director is authorized to approve and execute the transfer of funds between line items set forth in the Budget, and to approve such changes so long as they do not result in an increase in County's maximum financial obligation.

2.2. Adjustments Requiring Written Consent. County's written approval is required prior to the transfer of any program funds between Budget line items when the amount of the individual line item adjustment is more than the greater of $2,500 or 15% of funds budgeted per line item.

3. Audits. Contractor must have a fiscal monitoring biannually. The type of monitoring will depend upon the funding level of Contractor. In addition, contractors who receive multiple Federal Awards which taken together total over Seven Hundred Fifty Thousand Dollars ($750,000) are required to have a single agency audit in accordance with the Federal Office of Management and Budget, 2 CFR Part 200, Subpart F. A copy of this audit must be forwarded to the Area Agency on Aging by the auditor as soon as it is complete.

3.1. The contractor shall ensure that State-Funded expenditures are displayed discretely along with the related federal expenditures in the single audit report's "Schedule of Expenditures of Federal Awards" under the appropriate Catalog of Federal Domestic Assistance (CFDA) number.

3.2. For state contracts that do not have CFDA numbers, the Contractor shall ensure that the State-funded expenditures are discreetly identified in the Schedule of Expenditures of Federal Awards (SEFA) by the appropriate program name, identifying grant/contract number, and as passed through the AAA.

4. Repayment. Contractor is responsible for the repayment of all audit exceptions and disallowances taken by County, state, or federal agencies related to activities conducted by Contractor under this Agreement.

5. Local Non-Federal Match. Most programs require that Contractor provide local, non-federal funds as program match. In most cases the match can be either cash or in-kind. The amount of the match requirement depends upon the specific program.

6. Payment. All or part of this Agreement will be paid with Federal awards. As a pass-through entity, the County is required to provide certain information regarding Federal award(s) to Contractor as a sub recipient. In signing this Agreement, Contractor acknowledges receipt of the following information regarding Federal award(s) that will be used to pay this Agreement:

Program Title: Crime Victim Assistance
CFDA Number: 16.575
Federal Agency: Office for Victims of Crime

7. Budget. As compensation for services as defined in Exhibit A of this Agreement, funding shall be allocated according to the following:

Description	Cost
Care Coordinator	$81,260
Elder Advocate	$29,950
Program Director	$10,000
Mileage	$7,000
Equipment	$1,500
Training/Travel	$8,000
IT Support/Security	$5,000
Communications/phone	$1,500
Membership dues	$1,000
Program/Office supplies	$7,500
Printing	$1,305
Total Budget	**$154,015**

Exhibit C: Insurance Requirements

With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Contractor from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1 Workers Compensation and Employers Liability Insurance

- **a.** Required if Contractor has employees.
- **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
- **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
- **d.** *Required Evidence of Insurance*: Certificate of Insurance.

If Contractor currently has no employees, Contractor agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should any employees be engaged during the term of this Agreement or any extensions of the term.

2 General Liability Insurance

- **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
- **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Contractor maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Contractor.
- **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Contractor is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Contractor has a claim against the insurance or is named as a party in any action involving the County.
- **d.** **The County of Sonoma, its Officers, Agents and Employees** shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Contractor in the performance of this agreement.
- **e.** The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between County and Contractor and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. *Required Evidence of Insurance*:

i. Copy of the additional insured endorsement or policy language granting additional insured status; and

ii. Certificate of Insurance.

3 Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limits may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Contractor currently owns no autos, Contractor agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

4 Professional Liability/Errors and Omissions Insurance

a. Minimum Limit: $1,000,000 per claim or per occurrence.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County.

c. If Contractor's services include: (1) programming, customization, or maintenance of software; or (2) access to individuals' private, personally identifiable information, the insurance shall cover:

i. Breach of privacy; breach of data; programming errors, failure of work to meet contracted standards, and unauthorized access; and

ii. Claims against Contractor arising from the negligence of Contractor, Contractor's employees and Contractor's subcontractors.

d. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

e. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.

f. *Required Evidence of Insurance*: Certificate of Insurance specifying the limits and the claims-made retroactive date.

5 Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

6 Documentation

a. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Contractor agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1 – 4 above.

b. The name and address for Additional Insured endorsements and Certificates of Insurance is:

The County of Sonoma, its Officers, Agents and Employees
Contracts Unit
3600 Westwind Boulevard
Santa Rosa, CA 95403

Or pdf to: contracts@schsd.org

c. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

d. Contractor shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

e. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

7 Policy Obligations

Contractor's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

8 Material Breach

If Contractor fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Contractor resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Contractor, County may deduct from sums due to Contractor any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

ASSURANCE OF COMPLIANCE WITH NONDISCRIMINATION IN STATE AND FEDERALLY ASSISTED PROGRAMS

Contractor HEREBY AGREES THAT it will comply with Title VI and VII of the Civil Rights Act of 1964 as amended; Section 504 of the Rehabilitation Act of 1973, as amended; the Age Discrimination Act of 1975, as amended; the Food Stamp Act of 1977 as amended, and in particular Section 272.6; Title II of the Americans with Disabilities Act of 1990; California Civil Code, Section 51 et seq., as amended; California Government Code Section 11135-11139.5, as amended; California Government Code Section 12940 (c), (h) (1), (i), and (j); California Government Code, Section 4450; Title 22, California Code of Regulations 98000 – 98413; Title 24 of the California Code of Regulations, Section 3105A(e); the Dymally-Alatorre Bilingual Services Act; Section 1808 of the Removal of Barriers to Inter Ethnic Adoption Act of 1996 (California Government Code Section 7290-7299.8); Sonoma County Ordinance 4291, and other applicable federal, state and local laws, as well as their implementing regulations (including 45 Code of Federal Regulations (CFR) Parts 80, 84, and 91, 7 CFR Part 15, and 28 CFR Parts 35 & 42), by ensuring that employment practices and the administration of public assistance and social services programs are nondiscriminatory, to the effect that no person shall because of ethnic group identification, age, sex, color, disability, medical condition, including AIDS and/or HIV, national origin, race, ancestry, marital status, religion, religious creed or political belief be excluded from participation in or be denied the benefits of, or be otherwise subject to discrimination under any program or activity receiving federal or state financial assistance; and HEREBY GIVES ASSURANCE THAT it will immediately take any measures necessary to effectuate this agreement.

THIS ASSURANCE is given in consideration of and for the purpose of obtaining any and all federal and state assistance; and THE CONTRACTOR HEREBY GIVES ASSURANCE THAT administrative methods/procedures which have the effect of subjecting individuals to discrimination or defeating the objectives of the California Department Aging, will be prohibited.

BY ACCEPTING THIS ASSURANCE, the contractor agrees to compile data, maintain records and submit reports as required, to permit effective enforcement of the aforementioned laws, rules and regulations and permit authorized State and/or federal government personnel, during normal working hours, to review such records, books and accounts as needed to ascertain compliance. If there are any violations of this assurance, State shall have the right to invoke fiscal sanctions or other legal remedies in accordance with Welfare and Institutions Code Section 10605, or Government Code Section 11135-11139.5, or any other laws, or the issue may be referred to the appropriate federal agency for further compliance action and enforcement of this assurance.

THIS ASSURANCE is binding on the contractor directly or through contract, license, or other provider services, as long as it receives federal or state assistance.

Exhibit E: Additional Federal Requirements

County has determined that for the services provided under this Agreement, Contractor has been designated as Sub-recipient of Federal funds and as such, shall adhere to the following additional requirements.

1. Environmental Standards. Contractor shall comply with mandatory state standards and policies related to energy efficiency, which are contained in the state energy conservation plan issued in compliance with the Energy Policy Conservation Act, PL 94-163.

   If Contractor receives more than $100,000 under this Agreement, Contractor shall comply with all applicable federal standards, orders, or requirements issued under Section 306 of the Clean Air Act, Section 508 of the Clean Water Act and Federal Water Pollution Control Act, Environmental Protection Agency Regulations [40 CRF, Part 15 and Executive Order 11738], and Public Contract Code Section 10295.3.

2. Union Organizing. Funds provided under this Agreement shall not be used to assist, promote, or deter union organizing.

3. Conflict of Interest. Contractor shall disclose to County in writing any potential conflict to County per 2 CFR 200.112 and 200.318(c).

4. Grievances and Complaint System. Contractor will establish and maintain a grievance and complaint procedure in compliance with Uniform Guidance 2 CFR Part 200 and all applicable Federal regulations and State statues, regulations and policies.

5. Lobby Certification. If Contractor receives more than $100,000 under this Agreement, Contractor shall comply with regulations regarding Lobbying by signing Exhibit E-1, Certification Regarding Lobbying.

6. Debarment Certification. Contractor shall comply with the regulations implementing Executive Order 12549, Debarment and Suspension, Uniform Guidance 2 CFR Part 200, Appendix I by signing Exhibit E-2, Certification Regarding Debarment.

7. Drug Free Workplace. Contractor shall comply with the government-wide requirements for a drug-free workplace codified at 29 CFR Part 98 and as certified by Contractor in Exhibit E-3.

Exhibit E-1: Lobbying Certification

CERTIFICATION REGARDING LOBBYING

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any persons for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants and contracts under grants, loans, and cooperative agreements which exceed $100,000) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Exhibit E-3: Certification Regarding Drug Free Workplace

CERTIFICATION

The undersigned hereby certifies compliance with Government Code Section 8355 in matters relating to providing a drug free workplace. The undersigned will:

1. Publish a statement notifying employees that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees for violations, as required by Government Code Section 8355(a).

2. Establish a Drug-Free Awareness Program as required by Government Code Section 8355(b), to inform employees about all of the following:
   a) The dangers of drug abuse in the workplace;
   b) The person's or organization's policy of maintaining a drug-free workplace;
   c) An available counseling, rehabilitation and employee assistance programs;
   d) Penalties that may be imposed upon employees for drug abuse violations.

3. Provide as required by Government Code Section 8355(c) that every employee who works on the proposed contract.
   a) Will receive a copy of the drug free policy statement, and
   b) Will agree to abide by the terms of the statement as a condition of employment on the contract.

I hereby swear that I am duly authorized legally to bind this organization to the above described certification. I am fully aware that this certification is made under penalty of perjury under the laws of the State of California.

Exhibit G: Media Communications

If Contractor provides media communications to the public, including but not limited to flyers, press releases, web or social media posts, public service announcements, or interviews, about any program activities or projects funded under this Agreement, Contractor shall give credit to County as the program's funding source. County reserves the right to review and approve media communications, prior to release. In providing any media coverage referenced above, Contractor shall comply with all confidentiality requirements in Article 9.12.

COUNCIL ON AGING SERVICES FOR SENIORS
Agreement to Provide
AGE-FRIENDLY COORDINATOR SERVICES
Funding Amount: **$100,000**
Term: **7/01/18 to 6/30/2019**
Agreement Number: AA-COA-AFCS-1819
Funding Source: County of Sonoma Funds

AGREEMENT FOR PROVISION OF SERVICES

This Agreement (hereinafter "Agreement"), dated as of July 1, 2018 (hereinafter "Effective Date") is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Council on Aging Services for Seniors, a California non-profit Corporation (hereinafter "Contractor").

RECITALS

WHEREAS, Contractor represents that it is a duly qualified senior service provider, experienced in age-friendly coordination and related services; and

WHEREAS, in the judgment of the Board of Supervisors and the Director of Human Services, it is necessary and desirable to employ the services of Contractor for Age-Friendly Coordinator Services,

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

AGREEMENT

1. Scope of Services.

1.1. Contract Documents. The following documents, if checked, and the provisions set forth therein are attached hereto and incorporated herein, and shall be dutifully performed according to the terms of this agreement:

- ☒ **Exhibit A: Scope of Work**
- ☒ **Exhibit B: Fiscal Provisions/Budget**
- ☒ **Exhibit C: Insurance Requirements**
- ☐ Exhibit D: Assurance of Compliance
- ☐ Exhibit E: Additional Federal Requirements
- ☐ Exhibit F: Professional Licensure/Certification
- ☒ **Exhibit G: Media Communications**
- ☐ Exhibit H: Accessibility
- ☐ Exhibit I: Data System Requirements
- ☐ Exhibit J: Adverse Actions / Complaint Procedures

1.2. Contractor's Specified Services. Contractor shall perform the services described in “Exhibit A: Scope of Work” (hereinafter "Exhibit A"), attached hereto and incorporated herein by this reference, and within the times or by the dates provided for in Exhibit A and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit A, the provisions in the body of this Agreement shall control.

1.3. Cooperation With County. Contractor shall cooperate with County and County staff in the performance of all work hereunder.

1.4. Performance Standard. Contractor shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Contractor's profession. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor’s work by County shall not operate as a waiver or release. If County determines that any of Contractor's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Contractor to meet with County to review the quality of the work and resolve matters of concern; (b) require Contractor to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.5. Assigned Personnel.

1.5.1. Contractor shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Contractor to perform work hereunder, Contractor shall remove such person or persons immediately upon receiving written notice from County.

1.5.2. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Contractor shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of County.

1.5.3. In the event that any of Contractor’s personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Contractor’s control, Contractor shall be responsible for timely provision of adequately qualified replacements.

2. Payment.

For all services and incidental costs required hereunder, Contractor shall be paid on a cost reimbursement basis in accordance with the budget set forth in “Exhibit B: Fiscal Provisions/Budget” (hereinafter “Exhibit B”), attached hereto and incorporated herein by this reference. Contractor shall be paid an amount not to exceed One Hundred

Thousand Dollars ($100,000), without the prior written approval of County. Expenses not expressly authorized by the Agreement shall not be reimbursed.

Unless otherwise noted in this agreement, payments shall be made within the normal course of county business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

2.1. Overpayment. If County overpays Contractor for any reason, Contractor agrees to return the amount of such overpayment to County at County's option, permit County to offset the amount of such overpayment against future payments owed to Contractor under this Agreement or any other agreement.

2.2. Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Contractor for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Contractor does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

2.2.1. If Contractor does not qualify, County requires that a completed and signed Form 587 be provided by the Contractor in order for payments to be made. If Contractor is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the contractor agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Contractor has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement.

The term of this Agreement shall be from 07/01/2018 to 6/30/2019 unless terminated earlier in accordance with the provisions of Article 4 below.

4. Termination.

4.1. Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving five (5) days written notice to Contractor.

4.2. Termination for Cause. Notwithstanding any other provision of this Agreement, should Contractor fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Contractor written notice of such termination, stating the reason for termination.

4.3. Change in Funding. Contractor understands and agrees that County shall have the right to terminate this Agreement immediately upon written notice to Contractor in the event that (1) any state or federal agency or other funder reduces, withholds, terminates or funds are not made available for which the County anticipated using to pay Contractor for services provided under this Agreement or (2) County has exhausted all funds legally available for payments due to become due under this Agreement.

4.4. Delivery of Work Product and Final Payment Upon Termination. In the event of termination, Contractor, within 14 days following the date of termination, shall deliver to County all materials and work product subject to Article 9.18 (Ownership and Disclosure of Work Product) and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.5. Payment Upon Termination. Upon termination of this Agreement by County, Contractor shall be entitled to receive as full payment for all services satisfactorily rendered and expenses incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Contractor bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Contractor shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Article 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Contractor.

4.6. Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or the Director of the Human Services Department, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification.

Contractor agrees to accept all responsibility for loss or damage to any person or entity, including County, and to indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Contractor, that arise out of, pertain to, or relate to Contractor's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Contractor agrees to provide a complete defense for any claim or action brought against County based upon a claim relating to such Contractor's or its agents', employees, contractors, subcontractors, or invitees performance or obligations under this Agreement. Contractor's obligations under this Section apply whether or not there is concurrent negligence on County's part, but to the extent required by law, excluding liability due to County's conduct. County shall have the right to select its legal counsel at Contractor's expense, subject to Contractor's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Contractor or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance.

With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in "Exhibit C: Insurance Requirements" (hereinafter "Exhibit C"), which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work.

The execution of this Agreement shall constitute Contractor's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Contractor's performance of this Agreement shall be extended by a number of days equal to the number of days Contractor has been delayed.

8. Extra or Changed Work.

Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes, which do not increase the amount paid under the Agreement, and which do not significantly change the scope of work or significantly lengthen time schedules may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors/Purchasing Agent must authorize all other extra or changed work. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Contractor to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Contractor shall be entitled to no compensation whatsoever for the performance of such work. Contractor further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Contractor.

9.1. Standard of Care. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release.

9.2. Status of Contractor. The parties intend that Contractor, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Contractor is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker’s compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Contractor expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3. Subcontractors. No performance of this Agreement or any portion thereof, may be assigned or subcontracted without the express written consent of the County. Any attempt by the Contractor to assign or subcontract any performance of this Agreement without the express written consent of the County shall be invalid and shall constitute a breach of this Agreement.

9.3.1. In the event the Contractor is allowed to subcontract, the County shall look to the Contractor for results of its subcontracts. The Contractor agrees to be responsible for all the subcontractor's acts and omissions to the same extent as if the subcontractors were employees of the Contractor. No subcontracts shall alter in any way any legal responsibility of the Contractor to the County. Whenever the Contractor is authorized to subcontract or assign, the terms of this Agreement shall prevail over those of any such subcontract or assignment.

9.4. No Suspension or Debarment. Contractor warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Contractor also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or Non-procurement Programs issued by the General Services Administration. If the Contractor becomes debarred, Contractor has the obligation to inform the County.

9.5. Taxes. Contractor agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Contractor agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Contractor's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Contractor agrees to furnish County with proof of payment of taxes on these earnings.

9.6. Records Maintenance. Contractor shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Contractor shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6.1. Contractor shall, during normal business hours and as often as any agent of the county, state, or federal government may deem necessary, make available for examination and/or duplication all of its records with respect to all matters covered by this Agreement. Contractor acknowledges that the above-named entities shall have the right to observe, monitor, evaluate, audit, examine, and investigate all activities of Contractor and its subcontractors associated with this Agreement.

9.6.2. In compliance with 29 CFR 95.53 and 45 CFR 74.53: Retention and Access Requirements for Records, Contractor shall retain all records pertinent to this Agreement, including financial, statistical, property, and participant records and supporting documentation for a period of four (4) years from the date of final payment of this Agreement. If, at the end of four years, there is ongoing litigation or an outstanding audit involving those records, Contractor shall retain the records until resolution of the litigation or audit.

9.7. Monitoring, Assessment & Evaluation. Authorized state, federal and/or county representatives shall have the right to monitor, assess, and evaluate Contractor’s performance pursuant to this Agreement. Said monitoring, assessment, and evaluation may include, but is not limited to, audits, inspections of project premises, inspection of food preparation sites as appropriate, interviews of project staff and

participants, and review of all records. Contractor shall cooperate with County in the monitoring, assessment, and evaluation process, which includes making any program or administrative staff (fiscal, etc.) available during any scheduled process.

9.8. Conflict of Interest. Contractor covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Contractor further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Contractor shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Contractor's or such other person's financial interests.

9.9. Statutory Compliance/Living Wage Ordinance. Contractor agrees to comply, and to ensure compliance by its subconsultants or subcontractors, with all applicable federal, state and local laws, regulations, statutes and policies – including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Contractor expressly acknowledges and agrees that this Agreement may be subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.10. Nondiscrimination. Without limiting any other provision hereunder, Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment practices and in delivery of services because of race, color, ancestry, national origin (including limited English proficiency), religious creed, belief or grooming, sex (including sexual orientation, gender identity, gender expression, transgender status, pregnancy, childbirth, medical conditions related to pregnancy, childbirth or breast feeding, sex stereotyping), marital status, age, medical condition, physical or mental disability, genetic information, military or veteran status, or any other legally protected category or prohibited basis, including without limitation, the County’s Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.10.1. Contractor understands and agrees that administrative methods and/or procedures which have the effect of subjecting individuals to discrimination or otherwise defeating the objectives of the applicable and aforementioned laws will be prohibited.

9.10.2. Contractor shall provide County with a copy of their Equal Employment Opportunity and Affirmative Action policies upon request.

9.10.3. Contractor and subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

9.10.4. Any and all subcontracts to perform work under this Agreement shall include the nondiscrimination and compliance provisions of this article.

9.11. AIDS Discrimination. Contractor agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.12. Confidentiality. Contractor agrees to maintain the confidentiality of all client information in accordance with all applicable state and federal laws and regulations, including the requirement to implement reasonable and appropriate administrative, physical, and technical safeguards to protect all confidential information. Contractor shall be in compliance with all State and Federal regulations pertaining to the privacy and security of personally identifiable information (hereinafter "PII") and/or protected health information (hereinafter "PHI").

9.12.1. Contractor agrees to comply with the provisions of 45 Code of Federal Regulations 205.50, Section 10850 of the Welfare and Institutions Code, and Division 19 of the California Department of Social Services Manual of Policies and Procedures to assure that all records are confidential, and will not be open to examination for any purpose not directly connected with the administration of any public social services program.

9.12.2. Contractor shall protect from unauthorized disclosure, confidential, sensitive and/or personal identifying information, concerning persons receiving services pursuant to this Agreement, except for statistical information not identifying any client. The Contractor shall not use such information for any purpose not directly connected with the administration of the services provided herein. The Contractor shall promptly transmit to the County all requests for disclosure of such information not emanating from the client. The Contractor shall not disclose, except as otherwise specifically permitted by this Agreement or authorized by the client in writing, any such information to anyone other than the County without prior written authorization from the County. “Personal identifying information” shall include, but not be limited to: name, identifying number, social security number, state driver’s license or state identification number, financial account numbers, and symbol or other identifying characteristic assigned to the individual, such as finger or voice print or a photograph.

9.12.3. No person will publish, disclose or use or permit or cause to be published, disclosed or used any confidential information pertaining to an applicant, recipient, or client.

9.12.4. Contractor agrees to inform all employees, agents and partners of the provisions and that any person knowingly and intentionally violating the provisions of this Article may be guilty of a misdemeanor.

9.12.5. Contractor understands and agrees that this Article shall survive any termination or expiration of this Agreement in accordance with 9.6 above.

9.13. Information Security. In addition to any other provisions of this Agreement, all parties to this Agreement shall be responsible for ensuring that electronic media containing confidential and sensitive client data is protected from unauthorized access. Contractor agrees that any security incidents or breaches of unsecured PHI, PII or other confidential information will be immediately reported to the County.

9.13.1. Contractor shall ensure that all computer workstations, laptops, tablets, smart-phones and other devices used to store and transmit confidential client

data and information are: 1) physically located in areas not freely accessible to or in open view of persons not authorized to have access to confidential data and information, 2) protected by unique secure passwords, and 3) configured to automatically lock or timeout after no more than 30 minutes of inactivity. Contractor shall ensure that users of such computing devices log off or lock their device before leaving it unattended or when done with a session.

9.13.2. Contractor shall encrypt all confidential client data, whether for storage or transmission on portable and non-portable computing and storage devices using non-proprietary, secure, generally-available encryption software. Proprietary encryption algorithms will not be acceptable. Such devices shall include, but not be limited to, desktop, laptop or notebook computers, optical or magnetic drives, flash or jump drives, and wireless devices such as cellular phones and other handheld computing devices with data storage capability.

9.13.3. Contractor shall ensure all electronic transmission of confidential client data sent outside a secure private network or secure electronic device via email, either in the body of the email or in an attachment, or sent by other file transfer methods is sent via an encrypted method.

9.13.4. Contractor shall apply security patches and upgrades in a timely manner, and keep virus software up-to-date on all systems on which County data may be stored or accessed.

9.13.5. Contractor shall 1) perform regular backups of automated files and databases, and 2) destroy or wipe all confidential client data from all electronic storage media and devices in a manner that prevents recovery of any and all confidential client data in accordance with Article 9.6 above.

9.13.6. All information security requirements stated herein shall be enforced and implemented immediately upon execution of this agreement, and continue beyond the term of the Agreement in accordance with Article 9.6. above.

9.14. Political and Sectarian Activities. Contractor warrants as follows: (a) it shall comply with requirements that no program under this Agreement shall involve political or lobbying activities; (b) it shall not employ or assign participants in the program to any sectarian facility, except as provided by federal and state law or regulation; (c) it shall not use funds made available under this Agreement for political or lobbying activities.

9.15. Drug-Free Workplace. Contractor will comply with the requirements of the Drug-Free Workplace Act of 1990 and will provide a drug-free workplace by complying with all requirements set forth in the Act.

9.16. Facilities. Contractor warrants that all of the Contractor’s facilities: (a) will be adequately supervised, (b) will be maintained in a safe and sanitary condition, (c) will be available for monitoring by County and/or state and federal monitors, (d) are accessible to handicapped individuals if appropriate, and (e) are nonsectarian.

9.17. Assignment of Rights. Contractor assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Contractor in connection with this Agreement. Contractor agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Contractor's responsibilities

under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County. Contractor shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.18. Ownership and Disclosure of Work Product. All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Contractor or Contractor's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of County. County shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Contractor shall promptly deliver to County all such documents, which have not already been provided to County in such form or format, as County deems appropriate. Such documents shall be and will remain the property of County without restriction or limitation. Contractor may retain copies of the above- described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of County.

9.19. Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Contractor.

10. Demand for Assurance.

Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice and Making Payments.

All notices and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail. Notices and payments shall be addressed as follows:

TO COUNTY: County of Sonoma, Human Services Department

3600 Westwind Boulevard
Santa Rosa, CA 95403

TO CONTRACTOR: Council on Aging Services for Seniors
30 Kawana Springs Road
Santa Rosa, CA 95401

When a notice or payment is given by a generally recognized overnight courier service, the notice or payment shall be deemed received on the next business day. When a copy of a notice or payment is sent by facsimile or email, the notice or payment shall be deemed received upon transmission as long as (1) the original copy of the notice or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1. No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2. Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Contractor and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Contractor and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3. Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4. No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5. Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6. Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7. Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9. Counterparts and Electronic Copies. The parties agree that, where applicable, this Agreement may be executed in counterparts, together which when executed by the requisite parties shall be deemed to be a complete original agreement. In the event that any handwritten signature is delivered by facsimile transmission (“Fax”) or by electronic mail (“email”) delivery of a portable document format ("pdf") data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such Fax or pdf signature page were an original thereof. An electronic copy, including Fax copy, email, or scanned copy of the executed Agreement or counterpart, shall be deemed, and shall have the same legal force and effect as, an original document.

13.10. Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

Exhibit A: Scope of Work

1. Program Overview:

   In April 2016, the Sonoma County Aging Together Leadership Committee received approval from the Sonoma County Board of Supervisors to pursue membership in the World Health Organization's (WHO's) Network of Age-Friendly Cities and Communities. Membership designates Sonoma County as a WHO Age-Friendly Community and demonstrates the County's commitment to making Sonoma County a "livable community" for older adults. Having Age-Friendly designation supports efforts to strengthen systems, structures, and planning to improve the quality of life for people across their lifespan.

2. Contractor Responsibilities: Under this Agreement, Contractor will:

   2.1. Complete and submit the Sonoma County Age-Friendly Action Plan to Sonoma County's Human Services, Adult & Aging Division (HSD), AARP, and the WHO's Global Network for Age-Friendly Cities and Communities by August 15, 2018.

   2.2. Make presentations to groups and organizations to share Age-Friendly information and resources, establish collaborative relationships, identify additional community assets, and connect with Age-Friendly advocates and volunteers.

   2.3. Provide Age-Friendly Action Plan progress reports at the monthly Aging Together Leadership Committee meetings.

   2.4. Attend monthly progress report meetings with Adult & Aging Division Director and Adult & Aging support staff.

   2.5. Provide quarterly written progress reports to HSD by the fifteenth of each month following the quarter month end; October, January, April, and July. Reports are to include (at minimum): City-Based Taskforce stage progression, presentations made and to what group(s), Age-Friendly Coordinator activities and progress outlined by each of the Age-Friendly Action Plan priorities of Isolation, Housing, and Transportation.

   2.6. Convene and staff quarterly Age-Friendly Steering Committee meetings to ensure progress and completion of activities stated in the Action Plan.

