13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. Consultant or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Consultant shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

- 13.5.1 Consultant shall comply with the State of California's General Prevailing Wage Rate requirements in accordance with California Labor Code, Section 1770, and all Federal, State, and local laws and ordinances applicable to the work.
- 13.5.2 Any subcontract entered into as a result of this contract, if for more than \$25,000 for public works construction or more than \$15,000 for the alteration, demolition, repair, or maintenance of public works, shall contain all of the provisions of this Article, unless

the awarding agency has an approved labor compliance program by the Director of Industrial Relations.

The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.

To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities (“DBE”) and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant’s work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. Consultant hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor’s work by County shall not operate as a waiver or release. If County determines that any of Consultant's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require

Consultant to meet with County to review the quality of the work and resolve matters of concern; (b) require Consultant to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. Consultant or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Consultant shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. Failure by Consultant to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as County deems appropriate.
- 13.4.4 Any subcontract entered into as a result of this contract shall contain all of the provisions of this section.
- 13.4.5 A DBE firm may be terminated only with prior written approval from County and only for the reasons specified in 49 CFR 26.53(f). Prior to requesting County consent for the termination, Consultant must meet the procedural requirements specified in 49 CFR 26.53(f).
- 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.

- 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. Acceptance of any improper delivery, service, or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance. Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

Consultant hereby agrees to provide all services under this Agreement in accordance with generally accepted professional practices and standards of care, as well as the requirements of applicable federal, state and local laws, it being understood that acceptance of Contractor’s work by County shall not operate as a waiver or release. If County determines that any of Consultant's work is not in accordance with such level of competency and standard of care, County, in its sole discretion, shall have the right to do any or all of the following: (a) require

Consultant to meet with County to review the quality of the work and resolve matters of concern; (b) require Consultant to repeat the work at no additional charge until it is satisfactory; (c) terminate this Agreement pursuant to the provisions of Article 4; or (d) pursue any and all other remedies at law or in equity.

Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

Nothing in this Article limits County's right to terminate this Agreement pursuant to Article 4.

11. Assignment and Delegation.

13. Federal Requirements.

13.1 Contract Assurance.

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted agreements. Failure by the consultant to carry out these requirements is a material breach of this agreement, which may result in the termination of this agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to: (1) Withholding monthly progress payments; (2) Assessing sanctions; (3) Liquidated damages; and/or (4) Disqualifying the contractor from future bidding as non-responsible.

13.2 Prompt Progress Payments to Subcontractors.

Attention is directed to Section 7108.5 of the California Business and Professions Code, which requires a prime contractor or subcontractor to pay any subcontractor not later than ten (10) days of receipt of each progress payment, unless otherwise agreed to in writing. In addition, federal regulations (Title 49 Code of Federal Regulations Part 26.29) require a prime contractor or subcontractor to pay a subcontractor no later than thirty (30) days of receipt of each payment, unless any delay or postponement of payment among the parties takes place only for good cause and with the prior written approval of County. Section 7108.5 of the California Business and Professions Code also contains enforcement actions and penalties. The requirements apply to both Disadvantaged Business Entities ("DBE") and non-DBE subcontractors. Consultant shall include the foregoing progress payment requirements in every subcontract entered into by Consultant in the performance of its obligations under this Agreement

13.3 Prompt Payment of Withheld Funds to Subcontractors.

No retainage will be held by the County from progress payments due the prime consultant. Any retainage held by the prime consultant or subconsultants from progress payments due subconsultants shall be promptly paid in full to subconsultants within 30 days after the subconsultant's work is satisfactorily completed. Federal law (49 CFR 26.29) requires that any

delay or postponement of payment over the 30 days may take place only for good cause and with the Agency's prior written approval. Any violation of this provision shall subject the violating prime consultant or subconsultant to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies, otherwise available to the prime consultant or subconsultant in the event of a dispute involving late payment or nonpayment by the prime consultant, deficient subconsultant performance, or noncompliance by a subconsultant. This provision applies to both DBE and non-DBE prime consultant and subconsultants.

13.4 Disadvantaged Business Enterprise (DBE) Participation.

- 13.4.1 This contract is subject to 49 CFR, Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- 13.4.2 A DBE participation goal will be established for each Task Order. Participation by DBE consultant or subconsultants shall be in accordance with information contained in the Consultant Proposal DBE Commitment (Exhibit 10-O1), or in the Consultant Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met.
- 13.4.3 DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. Consultant or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Consultant shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. - 13.4.6 A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under

the, contract is commensurate with the work it is actually performing, and other relevant factors.

- 13.4.7 A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.
- 13.4.8 If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- 13.4.9 Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- 13.4.10 Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subconsultants" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by Consultant or Consultant's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to Consultant when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- 13.4.11 If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Contract, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to County's Contract Administrator within 30 days.

