Susan was hospitalized for several days after a fall left her with a broken hip. She was then released to a skilled nursing facility for 23 days and had two follow-up doctor’s appointments as well. Below is what Susan’s out-of-pocket expenses could look like with only Medicare Parts A and B, as well as what her expenses could look like with Medicare supplement plans N and F:

Two ways to get covered.

Added on.
A Medicare Part D plan can be added onto Original Medicare, a Medicare Supplement insurance plan or certain Medicare Advantage plan that doesn’t include prescription drug coverage.

OR

Included.
Many Medicare Advantage plans include prescription drugs as a part of the standard plan coverage.
UnitedHealthcare Prescription Drug Plans (Part D)

UnitedHealthcare Prescription Drug Plans (Part D)

**Costs**
All Medicare Part D plans are set up in drug payment stages. Each stage tells you the amount you pay and the amount your plan pays for covered medications.

**Annual deductible**
If your plan has a deductible, you pay the total cost of your drugs until you reach the deductible amount set by your plan. Then you move to the initial coverage stage.

</tr>
</tbody>
</table>

**Total Drug Costs:** The amount you pay (or others pay on your behalf) and the plan pays for prescription drugs, starting January 2016. This does not include premiums.

**Out-of-Pocket Costs:** The amount you pay (or others pay on your behalf) for prescription drugs, starting January 2016. This does not include premiums.
Two Plans That May Fit Your Needs

Most prescription drug plans divide their list of drugs into tiers or levels. Generally, the lower the tier, the lower the cost you pay.

- If you have a drug in a higher tier, you may want to talk to your doctor to see if a drug in a lower tier will work just as well and save you money.
- Pay $0 for a 90-day supply of most generic medications with OptumRx home delivery.