   2.7. Support City-Based Taskforces, assisting with each group's varying level of stage development.

   2.8. Create outreach materials reflecting the Age-Friendly Action Plan priorities of Isolation, Housing, and Transportation.

   2.9. Update/maintain the Age-Friendly website.

Exhibit B: Fiscal Provisions/Budget

1. Fiscal Responsibilities. In consideration of the obligations described herein, the Contractor shall be reimbursed under the terms of this Agreement. The Contractor shall be reimbursed for actual costs, in accordance with the agreed upon budget included herein by reference. The amount of reimbursement shall in no case exceed the funding amount as set forth in Article 2 of this Agreement.

1.1. Claiming and Documentation. Contractor shall receive reimbursement for its actual costs by submitting an invoice and expenditure report. All costs reported by Contractor shall be supported by appropriate accounting documentation. The documentation shall establish that County is charged a fair and equitable portion of any indirect or shared costs attributable to services performed under this Agreement.

1.2. No Supplantation. Contractor must not claim reimbursement under this Agreement for expenditures reimbursed or financed by any other federal, state or local government source. No supplantation of program financing by Contractor is contemplated or allowed.

1.3. Financial Records. Contractor understands and accepts its obligation to establish and maintain financial records of all program expenditures.

1.3.1. Contractor shall make available for inspection and audit to representatives of county, federal, and/or state governments all books, financial records, program information, and other records pertaining to the overall operation of Contractor and this Agreement, and shall allow said representatives to review and inspect its facilities and program operation of this Agreement to assure compliance with all applicable local, state, and/or federal regulations. Contractor shall maintain the accounting records in conformity with generally accepted accounting principles and as directed by the Sonoma County Auditor-Controller.

1.3.2. If it should be determined during the term of this Agreement by the County, Auditor-Controller, and/or Board of Supervisors that funds are not being utilized by Contractor in accordance with this Agreement, an audit may be ordered of Contractor's books, financial records, and program records. The cost of this audit shall be deducted from the total paid to Contractor through this Agreement.

1.3.3. In the event that Contractor terminates its business activities, all records related to this Agreement shall be promptly delivered to County by Contractor. Contractor shall be liable for any and all attorneys' fees incurred by County in recovering records pursuant to this section.

2. Budget Adjustments. The Director of the Human Services Department is authorized to approve and execute Amendment(s) to the contract for line item adjustments to the Budget that is set forth below in Section 6.1.

3. Audits. Contractor must have a fiscal monitoring biannually. The type of monitoring will depend upon the funding level of Contractor. In addition, contractors who receive multiple Federal Awards which taken together total over Seven Hundred Fifty Thousand Dollars ($750,000) are required to have a single audit in accordance with the Federal Office of Management and Budget, 2 CFR Part 200, Subpart F. A copy of this audit must be forwarded to the Area Agency on Aging by the auditor as soon as it is complete.

4. Closeout. Within thirty (30) calendar days after the termination of this Agreement, Contractor shall submit to County a final cost report showing the actual allowable Agreement costs. If the cost report shows that the payments exceeded the actual allowable costs for the term of the Agreement, Contractor shall enclose with the cost report funds equal to the difference between payments received and costs incurred.

5. Repayment. Contractor is responsible for the repayment of all audit exceptions and disallowances taken by County, state, or federal agencies related to activities conducted by Contractor under this Agreement.

6. Budget

6.1. As compensation for services as defined in Exhibit A of this Agreement, funding shall be allocated according to the following budget:

Budget Line Item	Cost
Payroll	$55,000
Taxes & Benefits	$13,200
Independent Contractor/Outside Services	$12,000
Training/Conference Fees	$3,000
Mileage/Travel	$3,000
Program Supplies/Events	$7,500
Advertising/Marketing/Outreach Materials	$5,000
Printing	$1,300
Total Costs:	**$100,000**

6.2. Budget Narrative:

- Payroll includes 22.5 hrs/week Age Friendly Coordinator; 10 hrs/week Volunteer Director; 1-2 hrs/week CEO, 1-2 hrs/week Marketing Coordinator; 1-2 hrs/week Web Designer; 1-2 hrs/week Administrative Assistant
- Assessment costs are covered under Independent Contractor/Outside Assistant, Printing, Mailing and part of Program Supply.
- Volunteer Teams and Meeting Costs are covered under Facilities Use and Program Supply.
- Mileage reimbursement will cover staff cost to attend meetings
- Advertising costs will go towards volunteer outreach.

Exhibit C: Insurance Requirements

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

I. Workers Compensation and Employers Liability Insurance

a. Required if Consultant has employees as defined by the Labor Code of the State of California.
b. Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
c. Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
d. *Required Evidence of Insurance*: Certificate of Insurance.

If Consultant currently has no employees as defined by the Labor Code of the State of California, Consultant agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

II. General Liability Insurance

a. Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
b. Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Consultant.
c. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Consultant is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the County.
d. **The County of Sonoma, its Officers, Agents and Employees** shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.
e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.
f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations

hazard (broad form contractual liability coverage including the “f” definition of insured contract in ISO form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between the additional insureds and Consultant and include a “separation of insureds” or “severability” clause which treats each insured separately.
h. *Required Evidence of Insurance:*
    i. Copy of the additional insured endorsement or policy language granting additional insured status; and
    ii. Certificate of Insurance.

III. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limits may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.
b. Insurance shall cover all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.
c. Insurance shall cover hired and non-owned autos.
d. *Required Evidence of Insurance*: Certificate of Insurance.

IV. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

V. Documentation

a. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Consultant agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1 – 4 above.
b. The name and address for Additional Insured endorsements and Certificates of Insurance is:

    The County of Sonoma, its Officers, Agents and Employees
    3600 Westwind Blvd.
    Santa Rosa, CA 95403

c. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.
d. Consultant shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.
e. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

VI. Policy Obligations

Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

VII. Material Breach

If Consultant fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Consultant

resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Consultant, County may deduct from sums due to Consultant any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

Exhibit G: Media Communications

If Contractor provides media communications to the public, including but not limited to flyers, press releases, web or social media posts, public service announcements, or interviews, about any program activities or projects funded under this Agreement, Contractor shall give credit to County as the program's funding source. County reserves the right to review and approve media communications, prior to release. In providing any media coverage referenced above, Contractor shall comply with all confidentiality requirements in Article 9.12.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 32
(This Section for use by Clerk of the Board Only.)

To: Sonoma County Board of Supervisors

Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s): Information Systems Department	
Staff Name and Phone Number:	**Supervisorial District(s):**
Jonathan Kajeckas 565-2456	Countywide

Title: Extension of existing agreement with Dimension Data for support of Voice Systems and Infrastructure

Recommended Actions:

Authorize the Director of Information Systems Department to extend an existing Professional Services Agreement with Dimension Data, Inc. for the daily operational support of the County's unified communications telephone system for a total not to exceed $311,662 for the period of August 18, 2018 to February 17, 2019.

Executive Summary:

Dimension Data is the current vendor providing remote network monitoring and support, on-site technical operational support and other services to the Information Systems Department to support voice and data communications systems. This six month extension allows the contract for vendor support of the County voice communications system to remain in effect while a Request for Proposal evaluation is completed and vendor is chosen.

Discussion:

The previous contract renewal for vendor support of the voice telephone system in August 2017 stated the County's intention to solicit proposals from multiple vendors to ensure that the County is contracting with the best vendor for the services needed. The wildfires of October 2017 diverted hundreds of hours of time from Information Systems Department staff to recovery related projects and delayed the administrative work of preparing the Request For Proposal documents. The voice system itself provided critical communications for the public during the disaster and flexibly scaled up to allow a large volume of calls from the public for information.

The request for an extension is to allow the Information Systems Department time to go through a competitive procurement process to find the best supplier through the Request For Proposal process, allowing the department to continue providing crucial day to day services for all County departments. The Request For Proposal process has been initiated.

Managed Services	
System Monitoring	$159,162
Moves, Adds, Changes	$40,000
Field Operations	$72,500
Professional Services Costs	**$271,662**
Materials	$25,000
Contingency	$15,000
Managed Services Total	**$311,662**

Prior Board Actions:

August 15, 2017 – Item #8 - Board authorized Director of Information Systems Department to execute a Professional Services Agreement with Dimension Data for the daily operational support of the County's unified communications telephony system for a period of August 18, 2017 to August 17, 2018.

March 1, 2016 – Item #15 – Information System Department's report on status of the County's telecommunications system purchase and implementation project (informational only).

March 17, 2015 – Item #16 – Board authorized the ISD Director to execute an agreement with Nexus IS for the daily operational support of the Cisco Unified Communications System for a two year period with the option to extend one year.

March 18, 2014 – Item #12 – Board authorized ISD Director to execute an agreement with Nexus IS for the daily operational support of the new Cisco Unified Communications System (Voice over Internet Protocol) for a one year period.

October 15, 2013 - Item #18 - Board authorized ISD to executive an agreement with Nexus IS for the purchase and implementation of the Cisco System Unified Communications System.

December 8, 2009 - Board authorized an agreement with Nexus IS for managed services of the NEC system for the period of May 1, 2010 to June 30, 2014 with two {2} one-year extensions.

*** In April 2014, Dimension Data, Inc. purchased Nexus and assumed responsibility for the services provided to County by Nexus under that agreement.**

Strategic Plan Alignment Goal 3: Invest in the Future

Investment in a unified communications system provides a more resilient and flexible infrastructure, additional features for voice and data, mobility for teleworkers, and improved redundancy.

Fiscal Summary			
Expenditures	**FY 18-19 Adopted**	**FY 19-20 Projected**	**FY 20-21 Projected**
Budgeted Expenses	311,662		
Additional Appropriation Requested			
Total Expenditures	**311,662**		
Funding Sources			
General Fund/WA GF			
State/Federal			
Fees/Other	311,662		
Use of Fund Balance			
Contingencies			
Total Sources	**311,662**		

Narrative Explanation of Fiscal Impacts:

There are no budgetary impacts to this contract extension. The cost has already been included in the Fiscal Year 2018-19 budget and is included in baseline rates scheduled to be collected in Fiscal Year 2018-19.

The vendor has honored their current rate structure for the 6-month contract extension.

Attachment #1: Agreement with Dimension Data

Related Items "On File" with the Clerk of the Board:

Standard Professional Services Agreement ("PSA")

AGREEMENT FOR PROFESSIONAL SERVICES

This agreement ("Agreement"), dated as of _____ ("Effective Date") is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and Dimension Data, a California Corporation (hereinafter "Contractor").

R E C I T A L S

WHEREAS, Contractor represents that it is a duly qualified and licensed contractor, experienced in the preparation of support, upgrade and implementation of the Cisco Unified Communications System, Voice over Internet Protocol telephony systems, unified communications, project management and related services; and

WHEREAS, in the judgment of the Board of Supervisors, it is necessary and desirable to employ the services of Contractor for the managed services and applications upgrade of the County's telephony/voice system.

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

A G R E E M E N T

l. Scope of Services.

1.1 Contractor's Specified Services

Contractor shall perform the services described in Exhibit "A," Exhibit "B", and Exhibit "C" attached hereto and incorporated herein by this reference (hereinafter "Scope of Work"), and within the times or by the dates provided for in Exhibits "A-C" and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibits "A-C", the provisions in the body of this Agreement shall control.

1.2 Cooperation With County. Contractor shall cooperate with County and County staff in the performance of all work hereunder.

1.3 Performance Standard. Contractor shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Contractor's profession. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees to provide all services under this Agreement in

accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release. If County determines that any of Contractor's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Contractor to meet with County to review the quality of the work and resolve matters of concern; (b) require Contractor to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.4 Assigned Personnel.

a. Contractor shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Contractor to perform work hereunder, Contractor shall remove such person or persons immediately upon receiving written notice from County.

b. Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Contractor shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of County.

c. In the event that any of Contractor's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Contractor's control, Contractor shall be responsible for timely provision of adequately qualified replacements.

2. Payment.

For all services and incidental costs required hereunder, Contractor shall be paid in accordance with the payment milestones identified in Exhibit A , attached hereto and incorporated herein by this reference, provided, however, that total payments to Contractor shall not exceed Three Hundred Eleven Thousand Six Hundred Sixty Two Dollars ($311,662) without written approval of County.

Upon completion of the work, Contractor shall submit its bill[s] for payment in a form approved by County's Auditor and the Head of the County Department receiving the services. The bill[s] shall identify the services completed and the amount charged.

Unless otherwise noted in this Agreement, payments shall be made within the normal course of County business after presentation of an invoice in a form approved by the

County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Contractor for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Contractor does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

If Contractor does not qualify, County requires that a completed and signed Form 587 be provided by the Contractor in order for payments to be made. If Contractor is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the Contractor agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Contractor has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement. The term of this Agreement shall be from August 18, 2018 to February 17, 2019 unless terminated earlier in accordance with the provisions of Article 4 below.

4. Termination.

4.1 Termination Without Cause. Notwithstanding any other provision of this Agreement, at any time and without cause, County shall have the right, in its sole discretion, to terminate this Agreement by giving 5 days written notice to Contractor.

4.2 Termination for Cause. Notwithstanding any other provision of this Agreement, should Contractor fail to perform any of its obligations hereunder, within the time and in the manner herein provided, or otherwise violate any of the terms of this Agreement, County may immediately terminate this Agreement by giving Contractor written notice of such termination, stating the reason for termination.

4.3 Delivery of Work Product and Final Payment Upon Termination.
In the event of termination, Contractor, within 14 days following the date of termination, shall deliver to County all reports, original drawings, graphics, plans, studies, and other data or documents, in whatever form or format, assembled or prepared by Contractor or Contractor's subcontractors, Contractors, and other agents in connection with this Agreement and shall submit to County an invoice showing the services performed, hours worked, and copies of receipts for reimbursable expenses up to the date of termination.

4.4 Payment Upon Termination. Upon termination of this Agreement by County, Contractor shall be entitled to receive as full payment for all services satisfactorily rendered and reimbursable expenses properly incurred hereunder, an amount which bears the same ratio to the total payment specified in the Agreement as the services satisfactorily rendered hereunder by Contractor bear to the total services otherwise required to be performed for such total payment; provided, however, that if services which have been satisfactorily rendered are to be paid on a per-hour or per-day basis, Contractor shall be entitled to receive as full payment an amount equal to the number of hours or days actually worked prior to the termination times the applicable hourly or daily rate; and further provided, however, that if County terminates the Agreement for cause pursuant to Section 4.2, County shall deduct from such amount the amount of damage, if any, sustained by County by virtue of the breach of the Agreement by Contractor.

4.5 Authority to Terminate. The Board of Supervisors has the authority to terminate this Agreement on behalf of the County. In addition, the Purchasing Agent or Information Systems Department Head, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification. Contractor agrees to accept all responsibility for loss or damage to any person or entity, including County, and to indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Contractor, that arise out of, pertain to, or relate to Contractor's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Contractor agrees to provide a complete defense for any claim or action brought against County based upon a claim relating to such Contractor's or its agents', employees', contractors', subcontractors', or invitees' performance or obligations under this Agreement. Contractor's obligations under this Section apply whether or not there is concurrent or contributory negligence on County's part, but to the extent required by law, excluding liability due to County's conduct. County shall have the right to select its legal counsel at Contractor's expense, subject to Contractor's approval, which shall not be unreasonably withheld. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Contractor or its agents under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance. With respect to performance of work under this Agreement, Contractor shall maintain and shall require all of its subcontractors, Contractors, and other agents to maintain, insurance as described in Exhibit D, which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work. The execution of this Agreement shall constitute Contractor's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided,

however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Contractor's performance of this Agreement shall be extended by a number of days equal to the number of days Contractor has been delayed.

8. Extra or Changed Work. Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Changes which do not exceed the delegated signature authority of the Department may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors or Purchasing Agent must authorize all other extra or changed work which exceeds the delegated signature authority of the Department Head. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Contractor to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Contractor shall be entitled to no compensation whatsoever for the performance of such work. Contractor further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Contractor.

9.1 Standard of Care. County has relied upon the professional ability and training of Contractor as a material inducement to enter into this Agreement. Contractor hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release.

9.2 Status of Contractor. The parties intend that Contractor, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Contractor is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker’s compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Contractor expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3 No Suspension or Debarment. Contractor warrants that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in covered transactions by any federal department or agency. Contractor also warrants that it is not suspended or debarred from receiving federal funds as listed in the List of Parties Excluded from Federal Procurement or

Non-procurement Programs issued by the General Services Administration. If the Contractor becomes debarred, Contractor has the obligation to inform the County

9.4 Taxes. Contractor agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Contractor agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Contractor's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Contractor agrees to furnish County with proof of payment of taxes on these earnings.

9.5 Records Maintenance. Contractor shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Contractor shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6 Conflict of Interest. Contractor covenants that it presently has no interest and that it will not acquire any interest, direct or indirect, that represents a financial conflict of interest under state law or that would otherwise conflict in any manner or degree with the performance of its services hereunder. Contractor further covenants that in the performance of this Agreement no person having any such interests shall be employed. In addition, if requested to do so by County, Contractor shall complete and file and shall require any other person doing work under this Agreement to complete and file a "Statement of Economic Interest" with County disclosing Contractor's or such other person's financial interests.

9.7 Statutory Compliance/Living Wage Ordinance. Contractor agrees to comply with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Contractor expressly acknowledges and agrees that this Agreement is subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.8 Nondiscrimination. Without limiting any other provision hereunder, Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis, including without limitation, the County’s

Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.9 AIDS Discrimination. Contractor agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.10 Assignment of Rights. Contractor assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Contractor in connection with this Agreement. Contractor agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Contractor's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County. Contractor shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.11 Ownership of Work Product**.** All reports, drawings, graphics, plans, and studies, in their final form and format, assembled or prepared by Contractor or Contractor's subcontractors, Contractors, and other agents in connection with this Agreement, shall be the property of County. Contractor shall deliver such materials to County upon request in their final form and format. Such materials shall be and will remain the property of County without restriction or limitation. Document drafts, notes, and emails of the Contractor and Contractor's subcontractors, Contractors, and other agents shall remain the property of those persons or entities.

9.12 Authority. The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Contractor.

10. Demand for Assurance. Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation. Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice, Submitting Bills and Making Payments. All notices, bills, and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail or courier service. Notices, bills, and payments shall be addressed as follows:

TO: COUNTY: Information Systems Department
Attn: Accounting Office
2615 Paulin Drive
Santa Rosa, CA 95403
Email: ISD-Accounts-Payable@sonoma-county.org

TO: CONTRACTOR: Dimension Data
PO Box 392387
Pittsburgh, PA 15251-9387

When a notice, bill or payment is given by a generally recognized overnight courier service, the notice, bill or payment shall be deemed received on the next business day. When a copy of a notice, bill or payment is sent by facsimile or email, the notice, bill or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Miscellaneous Provisions.

13.1 No Waiver of Breach. The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

13.2 Construction. To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation

of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Contractor and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Contractor and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

13.3 Consent. Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

13.4 No Third Party Beneficiaries. Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

13.5 Applicable Law and Forum. This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

13.6 Captions. The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

13.7 Merger. This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

13.8. Survival of Terms. All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

13.9 Time of Essence. Time is and shall be of the essence of this Agreement and every provision hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

1. Background

County of Sonoma (hereinafter "County") purchased a telecommunications system in October 2013 that was implemented by Nexus IS, Inc. (hereinafter "Nexus"). The County entered into agreement for support of that telecommunications system through July 18, 2017. In April 2014, Dimension Data, Inc. (hereinafter "Dimension Data") purchased Nexus IS, Inc. and assumed responsibility for the services provided to County by Nexus under that agreement. Through this agreement, Dimension Data will be providing similar services but transitioning the County to a new support model and monitoring and reporting platform.

Dimension Data will provide the remote network monitoring and reporting, remote network support, and on-site technical operational support (one full-time telecommunications specialist discussed in "Field Operations"), and other related services, described in this Exhibit A and all collectively referred to as "Managed Services."

2. Managed Services

Dimension Data will provide these Support Services for Contact Center & IP Telephony services for all of the devices detailed in Exhibit C – Covered Infrastructure.

Service	Service Components
Governance	• Service Delivery Manager • Scheduled Review Meetings • Service Portal • Service Transition
System Monitoring	• Hardware Monitoring • Application Monitoring
Configuration Archiving	• Change Control Process • Configuration File Archiving for IOS devices • Hardware and Software Inventory
Incident Management	• Incident recording and tracking • Incident classification and support • Incident remediation • Coordination with 3rd party vendors
Performance Management	• Predictive analysis and reporting • Threshold management • Identification of areas of concern • Recurring analysis of performance data • Recurring event analysis • Recommendations report
Technical Reporting	• Event analysis vs. measured service level • Infrastructure health reports • 'Situations to watch' proactive analysis

Table 1-Managed Services

2.1.1. . Service Delivery Manager

Dimension Data will designate a Service Delivery Manager (SOM) as a single point of contact, at an operational level, for all technical, logistics and support issues.

The Service Delivery Manager will work in partnership with Sonoma County's technical and IT management teams to maintain the delivery of optimal service levels.

Dimension Data's Service Delivery Manager will do the following:

- Responsible for all service-related issues,

- Monitors Dimension Data's performance of services during Transition.
- Conducts annual satisfaction surveys
- Schedules and conducts quarterly service meetings, including the drafting of meeting agendas and minutes. Regular service meetings include a proactive report and a review of all operational activities performed in this SOW over the previous period.
- Meeting minutes will be distributed within 24 hours of the meeting, confirmed receipt of the minutes and approval of contents thereof within five working days.
- Follow through on action items and issues highlighted during service meetings.
- When necessary, Service Delivery Manager will include engineering resources to address technical issues.
- Confirm that Service Level Objectives are met by communication to all relevant support services.
- Assist in resolving Sonoma County's queries in a timely manner.
- Verify any complaints are responded to and resolved in a timely and professional manner.
- Provide a quarterly billing report with appropriate details based on the services delivered.

2.11.2. Quarterly Business Reviews

The SOM will meet either in-person or remotely with Sonoma County on a quarterly basis. Prior to the meeting, Sonoma County and the SOM will determine the topics to be presented or discussed in the meeting. General topics of discussion will include:

- Infrastructure trends
- Operational review
- Trend of events
- All events by outage type
- Top devices by number of events
- Proactive engineering report
- Performance and capacity review
- Problem Management actions status and updates (as needed)

2.2. Service Portal

Sonoma County will receive a dedicated Service Portal accessible via the web that provides real-time secure infrastructure management and technical information allowing Sonoma County to access Incident, Problem, Change, and Configuration interface items. The County will designate a list of individuals who will receive access. Included in the System Monitoring billing is access for five (5) individuals. Access for more than 5 will be a one-time cost to County of $130 for each additional ITSM user login. Via the Service Portal, County will be able to:

- View event information and drill down to the details of the event
- View reports
- View infrastructure status and metrics
- View archived storage, where applicable, of all router, switch, and gateway configurations
- Archived storage and viewing of all Sonoma County provided system documentation
- Complete inventory of assets

2.2.1. Service Transition

The services described in Section 2.2.1 will be performed by Dimension Data in order for Dimension Data to access County's telephony infrastructure for system monitoring and reporting.

2.2.1.1. . *Service Deployment*

Dimension Data will perform deployment activities to include:

- Deployment of Configuration Items such as any service component, infrastructure element or other items that need to be managed and access information required to deliver the monitoring platform service,
- Dimension Data will provide administrative tasks associated with establishing the connection for monitoring of the environment,
- Technical information needed to identify the device and ports and the notification profile for each County technical staff that will receive a communication when an event occurs.
- Activating the managed devices onto the Dimension Data monitoring platform. Establishing the network connection so that Dimension Data may begin to monitor County's infrastructure.
- Dimension Data will go live with the new service by migrating the monitoring traffic from pre-production to live production.

2.2.1.2. . *Network Connectivity*

Client and Dimension Data will establish the required connectivity for Dimension Data to perform services as described in this high level diagram.

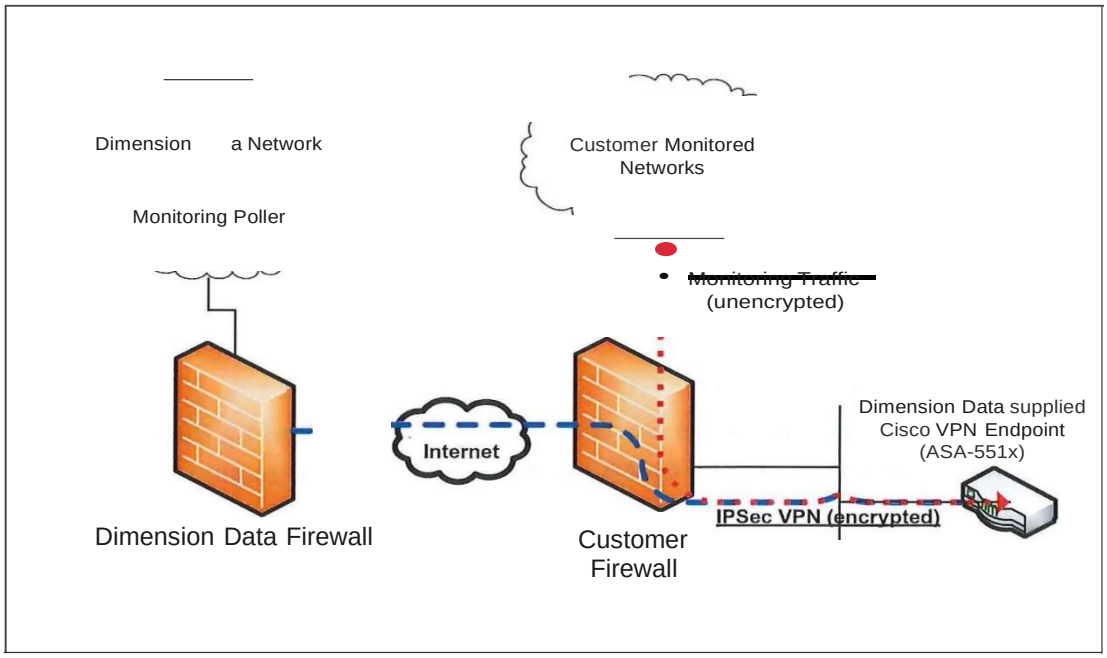

Figure 1 Monitoring & Management Connectivity

Dimension Data will provide a monitoring device located in Dimension Data's datacenter to perform polling operations via a VPN connection. A Cisco VPN device (ASA-551x) will be issued and should be installed on County's firewall DMZ network.

Dimension Data will provide additional documentation specifying addressing, ports and protocols, etc. to County's security team during the kick-off. The Sonoma County and Dimension Data security teams will then work together to set up the VPN and establish the required access.

2.2.1.3. *Deployment*

The Dimension Data deployment team will work with Sonoma County to modify standard procedures with County specific details during the Deployment Phase of the project, for example :

- Notification matrix
- Escalation procedure
- Specific procedures for third-party providers

2.2.1.4. *Network Information Collection*

The service does not "discover" device details by probing the Sonoma County environment. The required information must be loaded into the Dimension Data monitoring platform. Sonoma County will be responsible for providing the following information (as a minimum):

- Device name
- IP address

- Serial number
- Part number
- Physical location address

The Dimension Data will load and utilize the County compiled data. While the deployment team will work with Sonoma County to compile information from available sources, Dimension Data is not accountable for any delays in activation of the services due to incomplete or unavailable network information that Dimension Data has requested in writing and for which Sonoma County has been given an agreed upon time to respond.

2.2.1.5. ***Managed Device Preparation***

The Server hardware and application monitoring service is dependent upon the installation of agents on each server to be managed by Dimension Data, and the configuration of the SNMP service. The WAN service is dependent upon:

a. Configuration of SNMP
b. Trap Receiver destination IP address
c. Provision of login and enable passwords

A required device specific configuration will be supplied to Sonoma County, including community strings and host destination addresses. The County will use this device specific configuration.

2.2.1.6. ***Setup of the Monitoring Application***

This includes the installation of all hardware and software components of the monitoring application. Managed device information from the network information collection stage will be loaded and each individual device will be configured for required statistics/reporting. Dimension Data will also resolve any network connectivity, firewall or routing issues.