13.5 Prevailing Wage.

- 13.5.1 Consultant shall comply with the State of California's General Prevailing Wage Rate requirements in accordance with California Labor Code, Section 1770, and all Federal, State, and local laws and ordinances applicable to the work.
- 13.5.2 Any subcontract entered into as a result of this contract, if for more than \$25,000 for public works construction or more than \$15,000 for the alteration, demolition, repair, or maintenance of public works, shall contain all of the provisions of this Article, unless

the awarding agency has an approved labor compliance program by the Director of Industrial Relations.

Title: Recognition of the 2017-2018 Junior Commission on Human Rights

Recommended Actions:

Recognize twenty-one high school students for their participation on the Junior Commission on Human Rights for the 2017-2018 term.

Executive Summary:

The Junior Commission on Human Rights is a mentorship program that engages high school youth ages 14 to 18 in education and activism around human rights issues within Sonoma County. Additionally, the project provides an opportunity to foster leadership skills by educating their peers and creating ad hoc committees on issues of interest. The students are encouraged to be active participants in their community, engaging with elected officials and human rights organizations, and creating projects that benefit the community. The program also provides a vehicle by which County Supervisors are able to learn about current concerns and issues important to youth, and to advancing human rights in Sonoma County.

Discussion:

The Commission on Human Rights oversees the Junior Commission and students are recruited from high schools and community organizations in all five county districts through an application process. The Junior Commissioner term runs concurrent with the school year from August to May.

After being sworn into office by Dmitra Smith, Vice Chair of the Commission on Human Rights on August 23, 2017, the Junior Commissioners began to discuss human rights issues affecting members of the Sonoma County community. Ad hoc committees were formed to develop goals and objectives for term-long projects to address these issues.

The Junior Commissioners created the following community service projects:

Education Gap Ad hoc:

Drawing from personal experience and observation of decreased representation for Latino students in Advanced Placement classes, this committee conducted a survey and created a report addressing the education gap between Latino students and their Caucasian peers in Sonoma Valley. The report was presented at the Sonoma County Commission on Human Rights' Education Forum in Sonoma Valley on March 28, 2018 and shared with Sonoma Valley educators, administrators, and school board trustees. (Organized by Junior Commissioner Torres).

Homelessness Ad hoc:

In an effort to spread awareness around the issues of homelessness in our community, and to bring attention to the need for more housing, this committee held a public Forum on Homelessness, featuring speakers from partner organizations that provide services to the homeless population, and partnering members of the public with volunteer opportunities. They also created a short film featuring interviews

with members of the homeless community. (Organized by Junior Commissioners Andersen, Hejl, Hornbostel, Leddy, and Nagappala).

Human Trafficking Ad hoc:

This committee promoted *Strong Survival*, the 2016-2017 junior commission documentary that spreads awareness about human trafficking through the story of local survivor and activist, Maya Babow. The film was shared with all middle and high school administrators, screened at various events, and at high school presentations organized with Ms. Babow. In partnership with sexual assault victims' advocacy organization, Verity, the committee also developed a one page fact sheet with information and statistics about human trafficking that exists in our own community. The one sheet was distributed to all middle and high school administrators with a request to share the information with parents so as to spread awareness, and help protect students from traffickers. (Organized by Junior Commissioners Dai, Johnson, Kulawiak, and Lu).

Immigrants' Rights Ad hoc:

The Immigrants' Rights committee created a presentation on myths vs. facts about the immigrant community for schools. In an effort to spread awareness to their peers and provide support for Deferred Action for Childhood Arrivals (DACA) students in their own communities, they also created a poster campaign urging students to engage their members of Congress to enact a Clean Dream Act. The commissioners also distributed Know Your Rights cards and participated in a short documentary film about DREAMers – children who have benefited from DACA following the failure of Congress to pass the Development, Relief and Education for Alien Minors (DREAM Act) (Organized by Junior Commissioners Cervantes, Ling, and Makaryan).

Mental Health and Illness Ad hoc:

Realizing that mental health intersects with many other issues, and noting the decrease in services available at many high schools, this committee created an anonymous online survey to study the perceptions of high school students and the culture surrounding mental illness. Participants answered a set of questions in English and Spanish about their feelings about mental health concerns and their perceptions of available support. The committee compiled the data into a report with recommendations that they shared with Sonoma county high schools. (Organized by Junior Commissioners Nadler, and Talcott).

Racial Equality in Sonoma County Ad hoc:

To promote awareness of the racial issues that exist in our community, this committee created a comprehensive report analyzing the data of the results of last year's anonymous online, peer-to-peer survey that was open to all Sonoma County high school students to evaluate racial climate in their schools. The report, along with recommendations to improve school climate around race, was distributed to Sonoma county high school administrators and district superintendents. The committee participated in several workshops as part of the Day of Dialogue event at Maria Carrillo High School.

The members on Racial Equality also manage the Facebook page Real Humans of Sonoma County, a source of compelling stories from our diverse community

<https://www.facebook.com/realhumansofsonomacounty/>

(Organized by Junior Commissioners Barrales, Garay, Kinsella, Patel, and Sullivan).

