

RABIES ALERT

Sonoma County Department of Health Services has determined that a domestic cat in Sonoma County had contracted rabies recently. The cat exposed its owners and other pets to the deadly disease and was euthanized. This is the first domestic animal in the county to test positive since the 1990s. The cat was not vaccinated.

“This case highlights the danger of failing to vaccinate pets.”

To help prevent this tragedy from occurring in the future and as part of our continuing mission to promote public health and safety, **VIP PetCare** is offering **\$5 Canine and Feline rabies vaccinations** at all of our Community Veterinary Clinics held in Sonoma County throughout the month of February.

“If your pet is not current in its rabies vaccinations and encounters a rabid animal it will be recommended to be euthanized.”

Karen Holbrook, Deputy Health Officer