2.2.1.7. . ***Activation***

Notifications of events as defined in Section 2.9.2 will occur once all required documentation and procedures are in place, and the application is successfully detecting and reporting events.

This comprises all the steps Dimension Data will complete in deploying the Monitoring Service and allowing access to the dedicated client Service Portal. Portal Training

Dimension Data will schedule a remote half-day Service Portal training class for Sonoma County's staff at a time mutually agreeable to the Parties. The training course will be recorded and covers:

- Portal navigation
- Change management procedures
- Interpretation of live statistics

2.2.1.8. *Baseline Review Report Interpretation Training:*

Approximately six weeks after the activation of the monitoring and reporting Service, an assigned engineer will conduct a six-week baseline review. In addition to a six-week service baseline review the assigned engineer will review performance and health reports with County personnel. During this session the engineer will review in detail the type of reports, their meaning, and applicability to the client environment. These reports are continually updated on the Service Portal and are used as the basis for the regular meetings.

2.2.1.9. *Secure Network Connection*

The monitoring service will provide Sonoma County with a dedicated and secure connection to the Service Portal located in the Dimension Data Global Services Center. Dimension Data will secure:

- Sonoma County from other clients
- Sonoma County from the Operations Center
- Dimension Data's Operations Center from outside breaches into Sonoma County's networks

Dimension Data will provide a dedicated, professional security management team in the Global Services Center to control passwords and changes to the security software configurations.

2.2.1.10. *Service Activation*

Service Activation deliverables include:

- Customer kick-off meeting
- Processing of OEM support contracts
- Collection of supporting device data
- Establishing network access
- Storing information on back-end systems
- Device discovery
- Conducting a Transfer of Information with the Professional Services team or customer
- Providing the customer with contact, process and escalation information
- Portal training
- Establishing a date for transition to the Dimension Data Global Services Center

The length of the project and frequency of meetings are a function of project size and scope and can vary.

2.2.1.11. *Service Activation Kickoff*

Dimension Data will have a formal kickoff meeting with Sonoma County within two weeks of a signed agreement. This meeting will include a review of the service deliverables, the project timetable, and introduction of key personnel to be involved in the project.

2.3. System Monitoring

Dimension Data will monitor Sonoma County's infrastructure inventory, identify events, diagnose events, and remotely resolve them quickly and effectively. Dimension Data will keep the County informed throughout the life of the event through notifications based upon priority.

Dimension Data will configure the network management systems to send SNMP polls and receive SNMP traps from the managed devices and elements. The polling interval is every five minutes.

Dimension Data will monitor the following:

- Availability Status
- Capacity Thresholds
- Performance Thresholds

2.3.1. Hardware Monitoring

Dimension Data will monitor critical hardware components for up/down status and provide notification upon loss of availability. These components include:

- Designated Servers hosting bare-metal or virtualized Contact Center and Telephony applications
- Voice Gateways - Ingress/Egress/VXML/DSP Farm

2.3.2. . Application Monitoring

Dimension Data will monitor all critical services and application specific metrics related to the Contact Center and IP Telephony applications as identified below:

Monitored Device	Monitored Process & Definition
All Application Servers (IP Telephony, Contact Center)	• Reachability (up/down status) • Status of services critical to application operation • Disk/CPU/Memory utilization

Monitored Device	Monitored Process & Definition
All Windows Servers (UCCE, CVP)	• Notification of Network Device Errors • Notification of *Server* Hardware or Operating System Errors • Notification of Down or Hung Monitored Service • Notification of Select Application Errors or Events • Notification of Select SQL Errors or Events • Notification of Select Windows System Event Log Events • Proactive warning of degradation or imminent failure
All Windows Servers (UCCE, CVP)	• Customized Alerts: • Windows Event Log monitoring • Log File monitoring • Service/Process monitoring
Unified Communications Manager	• Media resource (CFB, MTP, XCoder) utilization • License utilization (where applicable) • Disk/Memory/CPU utilization • Route group/Route list/Media list exhausted • Directory services connectivity • Gateway reachability
Peripheral Gateway	• Peripheral Information Manager(PIM) - Connectivity monitoring to peripheral device(s) • Open Peripheral Controller(OPC) - date and configuration synchronization • Message Delivery Service (MOS) – side to side connectivity and message delivery • PGAgent - connectivity to central controller

Monitored Device	Monitored Process & Definition
Call Router(s) / Rogger(s)	• CCAgent - Peripheral on line and offline notification • Router Process - routing issue notifications • Database Agent - connectivity to non ICM database • Database Worker - connectivity to non ICM database • Application Gateway - connectivity to external data sources • ICM to ICM Gateway – connectivity and stability • Network Gateway - connectivity into PSTN /IXC
Call Logger(s) / Rogger(s)	• Logger - database health and continuity • Replication - database replication for HOS and connectivity to the HDS • Recovery - database health and data retention period
Computer Telephony Integration (CTI) Server	• CTI Server - agent state messaging and ACD call supervision
Computer Telephony Integration Object Server (CTIOS)	• CTIOS - connectivity to CTI server
Administrative Workstation (AW)	• Database messaging - size, and continuity
Historical Data Server (HOS)	• Database messaging - size, continuity • Replication - database replication logger
Customer Voice Portal	• CVP Call Server/Voice Browser connectivity • CVP Call Server process • CVP Connectivity to PCCE

Table 2 - Application Monitoring

2.4. Incident Management of System Remote Monitoring

Dimension Data will perform the following during the management of Incidents identified through monitoring of the environment or by direct client notification via email or phone:

- Event Identification, logging and management
- Event severity classification
- Client notification
- System Restore

The Global Services Center will provide an incident management and remote monitoring process for problem identification and resolution.

In implementing the above, the Dimension Data process will provide:

- Correct escalation management
- Initiating special sequence-of-events investigations
- Resource management, prioritization and allocation for event resolution

Timely communications with Sonoma County

2.4.1. Identification, Logging and Management

Dimension Data will perform the following tasks during the identification of the Event:

- Event identification, isolation and diagnosis. Dimension Data will review each alert to assess if it is a true alert or a hiccup in the monitoring.
- Clear an alert if it is not a true incident, or if it is associated with a known scheduled outage, defer it until clearance of that outage
- For incidents, group related events into a single incident with parent/child relationships of live events (where necessary)
- Raise a an Incident ticket
- Provide a notification of the incident to Sonoma County, according to the notification matrix, and within the notification service level.

2.4.1.1. *Incident Severity Classification and Initiation of remedial actions*

Dimension Data will perform Incident diagnosis and troubleshooting to isolate and categorize the incident as either:

- Carrier
- Client
- Environment
- Hardware
- Power
- Software
- Unscheduled outage

Upon completion of the ICM ticket assessment and/or the Incident Diagnosis, Dimension Data will inform Sonoma County of the results.

Where multiple unrelated incidents occur, Dimension Data will prioritize actioning incidents using the severity levels defined in Section 2.5.3.

2.4.2. . Priority Management

Dimension Data and County will calculate a priority level to be allocated to all managed devices and element based on urgency and business impact allocated by Sonoma County during deployment. Upon the request of Sonoma County, the Parties shall have the option during each quarterly meeting defined in Section 2.1 with the Service Delivery Manager to reevaluate and modify the urgency and impact level designation for future

Incidents. The available options for each device are high, medium, or low. Priority levels are used for:

- Call handling prioritization in the operations center
- Configuring selective call notification for Sonoma County

High priority calls will be handled first in the operations center, followed by medium priority and lastly, low priority calls. By means of example, an access circuit or router failing is not worked on before a core router failure incident.

2.4.2.1. . ***Notification Rules***

Dimension Data and County will together set notification rules, notification methods, and notification configurations.

Each contact will have a set of notification details for, and notification methods will be set by Dimension Data and County:

- Office phone
- After hours phone
- Email
- Mobile

Dimension Data and County will create and assign Notification Groups using the following levels:

- Client level
- Site level
- Device level (Configuration Item - CI)

The Parties will set notifications to communicate to all of these, some, or just one. These parameters are also set depending on the severity of the event, i.e. high, medium or low.

Dimension Data will present and discuss these options in detail during the deployment of the service. Dimension Data will utilize industry best practices so that Sonoma County receives all the important notifications and that alternate notification methods will be utilized for minor and informational Events. Notification parameters, groups and contacts can be changed at any time at Sonoma County's request.

The notification matrix, will be defined per product as required by County. The notification matrix defines the notification:

- Sonoma County contact
- The Incident Management process step (initial, diagnose, update and resolve)
- The method (telephone, mobile, SMS, email)
- Hours - business hours or outside business hours
- Event type priority – High, medium or low

2.4.3. . Incident Priority Levels

Dimension Data will use the following table to categorize the priority of the incident.

Priority 1	Priority 2	Priority 3	Priority 4
Production network is down. It is causing critical impact to business operations	Production performance is severely degraded impacting aspects of business operations	Network performance is degraded. Network functionality is noticeably impaired but most business operations continue	Customer requires information or assistance on product capabilities, installation or configuration

Table 3 - Incident Severity Levels

2.4.4. Escalation Management

Escalation will occur based both on the severity of the incident (see severity definitions in table above) and the length of time the service incident has been ongoing (less periods where the Sonoma County and Dimension Data agree that the escalation timer should be stopped for any reason).

Dimension Data will provide an e-mail and phone call notification of any escalation.

2.4.5. Third Party Applications and Hardware

Dimension Data will provide system up/down monitoring coupled with Vendor Maintenance Aggregation (VMA) which Dimension Data will use to open and drive tickets to resolution on County's behalf. Dimension Data engineers will troubleshoot incidents in accordance with the priority levels determined in Section 2.4.2 Priority Management and Table 3. Incident Priority Levels in Section 2.4.3 and escalate to the vendor where appropriate. The following devices would fall under this type of service:

- Calabria

2.5. . Performance Management of Remote System Monitoring

The service will monitor attributes for a managed device and gather performance statistics , accessible by County via the Service Portal, through thres.hold monitoring on these attributes.

Monitoring attributes include:

- Mean average value over the previous five minutes (e.g. CPU).
- Current value (e.g. disk capacity free).

These are based on the product manufacturer's Management Information Base (MIB)

2.5.1. . Threshold Management

Dimension Data will use thresholds to manage capacity planning and act proactively to prevent possible future problems (e.g. disk space utilization). Through threshold monitoring, the Dimension Data monitoring system provides notifications to Sonoma

County on the performance of the products in relation to set thresholds. The Dimension Data system will post threshold events and traps received from the managed elements and devices to the Service Portal for viewing.

2.5.1.1. *Threshold Monitoring*

Threshold monitoring will be based on an event exceeding the median value of the previous three SNMP polls (at five minute intervals).

Threshold events will have severity values assigned as critical events, major events, or informational only. These severities are assigned according to the three threshold levels that are exceeded as set out in the table below.

Threshold level	Event severity
Minimum	Informational Only
Average	Major Event
Maximum	Critical Event

Table 4 - Threshold Severity Levels

2.5.1.2. *Online Threshold Views*

The County will be able to view the following on the Service Portal:

- All current threshold events via the live events views
- All current threshold events by product or event
- Threshold events for the current reporting period in summary format and number of events for the current reporting period by product type or product and site

2.5.1.3. *Threshold Event Notification*

Dimension Data will notify Sonoma County of critical and major threshold events according to the notification matrix. Additionally, Dimension Data will perform activities outlined in Section 2.4 Incident Management to remediate critical and major events.

Dimension Data will contact the County if threshold event notifications remain open for three business days. If the performance issue is ongoing and the element performance stays above the critical threshold for more than three business days, Dimension Data will adjust thresholds and notify Sonoma County.

2.5.2. Performance Reporting

Dimension Data will provide Sonoma County with performance reports which are also accessible on-demand by County via the Service Portal or via automated email distribution.

- Live device metrics graphs
- Service health reports
    - Weekly health reports are scheduled and kept for five weeks

- Monthly health reports are scheduled and kept for six months
- Monthly service level reports (including reports at Client level and Site level) are scheduled and kept for six months

Typical reports provided include:

- Reach ability (router, LAN/WAN, servers,)
- Element health index (router, LAN/WAN and server)
- CPU utilization (router, LAN/WAN, servers)
- Bandwidth utilization chart (router and LAN\WAN interfaces)
- Volume leaders (router, LAN/WAN and server)
- Average health index (router, LAN/WAN and server)
- Total network volume (router, LAN/WAN and server)
- Usage of digital PSTN, PRI, jitter, latency, conference bridge, and call volume (UC environment)

Additional information for a particular device is available on request by contacting the Service Delivery Manager.

2.6. Configuration Archive

The Dimension Data Service keeps an archived copy of supported devices' configuration files that have been backed up, and these will be available via the Service Portal. A complete listing of all managed devices is maintained on the Service Portal, with the current configuration status of devices, including details such as device serial number, hardware sub-components, firmware revision and software versions.

The Dimension Data Service will automatically detect and make use of the change control process so that site summary information; device configuration files are constantly updated.

County will be responsible for:

- The County will archive and back-up configurations for software applications (e.g.; CUCM, UCXN, PCCE, CVP, etc.).
- The County will provide Dimension Data with information for backup of contact center and telephony core applications within the scope of this Service to develop a backup and restore plan.
- County agrees to confirm the existence of server rebuild kits, which consist of all disks and files necessary to completely rebuild a server, for all core UC servers defined in Exhibit C – Covered Infrastructure within the scope of this service.
- County agrees to work with Dimension Data to develop a specific plan for providing Dimension Data with immediate access to the server rebuild kits in the event they are needed for any reason during the course of the Service. The server discs and files

in the server rebuild kits must include discs with the current major/minor software version.

In the event that Dimension Data is not provided with immediate access to backups or server rebuild kits when they are needed for any reason during the course of the service Dimension Data will not be responsible for any delays in restoration of service of the UC environment or any impacts resulting from downtime of the UC environment.

2.6.1 1. Device Configuration File Management

The System will keep backup copies of all Cisco IOS based devices and archive the device configuration files, where possible. (This feature is device and manufacturer dependent and thus is limited to supported platforms and vendors.) Dimension Data will automatically detect saved edits to the managed device's configuration files and save the old configuration and the new configuration. Sonoma County may view all archived configuration files on the Service Portal.

Ech time a configuration file is 'saved' by someone on a remote device it raises a "Configuration event" on the Service Portal. In addition, the System will weekly download the devices' configuration files and compare them against those in its database. Any discrepancies will raise another "Configuration event". The events are used to check that the changes do not affect the reporting systems.

If any incidents develop due to changes made by Sonoma County staff to the device configurations, Sonoma County will be billed on a 'time and materials' basis against the Performance Assurance Retainer (PAR) for the time spent resolving such incidents. Dimension Data will not accept responsibility for any downtime or loss of functionality caused.

2.6.1.1. . *Managed Device Database*

Dimension Data will keep an updated record of all device information. Managed device information will include but is not limited to items such as:

- Device name
- Software versions
- Firmware versions
- Memory

This information will be available by clicking on the device name in the Service Portal. The County acknowledges that the amount of information available on a device is specific to the device and the vendor.

2.7. Moves, Adds, Changes and Deletes (MACDs)

Dimension Data will perform user-based and system-based moves, adds, changes and deletes, called "MACDs". MACDs may be logged with the Global Service Center at any time (24x7).

2.7.1. User MACDs

"User MACDs" include any single user-based configuration change. Typical User MACDs include any move, add, change, or deletion of a single user or equivalent.

Typical Telephony User MACD's include the following activities:

- Set up user and device information for a new IP Phone
- Update end-user phone information (eg; assign new Directory Number)
- Create new voicemail box

Typical Contact Center User MACD's include the following activities:

- Create new contact center agent/supervisor account
- Adjust team ownership for a contact center supervisor
- Adjust skill group membership for a contact center agent

Technology Discipline	Request Type	Scenario	MACO Activity	# of Service Units for Normal Urgency/ Business Hours	# of Service Units for Normal Urgency/ After Hours	# of Service Units for High Urgency/ Business Hours	# of Service Units for Normal Urgency/ After Hours
				MULTIPLIERS			
Unified Communications	User MACO	User Request	Activate phone number (hard and soft phone)	1	2	3	4
Unified Communications	User MACO	User Request	Deactivate phone number	1	2	3	4
Unified Communications	User MACO	User Request	Assiqn new phone number	1	2	3	4
Unified Communications	User MACO	User Request	Update end-user phone information	1	2	3	4
Unified Communications	User MACO	User Request	Create new Unified Messaging account	1	2	3	4
Unified Communications	User MACO	User Request	Delete existing Unified Messaging account	1	2	3	4
Contact Center	User MACO	User Request	Aqent setup	1	2	3	4
Contact Center	User MACO	User Request	Aqent Supervisor setup	1	2	3	4

Table 5 - Service Unit Consumption Matrix

Service Units will be billed to the County in 15 minute increments, at $25 per Service Unit with a multiplier based on urgency as specified above. For example, if 15 minutes are spent in a "High Urgency *I* After Hours" MACO service, the County will be billed $100.

2.7.2. . System MACO

"System MACDs" are defined as configuration requests that are not User MACDs, and are typically not specific to a single user. Dimension Data will review the Service Request for each System MACO. System MACDs are billed at actual time spent in 15 minute intervals at a rate of $100 per hour. If the work will take longer than 4 hours to

complete, the SOM will review the request with Sonoma County to determine if the scope of work should be billed to the County under the Performance Assurance Retainer.

Typical Telephony System MACD's include the following activities:

- Creation of a new hunt group
- Changes to call routing/dial plan within CUCM
- Changes to dialing rights and restrictions within CUCM
- Addition of a new voice gateway to CUCM

Typical Contact Center System MACD's include the following activities:

- Changes to existing Call Routing script
- Changes to existing Interactive Voice Response (IVR) script
- Changes to existing IVR prompts

2.7.3. Service Level Objectives

County will inform Dimension Data if a MACO request shall be handled as normal or high urgency.

2.7.3.1. *User MACDs*

- Normal:
  - Remote execution -To be completed within 2 business days of request once all information requested by Dimension Data in the User MACO Request template and to be provided by Sonoma County is obtained.
- High:
  - Remote execution – To be completed within 8 business hours of request once all information requested by Dimension Data in the User MACO Request template and to be provided by Sonoma County is obtained.

2.7.3.2. *System MACDs*

- Normal:
  - Remote/On-site execution – To be completed within 10 business days of request, or per agreed to schedule, once all required information requested Dimension Data in the System MACO Request template and to be provided by Sonoma County is obtained.
- High:
  - Remote/On-site execution – To be completed within 5 business days of request (Dimension Data requires a minimum of 2 days notification for on-site MACO work), or per agreed to schedule less than 5 days, once all information requested Dimension Data in the System MACO Request template and to be provided by Sonoma County is obtained.

2.7.4. Call Handling Procedure

- Sonoma County will submit MACO requests via phone call, through web portal, or during transition via email (Dimension Data to provide email alias during transition). If a request is Urgent, County will make the request by phone.
- County will advise Dimension Data when a request is for onsite or user-based MACO support and provide the Site ID for the location requesting service. These changes are to be handled and billed in accordance with the Field Operations detailed in Section 3.
- Sonoma County will provide the information requested by Dimension Data in the User MACO Request Template or the System MACO Request Template (as applicable)..
- When System MACO service is completed, Dimension Data will invoice against the MAC O Service Retainer, documenting the engineer's time.
- If a User MACO ticket has incomplete or incorrect information Dimension Data will directly contact the County Service Desk for clarification via email or phone.
- Dimension Data will use the English language only.
- MACO Service Units is 15 minutes of service time, 1 SU = $25.

2.8. Engineering Services

Dimension Data will provide engineering services for issues which exceed four (4) hours Dimension Data will follow normal procedure for documenting the engineer's time and invoice against the Performance Assurance Retainer (PAR).

2.9. Technical Reporting

As part of "System Monitoring" (section 6.6 of this Scope of Work), a Dimension Data Proactive Engineer will:

- Work with Sonoma County's technical management responsible for critical applications and determining their monitoring requirements, critical characteristics and other 'hot spots' that require monitoring and can be monitored.
- Feed this information back into the operations center to determine that the prescribed service is delivering requirements.
- Work with the engineering support team to extend monitoring based on a request from Sonoma County, to support change control and the roll-out of new monitoring agent modifications, as required
- Work with the support services engineering team on activities in support of Sonoma County environment.
- Continually analyze the inputs from the operations center (Service Requests, Events, thresholds, service response, agents and performance reports), summarize and make technical recommendations to Sonoma County for the purpose of:
    - Guiding Sonoma County to make design and configuration changes to the IT environment for the purpose of extracting enhanced performance and maximum business benefit

- o Refining threshold settings so as to reduce the number of Events generated with a view to minimizing the load on both Sonoma County and the operations center whilst still providing key inputs to the successful management of Sonoma County environment

- Work with the Service Delivery to maintain Sonoma County's level of satisfaction with the managed service offering remains high.

2.9.1. Analysis & Reporting

As part of "System Monitoring" (section 6.6 of this Scope of Work), Dimension Data will do the following.

2.9.1.1. *Monthly Events Analysis*

Dimension Data's engineers will review the following:

- Historical events reporter for trends
- Critical threshold events history to detect frequent trends

2.9.1.2. *Recurring Events Analysis*

Dimension Data engineers will review the events summary to determine recurring events by device and location. Dimension Data will make a diagnosis on the basis of the information in the summary and notify Sonoma County of any trends, recommendations and information that may be relevant.

2.9.1.3. *Recommendations Report*

As part of the quarterly review meeting with Sonoma County, Dimension Data will provide a list of recommendations based on the above analyses. Sonoma County shall be under no obligation to approve or initiate any of the recommendations described above.

2.9.2. Notifications

As part of "System Monitoring" (section 6.6 of this Scope of Work), Dimension Data will provide Sonoma County with the following notifications:

- Initial notification - when an event has been received
- Investigation notification - notification of the Problem and incident number
- Update intervals – updates of the progress on the incident restoration
- Restoration notification - notification that the incident has been resolved
- Problem Management Debrief - review of root cause, corrective action, next steps, and timeline.

2.9.2.1. *Initial Notification*

The engineer will notify Sonoma County that an event has been received and Dimension Data is investigating the cause of the event. The multi-dimensional notification system

allows for Sonoma County notification by individual employee, type of notification (e.g. phone, email), and severity level and device type.

2.9.2.2. *Investigation Notification*

The engineer will log-in to Sonoma County's network and attempt to diagnose the nature of the Problem. He or she will be responsible for contacting the Site and determining power and equipment status. This will generally require the help of an on-site contact. Dimension Data will then notify Sonoma County of the diagnosis. Specific deliverables in this notification include the assigned Service Request number, description of the isolated Problem and indication of the party responsible for its repair.

2.9.2.3. *Update Intervals*

During the course of managing the issue to resolution, Dimension Data will provide Sonoma County with periodic update notifications. Please note that these are maximum update intervals and updates may occur more frequently, when appropriate. Conversely, when no change in status will occur within the update interval (such as if the Telco indicates that it will only be on-site in four hours to repair the Problem) the notification may be parked with agreement from Sonoma County to avoid unnecessary notifications.

2.9.2.4. *Restoration Notification*

Once the system detects that the event appears to be cleared, a resolve notification is sent confirming that the event is resolved. The event is cleared but Sonoma County will also need to approve and agree that the actual outage is resolved, ticket is closed

3. Customer Experience Testing

Dimension Data will provide the following services under Dimension Data's optional components of the Support Services for Contact Center & IP Telephony. Customer Experience Testing is automated test calling into tl"ie Unified Communication system for call assurance and into the Contact Center Enterprise System for Interactive Voice Response (IVR) assurance. The Contact Center Customer Experience Testing service addresses and reproduces end users' actual experience with the platform in real time.

County is not obligated to purchase these services, nor shall Dimension Data have any expectation of payment for services not requested or implemented.

In the event that County desires these services, payment will be made from the Contingency Funding within this Scope of Work. County acknowledges that these services are a minimum 12 month contract. These services cannot be co-termed to a contract which has less than 12 months remaining on it.

3.1. Call Assurance

This basic test monitors the availability and responsiveness of the County's systems by placing a test call as a County resident would. This test will monitor the following elements in a call over a twelve (12) month period.

- Initial Call Connectivity
- Time to Answer
- Greeting Response Time
- (TBD) Toll-Free Dialed Numbers*
    - County to provide numbers if, and when, County wishes to engage such services.

*In the event monitored numbers are not toll-free customer understands and agrees that Dimension Data will pass thru any toll charges.

3.2. Interactive Voice Response (IVR) Assurance

This testing adds on additional specific IVR steps which allows the application to test the entire path of an end customer transaction (call) to just prior to hand-off to the agent (if applicable). Testing occurs over a twelve (12) month period. In the event that the call flows require significant alterations to properly accept the testing a Professional Services engagement via PAR service, if required. Call flow changes are outside the scope of this service. Some elements which can alerted on are as follows:

- DTMF (Touch Tone) Responsiveness
- IVR Prompt Response Time
- Speech Responsiveness
- DB Look-up Response Time
- Script Result

- Call Duration
- Greeting Prompt Length
- (TBD) Toll-Free Dialed Numbers*
    - County to provide numbers if, and when, County wishes to engage such services.

*In the event monitored numbers are not toll-free customer understands and agrees that Dimension Data will pass thru any toll charges.

3.3. . Service Transition

To activate the service we need to complete the following activities:

Prerequisites Include:

- VPN connectivity must be actively in place
- An accurate detailed call flow diagram for each Dialed Number (ON) to be tested must be provided by customer.
- County needs to review and understand any potential reporting alterations which the testing may require.

Deliverables include:

- Deployment & configuration of Customer Experience tests, if requested by County
- Baseline of Warning and Critical Threshold timers associated to call responsiveness

3.4. Monitoring and Alerting

The Global Services Center (GSC) will receive alarm notifications from the testing application when thresholds or responses are not satisfied. Test calls will be generated every 15 minutes. Alerts come in (2) varieties, Warning and Critical. Below are details for the Dimension Data actions for each.

3.4.1. . Warning

This alert indicates that the application DID respond within the time allotted BUT was delayed beyond the optimum operating parameter. Dimension Data will provide an automated e-mail notification to the customer provided contact. Since this type of alert does not indicate a failure, no further action will be taken. Warnings will be noted during the Quarterly Business Review (QBR) session.

3.4.2. Critical

This alert indicates that the application either failed to respond or did not respond within the time allocated. Dimension Data will provide an automated e-mail notification to County. Because this type of alert has potentially caused end customer service issues, Dimension Data will commence further testing of this ON via a Severity 2 Incident. Critical alerts will be tracked and reported during the Quarterly Business Review (QBR) session.

3.5. Changes to Customer Experience Testing

In the event that County would like to provision additional Dialed Numbers to be monitored, Dimension Data will provide County with a Request for Change (RFC). The RFC will include all relevant information pertaining to the planning, configuration and testing of the new ON. Dimension Data will also work with County to schedule the configuration and acceptance testing of the add-on. Scheduling will be done in accordance with a format and approved change management process that is agreed upon between Dimension Data and County during the service deployment process.

4. Field Operations

Field Operations will be provided by an on-site telecommunications expert, who will provide the Technician Services and Project Services, as described below. The on-site telecommunications expert will provide such services during business hours, 8:00am – 5:00pm, Monday – Friday, excluding County holidays.

4.1. . Technician Services

- Install new cabling both data and analog, as requested. Provide certification report with pass/fail status for each connection. All cabling will be in accordance with the TIA/EIA Commercial Building Telecommunications Cabling standard.
- Break/fix support of all non-IP lines (fax, alarms, analog,) etc. including contacting carrier for troubleshooting and re-cabling.
- Maintenance and repair of all County owned outside plants for both fiber and copper.
- Troubleshooting and repairs of all existing cabling.
- Order materials for patch panels, phones, cabling, etc.
- Install and replace wireless access points.
- Installation, maintenance, and repair of outside plants including contacting carrier for troubleshooting and re-cabling. Outside plants are the physical cabling and supporting infrastructure (such as conduit, cabinets, tower or poles), and any associated hardware (such as repeaters) located between a demarcation point in a switching facility and a demarcation point in another switching center or customer premises.
- Prepare data closets including racking and stacking equipment.
- Other duties of a similar nature, as requested by County.