Youth Human Rights Ad hoc:

This committee worked to develop a presentation on the rights of youth in education and general education on human rights concepts. (Organized by Junior Commissioner Macken).

These Junior Commission on Human Rights accomplishments are listed on the Commission’s website www.sonomacountychr.org.

In addition to creating community service projects, the Junior Commissioners also organized the county wide March for Our Lives rally at Old Courthouse Square on March 24, 2018. The event drew over 2,000 attendees and included youth speakers, elected officials, and community organizations partnering to provide a platform for Sonoma County students to speak out on gun violence in solidarity with the students of Marjory Stoneman Douglas High School in Parkland, Florida and other students nationwide. It also provided teens with an opportunity to pre-register to vote.

Junior Commissioners also participate in educational field trips. Before the end of the term, the Junior Commissioners will visit the offices of the Human Rights Watch, meet with the San Francisco Youth Commission in City Hall, and visit the California Historical Society and the Museum of the African Diaspora

RECOMMENDATION:

Recognize twenty-one high school students for their participation on the Junior Commission on Human Rights for the 2017-2018 term.

Prior Board Actions:

This is the fifth term of the Junior Commission on Human Rights. The Board has recognized participants since 2013, and participants in their sister commission, the Junior Commission on the Status of Women, since 1996.

Strategic Plan Alignment Goal 4: Civic Services and Engagement

Recognizing youth working to better their community promotes Civic Services and Engagement.

Is there a gap between minority and white students?

151 responses

This diagram comes from a student survey that I conducted, which consist of a broad selection of students

Student Comments:

"I did not know that AP classes were very important for high school"

"According to a 2017 article from Inside Higher Ed, just over **16% more white people graduate from college than hispanics**. As such, these parents are more likely to expect the same from their children and, as such, will push them to take these higher level classes."

"There tends to be a **stereotype** that Latin students **cannot get to the level of other** "superior races, white."

"The school can definitely try and teach in a **different form**. The material can also be more **diverse** as in teaching about different cultures and their background."

General Solutions/ What we need to focus on:

- Encourage/ Allow Special Ed, minority students to take **AP courses**
- Accessible **support** for disadvantaged students
- Improve **communication** with **all** parents
- Train teachers on how to teach diverse learners
- Make **Gifted Education** testing **mandatory** to all students
- Not only enrolling minority students in advanced classes, there is a responsibility to make sure that they receive **support** and **encouragement** to succeed in those classes.

“It’s been about changing the mindset about who is a gifted student, knowing who has the potential but needs a little more support going into it.”

HUMAN TRAFFICKING: SONOMA COUNTY

HUMAN TRAFFICKING IS THE MODERN DAY MANIFESTATION OF SLAVERY

Traffickers and purchasers of those who are victimized lack a sense of conscience, remorse, and respect for the women, men, children, and youth who are victimized by the atrocities that occur when one is trafficked. Each day in our very own community of Sonoma County more victims are held hostage by human traffickers.

XX SONOMA COUNTY LAW ENFORCEMENT HAVE INVESTIGATED HUMAN TRAFFICKING CASES IN

SANTA ROSA, ROHNERT PARK, PETALUMA, COTATI, AND WINDSOR

XX Victims are usually targeted based on vulnerability. Homelessness, experience in foster care, previous experiences of sexual or domestic violence, and younger age all play a factor in a victim's susceptibility to being trafficked.

XX Perpetrators or "buyers" come from all walks of life and all sorts of backgrounds. Verity's advocates have seen engineers, bankers, brew-masters, jewelers, attorneys, photographers, marijuana growers, laborers, and others. They've seen married men, fathers, single men, and a son-in-law gifting purchased sex to his father-in-law.

The only way to create change in the face of great injustice and danger is to recognize the problem, and address it.

PLEASE SPEAK WITH YOUR STUDENTS AND CHILDREN ABOUT THE DANGERS AND PREVALENCE OF HUMAN TRAFFICKING.

Having honest conversations and establishing networks of trust are invaluable actions that will help end the terrible practice of human trafficking. Organizations such as Verity are working hard to combat this awful abuse of human rights, but only through a community-wide acknowledgement and promise to end this horror can we truly put a stop to human trafficking.

Immigrants' Rights

What Are Immigrants' Rights?

The fundamental constitutional protections of due process and equal protection embodied in our Constitution and Bill of Rights apply to every person, regardless of immigration status.

What Is DACA? Why Is It Important

Requirements for DACA

- Came to the United States before their 16th birthday
- Have lived continuously in the United States since June 15, 2007
- Have completed high school or a GED, have been honorably discharged from the armed forces, or are enrolled in school
- Have not been convicted of a felony or serious misdemeanor, or three or more other misdemeanors, and do not otherwise pose a threat to national security or public safety

Myths About Immigrants

- **Undocumented immigrants could come the legal way, but choose to be here illegally.**
- Essentially there is no way to immigrate legally for the overwhelming majority of them
- **Immigrants receive a lot of public benefits and therefore are a huge drain on our society's resources**
- Generally speaking, immigrants come to work and to reunite with family members; the ratio between immigrant use of public benefits and the amount of taxes they pay is consistently favorable to the U.S.

