

## **EMS Project Stakeholder proposals for the ordinance based upon the Identified Topics and Interests**

### Accountability and Supervision of field or pre-hospital medical care

Ordinance language should better integrate the training process into the system including requirements that ambulance service providers accommodate interns from local training programs for placement in order to complete their practical experience in accordance with LEMSA policies.

### Other Issues for the Ordinance:

Ordinance language should provide the ability for agencies to secure agreements with neighboring county agencies to ensure that the closest EMS resource is dispatched regardless of county line.