4.2. Project Services

- Participation on the County's behalf in meetings with County business partners or service providers.
- Attend Architect and non-Architect meetings in order to generate an estimate.
- Create project estimates for billable services requests and projects.
- Provide project status updates to customers, as requested.
- Build departmental matrixes and floor plans for Architect remodel and other projects.

4.3. Recordkeeping

For all Field Operations Services, Dimension Data will track its efforts per project, incident, problem, or service request in County's ticket management tool or a Dimension Data provided tool approved by County. Sufficient detail for all completed tickets and projects will be provided including hours worked, travel time, materials cost, technician name, work performed, and billable status. The purpose of this recordkeeping will not be to bill the County for Field Operations Services, but to allow the Information Systems Department to charge for department services according to internal County procedures.

4.4. Service Delivery

Incidents which originate with the ISO Service Desk will be routed to Field Operations via the County's incident management tool. Field Operations will meet the following service level objectives established by County's Information System Department.

PRIORITY SERVICE DELIVERY FOR INCIDENTS		Impact		
		Political Impact *	Department Impact	User Impact
		II - High: VIP Customer or high Citizen Impact	12-Medium: 2 or more users up to Department wide	13-Low: 0-1 user impact or customer acknowledges impact is low
Urgency	Ul-High: Service is provided after hours (see below for services)	I I hr response 4hr resolution	2 2 hr response 4hr resolution	2 2 hr response 4hr resolution
	U2-Medium: Service is provided during business hours only	3 I hr response 8hr resolution	4 2 hr response 8hr resolution	4 2 hr response 8hr resolution
	U3-Low: Customer acknowledges next day service or longer	5 I hr response 16hr resolution	6 2 hr response 16hr resolution	6 2 hr response 16hr resolution
	System Generated Alert Only	7	7	7

* When Incident is rated High Impact (11), Service Desk will follow up with phone call to Tier 2.
Response time = Time between IR creation and initial customer contact from Support Team.
Resolution time = Time between IR creation and IR resolution (does not include customer acceptance).

4.5. Operations

4.5.1. Offices, Storage and Furnishings

County will provide Dimension Data with adequate office space and furnishings. Dimension Data will be responsible for all office supplies and operating costs. County will provide adequate and secure storage space for Dimension Data's tools, spare parts, installation materials and equipment, as needed.

4.5.2. . Computers

County will provide computers for the provisioning of services requiring onsite personnel.

4.5.3. Vehicles

Dimension Data will be responsible for providing service vehicles and all related maintenance, gasoline, registration and insurance costs.

4.5.4. Safety

Dimension Data will be responsible for providing and assuring compliance with a comprehensive safety plan for its employees used in conjunction with this Agreement.

Dimension Data may participate in County's safety program or implement its own safety program; however, Dimension Data will not charge County for this effort. Dimension Data will supply its employees with work tools and safety equipment needed for their performance of the services within.

4.6. . Skills and Clearance

4.6.1. Background Investigation

County requires all Dimension Data employees who work on-site to submit to a background investigation, which may include but is not necessarily limited to, a background questionnaire and fingerprinting, and be subject to approval by the County Sheriff's Office prior to performing services under this Agreement.

4.6.2. Skills/Certification

Dimension Data will assure that its employees will have the adequate skill levels and/or certification to provide the support detailed in this Scope of Services. Dimension Data will provide its employees with adequate training so skills are commensurate with changing technologies.

4.7. Materials

Materials associated with special projects are estimated at $50,000 annually.

Dimension Data is a Value Added Reseller of telecommunications equipment, and subsequently for all telecommunications products purchased through Dimension Data, Dimension Data will provide materials at contractor's cost plus a fixed mark-up not to exceed 15%.

Backup invoices will be provided for all materials charged to County. Dimension Data will provide an itemized spreadsheet including date of purchase, associated ticket, quantity, unit of measure, part number, description, unit cost, total unit cost including sales tax, mark-up percentage, and total extended cost.

County will be responsible for the purchase of all telecommunications products that become part of County's equipment.

5. Contingency

Due to unforeseeable circumstances which may arise the Parties are agreeing to a contingency in the amount of $30,000.

6. Business Hours

The pricing assumes work will be undertaken during normal working hours: Monday through Friday 8:30AM to 5:30PM local time, excluding Dimension Data observed holidays. Should o work be undertaken after business hours, either at the request of, or through default on the part of Sonoma County, Dimension Data reserves the right to invoice Sonoma County for the difference between cost of effort at normal hourly rates and the cost of Dimension Data's after hours rates as defined in Section 7.3.2 Performance Assurance Retainer.

7. Rates and Billing

This price is valid until February 17, 2019 .The following tables outlines the fees applicable in this Agreement.

7.1. System Monitoring

Description	Annual Quantity	Monthly	6- Months
System Monitoring		$26,527	$159,162
Total Recurring Charges			$159,162

Table 6 - System Monitoring Costs

The table below outlines the device count used to base the System Monitoring costs. The complete detail can be found in Exhibit C - Covered Infrastructure.

Element Type	Qty
PCCE Application	32
CUCM Applications	25
Server Chassis	17
PSTN Router/Gateways	2
VXML\CVP Gateways	2
3rd Party Devices (Calabria)	10

Table 7 - Device Counts

7.2. Customer Experience Testing

County may decide to perform quality testing on selected directory numbers (DNs). In the event County chooses to do so (DNs) using Dimension Data's Customer Experience Testing services, costs are per DN. Calls will be passed through from Dimension Data to County at cost to Dimension Data. This is a twelve-month program. Testing will occur daily (96 times in a 24-hour period) for the term of the contract.

Description	Quantity	Per DN	6-Months
Optional Services – Customer Experience Test – Call Assurance	TBD	$300/DN/mo	$1,800/DN
Optional Services – Customer Experience Test – IVR Assurance	TBD	$900/DN/mo	$5,400/DN

Table 8 – Customer Experience Testing Rates

7.3. Service Retainers and Prepayment

All services provided will be classified as either MACDs, Engineering Services, or Field Operations. MACDs and Engineering Services will be billed to retainers, as specified below, and Field Operations will be billed. County will make pre-payments of $10,000 for MACO Retainer, and $10,000 for a Performance Assurance Retainer (PAR). At the time either the MACO or PAR credit balances fall below $2,500 Dimension Data will invoice

County for additional payments in $5,000 increments. Dimension Data will not be paid more than $80,000 for the twelve month period for MACO and Engineering Services. Dimension Data is not guaranteed any amount of services under this section of the agreement. Any credit balances the last month concluding this agreement will be returned to County within 30 days or applied to any open balances.

7.3.1. MACO Retainer

User MACDs are billed per service unit(s) identified in Table 5: Service Unit Consumption Matrix Service Units (SU) are 15 minutes of service time, 1 SU = $25, with a multiplier as identified in Table 5.

System MACDs are billed at actual time spent. Business hours rates are in 15 minute intervals at a rate of $100 per hour. If the work will take longer than 4 hours to complete, the Service Delivery Manager will review the request with Sonoma County to determine if the scope of work should be performed by engineering services and thus billed to the Performance Assurance Retainer (PAR).

7.3.2. Performance Assurance Retainer

Engineering Services will be charged against the Performance Assurance Retainer (PAR) Service Retainers credits at rates defined below. Dimension Data will charge County in 15-minute increments. Dimension Data will provide a monthly record of the number of tickets performed, the ticket number assigned to the request, and the associated labor hours. The rates below will be billed in .25 hour increments. "After Hours" and "Business Hours" are defined in Section 6. Business Hours.

Table 9 – Rates

Category	Business Hours (rate per hour; billed in .25 hour)	After Hours (rate per hour; billed in .25 hour)
Principal Consultant	$275	$345
Technical Consultant	$225	$285
Program Manager	$240	$290
Senior Consultant	$225	$285
Project Manager	$190	$240
Senior Engineer	$185	$235
Consultant	$185	$225
Engineer	$150	$190
Project Coordinator	$125	$160
Technician	$110	$140

7.3.3. Engineering Rates

Engineering Services will be charged to the Performance Service Retainer and Dimension Data will assign the lowest rate possible based on the task assigned.

7.4. Field Operations

For all services provided by Field Operations, County will pay a flat monthly fee of $12,083.

Task	Cost
Technician and Project Services	$72,500
6-Months of Field Operations	$72,500
Monthly Field Operations Cost	$12,083

7.5. Invoice

a) System Monitoring costs will be invoiced monthly in advance for the following month.

b) Customer Experience Testing will be invoiced monthly per tested ON.

c) For MACDs and PARs retainers, Dimension Data will issue monthly statement the first of the month, showing the increments/services units consumed for the time accumulated through the last Friday of the preceding month. All activities will be itemized and charged in quarter hour increments.

d) Field Operations will be invoiced a flat monthly rate the first of the month for the previous month.

e) Materials Costs will be invoiced based on actual charges incurred the first of the month for the previous month.

7.6. . Total Costs

For all services and incidental costs required, Dimension Data will be paid in accordance with the terms described hereunder provided, however, that total payments to Dimension Data shall not exceed $311,662.

Baseline Services	6-Months
System Monitoring (all services and functionality described in Section 2 of this Scope of Work)	$159,162
MACD Service Retainer	$20,000
Performance Assurance Retainer	$20,000
Field Operations (all services described in Section 4 of this Scope of Work)	$72,500
Materials	$25,000
Baseline Services Cost	$296,662
Contingency	$15,000
Total Costs Not To Exceed	$311,662

8. County Requirements

- County will pay for relevant manufacturer hardware and software maintenance (Calabria, Microsoft, VMware, Informacast, etc) outside the scope of this agreement.
- County will purchase Cisco SmartNet device-level technical support and hardware coverage by Cisco Technical Assistance Center (CTAC).
- County's end users will contact the ISO Service Desk. Only level 2 and level 3 support tickets will be opened with Dimension Data by Sonoma County's Service Desk. .

9. Contact Information

Dimension Data acknowledges that County's first point of contact is the ISO Services Desk.

Exhibit B - Change Management

1. Change Management

Extra or changed work or other changes to this scope may be authorized only by written amendment. (See section 8.0 Extra or Changed Work in the Agreement for Services.)

Change Management in this section of the scope of work pertains to technical changes to County's unified communications, contact center and Calabria environment.

Dimension Data will maintain documentation that contains information about County devices and applications, as well as instructions on County contacts for notification, escalations, and authorizations for work to be performed.

Dimension Data agrees to submit changes in accordance with County's change management process.

a) Changes will include remediation steps for applicable problem and service requests tickets.

b) All changes to County's network environment will be scheduled in advance with ISO including work performed by third party vendors.

c) Where possible, changes should be scheduled for implementation during off hours or during defined maintenance windows or periods of low activity or risk.

d) Scheduled downtime for change will be planned.

e) All previous scheduled changes will be discussed to ensure all is working as desired and County is satisfied with results.

f) All relevant documentation regarding the change will be updated and provided to County.

1.1. Approval

Changes will not be implemented without County's approval.

1.2. County's Access to Core Network Components

ISO shall have administrator level access to unified communications, contact center, and Calabria network components on the ISO cluster.

ISO will provide SNMP Read Only access to network routers and switches for Dimension Data for the purpose of monitoring and troubleshooting. County reserves the right to deny access to any equipment depending on the sensitivity of the customer/agency involved.

ISO will continue to use its own network management system in parallel with Dimension Data's tools.

Exhibit D

Contractor shall maintain and require all of its subcontractors and other agents to maintain the insurance listed below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Contractor shall not commence Work, nor allow its employees, subcontractors or anyone to commence Work until the required insurance has been submitted and approved by County. Any requirement for Contractor to maintain insurance after completion of the Work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. County's failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or County's failure to identify any insurance deficiency shall not relieve Contractor from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. **Workers Compensation and Employers Liability Insurance**
   - **a.** Required if Contractor has employees as defined by the Labor Code of the State of California.
   - **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   - **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   - **d.** The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against County.
   - **e.** *Required Evidence of Insurance*:
     - **i.** Subrogation waiver endorsement; and
     - **ii.** Certificate of Insurance.

   If Contractor currently has no employees as defined by the Labor Code of the State of California, Contractor agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should any employees be engaged during the term of this Agreement or any extensions of the term.

2. **General Liability Insurance**
   - **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   - **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The General Aggregate shall apply separately to each Project. The required limits may be satisfied by a combination of General Liability Insurance and either Commercial Excess or Commercial Umbrella Liability Insurance. If Contractor maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Contractor.
   - **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by

County. Contractor is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Contractor has a claim against the insurance or is named as a party in any action involving the County.

d. Insurance shall be continued for one (1) year after completion of the Work.

e. County of Sonoma, its Officers, Agents and Employees, Attention Information Services Department, 2615 Paulin Dr., Santa Rosa, CA 95403 shall be endorsed as additional insureds for liability arising out of ongoing and completed operations by or on behalf of the Contractor in the performance of this Agreement. The foregoing shall continue to be additional insureds for one (1) year after completion of the Work under this Agreement.

f. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

g. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

h. The policy shall be endorsed to include a written waiver of the insurer's right to subrogate against County.

i. The policy shall cover inter-insured suits between the additional insureds and Contractor and include a "separation of insureds" or "severability" clause which treats each insured separately.

j. *Required Evidence of Insurance*:

- **i.** Copy of the additional insured endorsement or policy language granting additional insured status; and
- **ii.** Certificate of Insurance.

3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limit may be satisfied by a combination of Automobile Liability Insurance and either Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Contractor currently owns no autos, Contractor agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

4. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

5. Documentation

a. The Certificate of Insurance must include the following reference: Managed Services-Communications Contractor shall submit all required Evidence of Insurance prior to the execution of this Agreement. Contractor agrees to maintain current Evidence of Insurance on file with County as specified in Sections 1 – 3 above.

b. The name and address for Additional Insured endorsements and Certificates of Insurance is: County of Sonoma, its Officers, Agents and Employees, Attention Information Services

Department, 2615 Paulin Dr., Santa Rosa, CA 95403.

c. Contractor shall submit required Evidence of Insurance for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

d. Contractor shall provide immediate written notice if: (1) any of the required insurance policies are terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

e. Upon written request, Contractor shall provide certified copies of required insurance policies within thirty (30) days.

6. Policy Obligations

Contractor's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

7. Material Breach

If Contractor fails to maintain insurance which is required pursuant to this Agreement, such failure shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Contractor resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Contractor, County may deduct from sums due to Contractor any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 33
(This Section for use by Clerk of the Board Only.)

To: Board of Supervisors

Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s): Permit Sonoma	
Staff Name and Phone Number:	**Supervisorial District(s):**
Jennifer Faso (707) 565-1683	Districts 4 and 5

Title: Grant Deed of Agricultural Easement and Covenant, Farm Family Housing; ZPE17-0435

Recommended Actions:

Authorize the Chair of the Board of Supervisors to execute a Deed of Agricultural Easement and Covenant to allow one detached farm family dwelling unit on property located at 7013 Westside Road, Healdsburg, APN: 110-240-039.

Executive Summary:

The 34.3 acre subject parcel is zoned Land Intensive Agriculture and is developed with a winery (UPE09-0026), 10 acre vineyard, 5,000 square foot primary single family dwelling and other supportive agricultural uses. The subject parcel is currently in compliance with the existing Land Conservation Contract and will continue to be so with the addition of the farm family dwelling. The proposed 1,287 square foot farm family unit will be located within the winery building which is currently under construction. The farm family unit will have its own separate entrance and will function separately from the winery. The farm family unit will be occupied by the vineyard manager.

Staff recommends that the Board authorize the Chair of the Board of Supervisors to execute a Deed of Agricultural Easement and Covenant to allow for one detached farm family dwelling unit on a parcel zoned Land Intensive Agriculture and subject to a Williamson Act Land Conservation Contract.

Discussion:

To satisfy the stipulations of the Grand Deed of Agricultural Easement and Covent, the following requirements must be met:

1) An agricultural easement having a term equal to the useful life of the structure, but in no event less than twenty (20) years shall be offered to the county at the time of application.

2) A covenant shall be recorded, in a form satisfactory to county counsel, which acknowledges that, in the event that the agricultural use is terminated on the property, the farm family shall become a nonconforming residential use.

A farm family dwelling unit is defined as an additional single-family dwelling incidental to the main dwelling in terms of size, location and architecture which is not leased, rented, or sub-rented separately from the main dwelling nor divided by sale, and which is inhabited by a member of the farm operator's family.

The proposed request is consistent with the requirements above and a Grant Deed of Agricultural Easement and Covenant (Farm Family Housing) has been prepared for the request. The easement will cover the whole property. A farm family unit is considered a compatible use as described in the County's Agricultural Preserves and Farmland Security Zones Uniform Rules for contracted lands.

Staff Recommendation:
Staff recommends the Board authorize the Chair of the Board of Supervisors to execute a Deed of Agricultural Easement and Covenant to allow one farm family dwelling unit.

None

Goal 2: Economic and Environmental Stewardship

The provision of the farm family units helps sustain agriculture and agricultural business while providing affordable housing for the farm family members.

Original Grant Deed of Agricultural Easement and Covenant.

Arista Wines
Proposed Farm Family Dwelling Unit
7013 Westside Road
Healdsburg, CA 95448
APN: 110-240-039

Request for a Zoning Permit for a Farm Family Dwelling Unit to consist of a 1,287 square foot dwelling unit on the third floor of an existing winery building (7011 Westside Road). This unit will have its own, separate entrance from that of the winery.

The subject parcel is 34.3 acres and is zoned LIA (Land Intensive Agriculture), B6-60 acre density, F2, SR, VOH. A Williamson Act Type I contract is in effect and there is approximately 10+/- acres planted in Pinot Noir and Chardonnay vineyards.

UPE09-0026 was previously approved for a winery on the property that is currently under construction. Design Review for this building was approved under ADR16-0004. The approved building plans will not change the exterior of the building. The only changes needed to convert this storage space into a Farm Family Dwelling are interior.

County of Sonoma Agenda Item Summary Report

Clerk of the Board
575 Administration Drive
Santa Rosa, CA 95403

Agenda Item Number: 34
(This Section for use by Clerk of the Board Only.)

To: Sonoma County Board of Supervisors

Board Agenda Date: August 14, 2018

Vote Requirement: Majority

Department or Agency Name(s): Probation and Human Services

Staff Name and Phone Number:

David Koch, 565-2732
Karen Fies, 565-6990

Supervisorial District(s):

Title: 2018 Combined Fund Drive

Recommended Actions:

Recognize the 2018 County of Sonoma Combined Fund Drive leadership team, chair, David Koch, Probation, and co-chair, Karen Fies, Human Services, and delegate authority to the chairs to conduct the 2018 Fund Drive in partnership with the United Way of the Wine County; approve up to $5,500 in General Fund to cover the Fund Drive expenses; and delegate authority for the Fund Drive Chair to sign the Memorandum of Understanding with United Way of the Wine Country for the administration of the Fund Drive through March 29, 2019.

Executive Summary:

The United Way Combined Fund Drive Steering Committee requests the Board's approval to conduct the 28th Annual Combined Fund Drive in partnership with the United Way of the Wine Country. The annual Fund Drive theme for 2018 is "Laissez les Bon Temps Rouler!" (Let the Good Times Roll!)

A $5,500 budget is requested to cover the costs associated with campaign activities, which include the cost of the campaign lunch and incentives, communication costs, etc. The United Way of the Wine Country administers the fund drive and campaign contributions through a Memorandum of Understanding, which includes administrative activities such as the campaign enrollment process and system, collection of payroll deductions, anonymous distribution of donations, reporting, etc.

Discussion:

Last year's theme, "Make Hope Happen – Give, Act, Volunteer, Engage," included original artwork by County employees incorporated into the marketing of the campaign. The campaign also featured a Cake Off competition to close the campaign. The 2017 Fund Drive Campaign raised $ 274,379 for over 350 different non-profits throughout the County.

Last year the following non-profits received the largest contributions from the campaign:

Name	2017 Amount
United Way of the Wine Country	$56,959
America's Best Local Charities	$34,673
Sonoma County Family of Funds	$26,871
Redwood Empire Food Bank	$16,264
Community Health Charities	$12,361
EarthShare California	$10,326
Social Advocates for Youth	$3,869
Code Blue c/o Catholic Charities	$3,705
Pacific Northwest US Lifesaving Assoc.	$3,520
The Living Room Center, Inc.	$3,174

The 2018 Combined Fund Drive will run from September 17, 2018 through October 31, 2018. The campaign goal is to raise at least $300,000. The Fund Drive will include a BBQ campaign drive lunch, a "Bon Temps" Tricycle Race, an active communication strategy, and campaign incentives.

An enthusiastic and committed steering committee and group of departmental campaign leaders and excellent partnership with the United Way are the lifeblood of the Fund Drive, and knowing the generosity of Sonoma County employees and retirees, 2018 promises to be a success.

Prior Board Actions:

The Board has approved County participation in the Combined Fund Drive each year since 1990.

Strategic Plan Alignment Goal 4: Civic Services and Engagement

Fiscal Summary

United Way of the Wine Country

Memorandum of Understanding
United Way of the Wine Country, County of Sonoma Employees, & County of Sonoma Retired Employees

The County of Sonoma and United Way of the Wine Country (UWWC) agree:

Pursuant to County of Sonoma's Employee Fund Drive Policy, United Way of the Wine Country will be the Principal Combined Fund Drive Agency (PCFDA).

This plan for the 2018 Combined Fund Drive is to establish payroll deductions and other donation types from the salaries/wages of County of Sonoma officers and employees and County of Sonoma Retired Employees for the year beginning January 1, 2019.

PCFD Agency Name:	United Way of the Wine Country
Contact Person:	Jennifer O'Donnell, Interim President/CEO
Address:	975 Corporate Center Pkwy., Suite 160 Santa Rosa, CA 95407
Telephone & Email:	(707) 528-4485 xt. 110; Jennifer.odonnell@unitedwaywinecountry.org

UWWC further agrees:

To conduct an annual fundraising campaign with the goal of representing all federations equally.

That the percentage of fundraising and administrative costs to be charged in the 2018 Combined Fund Drive by the PCFDA to affiliated and nonaffiliated organizations is 12%.

To include the following statement on the paper pledge form and electronic pledging: "If paying by check, please make your check payable to County of Sonoma Employee Combined Fund Drive".

To pay out to all Agencies and Federations and coordinate their participation in the Combined Fund Drive campaign.

Agency/federation distributions will occur as follows: Designations made to agencies are sent in addition to any existing program funding provided by United Way. United Way does not pay the designated agency until the donor's pledge payment is received by United Way. Once United Way receives payments on pledges to a designated agency, we pay the designated agency quarterly (i.e. July, October, January, & April). Donor names and gift details are forwarded to designated agencies unless the donor chooses to remain anonymous.

The boundary of the area where this federation normally solicits public contributions is Sonoma, Mendocino, Lake, Humboldt, and Del Norte counties.

We hereby certify under penalty of perjury that our organization is in compliance with the provisions of the Fair Employment Practice Act, Part 4.5 (commencing with Section 1410) of Division 2 of the Labor Code.

To solicit contributions for the Combined Fund Drive and to not make public or distribute donor information. Donor information will be shared with nonprofit agencies and federations receiving donor designations unless otherwise specified by the donor.

To provide an electronic version of the agency guide to the County of Sonoma Campaign Committee and provide other campaign materials to be disbursed to County Employee Campaign Leaders and employees during the fund drive as needed. The guide will list charitable organizations along with their contact information.

To provide an electronic pledging website on which the County of Sonoma officers and employees may designate contributions to federations and nonprofit agencies.

United Way of the Wine Country

Memorandum of Understanding
United Way of the Wine Country, County of Sonoma Employees, & County of Sonoma Retired Employees

To provide a printable electronic copy of a form on which County of Sonoma employees/retirees without access to the internet can designate contributions to federations and nonprofit agencies. Such form will be provided in PDF and distributed to the County of Sonoma Campaign Committee to be posted on the employee intranet site in order to be accessed by County Employee Campaign Leaders. We recommend three copies of the completed form be made and distributed to the following parties for accounting purposes: Payroll Department for County of Sonoma or County of Sonoma Retired Employees, The PCFDA (UWWC), and the donor/employee.

To provide County representatives with full Combined Fund Drive financial reports (electronic or paper) within 60 days of close of campaign including details of employee designations upon request.

To distribute payroll deductions to write-in designations made by employees upon UWWC's verification of designated agency. In the case of designations made to a write-in or non-federated agency, the agency is eligible for donations if it is tax-exempt according to IRS Code 501(c)3. UWWC may request agencies to provide proof of their 501(c)3 status before sending any payments to the agency. In the event an agency does not respond or does not meet eligibility, UWWC will attempt to contact the donor directly to identify an alternative agency choice.

The County of Sonoma further agrees:
To cooperate with enhancements to be environmentally conscious by operating an electronic pledge (i.e. paperless) campaign.

To provide an electronic file of County of Sonoma employees to UWWC for online pledging to include: Employee's ID/unique identifier, employee name, email, and department information.

To provide an electronic file to UWWC accompanying each payroll check disbursement to include: Employee's ID/unique identifier, employee name, and donation/payment amount. Payroll Departments for County of Sonoma and County of Sonoma Retired Employees will email the electronic file to UWWC beginning with the first 2019 payment.

To send all payroll deductions for all agencies and federations to UWWC.

To comply with pledge instructions in the Campaign Booklet and on electronic pledge methods.

In the event of a Federation default, reallocation decisions will be made by the County Campaign Chairs.

To limit designated contributions for payroll deductions to a maximum of 5 designations per donor (electronic pledging and paper pledging).

To promote online electronic pledging tool awareness throughout the campaign using email, other messaging/communication, and Department Head communications.

By executing this MOU, each signatory represents they have the authority on the date of execution to execute this MOU on behalf of their respective governing bodies. At least two copies of this MOU shall be signed and exchanged by the parties, and each shall be considered an original document.

Title: Rips Redwoods Updated Trail Easement and Quitclaim to Improve Title

Recommended Actions:

Adopt resolution of the Board of Supervisors of Sonoma County authorizing the acquisition of a trail easement over a portion of the Rips Redwoods property, making certain findings, and authorizing all other actions necessary to establish a trail easement.

Authorize the Chair to execute a quitclaim deed as to the interest conveyed to the County of Sonoma by a Right of Entry, recorded on February 2, 1984 as Document Number 1984-007222 in the Office of the Sonoma County Recorder.

Executive Summary:

On June 5, 2018, the Board approved the acceptance of a trail easement donation from Rips Redwoods LLC to the County of Sonoma for access along the South Fork Gualala River. This item secures the Board's approval of a revised version of the trail easement deed. This item also seeks the Board's approval to quitclaim a right of entry that currently affects a portion of the Rips Redwoods property. This quitclaim is requested to improve conditions of title affecting the conservation easement that will be purchased by the Sonoma County Agricultural Preservation and Open Space District in connection with the donation of the trail.

Discussion:

Trail Easement

A trail easement on the Rips Redwoods property will allow public access from Stewarts Point – Skaggs Springs Road to the South Fork Gualala River once the County has developed the trail and staging area. The trail easement includes a staging area for parking, picnic tables, and restrooms, and an approximate 1.2-mile trail along with South Fork Gualala River, with identified locations for access to the river itself. The trail will generally follow an old logging road. Regional Parks will undertake a Public Access Management Plan in consultation with the landowner, which will further define the operation,

management, and improvements for the trail once funding has been identified and high priority projects have been completed.

On June 5, 2018, the Board of Supervisors adopted Resolution No. 18-0223 accepting a trail easement over a portion of the Rips Redwoods property. At that time, staff were still negotiating final details of the trail easement, but in the interest of expediting the transaction, the item was presented to the Board in anticipation that the parties would agree on the terms as they were described to the Board. Later negotiations prompted changes to the trail easement that are substantive enough to warrant approval by the Board, including:

- Per the landowner's request, agreeing to name the trail the "Rips Redwoods River Trail;"
- Allowing for re-routing the trail around natural disturbances as necessary;
- Clarifying the trail width; and
- Prior to public access, the County must prepare a Public Access Management Plan that is approved by the landowner.