What Is DACA? Why is it Important

Q6

What could your school do better to help students with their mental health?

Answered: 212 Skipped: 12

Talk to the students

4/18/2018 10:03 AM

Have someone to look out and reach out if someone is seen possibly struggling.

4/18/2018 10:03 AM

Address it and acknowledge that individuals who do feel isolated because of it, are not alone and there are reputable resources to assist them with whatever they're going through. Educate students about mental health because there are actual children who are possibly suffering because they don't understand their condition.

4/18/2018 10:03 AM

We could have more education directly related to mental health and more education about the resources available to us on campus.

KNOW YOUR RIGHTS AT SCHOOL

What to do if you are harassed* (bullied) at school

Students:

*What is harassment?

It's when someone or some people keep saying or doing something to a student even if the student doesn't want them to and has tried to stop it. It's illegal under federal law. Students at any age level have the right not to be harassed.

Title VI states that:

"No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

Gender is protected under Title IX and is also under the jurisdiction of the Office for Civil Rights.

<http://www2.ed.gov/about/offices/list/ocr/docs/hq43e4.html>

HARASSMENT IS NOT YOUR FAULT.

You have a protected right to feel safe at school.

It is the right of all students to be free from discrimination from others—other kids or adults—at school.

Write it down

1

Keep notes, make an incident report
Always make a copy (or write it twice).

Tell someone at home

2

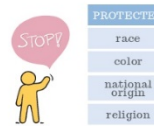

Talk to a parent or trusted adult
Tell someone the first time it happens.

Tell someone at school

3

Notify the school administration about the situation and request, specifically, that they "stop the harassment."

Parents:

What parents can do for any adult if a child reports harassment to you:

Talk to your student to make sure you have all the details of the incident(s). Have your student fill out the Campus Climate Check-Up.

1: NOTIFY THE SCHOOL ADMINISTRATION

Your student's school is required to initiate an internal grievance procedure upon notice of harassment. You may use their procedure AND/OR file an OCR complaint to address an inadequate response to your student's complaints.

2: FILE AN OFFICE OF CIVIL RIGHTS (OCR) COMPLAINT

Anyone who believes an act of discrimination on the basis of race, color or national origin has occurred against any person or group may file a complaint with OCR under Title VI. The person filing need not be the victim of the alleged discrimination. Complaint letters should explain: who was discriminated against, in what way, by whom, when it took place, who was harmed, and who to contact for more info.

Title: Health Care District Month 2018

Recommended Actions:

Adopt a resolution proclaiming May 2018 as Health Care District Month in Sonoma County.

Executive Summary:

This item requests that the Board adopt a resolution proclaiming May 2018 as Health Care District Month in Sonoma County. The following six health care districts currently serve Sonoma County: Cloverdale Health Care District, North Sonoma County Healthcare District, Palm Drive Health Care District, Petaluma Health Care District, Sonoma Valley Health Care District, and Coast Life Support District.

Discussion:

Shortly after the end of World War II, California faced a severe shortage of hospital beds. Many of the more rural and undeveloped areas of the state had almost no access to basic hospital and health care services. To respond to the inadequacy of acute care services in the non-urban areas of the state, the California legislature enacted the Local Hospital District Law in 1945 (§ 32000 et seq. of the Health and Safety Code). The intent was to give rural, low-income areas without ready access to hospital facilities a source of tax dollars that could be used to construct and operate community hospitals and health care institutions, and, in medically underserved areas, to recruit physicians and support their practices (e.g., subsidies, office space, and equipment).

The Local Hospital District Law allowed communities to create a new governmental entity, independent of local and county jurisdictions that had the power to impose property taxes, enter into contracts, purchase property, exercise the power of eminent domain, issue debt, hire staff, and so forth. Typically, the process of creating a hospital district began with a group of citizens in a community or cluster of communities identifying the need for improved access to medical care. Boundaries for a proposed hospital district were usually based on the distance between the communities and the closest available acute care hospital services. Community leaders organized grassroots campaigns to gather support from

the majority of residents in a designated area. That designated area could be within a county, near another underserved area in the county (districts do not need to encompass contiguous areas), or could overlap two counties. In fact, a few of the current health care districts, such as Coast Life Support District, do cross county boundaries.

The first hospital districts were formed in 1946, with several more districts being formed in the late 1940s, and associated hospitals beginning to open in the early 1950s. In 1951, in a response to the needs of these new districts, a new trade organization, the Association of California Healthcare Districts, was formed. Association of California Healthcare Districts' objective was to educate new hospital board members and provide a statewide forum for legislative advocacy. Today that group represents 66 of the 85 health care and hospital districts, both large and small, throughout the state.