Other minor, non-substantive changes have also been made to the trail easement through the process of negotiating the final document. The Board's adoption of the proposed resolution will rescind Resolution 18-0223.

Quitclaim Deed

In 1984, the County acquired a temporary right of entry upon the Rips Redwoods property for the purposes of constructing a bridge approach and driveway across the South Fork of the Gualala River. This right of entry, recorded on February 2, 1984 as Document Number 1984-007222 in the Office of the Sonoma County Recorder, was set to expire on December 31, 1985. Permanent rights covering and mooting these temporary rights were eventually secured in the land via deeds recorded as Document Numbers 1984-021648 and 1984-043305. However, the County never recorded a quitclaim to relinquish its temporary rights, even though they are no longer needed. As a result, the right of entry appears as an exception to title as to the conservation easement interest being purchased by the Sonoma County Agricultural Preservation and Open Space District. For these reasons, staff recommend that the Board authorize the Chair to execute a quitclaim deed as to the temporary interest conveyed to the County of Sonoma via the right of entry recorded as Document Number 1984-007222. Because this action is taken to clarify existing conditions of title as to expired and mooted temporary interests that are no longer needed by the County, this transaction may be approved pursuant to Government Code section 25526.5 and without compliance with the Surplus Lands Act.

Prior Board Actions:

June 5, 2018: Board of Supervisors accepts a trail easement over a portion of the Rips Redwoods property. (Reso #18-0223)

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

The trail easement acquisition will provide for additional public health and enjoyment.

County of Sonoma
State of California

Item Number: _____

Date: August 14, 2018 Resolution Number: _____

☐ 4/5 Vote Required

Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Making Certain Findings; Authorizing the Acquisition of a Trail Easement from Rips Redwoods LLC, Authorizing the Chair to Execute a the Trail Easement Agreement and Associated Certificate of Acceptance; Directing the Regional Parks Director to file a Notice of Exemption in Accordance with the California Environmental Quality Act; and Authorizing the Regional Parks Director to Take All Other Actions Necessary to Record the Trail Easement

Whereas, Rips Redwoods LLC owns approximately 1,600 acres of land off of Stewarts Point - Skaggs Springs Road and fronting onto nearly two miles of the South Fork Gualala River; and

Whereas, a public recreational trail across the Rips Redwoods property would further several goals and policies in the Sonoma County's General Plan 2020 by establishing a countywide park and trail system that meets future recreation needs of the County's residents while protecting agricultural uses and furthering efforts to designate a Gualala River Waterway Trail along the Gualala River; and

Whereas, the County of Sonoma ("County") and the Rips Redwoods have negotiated a Grant of Public Trail Easement ("Trail Easement") that conveys a public access easement to the County at no cost to the County; and

Whereas, the County's acceptance of the Trail Easement is categorically exempt from the California Environmental Quality Act pursuant to section 15316 of the CEQA guidelines because the project consists of the acquisition of land in order to establish a park where the land is in a natural condition and the management plan for the park has not been prepared; and

Now, Therefore, Be It Resolved that the Board of Supervisors of the County of Sonoma herby finds, determines, declares, and orders as follows:

1. *Truth of Recitals*. That the foregoing recitations are true and correct.

2. *General Plan Consistency*. That, pursuant to California Government Code

Section 65402, the Board of Directors of the Sonoma County Agricultural Preservation and Open Space District has determined in a previous action of this Board that the proposed acquisition of the Trail Easement by the County is consistent with the 2020 Sonoma County General Plan insofar as it promotes the "[The establishment of] a countywide park and trail system that meets future recreation needs of the County's residents while protecting agricultural uses." (Goal OSRC-17)

3. *Authority to Sign Contracts and Documents*. The Chair is authorized and directed to execute, on behalf of the County, a "Grant of Public Trail Easement" with the Rips Redwoods conveying a public trail easement, and a "Certificate of Acceptance" evidencing the County's acceptance of the Trail Easement. The Regional Parks Director is further authorized to execute any other documents necessary to record the Trail Easement as described. The Regional Parks Director is authorized to make any technical, non-substantive changes in the Trail Easement and other closing documents prior to recordation with the prior approval of County Counsel.

4. *The California Environmental Quality Act (CEQA)*. That the project authorized by this resolution – the acceptance of a public trail easement from the Rips Redwoods LLC – is categorically exempt from the requirements of CEQA pursuant to Section 15316 of the CEQA Guidelines as a transfer of land ownership in order to create parks. A Public Access Management Plan to guide development, operation, and maintenance of the trail will be prepared before any alteration of the land or public use of the trail.

5. *Authorization for Recordation*. That the Regional Parks Director is authorized and directed to record with the Sonoma County Recorder the Trail Easement and Certificate of Acceptance, and to deliver conformed copies of these documents, bearing evidence of recording, to the Clerk of the Board of Supervisors.

6. *Notice of Exemption*. That, immediately upon the adoption of this resolution, the Regional Parks Director is hereby authorized and directed to file a Notice of Exemption with the Sonoma County Clerk pursuant to Public Resources Code 21152.

7. *Prior Resolution Rescinded.* Resolution 18-0223, adopted by this Board on June 5, 2018, is hereby rescinded.

Title: Annual Federal Equitable Sharing Agreement and Certification with the U.S. Department of Justice and the U.S. Treasury.

Recommended Actions:

Authorize the Chairperson of the Board of Supervisors to execute an annual Federal Equitable Sharing Agreement and Certification with the U.S. Department of Justice and the U.S. Treasury, as timely annual reporting ensures eligibility for future funding.

Executive Summary:

Upon execution of the agreement and certification, the Sheriff's Office may continue to participate in the Department of Justice Equitable Sharing Program. Through this program, the Department of Justice distributes an equitable share of forfeited property and proceeds to participating state and local law enforcement agencies that directly participate in an investigation or prosecution that result in a federal forfeiture.

Each year, the Sheriff's Office must submit an agreement and certification within 60 days of the close of its fiscal year. The Sheriff's Office must report all equitably shared funds received during the last fiscal year and how those funds were spent.

Discussion:

The action requested of your Board is an annual activity required since 1997. It allows the Sheriff's Office, when working with federal agencies to enforce federal criminal laws, to receive the County's equitable share of federal asset forfeiture proceeds. The U.S. Department of Justice and Treasury requires the Chairperson of the Board of Supervisors to execute an annual Federal Equitable Sharing Agreement and Certification that confirms the proceeds received are allocated as required by federal statutes and regulations established by the U.S. Department of Justice and Treasury. The Agreement sets forth the statutory and regulatory requirements for participating in the program, and the restrictions upon the use of federally forfeited case property, proceeds, and any interest earned. All shared assets are required to be used only for law enforcement purposes. No supplantation is allowed.

These laws and regulations require that:

1. Forfeited funds or property must be kept separate from state or other forfeitures.
2. A federal Equitable Sharing Agreement and Certification be filed annually with both agencies.
3. A record shall be maintained of the funds or property and any expenditures; and
4. Funds exceeding $100,000 shall be audited annually.

The Sheriff's Office complies with all of the above listed laws and regulations. These funds are audited annually as part of the Single Audit of Federal Funds, which is performed by the Sonoma County Auditor-Controller-Treasurer-Tax Collector's Office.

The forfeited proceeds received through the Equitable Sharing Agreement vary greatly year to year (from $0 to several hundred thousand) as the receipt of funds are based on the resolution of specific court cases. Equitable shares allocated to a law enforcement agency such as the Sheriff's Office must bear a reasonable relationship to the agency's direct participation in the investigation or law enforcement effort resulting in the forfeiture. The U.S. Department of Justice ordinarily determines equitable shares by comparing the number of work hours expended by each agency participating in the seizure. Where the work hours alone do not reflect the contribution of a law enforcement agency, the U.S. Department of Justice considers qualitative factors in making a sharing allocation. When received, monies are placed into special asset forfeiture funds and must be used for law enforcement purposes only.

The Sheriff's Office received $0 in federally forfeited funds during the FY 2017-2018. The undesignated fund balances in the Department of Justice and the Treasury special funds for the fiscal year 2017-2018 will be approximately $227,752 and $5,695 respectively. Due to the unpredictable nature of revenue receipts, the Sheriff's Office usually recommends these funds be used for critical one-time projects. Expenditure appropriations in asset forfeiture special funds are approved by the Board. Past examples include the computer aided dispatch (CAD) system, security enhancements for the property\evidence storage annex, the purchase of oceangoing coastal patrol vessel, coastal resident deputy housing, build-out of Sheriff's main office shell space to reduce reliance on leased office space, and body worn cameras for Patrol deputies. In January 2015, the attorney general announced that the Justice Department is taking an important step to prohibit federal agency adoptions of state and local seizures. This was a major change to asset seizures that negatively impacts proceeds to local law enforcement.

The Certification Report included with the Agreement requires an electronic signature by the Agency Head (the Sheriff) and the Governing Body Head (the Chair of the Board) to certify under penalty of perjury that the County understands its obligations under the Agreement and that the reported financial information regarding the County's receipt and expenditure of the funds is true and correct. County Counsel has reviewed the language of the Certification, and has recommended that a letter accompany the Certification stating that it is being signed with the understanding that it is a *pro forma* document which does not require either the Sheriff or the Chair of the Board to personally verify the matters being certified.

Asset forfeiture funds generated as a result of the agreement are handled through the County's annual budget processes. For FY 18-19, $8,000 is appropriated for a non-post reimbursable executive management group workshop.

Prior Board Actions:

Board approval for the Federal Equitable Sharing Agreements and Annual Certification Reports for the past 25 years (1997 through 2017), most recently August 22, 2017.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

This item supports the strategic goal of a "safe, healthy, and caring community" by providing valuable resources to local law enforcement agencies which benefits the community.

Paperwork Reduction Act Notice

Under the Paperwork Reduction Act, a person is not required to respond to a collection of information unless it displays a valid OMB control number. We try to create accurate and easily understood forms that impose the least possible burden on you to complete. The estimated average time to complete this form is 30 minutes. If you have comments regarding the accuracy of this estimate, or suggestions for making this form simpler, please write to the Asset Forfeiture and Money Laundering Section: 1400 New York Avenue, N.W., Washington, DC 20005.

Controlled Equipment List Reporting

Pursuant to Executive Order 13688, "Federal Support for Local Law Enforcement Equipment Acquisition", a list of Controlled Equipment was developed. Should an agency intend to purchase controlled equipment with federal funding, including equitable sharing funds, the agency is required to take additional steps **prior** to purchasing the controlled equipment. The Table below must be used to report controlled equipment purchased by law enforcement agencies who have taken the necessary steps prior to purchasing the controlled equipment. Please note the amount of the expenditure for items reported below should also be reported in category d, "Law Enforcement Equipment" in the "Summary of Shared Funds Spent" section of the ESAC. If the agency purchased multiple pieces of the same controlled equipment (e.g., two airplanes) each piece of controlled equipment must be reported separately in this Table.

Controlled Equipment

Controlled Equipment Type	Justice Funds	Treasury Funds
Manned Aircraft, Rotary Wing	$1,763,630.00	

Affidavit

Under penalty of perjury, the undersigned officials certify that **they have read and understand their obligations under the Equitable Sharing Agreement** and that the information submitted in conjunction with this Document is an accurate accounting of funds received and spent by the Agency under the Guide during the reporting period and that the recipient Agency is compliant with the National Code of Professional Conduct for Asset Forfeiture.

The undersigned certify that the recipient Agency is in compliance with the applicable nondiscrimination requirements of the following laws and their implementing regulations: Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq.), Title IX of the Education Amendments of 1972 (20 U.S.C. § 1681 et seq.), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 794), and the Age Discrimination Act of 1975 (42 U.S.C. § 6101 et seq.), which prohibit discrimination on the basis of race, color, national origin, disability, or age in any federally assisted program or activity, or on the basis of sex in any federally assisted education program or activity. The Agency agrees that it will comply with all federal statutes and regulations permitting federal investigators access to records and any other sources of information as may be necessary to determine compliance with civil rights and other applicable statutes and regulations.

Equitable Sharing Agreement

This Federal Equitable Sharing Agreement, entered into among (1) the Federal Government, (2) the above-stated law enforcement agency ("Agency"), and (3) the governing body, sets forth the requirements for participation in the federal Equitable Sharing Program and the restrictions upon the use of federally forfeited cash, property, proceeds, and any interest earned thereon, which are equitably shared with participating law enforcement agencies. By submission of this form, the Agency agrees that it will be bound by the statutes and guidelines that regulate shared assets and the following requirements for participation in the Department of Justice and Department of the Treasury Equitable Sharing Programs. Receipt of the signed Equitable Sharing Agreement and Certification (this "Document") is a prerequisite to receiving any equitably shared cash, property, or proceeds.

1. Submission. This Document must be submitted within 60 days of the end of the Agency's fiscal year. This Document must be signed and submitted electronically. Electronic submission constitutes submission to the Department of Justice and the Department of the Treasury.

2. Signatories. This agreement must be signed by the head of the Agency and the head of the governing body. Examples of Agency heads include police chief, sheriff, director, commissioner, superintendent, administrator, city attorney, county attorney, district attorney, prosecuting attorney, state attorney, commonwealth attorney, and attorney general. The governing body's head is the head of the agency that appropriates funding to the Agency. Examples of governing body heads include city manager, mayor, city council chairperson, county executive, county council chairperson, administrator, commissioner, and governor. The governing body head cannot be from the law enforcement agency and must be from a separate entity.

3. Uses. Any shared asset shall be used for law enforcement purposes in accordance with the statutes and guidelines that govern the Department of Justice and the Department of the Treasury Equitable Sharing Programs as set forth in the current edition of the *Guide to Equitable Sharing for State and Local Law Enforcement Agencies (Guide).*

4. Transfers. Before the Agency transfers funds to other state or local law enforcement agencies, it must first verify with the Department of Justice that the receiving agency is a compliant Equitable Sharing Program participant. Transfers of tangible property are not permitted.

5. Internal Controls. The Agency agrees to account separately for federal equitable sharing funds received from the Department of Justice and the Department of the Treasury. Funds from state and local forfeitures, joint law enforcement operations funds, and other sources must not be commingled with federal equitable sharing funds.

The Agency certifies that funds are maintained by the jurisdiction maintaining appropriated funds and agrees that such accounting will be subject to the standard accounting requirements and practices employed by the Agency's jurisdiction in accordance with the requirements set forth in the current edition of the *Guide*, including the requirement to maintain relevant documents and records for five years.

The misuse or misapplication of shared resources or supplantation of existing resources with shared assets is prohibited. The Agency must follow its jurisdiction's procurement policies when expending shared funds. Failure to comply with any provision of this agreement shall subject the recipient agency to the sanctions stipulated in the current edition of the *Guide*.

6. Audit Report. Audits will be conducted as provided by the Single Audit Act Amendments of 1996 and OMB Super Circular,

Uniform Administrative Requirements, Costs Principles, and Audit Requirements for Federal Awards. The Department of Justice and the Department of the Treasury reserve the right to conduct periodic random audits or reviews.

7. Freedom of Information Act. Information provided in this Document is subject to the FOIA requirements of the Department of Justice and the Department of the Treasury.

During the past fiscal year: (1) has any court or administrative agency issued any finding, judgment, or determination that the Agency discriminated against any person or group in violation of any of the federal civil rights statutes listed above; or (2) has the Agency entered into any settlement agreement with respect to any complaint filed with a court or administrative agency alleging that the Agency discriminated against any person or group in violation of any of the federal civil rights statutes listed above?

Re: Equitable Sharing Agreement and Certification, fiscal year 2017-2018

Dear Acting Chief Conner:

The Sonoma County Sheriff's Office (SCSO) is in the process of submitting the Equitable Sharing Agreement and Certification (Affidavit – Existing Participant) as required by the US Department of Justice (DOJ) for the fiscal year ended 6/30/18 to obtain release of asset forfeiture funds.

In the past, the DOJ has rejected the Certification provided by the SCSO based on an interlineated change the County of Sonoma made to the form, which indicated that the signatories certified the information that was provided "based on their information and belief," rather than their direct knowledge. The County of Sonoma made this revision to the Certification pursuant to the DOJ's implied consent (see enclosed letter dated December 6, 2010), and because the Certification implied that the Sheriff and the Governing Body Head had direct and personal knowledge of all of the facts being verified under penalty of perjury. As the Sheriff and the Board of Supervisors are entitled to rely on information provided by County staff, the Certification should certify only their reasonable belief in the accuracy of such information. The DOJ had accepted the revised Certification for the years 2008 and 2009, but as of 2010, the DOJ required signature of the form Certification without such revisions as a precondition to releasing the funds.

It is therefore our understanding that the DOJ will no longer accept the Certification with the revisions the County of Sonoma deems necessary to ensure its accuracy. Accordingly, the enclosed Certification, signed by the Sheriff and the Chair of the County of Sonoma Board of Supervisors, is being provided both electronically and in hard copy with the understanding that this is a *pro forma* document which does not require the Sheriff or Chair of the Board of Supervisors be personally involved in the matters being certified.

If you have any questions or concerns, please do not hesitate to contact me at (707) 565-3928 or marta.peavey@sonoma-county.org.
Sincerely,

Marta Peavey
Supervising Accountant
Sonoma County Sheriff's Office

Title: Solid Waste Collection Franchise Agreement – Sonoma Garbage Collectors Second Amendment

Recommended Actions:

Authorize the Chair to execute Amendment No. 2 to the Solid Waste Collection Franchise Agreement By and Between the County of Sonoma and Sonoma Garbage Collectors (SGC) to: (a) provide a residential 20-gallon garbage can service option; and (b) change the audit period from Company's preceding fiscal year to County's preceding fiscal year.

Executive Summary:

On November 3, 2015, the Board approved the First Amendment to the Solid Waste Collection Franchise Agreement with SGC. The original agreement with SGC was approved by the Board on July 13, 2010. The 20-year Franchise Agreement provides for monthly franchise fees to be paid to the County based upon a percentage of gross revenue resulting from the franchise haulers' operations, ensures that all solid waste collected is delivered to the County's regional disposal system, provides special services including bulky item pickup, roadside collection of whole Christmas trees after the holiday, and walk-in service for the disabled free of charge. Additional contract provisions address control of solid waste flow, residual waste from the single-stream recycling facility, processing construction and demolition wastes, customer service, vehicle standards, and auditing and reporting requirements.

20 gallon can option

Unincorporated County customers of SGC have expressed interest in having a 20-gallon cart option to dispose of solid waste. The existing Agreement only offers rates for Single Family Dwellings a 32, 34, 64, and 96 gallon garbage can.

The existing Agreement offers the following residential service rates:

32 gallon can at $36.81

64 gallon can at $52.77

96 gallon can at $68.73

The proposed 20-gallon cart option is $31.36 per month. The rate for the new service has been set to cover the expected fixed service and equipment costs for this service, while providing a discount from the larger can size and an incentive to reduce waste.

Audit Period

The Auditor-Controller-Treasurer-Tax –Collector's (ACTTC) office recommends that the County align the tracking of franchise fee payments based on the County's fiscal year instead of the Company's fiscal year.

Discussion:

20 gallon can option

Unincorporated County customers of Sonoma Garbage Collectors have expressed interest in a 20-gallon cart option to dispose of solid waste. A 20-gallon option will allow customers to better match the size of the garbage can to the amount of waste they generate. Customers who elect to downsize garbage cans will effectively reduce their monthly garbage expense.

Audit Period

A 2017 audit of Redwood Empire Disposal (RED), now Recology, conducted by the Auditor-Controller-Treasurer-Tax –Collector's (ACTTC) office, recommended that the County realign the tracking of franchise fee payments based on the County's fiscal year instead of the Company's fiscal year. This recommendation was intended to extend to both RED's and SGC's Agreements but was never implemented. This second amendment will fulfil the ACTTC's audit recommendation by changing the audited franchise fee statement reporting period from January 1 – December 31 to July 1 – June 30.

In order to align franchise fee payments and reporting with the County's fiscal year, the ACTTC recommended that Section 7.3.2 of RED's Agreement be amended to reflect the recommendation.

Prior Board Actions:

11/03/15: Board approved the First Amendment to the Solid Waste Collection Franchise Agreement with SGC.

7/13/10: Board adopted Resolution No. 10-0559 approving a 20-year Solid Waste Collection Franchise Agreement with SGC.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

The Solid Waste Collection Franchise Agreement provide the Sonoma County communities with safe and efficient collection services for solid waste disposal, diverting recyclables, and organic materials.

SECOND AMENDMENT TO SOLID WASTE COLLECTION FRANCHISE AGREEMENT

This amendment ("Second Amendment") is entered into as of July 1, 2018 ("Effective Date") by and between the County of Sonoma ("County") and Sonoma Garbage Collectors ("Company").

RECITALS

WHEREAS, on July 13, 2010, County and Company entered into a Solid Waste Collection Franchise Agreement ("Original Agreement"); and

WHEREAS, County and Company amended the Original Agreement on October 6, 2015 ("First Amendment"); and

WHEREAS, the Original Agreement as modified by the First Amendment is hereafter referred to as the "Agreement"; and

WHEREAS, County and Company desire to amend the Agreement to provide unincorporated County customers of Sonoma Garbage Collectors with a 20-gallon residential service option; and

WHEREAS, County and Company desire to amend the Agreement to change the audit period from Company's preceding fiscal year to County's preceding fiscal year.; and

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties agree as follows:

AGREEMENT

1. Section 7.3.2 (Financial Information) shall be amended to read:

> "By October 1st of each year, Company shall deliver to the County two (2) copies of the audited franchise fee statements of franchise fees due under this Agreement for the period of co-extensive with the County's preceding fiscal year. With regard to reporting net revenues related to the processing of Recyclable Materials, Company shall provide the independent certified public accountant performing the franchise fee audit with the financial data required to document the proper reporting of gross revenues collected from Recyclables net of the allowed processing fee of $75 per ton (as adjusted by this Agreement). The annual franchise fee statements shall be prepared in accordance with this Agreement and shall be audited in accordance with Generally Accepted Accounting Principles (GAAP) consistently applied. Annual franchise fee statements shall be audited in accordance with Generally Accepted Auditing Standards (GAAS) by an independent third party Certified Public Accountant (CPA) licensed (in good standing) to practice public accounting in the State of California as determined by the State of California Department of Consumer Affairs Board of Accountancy. The CPA opinion on Company's annual franchise fee statements shall be unqualified.

2. Exhibit C (Service Rates) shall be deleted entirely and replaced with the revised Exhibit C, attached hereto as Attachment 1 to this Second Amendment.

3. Except to the extent the Agreement is specifically amended or supplemented hereby, the Agreement, together with exhibits, shall continue to be in full force and effect as originally executed, and nothing contained herein shall be construed to modify, invalidate, or otherwise affect any provision of the Agreement or any right of County arising thereunder. All capitalized terms used herein shall, unless otherwise defined, have the meaning ascribed to those terms in the Agreement, as amended.

4. The Recitals are incorporated into and form a part of this Second Amendment.

COUNTY AND COMPANY HAVE CAREFULLY READ AND REVIEWED THIS SECOND AMENDMENT AND EACH TERM AND PROVISION CONTAINED HEREIN AND, BY EXECUTION OF THIS SECOND AMENDMENT, SHOW THEIR INFORMED AND VOLUNTARY CONSENT THERETO.

IN WITNESS WHEREOF, County and Company have executed this Second Amendment as of the Effective Date.

(This Section for use by Clerk of the Board Only.)

To: Board of Supervisors

Board Agenda Date: August 14, 2018	**Vote Requirement:** Majority
Department or Agency Name(s): Transportation and Public Works	
Staff Name and Phone Number:	**Supervisorial District(s):**
Johannes J. Hoevertsz 707-565-2231	Fourth

Title: Agreement with OPAC Consulting Engineers, for design of the Chalk Hill Road Bridge over Maacama Creek Bridge Replacement Project.

Recommended Actions:

Authorize the Chair to execute the agreement with OPAC Consulting Engineers for engineering design services for the Chalk Hill Road Bridge over Maacama Creek Bridge Replacement Project for a not to exceed amount of $1,779,974, with a term ending 5 years from date of execution.

Staff also recommends the Board authorize the Director of Transportation and Public Works to execute a 10% contingency in the amount of $177,997 to fund additional, unforeseen scope changes for the related work.

Executive Summary:

Following a Request for Proposals (RFP) and an extensive Caltrans audit, Transportation and Public Works (TPW) selected OPAC Consulting Engineers (OPAC) as the most suitable consultant to provide engineering design services for a new bridge. These services could include environmental and geotechnical studies as well as design and construction support to be provided until the project is fully completed including the construction phase.

The department requests the Board of Supervisors authorize the Chair to execute the Professional Services Agreement between the County of Sonoma and OPAC for $1,779,974 with a term ending December 31, 2023. Additionally, staff also recommends the Board authorize the Director of TPW to execute a 10% contingency for $177,997 to fund additional, unforeseen scope changes.

Discussion:

The current Chalk Hill road bridge over Maacama Creek is a concrete structure built in 1915. The bridge is designated as a Sonoma County Landmark and may be eligible for inclusion in the National Register of Historic places however, seismic retrofitting and upgrading the structure to current state and federal

standards would be extremely costly and would have a short lifespan. For these reasons, federal program funds are not available to pursue this approach.

County staff have facilitated public meetings about plans to replace the current bridge and the local community have expressed a strong interest in the project as well as concerns over the future of the original bridge and potential solutions.

In September 2017, TPW issued a RFP for design services. Ongoing public outreach was identified as one of the key tasks to be evaluated in the RFP and each proposer's various strategies for including these services were considered in evaluating all responses. Seven companies responded and after evaluating their proposals, all were interviewed by a panel of TPW and Permit Sonoma staff, with OPAC identified as the preferred consultant. The selection process was completed in November followed by extensive work to finalize a draft agreement and complete a Caltrans financial audit of the proposed agreement. This process was completed in May 2018 with Caltrans issuing approval for the Department to proceed in executing a contract.

TPW recommends the Board authorize the Chair to execute this contract on behalf of the County of Sonoma. Design and construction of a new bridge is critical and has received state and federal approval. Failure to execute this contract would delay any replacement strategy by years and could require the County of Sonoma having to return any federal funds that have been previously spent in developing this project.

Federal funds have already been approved to reimburse the design costs of this project and staff anticipates design and environmental work beginning this month.

Prior Board Actions:

None

Strategic Plan Alignment Goal 3: Invest in the Future

This project will invest in the future by upgrading public infrastructure to current standards and provide the community with a new bridge that has a significant operational lifespan.

AGREEMENT FOR CONSULTING SERVICES

This agreement ("Agreement" dated as of_____, 2018 ("Effective Date") is by and between the County of Sonoma, a political subdivision of the State of California (hereinafter "County"), and OPAC Consulting Engineers (hereinafter "Consultant").

RECITALS

WHEREAS, Consultant represents that it is a duly qualified and licensed civil engineer, experienced in the preparation of and related services; and

WHEREAS, in the judgment of the Department of Transportation & Public Works, it is necessary and desirable to employ the services of Consultant for Design Services related to replacement of the Chalk Hill Road over Maacama Creek Bridge.

NOW, THEREFORE, in consideration of the foregoing recitals and the mutual covenants contained herein, the parties hereto agree as follows:

AGREEMENT

l. Scope of Services.

1.1 Consultant's Specified Services.

Consultant shall perform the services described in Exhibit "A," attached hereto and incorporated herein by this reference (hereinafter "Scope of Work"), and within the times or by the dates provided for in Exhibit "A" and pursuant to Article 7, Prosecution of Work. In the event of a conflict between the body of this Agreement and Exhibit "A", the provisions in the body of this Agreement shall control. Without limiting the foregoing, Consultant expressly agrees to comply with all Disadvantaged Business Enterprise ("DBE") requirements imposed on this Agreement as more specifically described in Section 13.4, below, and Exhibit "C" hereto.

1.2 Cooperation With County.

Consultant shall cooperate with County and County staff in the performance of all work hereunder.