Currently, California's 78 health care districts can be found throughout the state, in both urban and rural settings and offering a variety of services including community grant making, chronic disease management education, senior services, ambulance services, primary care clinics, dental clinics, nutritional counseling, physical education, long term care/skilled nursing, senior housing, and acute hospital care. In many instances, health care districts are the sole source of health care in the community; serving as an integral part of the safety net for the state's uninsured/underinsured. In 1994, in recognition of the rapidly expanding role of hospital districts, the state legislature broadened the scope of activity of the districts and renamed the statute to its current reference, Local Health Care District Law.

The following six health care districts currently serve Sonoma County:

Cloverdale Health Care District - The Cloverdale Health Care District is a local government entity, formed in 1958 by a vote of the greater Cloverdale area. The district provides emergency ambulance service to an 85 square mile response area, responding to over 900 calls for service per year. The Cloverdale Health Care District ambulance provides the only paramedic level patient care in Northern Sonoma County and also provides services to parts of Southern Mendocino County. These services include pre-hospital critical care with transport to local and specialty hospitals based on the patient's care requirements. The district's team approach between their agency, other local responder agencies, and specialty hospitals allows them to diagnose and treat heart attack, stroke, and trauma patients at the scene and obtain appropriate services in a timely fashion to save lives and ensure quality of life. The district's focus is to provide essential services to a medically underserved area and to work in cooperation with and to help facilitate care among limited local services.

North Sonoma County Healthcare District - North Sonoma County Healthcare District, located in Healdsburg, was formed in 2001 and has operated the Healdsburg District Hospital (founded in 1905) since 2002. The North Sonoma County Healthcare District is mainly comprised of Windsor, Healdsburg, Geyserville, Cloverdale, and the surrounding areas, totaling approximately 60,000 residents. The hospital currently serves over 10,000 patients a year.

Palm Drive Health Care District - Palm Drive Health Care District, located in Sebastopol, was formed in April 2000. The district operates Sonoma West Medical Center, a 25-bed community hospital, which include a physician-staffed around-the-clock emergency department with an operating room, critical care, and medical surgical unit. The hospital has active research related to Alzheimer's and provides telemedicine services. The district partners with West County Health Centers to provide additional in-home support services in the Russian River Community, more complex wound care at West County Health Centers, facilitation of the Health Action Group for the Russian River Area, and an increase in

West County Health Centers hours to weekends and evenings. The district serves approximately 50,000 people who live in western Sonoma County, including the communities of Sebastopol, Graton, Forestville, Bodega Bay, Carmet, Salmon Creek, Jenner, Duncan's Mills, Guerneville, Occidental, Freestone, Rio Nido, Monte Rio, Guerneville Park, Summerhome, and Mirabel Park.

Petaluma Health Care District - The Petaluma Health Care District was established in 1946 and works to improve the health and well-being of Southern Sonoma county residents through leadership, advocacy, support, partnerships and education. Petaluma Health Care District owns Petaluma Valley Hospital and leases hospital operations to St. Joseph's Health, ensuring access to local quality acute and emergency hospital services benefitting the community. Petaluma Health Care District serves as a community leader and local Health Action Chapter to support a countywide effort to make Sonoma County the healthiest county in California by 2020, which includes identifying community health priorities and addressing the social determinants of health, inequities, and disparities that exist and impact the well-being of the community. Petaluma Health Care District's efforts in improving the health and well-being of the people of Southern Sonoma County led to their being named 2015 Health Care District of the Year by the Association of California Healthcare Districts and also to being recognized as a HeartSafe Community.

Sonoma Valley Health Care District - The Sonoma Valley Health Care District was formed in 1946 and this year celebrates its 70th anniversary. Its mission is to maintain, improve, and restore the health of everyone in the community. The District operates Sonoma Valley Hospital, a 75-bed, full-service acute care hospital, located in the heart of the city of Sonoma and serving the 40,000 residents of the Sonoma Valley. The Hospital provides a broad range of health care services, with medical treatment extending to all but the most specialized issues. It also has a commitment to wellness, promoting improved health and wellbeing both in the Hospital and the community. Recently, the Hospital was extensively renovated and expanded, adding a new wing with a modern Emergency Department and Surgery Center.

Coast Life Support District - The Coast Life Support District was formed in 1986 following special California state legislation and a local election to form a new multi-county agency. Coast Life Support District provides emergency medical services, including emergency ambulance and life support services and other health-related services to a specified area within Sonoma and Mendocino Counties. From the center of the district, the closest medical facilities with 24-hour emergency medical care are a minimum of 1.5-2 hours travel time traversing the coast highway. Due to the longest transports in California to tertiary care, district paramedics routinely provide more comprehensive stabilization and in-transport care than the standard protocols of their urban counterparts. Coast Life Support District's mission is providing and promoting high quality healthcare services, facilities, emergency care and health education to all district residents and visitors. They work collaboratively with their community's Federally Qualified Health Center (one of only four non-hospital facilities designated by the California Emergency Medical Services as an Interim Stabilization and Triage Designation) allowing them to receive ambulance transports. A high percentage of these patients are treated and released locally, thereby minimizing unnecessary transports, avoiding additional clogging of already impacted emergency rooms, and allowing paramedics to stay in the area to be available for other emergencies.

Resolution of the Board of Supervisors of the County of Sonoma, State of California, Proclaiming May 2018 as Health Care District Month in Sonoma County

Whereas, health care districts are public entities that provide community-based health care services that are important to improving and protecting the quality of life for all Californians;

Whereas, health care districts were created after World War II to address a shortage of access to acute hospital care for many areas of the state, particularly rural areas of California. In 1994 Legislature enacted state law to rename hospital districts as health care districts to better reflect the focus of health care provision outside of hospital settings;

Whereas, health care districts have continued to evolve along with the changing health care environment and collectively provide a wide range of services, which include hospital services, emergency and ambulatory care, community health, wellness and preventative programs and services, skilled nursing and long-term care, community and rural health clinics, ambulance services, adult day care, senior housing and nutritional support, chronic disease management, health education, medical transportation, home health, and hospice;

Whereas, Sonoma County health care districts currently include:

1. Cloverdale Health Care District, located in Cloverdale and formed in 1958
2. North Sonoma County Healthcare District, located in Healdsburg and formed in 2001
3. Palm Drive Health Care District, located in Sebastopol and formed in 2000
4. Petaluma Health Care District, located In Petaluma and formed In 1946
5. Sonoma Valley Health Care District, located in Sonoma and formed in 1946
6. Coast Life Support District, located in Gualala and formed in 1986

Whereas, each health care district is uniquely focused on the unique needs of the community it serves. Health care districts utilize varying revenue streams, workforce sizes, services offered, and geographic locations to cater to the health services most needed by their communities.

Now, Therefore, Be It Resolved that the Board of Supervisors of the County of Sonoma does hereby proclaim May 2018 as Health Care District Month in Sonoma County.

Title: 2018 National Correctional Officers and Employees Week

Recommended Actions:

Adopt a Gold Resolution designating May 6 through May 12, 2018 as National Correctional Officers and Employees Week in Sonoma County, to recognize the efforts of all Correctional staff in keeping our communities safe.

Executive Summary:

Sheriff Rob Giordano, on behalf of the correctional employees of Sonoma County Sheriff's Office, is requesting the Board of Supervisors adopt a Gold Resolution designating May 6, 2017 through May 12, 2018 National Correctional Officers and Employees Week.

Discussion:

The annual observation of National Correctional Officers' Week began in 1984 when President Ronald Reagan signed Proclamation 5187 creating National Correctional Officers' Week to recognize the men and women who work in jails, prisons, and community corrections across the country. National Correctional Officers and Employees Week became the official name of the first full week in May when, in 1986, the U.S. Senate officially changed the name from "National Correctional Officers' Week".

In recent years, the duties of the Sonoma County correctional staff have become increasingly complex and demanding. They are called upon to simultaneously fill custodial, supervisory, and counseling roles. Since the implementation of AB 109/Realignment in October 2011, the size and make up of Sonoma County's inmate population has significantly changed. The makeup of the population now includes more violent, mentally ill, and high-risk offenders with longer stays.

There is a tremendous amount of work that goes into operating detention facilities that is carried out by sworn correctional staff as well as detention support staff that includes janitors, detention assistants, legal processors, kitchen, and healthcare staff.

The professionalism, dedication, and courage exhibited by the Sonoma County correctional employees throughout the performance of these demanding and often conflicting, challenging roles, and amidst historical staffing shortages deserve our utmost respect. It is appropriate that we honor the many contributions and accomplishments of these men and women who are a vital component in the field of corrections.

The resolution before you is requested to provide Sonoma County the opportunity to recognize the complex, dangerous, and challenging responsibilities carried out by each and every staff member inside our detention facilities. Correctional employees take on an enormous level of both personal and professional responsibility each day they come to work. We respectfully request that the Board honor and recognize the dedication and commitment of these employees and thank the selfless men and women who serve within our detention facilities each day. We encourage all our residents to join in recognition and appreciation of the outstanding professional service correctional employees provide to insure the safety and welfare of our community.

Prior Board Actions:

Since 2014, the Sonoma County Board of Supervisors has proclaimed the first full week in May, National Correctional Officers and Employees Week.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Correctional deputies and detention employees play a critical role in the goal of providing a safe, healthy, and caring community. Taking time to recognize the service of correctional employees reinforces the County’s commitment to this goal and acknowledges the personal sacrifices of correctional employees required to achieve this goal.