1.3 Performance Standard.

Consultant shall perform all work hereunder in a manner consistent with the level of competency and standard of care normally observed by a person practicing in Consultant's profession. County has relied upon the professional ability and training of Consultant as a material inducement to enter into this Agreement. Consultant hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor's work by County shall not operate as a waiver or release. If County determines that any of Consultant's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require Consultant to meet with County to review the quality of the work and resolve matters of concern; (b) require Consultant to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

1.4 Assigned Personnel.

1.4.1 Consultant shall assign only competent personnel to perform work hereunder. In the event that at any time County, in its sole discretion, desires the removal of any person or persons assigned by Consultant to perform work hereunder, Consultant shall remove such person or persons immediately upon receiving written notice from County.

1.4.2 Any and all persons identified in this Agreement or any exhibit hereto as the project manager, project team, or other professional performing work hereunder are deemed by County to be key personnel whose services were a material inducement to County to enter into this Agreement, and without whose services County would not have entered into this Agreement. Consultant shall not remove, replace, substitute, or otherwise change any key personnel without the prior written consent of County.

1.4.3 In the event that any of Consultant's personnel assigned to perform services under this Agreement become unavailable due to resignation, sickness or other factors outside of Consultant's control, Consultant shall be responsible for timely provision of adequately qualified replacements.

1.5 Consultant's Reports or Meetings.

1.5.1 Consultant shall submit progress reports at least once a month. The report should be sufficiently detailed for the Contract Administrator to determine, if Consultant is performing to expectations, or is on schedule; to provide communication of interim findings, and to sufficiently address any difficulties or special problems encountered, so remedies can be developed.

1.5.2 Consultant's Project Manager shall meet with County's Contract Administrator, as needed, to discuss progress on the contract.

2. Allowable Costs and Payments.

2.1 Method of payment.

The contract will be based on actual cost plus a fixed fee. County will reimburse Consultant for actual costs (including labor costs, employee benefits, travel, equipment rental costs, overhead and other direct costs) incurred by Consultant in performance of the work. Consultant will not be reimbursed for actual costs that exceed the estimated wage rates, employee benefits, travel, equipment rental, overhead, and other estimated costs set forth in the approved Consultant's Cost Proposal, attached hereto as Exhibit A, Attachment 1, unless additional reimbursement is provided for by contract amendment. In no event, will Consultant be reimbursed for overhead costs at a rate that exceeds County's approved overhead rate set forth in the Cost Proposal. In the event, that County determines that a change to the work from that specified in the Cost Proposal and contract is required, the contract time or actual costs reimbursable by County shall be adjusted by contract amendment to accommodate the changed work. The maximum total cost as specified Article 2.8 shall not be exceeded, unless authorized by contract amendment.

2.2 Fixed Fee.

Subject to the termination right stated in Article 4.2, in addition to the allowable incurred costs, County will pay Consultant a fixed fee of $84,331.03. The fixed fee is nonadjustable for the term of the contract, except in the event of a significant change in the scope of work and such adjustment is made by contract amendment.

2.3 Transportation & Subsistence.

Reimbursement for transportation and subsistence costs shall not exceed the rates specified in the approved Cost Proposal.

2.4 Milestone Costs.

When milestone cost estimates are included in the approved Cost Proposal, Consultant shall obtain prior written approval for a revised milestone cost estimate from the Contract Administrator before exceeding such cost estimate.

2.5 Progress Payments.

Progress payments will be made monthly in arrears based on services provided and allowable incurred costs. A pro rata portion of Consultant's fixed fee will be included in the monthly progress payments. If Consultant fails to submit the required deliverable items according to the schedule set forth in the Statement of Work, County shall have the right to delay payment or terminate this Contract in accordance with the provisions of Article 4, Termination.

2.6 Payment.

No payment will be made prior to approval of any work, nor for any work performed prior to approval of this contract.

2.7 Invoices.

Consultant will be reimbursed, as promptly as fiscal procedures will permit upon receipt by County's Contract Administrator of itemized invoices. Invoices shall be submitted no later than 45 calendar days after the performance of work for which Consultant is billing. Invoices shall detail the work performed on each milestone and each project as applicable. Invoices shall follow the format stipulated for the approved Cost Proposal and shall reference this contract number and project title. Final invoice must contain the final cost and all credits due County including any equipment purchased under the provisions of Article 13.13 Equipment Purchase of this contract. The final invoice should be submitted within 60 calendar days after completion of Consultant's work. Invoices shall be mailed to County's Contract Administrator at the following address:

Samuel Baumgardner
2300 County Center Drive, Suite B-100 Santa Rosa, CA 95403
(707) 565-2231
samuel.baumgardner@sonoma-County.org

2.8 Contract Value.

The total amount payable by County including the fixed fee shall not exceed $1,779,973.64.

2.9 Salary Increases.

Salary increases will be reimbursable if the new salary is within the salary range identified in the approved Cost Proposal and is approved by County's Contract Administrator.

For personnel subject to prevailing wage rates as described in the California Labor Code, all salary increases, which are the direct result of changes in the prevailing wage rates are reimbursable.

2.10 Invoicing.

Consultant shall submit its bills in arrears on a monthly basis in a form approved by County's Auditor and the Head of the County Department receiving the services. The bills shall show or include: (i) the task(s) performed; (ii) the time in quarter hours devoted to the task(s); (iii) the

hourly rate or rates of the persons performing the task(s); and (iv) copies of receipts for reimbursable materials/expenses, if any. Expenses not expressly authorized by the Agreement shall not be reimbursed, including invoices paid to sub-contractors for work required included in the prime consultant's invoice. Consultant shall submit the Subcontractor Payment Declaration with each invoice.

Unless otherwise noted in this agreement, payments shall be made within the normal course of County business after presentation of an invoice in a form approved by the County for services performed. Payments shall be made only upon the satisfactory completion of the services as determined by the County.

2.11 Taxes.

Pursuant to California Revenue and Taxation code (R&TC) Section 18662, the County shall withhold seven percent of the income paid to Consultant for services performed within the State of California under this agreement, for payment and reporting to the California Franchise Tax Board, if Consultant does not qualify as: (1) a corporation with its principal place of business in California, (2) an LLC or Partnership with a permanent place of business in California, (3) a corporation/LLC or Partnership qualified to do business in California by the Secretary of State, or (4) an individual with a permanent residence in the State of California.

If Consultant does not qualify, County requires that a completed and signed Form 587 be provided by the Consultant in order for payments to be made. If consultant is qualified, then the County requires a completed Form 590. Forms 587 and 590 remain valid for the duration of the Agreement provided there is no material change in facts. By signing either form, the contractor agrees to promptly notify the County of any changes in the facts. Forms should be sent to the County pursuant to Article 12. To reduce the amount withheld, Consultant has the option to provide County with either a full or partial waiver from the State of California.

3. Term of Agreement.

3.1 Term.

This contract shall go into effect on the Effective Date, contingent upon approval by County, and Consultant shall commence work after notification to proceed by County's Contract Administrator. The contract shall end on 31 December 2023, unless extended by contract amendment.

3.2 Contract Execution.

Consultant is advised that any recommendation for contract award is not binding on County until the contract is fully executed and approved by County.

4. Termination

4.1. Notice Period.

County reserves the right to terminate this contract upon thirty (30) calendar days written notice to Consultant with the reasons for termination stated in the notice.

4.2 Grounds for Termination.

County may terminate this contract with Consultant should Consultant fail to perform the covenants herein contained at the time and in the manner herein provided. In the event of such termination, County may proceed with the work in any manner deemed proper by County. If County terminates this contract with Consultant, County shall pay Consultant the sum due to Consultant under this contract prior to termination, unless the cost of completion to County exceeds the funds remaining

in the contract. In which case the overage shall be deducted from any sum due Consultant under this contract and the balance, if any, shall be paid to Consultant upon demand.

4.3 Liability.

The maximum amount for which the Government shall be liable if this contract is terminated is 1,779,973.64 dollars.

4.4 Authority to Terminate.

The Board of Supervisors has the authority to terminate this A greement on behalf of the County. In addition, the Purchasing Agent or Department Head, in consultation with County Counsel, shall have the authority to terminate this Agreement on behalf of the County.

5. Indemnification.

Consultant agrees to accept responsibility for loss or damage to any person or entity, including County, and to defend, indemnify, hold harmless, and release County, its officers, agents, and employees, from and against any actions, claims, damages, liabilities, disabilities, or expenses, that may be asserted by any person or entity, including Consultant, that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant or its agents, employees, contractors, subcontractors, or invitees hereunder, whether or not there is concurrent or contributory negligence on County's part, but, to the extent required by law, excluding liability due to County's conduct. This indemnification obligation is not limited in any way by any limitation on the amount or type of damages or compensation payable to or for Consultant or its agents, employees, contractors, subcontractors, or invitees under workers' compensation acts, disability benefits acts, or other employee benefit acts.

6. Insurance.

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain, insurance as described in Exhibit B Sonoma County Insurance Requirements, which is attached hereto and incorporated herein by this reference.

7. Prosecution of Work.

The execution of this Agreement shall constitute Consultant's authority to proceed immediately with the performance of this Agreement. Performance of the services hereunder shall be completed within the time required herein, provided, however, that if the performance is delayed by earthquake, flood, high water, or other Act of God or by strike, lockout, or similar labor disturbances, the time for Consultant's performance of this Agreement shall be extended by a number of days equal to the number of days Consultant has been delayed.

8. Extra or Changed Work.

Extra or changed work or other changes to the Agreement may be authorized only by written amendment to this Agreement, signed by both parties. Minor changes, which do not increase the amount paid under the Agreement, and which do not significantly change the scope of work or significantly lengthen time schedules may be executed by the Department Head in a form approved by County Counsel. The Board of Supervisors/Purchasing Agent must authorize all other extra or changed work. The parties expressly recognize that, pursuant to Sonoma County Code Section 1-11, County personnel are without authorization to order extra or changed work or waive Agreement requirements. Failure of Consultant to secure such written authorization for extra or changed work shall constitute a waiver of any and all right to adjustment in the Agreement price or Agreement time due to such unauthorized work and thereafter Consultant shall be entitled to no compensation whatsoever for the performance of such work. Consultant

further expressly waives any and all right or remedy by way of restitution and quantum meruit for any and all extra work performed without such express and prior written authorization of the County.

9. Representations of Consultant.

9.1 Standard of Care.

County has relied upon the professional ability and training of Consultant as a material inducement to enter into this Agreement. Consultant hereby agrees that all its work will be performed and that its operations shall be conducted in accordance with generally accepted and applicable professional practices and standards as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Consultant's work by County shall not operate as a waiver or release.

9.2 Status of Consultant.

The parties intend that Consultant, in performing the services specified herein, shall act as an independent contractor and shall control the work and the manner in which it is performed. Consultant is not to be considered an agent or employee of County and is not entitled to participate in any pension plan, worker's compensation plan, insurance, bonus, or similar benefits County provides its employees. In the event County exercises its right to terminate this Agreement pursuant to Article 4, above, Consultant expressly agrees that it shall have no recourse or right of appeal under rules, regulations, ordinances, or laws applicable to employees.

9.3 No Suspension or Debarment.

Consultant's signature affixed herein, shall constitute a certification under penalty of perjury under the laws of the State of California, that Consultant has complied with Title 2 CFR, Part 180, "OMB Guidelines to Agencies on Government wide Debarment and Suspension (nonprocurement)", which certifies that he/she or any person associated therewith in the capacity of owner, partner, director, officer, or manager, is not currently under suspension, debarment, voluntary exclusion, or determination of ineligibility by any federal agency; has not been suspended, debarred, voluntarily excluded, or determined ineligible by any federal agency within the past three (3) years; does not have a proposed debarment pending; and has not been indicted, convicted, or had a civil judgment rendered against it by a court of competent jurisdiction in any matter involving fraud or official misconduct within the past three (3) years. Any exceptions to this certification must be disclosed to County.

Exceptions will not necessarily result in denial of recommendation for award, but will be considered in determining Consultant responsibility. Disclosures must indicate to whom exceptions apply, initiating agency, and dates of action.

Exceptions to the Federal Government Excluded Parties List System maintained by the General Services Administration are to be determined by the Federal highway Administration.

9.4 Taxes.

Consultant agrees to file federal and state tax returns and pay all applicable taxes on amounts paid pursuant to this Agreement and shall be solely liable and responsible to pay such taxes and other obligations, including, but not limited to, state and federal income and FICA taxes. Consultant agrees to indemnify and hold County harmless from any liability which it may incur to the United States or to the State of California as a consequence of Consultant's failure to pay, when due, all such taxes and obligations. In case County is audited for compliance regarding any withholding or other applicable taxes, Consultant agrees to furnish County with proof of payment of taxes on

these earnings.

9.5 Records Maintenance.

Consultant shall keep and maintain full and complete documentation and accounting records concerning all services performed that are compensable under this Agreement and shall make such documents and records available to County for inspection at any reasonable time. Consultant shall maintain such records for a period of four (4) years following completion of work hereunder.

9.6 Conflict of Interest.

9.6.1 Consultant shall disclose any financial, business, or other relationship with County that may have an impact upon the outcome of this contract, or any ensuing County construction project. Consultant shall also list current clients who may have a financial interest in the outcome of this contract, or any ensuing County construction project, which will follow.

9.6.2 Consultant hereby certifies that it does not now have, nor shall it acquire any financial or business interest that would conflict with the performance of services under this contract.

9.6.3 Consultant hereby certifies that neither Consultant, nor any firm affiliated with Consultant will bid on any construction contract, or on any contract to provide construction inspection for any construction project resulting from this contract. An affiliated firm is one, which is subject to the control of the same persons through joint-ownership, or otherwise.

9.6.4 Except for subconsultants whose services are limited to providing surveying or materials testing information, no subconsultant who has provided design services in connection with this contract shall be eligible to bid on any construction contract, or on any contract to provide construction inspection for any construction project resulting from this contract.

9.7 Statutory Compliance.

Contractor agrees to comply with all applicable federal, state and local laws, regulations, statutes and policies applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Consultant expressly agrees, on behalf of itself and on behalf of all its agents, employees, subconsultants, and subcontractors, to comply with the federal contract requirements set forth in Section 13 herein.

9.8 Living Wage Ordinance.

Consultant agrees to comply with all applicable federal, state and local laws, regulations, statutes and policies, including but not limited to the County of Sonoma Living Wage Ordinance, applicable to the services provided under this Agreement as they exist now and as they are changed, amended or modified during the term of this Agreement. Without limiting the generality of the foregoing, Consultant expressly acknowledges and agrees that this Agreement is subject to the provisions of Article XXVI of Chapter 2 of the Sonoma County Code, requiring payment of a living wage to covered employees. Noncompliance during the term of the Agreement will be considered a material breach and may result in termination of the Agreement or pursuit of other legal or administrative remedies.

9.9 Nondiscrimination.

Without limiting any other provision hereunder, Consultant shall comply with all applicable federal, state, and local laws, rules, and regulations in regard to nondiscrimination in employment because of race, color, ancestry, national origin, religion, sex, marital status, age, medical condition, pregnancy, disability, sexual orientation or other prohibited basis, including without limitation, the County's Non-Discrimination Policy. All nondiscrimination rules or regulations required by law to be included in this Agreement are incorporated herein by this reference.

9.10 Statement of Compliance.

9.10.1 Consultant's signature affixed herein, and dated, shall constitute a certification under penalty of perjury under the laws of the State of California that Consultant has, unless exempt, complied with, the nondiscrimination program requirements of Government Code Section 12990 and Title 2, California Administrative Code, Section 8103.

9.10.2 During the performance of this Contract, Consultant and its subconsultants shall not unlawfully discriminate, harass, or allow harassment against any employee or applicant for employment because of sex, race, color, ancestry, religious creed, national origin, physical disability (including HIV and AIDS), mental disability, medical condition (e.g., cancer), age (over 40), marital status, and denial of family care leave. Consultant and subconsultants shall insure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. Consultant and subconsultants shall comply with the provisions of the Fair Employment and Housing Act (Gov. Code §12990 (a-f) et seq.) and the applicable regulations promulgated there under (California Code of Regulations, Title 2, Section 7285 et seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code Section 12990 (a-f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations, are incorporated into this Contract by reference and made a part hereof as if set forth in full. Consultant and its subconsultants shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other Agreement.

9.10.3 The Consultant shall comply with regulations relative to Title VI (nondiscrimination in federally-assisted programs of the Department of Transportation – Title 49 Code of Federal Regulations, Part 21 - Effectuation of Title VI of the 1964 Civil Rights Act). Title VI provides that the recipients of federal assistance will implement and maintain a policy of nondiscrimination in which no person in the state of California shall, on the basis of race, color, national origin, religion, sex, age, disability, be excluded from participation in, denied the benefits of or subject to discrimination under any program or activity by the recipients of federal assistance or their assignees and successors in interest.

9.10.4 The Consultant, with regard to the work performed by it during the Agreement shall act in accordance with Title VI. Specifically, the Consultant shall not discriminate on the basis of race, color, national origin, religion, sex, age, or disability in the selection and retention of Subconsultants, including procurement of materials and leases of equipment. The Consultant shall not participate either directly or indirectly in the discrimination prohibited by Section 21.5 of the U.S. DOT's Regulations, including employment practices when the Agreement covers a program whose goal is employment.

9.11 AIDS Discrimination.

Consultant agrees to comply with the provisions of Chapter 19, Article II, of the Sonoma County

Code prohibiting discrimination in housing, employment, and services because of AIDS or HIV infection during the term of this Agreement and any extensions of the term.

9.12 Assignment of Rights.

Consultant assigns to County all rights throughout the world in perpetuity in the nature of copyright, trademark, patent, right to ideas, in and to all versions of the plans and specifications, if any, now or later prepared by Consultant in connection with this Agreement. Consultant agrees to take such actions as are necessary to protect the rights assigned to County in this Agreement, and to refrain from taking any action which would impair those rights. Consultant's responsibilities under this provision include, but are not limited to, placing proper notice of copyright on all versions of the plans and specifications as County may direct, and refraining from disclosing any versions of the plans and specifications to any third party without first obtaining written permission of County.

Consultant shall not use or permit another to use the plans and specifications in connection with this or any other project without first obtaining written permission of County.

9.13 Ownership and Disclosure of Work Product.

All reports, original drawings, graphics, plans, studies, and other data or documents ("documents"), in whatever form or format, assembled or prepared by Consultant or Consultant's subcontractors, consultants, and other agents in connection with this Agreement shall be the property of County. County shall be entitled to immediate possession of such documents upon completion of the work pursuant to this Agreement. Upon expiration or termination of this Agreement, Consultant shall promptly deliver to County all such documents, which have not already been provided to County in such form or format, as County deems appropriate. Such documents shall be and will remain the property of County without restriction or limitation. Consultant may retain copies of the above-described documents but agrees not to disclose or discuss any information gathered, discovered, or generated in any way through this Agreement without the express written permission of County.

9.14 Authority.

The undersigned hereby represents and warrants that he or she has authority to execute and deliver this Agreement on behalf of Consultant.

10. Demand for Assurance.

Each party to this Agreement undertakes the obligation that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party, the other may in writing demand adequate assurance of due performance and until such assurance is received may, if commercially reasonable, suspend any performance for which the agreed return has not been received. "Commercially reasonable" includes not only the conduct of a party with respect to performance under this Agreement, but also conduct with respect to other agreements with parties to this Agreement or others. After receipt of a justified demand, failure to provide within a reasonable time, but not exceeding thirty (30) days, such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of this Agreement. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

Neither party hereto shall assign, delegate, sublet, or transfer any interest in or duty under this Agreement

without the prior written consent of the other, and no such transfer shall be of any force or effect whatsoever unless and until the other party shall have so consented.

12. Method and Place of Giving Notice, Submitting Bills and Making Payments.

All notices, bills, and payments shall be made in writing and shall be given by personal delivery or by U.S. Mail or courier service. Notices, bills, and payments shall be addressed as follows:

To County:

Sonoma County Department of Transportation and Public Works
Attn: Samuel Baumgardner
2300 County Center Drive, Suite B-100 Santa Rosa, CA 95403
(707) 565-2231
Samuel.Baumgardner@sonoma-county.org

To Consultant:

OPAC Consulting Engineers
Attn: Francis Drouillard
315 Bay Street, Second Floor
San Francisco, CA 94133
(415) 989-4551
fdrouillard@opacengineers.com

When a notice, bill or payment is given by a generally recognized overnight courier service, the notice, bill or payment shall be deemed received on the next business day. When a copy of a notice, bill or payment is sent by facsimile or email, the notice, bill or payment shall be deemed received upon transmission as long as (1) the original copy of the notice, bill or payment is promptly deposited in the U.S. mail and postmarked on the date of the facsimile or email (for a payment, on or before the due date), (2) the sender has a written confirmation of the facsimile transmission or email, and (3) the facsimile or email is transmitted before 5 p.m. (recipient's time). In all other instances, notices, bills and payments shall be effective upon receipt by the recipient. Changes may be made in the names and addresses of the person to whom notices are to be given by giving notice pursuant to this paragraph.

13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanction; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than seven (7) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Section 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment,

unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR26.29) requires that any delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.

13.4.2 The goal for DBE participation for this contract is 9%. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.

13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. Consultant or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Consultant shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. Failure by Consultant to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as County deems appropriate.

13.4.4 Any subcontract entered into as a result of this contract shall contain all of the provisions of this section.

13.4.5 A DBE firm may be terminated only with prior written approval from County and only for the reasons specified in 49 CFR 26.53(f). Prior to requesting County consent for the termination, Consultant must meet the procedural requirements specified in 49 CFR 26.53(f).

13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the, contract is commensurate with the work it is actually performing, and other relevant factors.

13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.

13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.

13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.

13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

13.5 Prevailing Wage.

13.5.1 Consultant shall comply with the State of California's General Prevailing Wage Rate requirements in accordance with California Labor Code, Section 1770, and all Federal, State, and local laws and ordinances applicable to the work.

13.5.2 Any subcontract entered into as a result of this contract, if for more than $25,000 for public works construction or more than $15,000 for the alteration, demolition, repair, or

maintenance of public works, shall contain all of the provisions of this Article, unless the awarding agency has an approved labor compliance program by the Director of Industrial Relations.

13.5.3 When prevailing wages apply to the services described in the scope of work, transportation and subsistence costs shall be reimbursed at the minimum rates set by the Department of Industrial Relations (DIR) as outlined in the applicable Prevailing Wage Determination. See http://www.dir.ca.gov.

13.6 Text Messaging While Driving.

In accordance with Executive Order 13513, Federal Leadership on Reducing Text Messaging While Driving, and Department of Transportation Order 3902.10, Text Messaging While Driving, text messaging while driving is prohibited in the performance of any duties included in this agreement for both consultant and any sub-consultants hired for performance of duties under this Agreement. Consultant shall include a provision prohibiting texting while driving in all sub-consultant agreements entered into related to the performance of its obligations under this Agreement.

Definitions. The following definitions are to be used in conjunction with this section. "Driving":

1) Means operating a motor vehicle on a roadway, including while temporarily stationary because of traffic, a traffic light, stop sign, or otherwise.

2) It does not include being in your vehicle (with or without the motor running) in a location off the roadway where it is safe and legal to remain stationary.

"Text Messaging" means reading from or entering data into any handheld or other electronic device, including for the purpose of short message service texting, e-mailing, instant messaging, obtaining navigational information, or engaging in any other form of electronic data retrieval or electronic data communication.

13.7 Buy America.

Furnish Steel and iron materials to be incorporated into the work with certificates of compliance. Steel and iron materials must be produced in the U.S. except:

1) Foreign pig iron and processed, pelletized, and reduced iron ore may be used in the domestic production of the steel and iron materials [60 Fed Reg 15478(3/24/1995)];

2) If the total combine cost of the materials does not exceed the great of 0.1 percent of the total bid or $2,500, materials produced outside the U. S. may be used.

Production includes:

1) Processing steel and iron materials, including smelting or other processes that alter the physical form or shape (such as rolling, extruding, machining, bending, grinding, and drilling0 or chemical composition;

2) Coating application, including epoxy coating, galvanizing, and painting, that protects or enhances the value of steel and iron materials.

13.8 Prohibition of Expending Local Agency, State or Federal funds for Lobbying.

13.8.1 Consultant certifies to the best of his or her knowledge and belief that:

1) No state, federal or County appropriated funds have been paid, or will be paid by-or-on behalf of Consultant to any person for influencing or attempting to influence an

officer or employee of any state or federal agency; a Member of the State Legislature or United States Congress; an officer or employee of the Legislature or Congress; or any employee of a Member of the Legislature or Congress, in connection with the awarding of any state or federal contract; the making of any state or federal grant; the making of any state or federal loan; the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any state or federal contract, grant, loan, or cooperative agreement.

2) If any funds other than federal appropriated funds have been paid, or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency; a Member of Congress; an officer or employee of Congress, or an employee of a Member of Congress; in connection with this federal contract, grant, loan, or cooperative agreement; Consultant shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

13.8.2 This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

13.8.3 Consultant also agrees by signing this document that he or she shall require that the language of this certification be included in all lower-tier subcontracts, which exceed $100,000 and that all such sub recipients shall certify and disclose accordingly.

13.9 Cost Principals and Administrative Requirements.

13.9.1 Consultant agrees that the Contract Cost Principles and Procedures, 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31.000 et seq., shall be used to determine the cost allowability of individual items.

13.9.2 Consultant also agrees to comply with federal procedures in accordance with 2 CFR, Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

13.9.3 Any costs for which payment has been made to consultant that are determined by subsequent audit to be unallowable under 2 CFR, Part 200 and 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31.000 et seq., are subject to repayment by Consultant to County.

13.10 Retention of Records/Audit.

For the purpose of determining compliance with Public Contract Code 10115, et seq. and Title 21, California Code of Regulations, Chapter 21, Section 2500 et seq., when applicable and other matters connected with the performance of the contract pursuant to Government Code 8546.7; Consultant, subconsultants, and County shall maintain and make available for inspection all books, documents, papers, accounting records, and other evidence pertaining to the performance of the contract, including but not limited to, the costs of administering the contract. All parties shall make such materials available at their respective offices at all reasonable times during the contract period and for three years from the date of final payment under the contract. The state, State Auditor, County, FHWA, or any duly authorized representative of the Federal Government shall have access to any books, records, and documents of Consultant and it's certified public accountants (CPA) work papers that are pertinent to the contract and indirect cost rates (ICR) for audit,

examinations, excerpts, and transactions, and copies thereof shall be furnished if requested.

13.11 Audit Review Procedures.

13.11.1 Any dispute concerning a question of fact arising under an interim or post audit of this contract that is not disposed of by agreement, shall be reviewed by County's Chief Financial Officer.

13.11.2 Not later than 30 days after issuance of the final audit report, Consultant may request a review by County's Chief Financial Officer of unresolved audit issues. The request for review will be submitted in writing.

13.11.3 Neither the pendency of a dispute nor its consideration by County will excuse Consultant from full and timely performance, in accordance with the terms of this contract.

13.11.4 Consultant and subconsultant contracts, including cost proposals and ICR, are subject to audits or reviews such as, but not limited to, a contract audit, an incurred cost audit, an ICR Audit, or a CPA ICR audit work paper review. If selected for audit or review, the contract, cost proposal and ICR and related work papers, if applicable, will be reviewed to verify compliance with 48 CFR, Part 31 and other related laws and regulations. In the instances of a CPA ICR audit work paper review it is Consultant's responsibility to ensure federal, state, or local government officials are allowed full access to the CPA's work papers including making copies as necessary. The contract, cost proposal, and ICR shall be adjusted by Consultant and approved by County contract manager to conform to the audit or review recommendations. Consultant agrees that individual terms of costs identified in the audit report shall be incorporated into the contract by this reference if directed by County at its sole discretion. Refusal by Consultant to incorporate audit or review recommendations, or to ensure that the federal, state or local governments have access to CPA work papers, will be considered a breach of contract terms and cause for termination of the contract and disallowance of prior reimbursed costs.