Adopt a gold resolution recognizing May 2018 as Sonoma County Travel and Tourism Month

Executive Summary:

Adopt a gold resolution recognizing May 2018, as Sonoma County Travel and Tourism Month

Discussion:

Sonoma County Tourism is asking the Board to adopt a gold resolution recognizing May 2018 as Travel and Tourism Month in Sonoma County, in recognition of an annual tradition for the travel community in the U.S.

Sonoma County Tourism joins with U.S. Travel, the non-profit organization that represents all components of the \$990 billion travel industry in the United States, the entity that celebrates National Travel and Tourism Week (NTTW). This year marks the 35th anniversary of the 1983 congressional resolution that established NTTW.

National Travel and Tourism Week is a time when travel and tourism professionals across the country unite to celebrate the value travel holds for our economy, businesses, and personal well-being.

Millions of visitors come to Sonoma County annually, and overnight visitors spend about \$389 per day, less than half of which is typically spent on lodging. Roughly 90 percent of Sonoma County's visitors are from within the United States. The 10 percent of international visitors to Sonoma County mainly hail from Canada, Western Europe, Mexico, Australia, New Zealand, Japan, and Korea.

Each year, Sonoma County's hospitality industry generates \$1.93 billion in destination spending; collects \$158.4 million in government revenue and employs 20,410 people.

Around one in 10 people are employed by tourism and hospitality businesses in Sonoma County. In fact, 82 percent of Sonoma County tourism businesses are small (fewer than 25 employees); 91 percent of tourism businesses are locally owned, only eight percent of these are franchises; and 39 percent have been in business for more than 20 years, 40 percent have been in business for 10 or fewer years.

Last year, Sonoma County Tourism celebrated National Travel and Tourism Week by launching Sonoma County Tourism Cares: More than 60 Sonoma County hospitality professionals celebrated by volunteering an estimated 250 hours to area non-profit agencies.

Prior Board Actions:

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

Sonoma County Tourism’s mission is to promote overnight stays and encourage tourism within Sonoma County. The organization envisions a robust economy for Sonoma County businesses and residents amplified by results-driven tourism planning and marketing. It exists as part of a countywide matrix of economic development entities, government, and private businesses that work to promote and manage the area for the travel and tourism segment.

Title: CalFresh Awareness Month

Recommended Actions:

Adopt a resolution declaring May 2018 as CalFresh Awareness Month in Sonoma County.

Executive Summary:

The designation of May 2018 as CalFresh Awareness Month is a collaborative effort across Sonoma County to highlight the benefits of the federal Supplemental Nutrition Assistance Program (SNAP) to increase access and participation in food assistance, to reduce hunger, and to promote good nutrition and physical activity. The California Department of Social Services, as well as counties throughout the state, traditionally celebrate CalFresh Awareness month in May each year.

Discussion:

In Sonoma County, there are three components of Supplemental Nutrition Assistance Program (SNAP): CalFresh benefits, SNAP education (SNAP-Ed), and CalFresh vendors. While CalFresh vendor enrollment and oversight is coordinated by the State of California, various County and non-profit organizations coordinate CalFresh benefits and/or SNAP-Ed efforts in Sonoma County, including the Human Services Department, the Department of Health Services, Catholic Charities of the Diocese of Santa Rosa, Petaluma Bounty, Redwood Community Healthcare Coalition, Redwood Empire Food Bank, Area Agency on Aging, the Northern Center for Well-Being and 211-Sonoma. Among other efforts, this partnership seeks to raise awareness and improve utilization of CalFresh benefits and healthy nutrition practices in Sonoma county.

CalFresh benefits are critical to healthy nutrition for many county residents. CalFresh benefits supplement household food budgets, allowing families to put healthy and nutritious food on the table. In Sonoma County 27,325 people receive CalFresh benefits. Of these beneficiaries:

- 42% are children under 21
- 13% are seniors age 60 and above
- 10% are homeless
- 6% are lawful immigrants

CalFresh generates over 6 million dollars annually into Sonoma County's local economy (\$1.79 in economic activity for every \$1 of CalFresh money spent). This helps local farmers markets and Community Supported agriculture and grocers sustain jobs in our community.

Sonoma County's SNAP-Ed program seeks to improve the likelihood that persons eligible for CalFresh will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*. Sonoma County's SNAP-Ed program focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for CalFresh by:

- Supporting low resourced schools to develop and implement school wellness policies and programs to support improved nutrition and physical activity behaviors among students, parents, and teachers.
- Providing nutrition education to children, their families and community members as well as vulnerable populations, such as seniors, homeless, and migrants.
- Increasing access to and promoting healthy foods and beverages, including fresh produce at neighborhood retail stores, alternative food sites (such as farmers' markets and community gardens), and emergency food sites (such as food pantries) through adopted and implemented policy and physical site changes.

The Human Services Department and the Department of Health Services partner with community organizations and agencies to provide outreach, education, or enrollment services throughout Sonoma County. Collaboration is central to reaching out to the communities where the need is greatest.

Title: Older Americans Month

Recommended Actions:

Adopt a Resolution declaring May 2018 as Older Americans Month in Sonoma County.