13.12 Subcontracting.

13.12.1 Nothing contained in this contract or otherwise, shall create any contractual relation between County and any subconsultant(s), and no subcontract shall relieve Consultant of its responsibilities and obligations hereunder. Consultant agrees to be as fully responsible to County for the acts and omissions of its subconsultant(s) and of persons either directly or indirectly employed by any of them as it is for the acts and omissions of persons directly employed by Consultant. consultant's obligation to pay its subconsultant(s) is an independent obligation from County's obligation to make payments to the Consultant.

13.12.2 Consultant shall perform the work contemplated with resources available within its own organization and no portion of the work pertinent to this contract shall be subcontracted without written authorization by County's Contract Administrator, except that, which is expressly identified in the approved Cost Proposal.

13.12.3 Consultant shall pay its subconsultants within ten (10) calendar days from receipt of each payment made to Consultant by County.

13.12.4 All subcontracts entered into as a result of this contract shall contain all the provisions stipulated in this contract to be applicable to subconsultants.

13.12.5 Any substitution of subconsultant(s) must be approved in writing by County's Contract Administrator prior to the start of work by the subconsultant(s).

13.13 Equipment Purchase.

13.13.1 Prior authorization in writing, by County's Contract Administrator shall be required before Consultant enters into any unbudgeted purchase order, or subcontract exceeding $5,000 for supplies, equipment, or Consultant services. Consultant shall provide an evaluation of the necessity or desirability of incurring such costs.

13.13.2 For purchase of any item, service or consulting work not covered in Consultant's Cost Proposal and exceeding $5,000 prior authorization by County's Contract Administrator; three competitive quotations must be submitted with the request, or the absence of bidding must be adequately justified.

13.13.3 Any equipment purchased as a result of this contract is subject to the following: "Consultant shall maintain an inventory of all nonexpendable property. Nonexpendable property is defined as having a useful life of at least two years and an acquisition cost of $5,000 or more. If the purchased equipment needs replacement and is sold or traded in, County shall receive a proper refund or credit at the conclusion of the contract, or if the contract is terminated, Consultant may either keep the equipment and credit County in an amount equal to its fair market value, or sell such equipment at the best price obtainable at a public or private sale, in accordance with established County procedures; and credit County in an amount equal to the sales price. If Consultant elects to keep the equipment, fair market value shall be determined at Consultant expense, on the basis of a competent independent appraisal of such equipment. Appraisals shall be obtained from an appraiser mutually agreeable to by County and Consultant, if it is determined to sell the equipment, the terms and conditions of such sale must be approved in advance by County." 49 CFR, Part 18 requires a credit to Federal funds when participating equipment with a fair market value greater than $5,000 is credited to the project.

14. Miscellaneous Provisions.

14.1 No Waiver of Breach.

The waiver by County of any breach of any term or promise contained in this Agreement shall not be deemed to be a waiver of such term or provision or any subsequent breach of the same or any other term or promise contained in this Agreement.

14.2 Construction.

To the fullest extent allowed by law, the provisions of this Agreement shall be construed and given effect in a manner that avoids any violation of statute, ordinance, regulation, or law. The parties covenant and agree that in the event that any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof shall remain in full force and effect and shall in no way be affected, impaired, or invalidated thereby. Consultant and County acknowledge that they have each contributed to the making of this Agreement and that, in the event of a dispute over the interpretation of this Agreement, the language of the Agreement will not be construed against one party in favor of the other. Consultant and County acknowledge that they have each had an adequate opportunity to consult with counsel in the negotiation and preparation of this Agreement.

14.3 Consent.

Wherever in this Agreement the consent or approval of one party is required to an act of the other party, such consent or approval shall not be unreasonably withheld or delayed.

14.4 No Third Party Beneficiaries.

Nothing contained in this Agreement shall be construed to create and the parties do not intend to create any rights in third parties.

14.5 Applicable Law and Forum.

This Agreement shall be construed and interpreted according to the substantive law of California, regardless of the law of conflicts to the contrary in any jurisdiction. Any action to enforce the terms of this Agreement or for the breach thereof shall be brought and tried in Santa Rosa or the forum nearest to the city of Santa Rosa, in the County of Sonoma.

14.6 Captions.

The captions in this Agreement are solely for convenience of reference. They are not a part of this Agreement and shall have no effect on its construction or interpretation.

14.7 Merger.

This writing is intended both as the final expression of the Agreement between the parties hereto with respect to the included terms and as a complete and exclusive statement of the terms of the Agreement, pursuant to Code of Civil Procedure Section 1856. No modification of this Agreement shall be effective unless and until such modification is evidenced by a writing signed by both parties.

14.8 Survival of Terms.

All express representations, waivers, indemnifications, and limitations of liability included in this Agreement will survive its completion or termination for any reason.

14.9 Time of Essence.

Time is and shall be of the essence of this Agreement and every provision hereof.

14.10 Rebates, Kickback or Other Unlawful Consideration.

Consultant warrants that this contract was not obtained or secured through rebates kickbacks or other unlawful consideration, either promised or paid to any County employee. For breach or violation of this warranty, County shall have the right in its discretion; to terminate the contract without liability; to pay only for the value of the work actually performed; or to deduct from the contract price; or otherwise recover the full amount of such rebate, kickback or other unlawful consideration.

14.11 Funding Requirements.

14.11.1 It is mutually understood between the parties that this contract may have been written before ascertaining the availability of funds or appropriation of funds, for the mutual benefit of both parties, in order to avoid program and fiscal delays that would occur if the contract were executed after that determination was made.

14.11.2 This contract is valid and enforceable only, if sufficient funds are made available to County for the purpose of this contract. In addition, this contract is subject to any additional restrictions, limitations, conditions, or any statute enacted by the Congress, State Legislature, or County Board of Supervisors that may affect the provisions, terms, or funding of this contract in any manner.

14.11.3 It is mutually agreed that if sufficient funds are not appropriated, this contract may be amended to reflect any reduction in funds.

14.11.4 County has the option to void the contract under the 30-day termination clause pursuant to Article 4, or by mutual agreement to amend the contract to reflect any reduction of funds.

14.12 Evaluation of Consultant.

Consultant's performance will be evaluated by County. A copy of the evaluation will be sent to Consultant for comments. The evaluation together with the comments shall be retained as part of the contract record.

14.13 Claims Filed by County's Construction Contractor.

14.13.1 If claims are filed by County's construction contractor relating to work performed by Consultant's personnel, and additional information or assistance from Consultant's personnel is required in order to evaluate or defend against such claims; Consultant agrees to make its personnel available for consultation with County's construction contract administration and legal staff and for testimony, if necessary, at depositions and at trial or arbitration proceedings.

14.13.2 Consultant's personnel that County considers essential to assist in defending against construction contractor claims will be made available on reasonable notice from County. Consultation or testimony will be reimbursed at the same rates, including travel costs that are being paid for Consultant's personnel services under this contract.

14.13.3 Services of Consultant's personnel in connection with County's construction contractor claims will be performed pursuant to a written contract amendment, if necessary, extending the termination date of this contract in order to resolve the construction claims.

14.14 National Labor Relations Board Certification.

In accordance with Public Contract Code Section 10296, Consultant hereby states under penalty of perjury that no more than one final unappealable finding of contempt of court by a federal court has been issued against Consultant within the immediately preceding two-year period, because of Consultant's failure to comply with an order of a federal court that orders Consultant to comply with an order of the National Labor Relations Board.

14.15 Retention of Funds.

14.15.1 Any subcontract entered into as a result of this Contract shall contain all of the provisions of this section.

14.15.2 The County shall hold retainage from the prime consultant and shall make prompt and regular incremental acceptances of portions, as determined by the County, of the contract work, and pay retainage to the prime consultant based on these acceptances. The prime consultant, or subconsultant, shall return all monies withheld in retention from a subconsultant within thirty (30) days after receiving payment for work satisfactorily completed and accepted including incremental acceptances of portions of the contract work by the agency. Federal law (49 CFR 26.29) requires that any delay or postponement of payment over thirty (30) days may take place only for good cause and with the agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute

involving late payment or nonpayment by the prime Consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

14.16 Contingent Fee.

Consultant warrants, by execution of this contract that no person or selling agency has been employed, or retained, to solicit or secure this contract upon an agreement or understanding, for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees, or bona fide established commercial or selling agencies maintained by Consultant for the purpose of securing business. For breach or violation of this warranty, County has the right to annul this contract without liability; pay only for the value of the work actually performed, or in its discretion to deduct from the contract price or consideration, or otherwise recover the full amount of such commission, percentage, brokerage, or contingent fee.

14.17 Inspection of Work.

Consultant and any subconsultant shall permit County, the state, and the FHWA if federal participating funds are used in this contract; to review and inspect the project activities and files at all reasonable times during the performance period of this contract including review and inspection on a daily basis.

14.18 Safety.

14.18.1 Consultant shall comply with OSHA regulations applicable to Consultant regarding necessary safety equipment or procedures. Consultant shall comply with safety instructions issued by County Safety Officer and other County representatives. Consultant personnel shall wear hard hats and safety vests at all times while working on the construction project site.

14.18.2 Pursuant to the authority contained in Section 591 of the Vehicle Code, County has determined that such areas are within the limits of the project and are open to public traffic. Consultant shall comply with all of the requirements set forth in Divisions 11, 12, 13, 14, and 15 of the Vehicle Code. Consultant shall take all reasonably necessary precautions for safe operation of its vehicles and the protection of the traveling public from injury and damage from such vehicles.

14.18.3 Any subcontract entered into as a result of this contract, shall contain all of the provisions of this Article.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.

EXHIBIT A

SCOPE OF WORK

Requested Scope of Services

The County of Sonoma Transportation and Public Works requires consultant services to assist with developing a project to replace the existing bridge on Chalk Hill Road at Maacama Creek in Sonoma County. The existing open spandrel concrete arch bridge was constructed in 1915. This project has attracted a good deal of public attention and there is strong local sentiment for the existing bridge. Developing a project for an acceptable replacement of the existing bridge will be difficult. The work to be performed under this agreement will be separated into two phases.

Phase 1 will focus on obtaining approval of an environmental document for the new bridge. This will include analyzing various alternatives for the location of the new bridge and road approaches, determining right-of-way (ROW) needs and selecting the type of bridge.

Phase 2 will include design of the bridge recommended in the environment document, final design of the road way approaches and appurtenances, preparing construction documents including plans, specifications and estimate for the project determined in Phase 1.

There is potential for overlap of some tasks between Phase 1 and Phase 2. The intention is to minimize engineering work in Phase 1 to that necessary to determine the project footprint and impacts. Tasks that fall within Phase 2 related must be avoided to the extent possible until the environmental document is approved and the County gives written approval to proceed with final plan preparation

Tentative Project Schedule:

a) Execute contract with selected design firm- Fall of 2018
b) Complete project mapping, establish existing ROW, determine alignment alternatives, and prepare Bridge Type Selection Report - First quarter of 2019
c) Start environmental work- 2018
d) NEPA/CEQA clearance-Spring, 2020
e) Design bridge described in environmental documents – Summer 2020
f) ROW certification- Spring, 2021
g) 100% P,S&E- January, 2022
h) Construction Begins-Spring of 2022

Listed below are tasks that proposers are expected to incorporate into the proposed scope of services. Each consultant or consultant team should, based on their expertise, develop a comprehensive and detailed scope of services necessary to complete the deliverables listed in this section of the RFP. The proposer may propose modifications to the individual tasks or the entire scope of services if the proposer can demonstrate innovative, advanced and well thought-out methodologies that the County may not have specifically identified in the scope of services. Any

proposed modifications shall be identified as optional items and priced out separately in the sealed fee proposal.

Consultant services shall include, but are not be limited to, the following:

- Lead public outreach effort necessary to obtain approval of the environmental document.
- Facilitate public meetings
- Bridge design and roadway engineering, including ADA Compliance
- Quantity calculations for Engineer's Estimate
- Engineering support to the County's in-house environmental team
- Preparation of various environmental studies for NEPA and CEQA documents and assisting as needed to obtain environmental permits
- Preliminary right of way engineering, and acquisition support
- Utility research and coordination, including relocation if required
- Drainage design and stormwater treatment
- Hydraulic analysis of river/stream
- Geotechnical engineering
- Topographic and boundary surveys
- Prepare ready-to-bid Plans, Specifications, and Estimate (PS&E)
- Technical support in bidding
- Traffic control (for field investigations)

Construction support services including but not limited to:

- Confirm geotechnical items in the field
- The review and approval of shop drawings.
- The review and approval of material submittals.
- The review and respond to Requests for Information.
- Check and approve structural calculations for falsework.
- Field surveys for construction control/staking.
- Prepare record drawings upon completion of the project.
- File final record of survey of as built monuments etc.

This project will require close coordination with Caltrans local assistance. The consultant will lead community outreach efforts required to gain public support of the project. Final PS&E must include preparation of the Notice to Bidders, Bid Book, and Resident Engineer's pending file. If necessary, the consultant must provide assistance to the County in resolution of construction claims filed by the contractor *in so far as the claims relate to the consultant's work*. All work furnished shall be prepared in conformance with the most current County of Sonoma and Caltrans standards, regulations, policies and procedures and in compliance with FHWA requirements.

Listed below are tasks that proposers are expected to incorporate into the proposed scope of services. Each consultant or consultant team should develop a comprehensive and detailed scope of services necessary to complete the deliverables listed in this section of the RFP. The proposer may propose modifications to the individual tasks or the entire scope of services if the proposer can demonstrate innovative, advanced and well thought-out methodologies that the County may not have specifically identified in the scope of services. Any proposed modifications shall be identified as optional items and priced out separately in the sealed fee proposal.

PHASE 1

Task 1 Project Management

The selected consultant shall be responsible for project management activities throughout the life of the contract. The scope of comprehensive project management includes, but is not limited to:

- Efficiently managing the project schedule and budget
- Setting up and facilitating client meetings
- Interagency meetings, public meetings
- Field reviews
- Other project related meetings

The consultant shall prepare meeting agendas, meeting minutes, identify action items and how they are accounted for, meeting sign in sheets for all meetings, and managing the consultant team involved in the project ("project team"). Managing the project team includes, but is not limited to, preparing contract paperwork, memos, letters and e-mail, making phone calls and maintaining project files.

On a monthly basis, the consultant shall submit a Work Progress Form, provided by the County. This summarizes accomplishments in the previous month, anticipated work for the next month and key decisions that need to be made to keep the project on schedule. Invoices shall show the original budget, reallocated budget, amount spent to-date, amount spent this period, and percentage spent to date for each task.

Task 2 Public Outreach

The goal of this task is to assist the County with informing the public about the importance of the bridge replacement project, identify the communities' key issues and concerns and provide information to the community on project status and design options for the proposed bridge. Incorporate input from the public into the decision making process for design aesthetics and location of the new bridge. Tasks include:

- Work closely with County staff to develop meeting agendas, presentations, and meeting materials for up to four public outreach meetings
- Attend two of the Sonoma County Board of Supervisor's meetings to provide technical background on board items related to project approvals/authorizations.
- The consultant shall coordinate and facilitate meetings and keep notes that can be shared with the public after review by County staff.
- Coordinate meetings with key stakeholder groups and interested public agencies as needed in addition to formal public meetings.
- Identify stakeholder groups and their background/interest, roles and contact information.
- Develop and maintain a stakeholder database which can be used to efficiently distribute project information.
- Develop, distribute, and evaluate a survey once the project is structurally developed so that the community can easily give their input on bridge aesthetics and the new alignment.

- Work with County staff to develop and distribute information/educational materials
- Assist the County's public information officer with news releases, media advisories or other interactions with the media

Task 2 Deliverables

- Stakeholder database
- Community input survey results
- Public information materials

Task 3 Surveying/Mapping/ROW Engineering

The consultant shall be responsible for data collection, mapping and surveying necessary for preliminary engineering design, cost estimates, right-of-way impacts, and the level of environmental clearance. All surveying and mapping shall comply with the provisions of the Professional Land Surveyors Act, Sections 8700 to 8805 Business and Professions Code, the provisions of the California Coordinate System, Sections 8801 through 8819 of the Public Resources Code and any other applicable code in the State of California. Tasks in each area include but are not limited to:

Surveying

- Control Surveys
- Aerial Photogrammetry
- Design Level Topographic Surveys
- Determination of existing County Right-of-Way
- Record of Survey

Mapping

- Establish project control
- Acquire site topography data for bridge and road design
- Develop stream cross section data necessary for hydraulic analysis

Right-of Way

- Stormwater treatment
- ADA compliance
- Staging areas and storage for excess materials generated by construction of the bridge

River Cross Sections for Hydrologic Analysis

This will include stream cross sections. Channel cross sections shall be taken at the upstream and downstream faces of both the existing bridge and the proposed bridge. Sections shall also be taken at 100' intervals for 1000' upstream and downstream of the proposed bridge, and at any other locations necessary for completion of hydraulic analysis, at the direction of the hydraulic engineer.

Control

Survey vertical control shall be NAVD 88. Survey horizontal control shall be California Coordinate System of 1983, Zone 2, Epoch 2010.0. Where more than one datum is required by

multiple agencies the consultant shall prepare the necessary conversion tables to enable the transformation from one datum to another.

Topographic Survey

The topographic survey will be at a drawing scale of 1 inch = 20 feet, with a one foot contour interval. The topographic survey must include the existing road facilities and encompass locations of various bridge alignments to be considered in project alternatives, conforms to the existing roadway, intersections and driveway approaches.

Topographic survey shall include all necessary work to produce a topographic map and an electronic surface model compatible with Civil3D (Version 2016 or later), including features such as, but not limited to:

- Pavement
- Existing delineation
- Utility markings on the pavement
- All utility facilities
- Driveways
- Fencing
- Landscaping
- Trees four (4) inches and larger in diameter at breast height
- Headwalls
- Bridge
- Retaining wall or decorative walls
- Vineyard rows
- Structures on adjoining parcels
- Existing lighting
- Drainage facilities
- Any other pertinent information that could apply to the project during design

Determine Existing Right of Way (ROW)

The consultant shall perform the following ROW survey tasks:

- Perform boundary research to locate the existing ROW data
- Perform boundary surveys to search for, locate and tie existing monuments
- Perform analysis and mapping of the existing road ROW (provide the County with copies of all documentation, records, maps etc. relied on in establishing the location of the existing ROW).
- File a Record of Survey map of the existing monuments found and existing County ROW as determined.

Task 3 Deliverables

- Topographic survey map and digital terrain model of project site compatible with Civil3D (Version 2016 or later).
- Acquisition map (Right-of-way Appraisal Map)
- Record of Survey (including found monuments and existing ROW)

- Legal descriptions, plats and closure calculations for ROW acquisition
- AutoCAD .dwg file of the topographic survey containing the survey points of stream cross section survey mapping at the drawing scale of 1 inch = 20 feet (Version 2016 or later).

Task 4 Alignment Engineering

The consultant shall recommend the alignment of the new bridge and the extent of the roadway approaches in close collaboration with the County. The consultant shall analyze several feasible alignment alternatives and propose the most feasible alternative based on the site constraints, public input, AASHTO, and Caltrans geometric standards. The alternatives alignments must be developed enough to determine the environmental foot print of the options, together with right-of-way requirements. Detailed design of new intersections shall be included.

Task 4 Deliverables:

- Preliminary Alignment Alternatives

Task 4 County Decision Point:

- Approve Preliminary Alignment

Task 5 - Geotechnical Engineering

The consultant shall prepare a geotechnical report for the site as required for the completion of design, construction documents. The consultant will be responsible for obtaining permits necessary for field geotechnical investigation work. . The geotechnical report shall include an evaluation of the effects of any slope erosion or periodic land movements during extreme storm and seismic events; hydrological and soils data, specifically designed for the liquefiable soils at the site; seismic parameters and recommendations for the foundation bridge design.

The consultant's subsurface exploration shall include drilling test borings at key locations, obtaining soil and rock samples for observation and laboratory testing, and measuring the depth to and variation in embankment groundwater levels. The coordination of boring locations must be discussed with the County prior to beginning boring. This task shall include the following:

- Planning & Permitting
- Schedule field exploration.
- Field stake boring locations; coordinate utility clearance with Underground Service Alert.
- Obtain Sonoma County Permit and Resource Management Department (PRMD) drilling permit and Caltrans encroachment permits as needed.

Drilling operations within the channel (below top of bank to top of bank).

Depending on location, this may require additional permits and to be completed only during the dry season. The consultant will be responsible for paying all the costs associated with these permits.

Traffic Control

Flagmen and portable orange traffic warning signs and cones shall be used to control traffic

whenever drilling operations present a potential obstruction to traffic.

Geologic Reconnaissance

Research published documents, including geologic maps of the site and vicinity.

Perform an engineering geologic reconnaissance of the channel and surrounding areas. The consultant's reconnaissance will be directed toward identifying and mapping bedrock types, bedding orientation, fracturing, faulting, and other bedrock characteristics, as appropriate.

Geotechnical Investigations

Attend a kick off meeting among representatives of the County and consultant (may be available by phone.)

Consultant shall perform field tests (test pits, borings, geologic reconnaissance or seismic refraction profiles) to collect subsurface information required for foundation design. This shall include locating borings at the project site; marking out field test locations with paint or other acceptable means for Underground Service Alert notification and for utility location; logging earth materials; groundwater depth and the depth of refusal or solid rock if either are encountered. Each boring site shall be accurately mapped.

Laboratory Testing

Selected soil and rock samples obtained from the consultant's borings will be subjected to laboratory testing at a certified geotechnical laboratory to assess their pertinent geotechnical engineering characteristics. Tests to be performed include moisture content/dry density, classification, strength, corrosivity, R-value (for pavement design) or any other tests recommended as appropriate by the Design Engineer. Hard rock core pieces of sufficient length will be tested for compressive strength, if practical. In addition, consultant shall also be responsible for providing the following; basic soil characteristics and bearing capacity. Consultant shall also be responsible for testing hazardous materials when pertinent.

Engineering and Geologic Analyses

The consultant shall characterize the creek channel and surrounding terrain in terms of regional and local geological and seismic conditions, including geologic hazards (primarily creek bank stability and channel scour). In consultation with the County, the consultant shall analyze the field and laboratory data and conduct engineering and geologic analyses to provide conclusions and recommendations regarding the bridge foundation design criteria. The consultant will also identify alternatives based on their experience with similar projects and the results of the investigation. The field geology and boring log data-will be presented on a geologic map and subsurface profile sheet. Laboratory test data will be presented on the boring logs alongside the samples tested.

The consultant will determine the appropriate seismic design parameters and use an accepted pile analysis for the pile design, as appropriate. The consultant will also prepare an Acceleration Response Spectrum (ARS) curve.

The consultant will develop geotechnical criteria for design of the most suitable foundation alternative, including the following:

- Site preparation and grading, including excavation characteristics, suitability of excavated

soils within the roadway for re-use as fill, and the treatment of existing fill, expansive and liquefiable soils, as appropriate
- ARS curves per Caltrans Seismic Design Criteria
- Foundation design criteria for potential foundation type, including group analyses for Cast-in-Drilled-Hole (CIDH) or driven pile design
- Pavement sections for asphalt-paved areas
- Anticipated geotechnical construction problems, if applicable

Prepare Reports

The consultant shall summarize the results of the investigation, testing, and analysis in a draft report. The draft report shall include recommendations for foundation type, foundation capacity, and retaining structures. The report shall identify any construction conditions or geologic hazards that may be present and need to be addressed. The draft report shall be submitted for the 35% PS&E. After the County has commented on the draft report and all outstanding questions answered the report shall be finalized.

Task 5 Deliverables:

- Preliminary Geotechnical Report
- Geotechnical Report
- Site-specific ARS Curves
- Log of Borings for PS&E

Task 6 Preliminary Engineering

This task will consist of investigatory studies, preliminary design, and all other work necessary to bring the project to 35% design and to provide a final Type Selection Report.

Assess Available Information

The consultant shall assess all available information on the project. Such information may include existing drawings, studies and reports, or preliminary engineering performed by others.

Areas of Focus

The consultant shall provide preliminary engineering services or site assessments needed for the following tasks:

- Assist the County with preparation of the bridge project NEPA/CEQA documents.
- Identify issues that must be addressed in the design
- Type Selection Report Preparation
- The consultant shall work closely with County staff to develop the appropriate bridge replacement design. Key issues to consider include (in no particular order):
- Aesthetics of the new bridge
- New bridge alignment
- Public input
- Flood water elevations
- Structure depth and span arrangement
- Site geology and seismicity

- Environmental issues
- Maintenance of traffic
- Lighting (if determined to be necessary)
- Available ROW
- Construction access
- Unique project design criteria

Consultant shall prepare a Type Selection Report that will document the structure types and configurations considered, with estimated costs and recommendations for final structure type. Assume aesthetic treatments such as a custom bridge design profile, balconies/lookouts, corbels, railings, and lights. The Type Selection Report shall be prepared for approval by the County and Caltrans Local Assistance following the guidelines established in the Caltrans Memo to Designers. The proposed replacement bridge shall be presented on general plan drawings and documented in a report.

Task 6 Deliverables:

- NEPA/CEQA document support/assistance to the County's Natural Resources Section of Permit Sonoma (PRMD).
- Preliminary design drawings and reports
- Bridge Type Selection Report
- Construction Cost Estimates
- AutoCAD .dwg files of preliminary design drawings

Task 6 County Decision Point:

- Select Bridge Type
- Provide 35% PS&E Review Comments

Task 7 Utility Coordination

Consultant shall lead the utility coordination efforts. Tasks include, but are not limited to:

- Organizing a list of utility contacts
- Creating and mailing Utility Letters on the County's letterhead
- Mapping existing utilities
- Identifying potential conflicts
- Designing preliminary utility layouts and identifying possible easements
- Preparing high level estimates of relocation costs for the various utility facilities requiring relocation
- New utility requirements for the new lighting if applicable

Task 7 Deliverables:

- Conflict Resolution Plans and Estimates for utility relocations
- Coordination of all utility relocations required for construction with the affected utility companies

Task 8 Hydrology and Hydraulics

The consultant shall complete the Design Hydrology and Hydraulics Report, Location Hydraulic Study, Floodplain Evaluation Report, Summary Floodplain Encroachment Report, as needed, and to establish the 100-year flood level at the bridge.

Data Collection and Site Review

The consultant shall collect and review any available hydrologic and hydraulic studies prepared for the project area as well as other background information from Sonoma County Water Agency (SCWA) and Federal Emergency Management Agency (FEMA). The consultant shall also conduct site visits to verify stream channel roughness, its constrictions and potential scour.

Hydraulics Analyses

The consultant will develop hydraulic analysis models to incorporate information obtained from its assessment of available information and the creek cross section data from the topographic survey.

The consultant shall evaluate the 50 year and 100 year drainage flows and overtopping event, for existing and proposed conditions of the new bridge and approach roadways. Modeling shall include the 50 and 100 year recurrence events. Flow results shall be used for the existing bridge geometry and calibrated against published data, gauge data, field observations of high water marks and any available anecdotal data.

Documentation

The consultant shall prepare studies and reports that document their findings. The reports will describe methodology used, summarize model output, include creek cross sections in plan and profile view and will delineate the 100-year water level for existing and proposed conditions through the project reach.

The reports shall be prepared in accordance with the format and guidelines presented in the "Checklist for Drainage Studies and Reports," *Local Assistance Procedures Manual* (LAPM): Exhibit 11-E. The draft report shall be submitted for the 35% PS&E. After the County has commented on the draft report and all outstanding questions answered the report shall be finalized.

Design Hydrology and Hydraulics Reports and Studies

In addition to the hydraulics report the following reports shall be prepared: Location Hydraulic Study, Floodplain Evaluation Report, and a Summary Floodplain Encroachment Report.

Task 8 Deliverables

- Hydraulics Report
- Floodplain Evaluation Report
- Summary Floodplain Encroachment Report
- Location Hydraulic Study

Task 9 Environmental

The County has in-house environmental specialists from PRMD, who will lead the environmental clearance effort (CEQA/NEPA and environmental permits), including setting up and facilitating interagency meetings. The consultant shall work closely with PRMD staff to support their work in obtaining the environmental clearance and identify environmental constraints and opportunities to minimize costs and time delays. This will include providing engineering information and documentation in a timely manner.

Listed below is an outline of the anticipated environmental studies to be prepared by the consultant, necessary to satisfy portions of the environmental documents (NEPA/CEQA) and environmental permitting requirements:

Visual Simulations for the Project

Visual simulations are required needed per the PRMD Visual Assessment Guidelines, which will also be used for public meetings. Up to three viewpoints of the preferred alignment shall be chosen for the simulations.

Equipment Staging Technical Memorandum

Prepare an Equipment Staging Tech Memo. PRMD environmental staff can provide a sample from a recent project.

Right of Way Technical Memorandum

Prepare a Right of Way tech Memo as described in the Caltrans February 17, 2016 letter transmitting the signed PES to the County.

Noise Technical Memorandum

Prepare a Noise Tech Memo as described in the Caltrans February 17, 2016 letter transmitting the signed PES to the County. A bioacoustics analysis shall be performed for the proposed project if pile driving is required. PRMD environmental staff can provide a sample from a recent project.

Cultural Resources

The consultant shall prepare the Section 106 of the Historic Preservation Act reports: Historical Property Survey Report (HPSR), Historical Resources Evaluation Report (HRER), an Archeological Survey Report (ASR), and a Finding of Effect (FOE) Report. (Note the County shall provide an approved APE map). See PQS letter attached to February 17, 2016 letter from Caltrans to the County for details.

The consultant will also complete a California Department of Parks and Recreation Form 523 (DPR Form 523) for the existing bridge, evaluating the bridges potential for eligibility on the California Register of Historic Resources.

Water Quality Assessment Report (WQAR)

The consultant will assist and provide PRMD with storm flows and drainage pattern information (existing and proposed) for inclusion in the WQAR. The consultant shall prepare a WQAR per the Caltrans guidance in the Standard Environmental Reference.

Task 9 Deliverables

- Equipment Staging Tech Memo Right of Way Tech Memo
- Visual Simulations for Proposed Project per PRMD Guidelines
- Cultural Reports: HPSR, HRER, ASR, FOE
- DPR Form 523
- WQAR
- Noise Tech Memo

PHASE 2

Begin preparation of ready-to-bid plans for project described in the approved environmental document. The cost estimate for the bridge design portion of the work in Phase 2 should include two options. The first being some form of a reinforced concrete open spandrel arch bridge similar to the existing structure. The second to design a conventional reinforced concrete box girder.

Task 10 Finalize ROW to be acquired

Consultant shall prepare an acquisition map

Complete a Record of Survey showing the existing ROW and the project centerline(s). The Record of Survey shall show at least two permanent monuments that will survive the construction of the project

This proposal assumes the consultant will procure between 8 to 10 title reports

The consultant will prepare approximately 8 to 10 legal descriptions for permanent ROW acquisition and 8 to10 legal descriptions for temporary construction easement acquisition. Consultant shall prepare ROW Data sheets per the guidelines in the *Caltrans Right of Way Manual*. These descriptions shall include the following:

- Plats and closure calculations for permanent acquisitions and temporary construction easements
- Prepare legal descriptions

Task 11 - 65% PS&E

Bridge/Structural Design Development

The consultant shall preform structural design investigations, analysis, computations, and prepare detailed structural plans for the proposed replacement bridge in accordance with the latest Caltrans bridge design techniques including a Foundation Report and a Location Hydraulic Study. Standard construction materials shall be used in the design of the proposed bridge replacement wherever possible. Where specialized non-standard construction/building materials are required, the consultant shall first obtain approval from the County prior to incorporating them into the design.

The consultant shall confirm and verify the design criteria and loading conditions, then verify the structural adequacy of the selected bridge type.

Permanent, transient and extreme event load cases shall be considered per Caltrans BDS and AASHTO LRFD. For steel structures, an analysis of fatigue loading will be performed. Global analyses shall consider soil-structure interaction.

Project plans prepared by the consultant shall include a complete set of plans at the 65% level. All identified and affected existing utilities shall be accurately indicated on the plans. Plans at 65% should be of sufficient level to start ROW acquisition.

- Contract drawings will be developed using AutoCAD 2015 or newer
- Contract Drawings
- Contract drawings for the bridge and roadway approaches will include as a minimum:
- General Plan
- General Notes, Index, Std. Plans List
- Approach Plans, Profiles & Sections
- Structure Plans and Elevations
- Drainage Plans and Profiles
- Temporary and Permanent Erosion and Pollution Control Plans
- Foundation Plans
- Abutment Plans, Elevations & Sections
- Abutment Reinforcing Details
- Deck Plans and Reinforcing Details
- Proposed Erection Sequence
- Expansion Joints and Bridge Rails
- Drainage Details
- Log of Test Borings
- Stormwater treatment
- Utility relocations and/or adjustments
- Typical Sections
- Roadway Design Criteria (Traffic Index, Design Speed, etc.)
- Lighting
- Any environmentally sensitive areas, areas of cultural or tribal monitoring
- Traffic Control Plans
- Pavement Delineation Plans

All drawings will be prepared per the most current Caltrans, FHWA and County standards.

Specifications

The consultant will develop project specifications and special provisions from the most current Caltrans and County standards.

Bridge Approach Roadways

The consultant shall preform roadway design in accordance with the latest version of the Caltrans *Highway Design Manual* and the County design standards. Design shall include details for traffic control plans in accordance with the Caltrans *Manual of Uniform Traffic Control Devices*.

Re-alignment at the south and north approaches may be necessary, depending on the project

alternative that is selected. The consultant will design the approach roadways and prepare the contract drawings for these. The pavement section, roadside drainage and roadside barriers are included in the design of the bridge approach roadways.

Quality Control and Quality Assurance

A Quality Control (QC) and Quality Assurance (QA) program will be implemented on the project to capture any design or drafting errors.

The consultant shall employ a QC program that consists of checking and back-checking the design calculations and contract plans.

QA entails ensuring that all QC procedures have been followed and that all critical issues have been addressed and resolved.

The 65% PS&E will be submitted after QA/QC has been completed.

Task 11 Deliverables

- 65%PS&E
- 65% Design Calculations

Task 11 County Decision Points

- Provide 65% PS&E review comments

Task 12 95% PS&E

PS&E shall be 95% complete. Major subtasks for this phase of the work are:

- Incorporate County review comments into the design and bidding documents, if any
- Complete the design documents and bidding documents
- Perform an independent design check

The QC/QA procedures described in Task 4 will be implemented during this task as well, this time with an emphasis on coordination between structural, traffic and utility documents and the elimination of any conflicts between them.

Independent Design Check

The independent design check of the bridge structure shall be performed by individuals that weren't involved in the originating or checking of the design calculations. Where possible, the independent checker shall use alternative methods of design and analysis than used by the designer.

The independent check is complete when the independent checker finishes their calculations, compares results with those of the designer and reconciles all discrepancies between the independent check and the original design.

The 95% PS&E will be submitted when the independent design check is complete. The design of the bridge and approaches is essentially complete at this time.

Task 12 Deliverables:

- 95% PS&E
- 95% Design Calculations
- Independent Design Check

Task 12 County Decision Point:

- Provide 95% PS&E review comments
- The County may hire a bridge consultant to perform a constructability review.

Task 13 Final (100%) PS&E

This phase begins after the 95% PS&E is submitted and County has responded with comments.

The objective in this task is to provide the design and construction documents the County will use to advertise for bids and administer the bridge construction. PS&E shall be 100% complete.

Major sub tasks for this phase of the work include:

- Incorporate County review comments into the design and bidding documents
- Sign and seal the design and bidding documents
- Prepare copies of design, design check and bidding documents in the quantities required by the County
- Assist the County in securing federal bridge funding through Caltrans, if needed

The consultant shall not prepare the deliverable for this task until receiving written authorization from the County.

Task 13 Deliverables:

- (1) Set of reproducible final design plans (printed in black ink on mylar)
- (10) Sets of hardcopy final design plans
- (10) Copies of Specifications (two loose-leaf bound and one printer ready)
- (1) Copy of Engineer's Estimate
- (1) Copy of design check calculations
- (1)Copy of design check quantities
- (2) Copies of Resident Engineer pending file
- (2) Copies of the Geotechnical Report, including the Bridge Foundation Report
- (2) Copies of hydraulic studies and reports
- (1) Flash drive with electronic versions of all Task 10 deliverables itemized above in DWG, MS Excel or MS Word format, Print ready PDF files of same will be provided. Design plans will be provided in AutoCAD and PDF formats.

Task 13 County Decision Point:

- Provide written authorization to proceed

Task 14 Pre-Construction Engineering Services

The consultant shall remain available to provide assistance during bidding and award. This work may include clarification of contract documents in response to contractor inquiries, preparing addenda and evaluating bids. Pre-construction engineering services shall be included in this proposal.

Task 15 Construction Support Services

Anticipation of reasonable hours for construction support services shall be included in the proposal. Key members of the Consultant design team must remain available to perform construction support services.

If additional services are required such services will be negotiated with the County at a future date. Common construction support services are described below.

Pre-construction Meeting

Key members of the consultant design team shall be available to attend the preconstruction meeting with the successful construction contractor.

Consultant Site Visits

Key members of the consultant design team shall remain available to review shop drawings and check falsework structural calculations, review material submittals, review/respond to Request for Information (RFI) and visit the project site during construction, if required. Any observed defects or deficiencies in the work shall immediately be brought to the attention of the County's Resident Engineer.

p) **Total Other Direct Costs** [(l) + (m) + (n) + (o)] **$852,332.36**

NOTES: **TOTAL COST** [(c) + (j) + (k) + (p)] **$1,779,973.64**

- Employees subject to prevailing wage requirements to be marked with an *.
- ODC items should be based on actual costs and supported by historical data and other documentation.
- ODC items that would be considered “tools of the trade” are not reimbursable.
- ODC items should be consistently billed directly to all clients, not just when client will pay for them as a direct cost.
- ODC items when incurred for the same purpose, in like circumstances, should not be included in any indirect cost pool or in overhead rate

EXHIBIT 10-H COST PROPOSAL (EXAMPLE #1) PAGE 2 OF 2

ACTUAL COST-PLUS-FIXED FEE OR LUMP SUM (FIRM FIXED PRICE) CONTRACTS

(SAMPLE CALCULATIONS FOR ANTICIPATED SALARY INCREASES)

Consultant OPAC Consulting Engineers, Inc. Contract No. BLRO-5920(11 Date Nov. 1, 2017

1. Calculate Average Hourly Rate for 1st year of the contract (Direct Labor Subtotal divided by total hours) Nov. 1, 2017

Direct Labor Subtotal per Cost Proposal		Total Hours per Cost Proposal		Avg Hourly Rate	5 Year Contract Duration
$320,395.61		6232	=	$51.41	Year 1 Avg Rate

2. Calculate hourly rate for all years (Increase the Average Hourly Rate for a year by proposed escalation %

	Avg Hourly Rate		Proposed Escalation			
Year 1	$51.41	+	2%	=	$52.44	Year 2 Avg Rate
Year 2	$52.44	+	2%	=	$53.49	Year 3 Avg Rate
Year 3	$53.49	+	2%	=	$54.56	Year 4 Avg Rate
Year 4	$54.56	+	2%	=	$55.65	Year 5 Avg Rate

3. Calculate estimated hours per year (Multiply estimate % each year by total hours)

	Estimated % Completed Each Year		Total Hours per Cost Proposal		Total Hours per Year	
Year 1	40.00%	*	6232.0	=	2492.8	Estimated Hours Year 1
Year 2	15.00%	*	6232.0	=	934.8	Estimated Hours Year 2
Year 3	35.00%	*	6232.0	=	2181.2	Estimated Hours Year 3
Year 4	10.00%	*	6232.0	=	623.2	Estimated Hours Year 4
Year 5	0.00%	*	6232.0	=	0.0	Estimated Hours Year 5
Total	100%		Total	=	6232.0	

4. Calculate Total Costs including Escalation (Multiply Average Hourly Rate by the number of hours)

	Avg Hourly Rate (calculated above)		Estimated hours (calculated above)		Cost per Year	
Year 1	$51.41	*	2493	=	$128,158.24	Estimated Costs Year 1
Year 2	$53.49	*	935	=	$50,000.94	Estimated Costs Year 2
Year 3	$54.56	*	2181	=	$119,002.24	Estimated Costs Year 3
Year 4	$55.65	*	623	=	$34,680.65	Estimated Costs Year 4
Year 5	$0.00	*	0	=	$0.00	Estimated costs Year 5
			0	=	$331,842.07	
			Direct Labor Subtotal before Escalation	=	$320,395.61	
			Estimated total of Direct Labor Salary Increase	=	**$11,446.46**	Transfer to Page 1

NOTES:

- This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year.
- An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. $250,000 x 2% x 5 yrs = $25,000 is not an acceptable methodology)
- This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted.

EXHIBIT B - Insurance Requirements

With respect to performance of work under this Agreement, Consultant shall maintain and shall require all of its subcontractors, consultants, and other agents to maintain insurance as described below unless such insurance has been expressly waived by the attachment of a *Waiver of Insurance Requirements*. Any requirement for insurance to be maintained after completion of the work shall survive this Agreement.

County reserves the right to review any and all of the required insurance policies and/or endorsements, but has no obligation to do so. Failure to demand evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

1. **Workers Compensation and Employers Liability Insurance**
   - **a.** Required if Consultant has employees as defined by the Labor Code of the State of California.
   - **b.** Workers Compensation insurance with statutory limits as required by the Labor Code of the State of California.
   - **c.** Employers Liability with minimum limits of $1,000,000 per Accident; $1,000,000 Disease per employee; $1,000,000 Disease per policy.
   - **d.** *Required Evidence of Insurance*: Certificate of Insurance.

   If Consultant currently has no employees as defined by the Labor Code of the State of California, Consultant agrees to obtain the above-specified Workers Compensation and Employers Liability insurance should employees be engaged during the term of this Agreement or any extensions of the term.

2. **General Liability Insurance**
   - **a.** Commercial General Liability Insurance on a standard occurrence form, no less broad than Insurance Services Office (ISO) form CG 00 01.
   - **b.** Minimum Limits: $1,000,000 per Occurrence; $2,000,000 General Aggregate; $2,000,000 Products/Completed Operations Aggregate. The required limits may be provided by a combination of General Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance. If Consultant maintains higher limits than the specified minimum limits, County requires and shall be entitled to coverage for the higher limits maintained by Consultant.
   - **c.** Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County. Consultant is responsible for any deductible or self-insured retention and shall fund it upon County's written request, regardless of whether Consultant has a claim against the insurance or is named as a party in any action involving the County.
   - **d.** The County of Sonoma, its Officers, Agents, and Employees shall be endorsed as additional insureds for liability arising out of operations by or on behalf of the Consultant in the performance of this Agreement.

e. The insurance provided to the additional insureds shall be primary to, and non-contributory with, any insurance or self-insurance program maintained by them.

f. The policy definition of "insured contract" shall include assumptions of liability arising out of both ongoing operations and the products-completed operations hazard (broad form contractual liability coverage including the "f" definition of insured contract in ISO form CG 00 01, or equivalent).

g. The policy shall cover inter-insured suits between the additional insureds and Consultant and include a "separation of insureds" or "severability" clause which treats each insured separately.

h. *Required Evidence of Insurance:*

- **i.** Copy of the additional insured endorsement or policy language granting additional insured status; and
- **ii.** Certificate of Insurance.

3. Automobile Liability Insurance

a. Minimum Limit: $1,000,000 combined single limit per accident. The required limits may be provided by a combination of Automobile Liability Insurance and Commercial Excess or Commercial Umbrella Liability Insurance.

b. Insurance shall cover all owned autos. If Consultant currently owns no autos, Consultant agrees to obtain such insurance should any autos be acquired during the term of this Agreement or any extensions of the term.

c. Insurance shall cover hired and non-owned autos.

d. *Required Evidence of Insurance*: Certificate of Insurance.

4. Professional Liability/Errors and Omissions Insurance

a. Minimum Limits: $1,000,000 per claim or per occurrence; $1,000,000 annual aggregate.

b. Any deductible or self-insured retention shall be shown on the Certificate of Insurance. If the deductible or self-insured retention exceeds $25,000 it must be approved in advance by County.

c. If the insurance is on a Claims-Made basis, the retroactive date shall be no later than the commencement of the work.

d. Coverage applicable to the work performed under this Agreement shall be continued for two (2) years after completion of the work. Such continuation coverage may be provided by one of the following: (1) renewal of the existing policy; (2) an extended reporting period endorsement; or (3) replacement insurance with a retroactive date no later than the commencement of the work under this Agreement.

e. *Required Evidence of Insurance*: Certificate of Insurance.

5. Standards for Insurance Companies

Insurers, other than the California State Compensation Insurance Fund, shall have an A.M. Best's rating of at least A:VII.

6. Documentation

a. The Certificate of Insurance must include the following reference: Chalk Hill Road over Maacama Creek Bridge Replacement Project (C10002).

b. All required Evidence of Insurance shall be submitted prior to the execution of this Agreement. Consultant agrees to maintain current Evidence of Insurance on file with County for the entire term of this Agreement and any additional periods if specified in Sections 1 – 4 above.

c. The name and address for Additional Insured endorsements and Certificates of Insurance is: The County of Sonoma, its Officers, Agents, and Employees, Attn: Samuel Baumgardner 2300 County Center Drive, Suite B100, Santa Rosa, CA 95403

d. Required Evidence of Insurance shall be submitted for any renewal or replacement of a policy that already exists, at least ten (10) days before expiration or other termination of the existing policy.

e. Consultant shall provide immediate written notice if: (1) any of the required insurance policies is terminated; (2) the limits of any of the required policies are reduced; or (3) the deductible or self-insured retention is increased.

f. Upon written request, certified copies of required insurance policies must be provided within thirty (30) days.

7. Policy Obligations

Consultant's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

8. Material Breach

If Consultant fails to maintain insurance which is required pursuant to this Agreement, it shall be deemed a material breach of this Agreement. County, at its sole option, may terminate this Agreement and obtain damages from Consultant resulting from said breach. Alternatively, County may purchase the required insurance, and without further notice to Consultant, County may deduct from sums due to Consultant any premium costs advanced by County for such insurance. These remedies shall be in addition to any other remedies available to County.

EXHIBIT C– Disadvantaged Business Enterprises (DBE)

THIS PROJECT IS SUBJECT TO TITLE 49 CFR 26.13(B)

The consultant, sub recipient, or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate.

Consultant must take necessary and reasonable steps to ensure that DBEs have opportunity to participate in the agreement (49 CFR 26).

To ensure equal participation of DBEs provided in 49 CFR 26.5, the Department shows a goal for DBEs. Consultant must make work available to DBEs and select work parts consistent with available DBE subcontractors and suppliers.

Consultant must meet the DBE goal shown in Section 13.4 of Agreement or demonstrate that adequate good faith efforts to meet this goal. It is the consultant's responsibility to verify that the DBE firm is certified as DBE at date of proposal opening. For a list of DBEs certified by the California Unified Certification Program, go to:

http://www.dot.ca.gov/hq/bep/findcertified.htm

All DBE participation will count toward the Department's federally mandated statewide overall DBE goal.

Credit for materials or supplies you purchase from DBEs counts towards the goal in the following manner:

100 percent counts if the materials or supplies are obtained from a DBE manufacturer.

60 percent counts if the materials or supplies are obtained from a DBE regular dealer.

Only fees, commissions, and charges for assistance in the procurement and delivery of materials or supplies count if obtained from a DBE that is neither a manufacturer or regular dealer. 49 CFR 26.55 defines "manufacturer" and "regular dealer."

You receive credit towards the goal if you employ a DBE trucking company that performs a commercially useful function as defined in 49 CFR 26.55(d)(l) through (4) and (6).

DBE GOAL.

The Disadvantaged Business Enterprise (DBE) goal for this project is **9%**.

DBE COMMITMENT SUBMITTAL.

Submit DBE information on the Caltrans Bidder – DBE Commitment form included as within this Agreement. The form must be completed and returned with the agreement.

Submit written confirmation from each DBE stating that it is participating in the contract. Include confirmation with the DBE Commitment form. A copy of a DBE's quote will serve as written confirmation that the DBE is participating in the contract.

It is the consultant's responsibility to verify that the firm is certified as of the date of submittal.

GOOD FAITH EFFORTS SUBMITTAL.

If you have not met the DBE goal, complete and submit the Good Faith Efforts Documentation form with the proposal showing that you made adequate good faith efforts to meet the goal.

Only good faith efforts directed towards obtaining participation by DBEs will be considered.

If your DBE Commitment form shows that you have met the DBE goal or if you are required to submit the DBE Commitment form, you must also submit good faith efforts documentation.

Good faith efforts documentation must include the following information and supporting documents, as necessary:

Items of work the consultant has made available to DBE firms. Identify those items of work you might otherwise perform with its own forces and those items that have been broken down into economically feasible units to facilitate DBE participation. For each item listed, show the dollar value and percentage of the total contract. It is your responsibility to demonstrate that sufficient work to meet the goal was made available to DBE firms.

Names of certified DBEs and dates on which they were solicited to bid on the project. Include the items of work offered. Describe the methods used for following up initial solicitations to determine with certainty if the DBEs were interested, and the dates of the follow-up. Attach supporting documents such as copies of letters, memos, facsimiles sent, telephone logs, telephone billing statements, and other evidence of solicitation. You are reminded to solicit certified DBEs through all reasonable and available means and provide sufficient time to allow DBEs to respond.

Name of selected firm and its status as a DBE for each item of work made available. Include name, address, and telephone number of each DBE that provided a quote and their price quote. If the firm selected for the item is not a DBE, provide the reasons for the selection.

Name and date of each publication in which you requested DBE participation for the project. Attach copies of the published advertisements.

Names of agencies and dates on which they were contacted to provide assistance in contacting, recruiting, and using DBE firms. If the agencies were contacted in writing, provide copies of supporting documents.

List of efforts made to provide interested DBEs with adequate information about the plans, specifications, and requirements of the contract to assist them in responding to a solicitation. If you have provided information, identify the name of the DBE assisted, the nature of the information provided, and date of contact. Provide copies of supporting documents, as appropriate.

List of efforts made to assist interested DBEs in obtaining bonding, lines of credit, insurance, necessary equipment, supplies, and materials, excluding supplies and equipment that the DBE subcontractor purchases or leases from the prime consultant or its affiliate. If such assistance is provided by you, identify the name of the DBE assisted, nature of the assistance offered, and date assistance was provided. Provide copies of supporting documents, as appropriate.

Any additional data to support demonstration of good faith efforts.

SUBCONTRACTOR AND DBE RECORDS.

The Consultant shall maintain records showing the name and business address of each first-tier subcontractor. The records shall also show the name and business address of every DBE subcontractor, DBE vendor of materials and DBE trucking company, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all of these firms. DBE prime Consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

Upon completion of the Agreement, a summary of these records shall be prepared on "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First Tier Subcontractor's" Form CEM-2402(F) and certified correct by the Consultant or the Consultant's authorized representative, and shall be furnished to the County Engineer. The form shall be furnished to the Engineer within 90 days from the date of contract acceptance.

DBE CERTIFICATION STATUS.

If a DBE subcontractor is decertified during the life of the project, the decertified subcontractor shall notify the Consultant in writing with the date of decertification. If a subcontractor becomes a certified DBE during the life of the project, the subcontractor shall notify the Consultant in writing with the date of certification. The Consultant shall furnish the written documentation to the Engineer.

Upon completion of the contract, "Disadvantaged Business Enterprise (DBE) Certification Status Change" Form CEM-2403 (F) indicating the DBE's existing certification status shall be signed and certified correct by the Consultant. The certified form shall be furnished to the Engineer within 90 days from the date of contract acceptance.

PERFORMANCE OF DBE SUBCONTRACTORS AND SUPPLIERS.

The DBEs listed by the Consultant in response to the Section 13.4 of agreement, which are determined by the Department to be certified DBEs, shall perform the work and supply the materials for which they are listed, unless the Consultant has received prior written authorization

to perform the work with other forces or to obtain the materials from other sources.

Authorization to use other forces or sources of materials may be requested for the following reasons:

The listed DBE, after having had a reasonable opportunity to do so, fails or refuses to execute a written contract, when such written contract, based upon the general terms, conditions, plans and specifications for the project, or on the terms of such subcontractor's or supplier's written bid, is presented by the Consultant.

The listed DBE becomes bankrupt or insolvent.

The Listed DBE fails or refuses to perform the subcontract or furnish the listed materials.

The Consultant stipulated that a bond was a condition of executing a subcontract and the listed DBE subcontractor fails or refuses to meet the bond requirements of the Consultant.

The work performed by the listed subcontractor is substantially unsatisfactory and is not in substantial conformance with the plans and specifications, or the subcontractor is substantially delaying or disrupting the progress of the work.

It would be in the best interest of the County.

The Consultant shall not be entitled to any payment for such work or material unless it is performed or supplied by the listed DBE or by other forces (including those of the Consultant) pursuant to prior written authorization of the Engineer.

Title: Women's Equality Day 2018

Recommended Actions:

Adopt a Resolution proclaiming August 26, 2018 to be Women's Equality Day in Sonoma County

Executive Summary:

Women's Equality Day was established in 1971 through a Joint Resolution of Congress put forth by Representative Bella Abzug (D-NY). The date of August 26th was chosen in commemoration of the passage of the 19th Amendment and, in celebration and recognition of, the history of the United States suffrage movement that officially began at Seneca Falls, New York in 1848. Seventy-two years later, in 1920, women were finally given the right to vote.

The Commission on the Status of Women (CSW) strives to carry forward the legacy of the suffrage movement by providing programs that support the equality of women and girls in our community – a key component of the Junior Commissioner Project, a leadership and mentoring program for high-school age youth – and partnering with organizations that promote the participation of women in the electoral and political process.

Discussion:

The Commission believes Women's Equality Day is not only an opportunity to recognize and honor the efforts of the women and men who fought for equal rights for women, but that Women's Equality Day is also an opportunity to bring attention to the reality that despite decades of progress, women have not achieved true equality beyond the voting booth. Women still face an array of gender-related disparities in many areas, including but not limited to: employment earnings, economic security, personal safety, and healthcare. These disparities play a major role in the lack of women in positions of corporate leadership and elected office.

After reviewing the California Women's Well-Being Index compiled by the California Budget & Policy Center and the Women's Foundation of California, the Commission selected four low-scoring areas affecting women and girls in Sonoma County in which they hope to bring about change.

Affordable Childcare
Women often cannot accept gainful employment, or invest in professional development when they cannot access affordable care for their children. The Affordable Childcare ad hoc will work to raise local awareness of the need for affordable care in Sonoma County while also supporting legislation that will increase its availability locally. Commissioners will participate in lobbying efforts, provide support for relevant legislation and will team up with local groups who are also seeking to increase quality affordable childcare in our community.

Empowering Women
This ad hoc committee continues to focus on encouraging and supporting women to undertake active roles in the public sector and recognize the innate value of the participation of women in decision making. To this end, the committee has collected and collated information about every committee, board, commission, advisory body in Sonoma County with public participation showing jurisdiction, purpose, composition and membership. This information will be made available through the Commission webpage, and will be updated to insure that the information is current and complete. To complement this information, the committee is designing workshops that will be presented in locations throughout the county to engage, recruit and support women who might be interested in a public role. This workshop is designed not only to provide information about the application process but to demonstrate that women have skills and perspectives that would be valuable to any public service with or without prior experience or professional training.

The Commission is committed to the principles equal rights and equal access for women and opening doors to the ideas and voice of women benefits the entire community regardless of the location, subject matter, or jurisdiction.

Intimate Partner Violence
Women locked into abusive and violent relationships are particularly challenged in working on their own professional growth and development.

The ad hoc continues to identify and build relationships with organizations that help individuals affected by intimate partner violence and sexual assault. Commissioners also continue to support our partners in providing access to intimate partner violence and sexual assault prevention education within local schools and throughout the community. This is an area we hope to expand in the next year.

Mental Health/Suicide