Executive Summary:

Sonoma County is committed to honoring older adults and celebrating the contributions made by older people in our communities. To demonstrate this commitment, the Board of Supervisors annually proclaims May as Older Americans Month in Sonoma County. This year's Older Americans Month theme is *Engage at Every Age*, which emphasizes that people are never too old (or too young) to take part in activities that enrich physical, mental and emotional well-being and celebrate the many ways older adults make a difference.

Discussion:

2018 marks the 53rd anniversary of the Older Americans Act, which was signed by President Lyndon B. Johnson into law in July 1965. Since that time, the Older Americans Act has provided a nationwide aging services network and funding that helps older adults live with dignity in the communities of their choice for as long as possible. These services include home-delivered and congregate meals, caregiver support, community-based assistance, preventive health services, elder abuse prevention, and much more.

AAA Advisory Council members will participate in community events in honor of Older Americans Month including attending the City of Santa Rosa's Senior Expo on May 19th at the Finley Community Center and Senior Rally Day on May 8th at the State Capitol. Additionally, Council members will participate in the "Sonoma County's New Workforce: Older Adults" event at the Vintners Inn in Santa Rosa on May 9th. This event will be hosted by Aging Together Sonoma County incorporating the Older Americans Month theme making the business case for age-friendly hiring highlighting that there is a skilled, experienced, productive population ready to join the workforce of local businesses. The event will be

highlighted by keynote speaker, Richard Adler, a Distinguished Fellow at the Institute for the Future in Palo Alto and include a panel discussion moderated by Cynthia Murry, President/CEO of North Bay Leadership Council.

Prior Board Actions:

May has been recognized by the Sonoma County Board of Supervisors as Older Americans Month in Sonoma County at the following meetings:

Title: 2018 Public Service Recognition Week

Recommended Actions:

Adopt Gold Resolution proclaiming the week of May 6 to 12, 2018 as Public Service Recognition Week in Sonoma County.

Executive Summary:

Public Service Recognition Week (PSRW) is celebrated annually during the first week of May, and this year the County of Sonoma will celebrate with lunch and entertainment for employees on May 9, 2018 at the County Center and on May 10, 2017 at the Airport Area. Human Resources looks forward to the Board's participation at this annual event honoring the County's approximately 4,000 employees.

Discussion:

Public Service Recognition Week is a national program sponsored by the Public Employee Roundtable, a non-partisan coalition of government organizations representing civil servants and retirees from all levels throughout the country. Public Service Recognition Week is celebrated annually during the first week of May, with this year's week being celebrated May 6 – May 12, 2018. This national recognition week encourages government at all levels to promote government employees and careers, educate the public about the value of public servants and the services they provide, recognize excellence in public service, and promote the spirit of public service.

The County of Sonoma began observing Public Service Recognition Week in 1997, by hosting an onsite recognition event. Traditionally, County employees are encouraged to attend a lunchtime event with their co-workers, during which they receive recognition from the Board of Supervisors and are served their meal by their Department Heads and members of the Board. Departments are encouraged to use their Department Employee Recognition Program funds to purchase tickets for their staff to attend this annual event.

This year, it is especially important to recognize our employee’s contributions, sacrifices, and time given to help our community survive and thrive after the tragic wildfires that severely impacted our services and residents in October 2017. County employees jumped into action, serving as first responders, and first line staffing at the emergency operation centers, point of entry sites, shelters, and the local assistance center. A few examples of the employee’s work and support of the response and recovery to the 2017 wildfires:

- Helped 52,372 callers through the emergency hotline.
- Supported the Local Assistance Center which served 11,204 residents.
- Issued over 4,000 replacement documents at a cost savings of \$250,000 to victims of the wildfires.

We recognize the daily efforts of all staff and the positive impact to the community and organizations derived from employee teamwork. County of Sonoma employees have accomplished much that is worthy of recognition. Employees have individually committed to advance the goals and priorities of the Board to create a safe, healthy and caring community; promote economic and environmental stewardship; invest in the future; and promote civic services and engagement.

The County of Sonoma has a history of providing excellent and responsible public service. This success does not happen without each and every one of our family of County employees doing their part toward achieving the common goal. The path is a constant effort which involves everyone at all levels being actively engaged, committed to public service, and collaborating on the efforts which improve the lives of our citizens and visitors. Public Service Recognition Week is one way to recognize the value of County employees’ service to the community.

In the last several years, employees have enjoyed Hawaiian plates, burritos, pasta, hamburgers and hotdogs. At this year’s Public Service Recognition Week lunch, employees will enjoy a fabulous paella and salad, and enjoy entertainment with the resiliency theme of ‘Viva Sonoma County!’ which can be translated as ‘Long Live Sonoma County!’ Employees will visit booths of interest and have the opportunity to win fabulous prizes. To continue with our Healthy Habit goals, our health partners will offer free biometric screenings to employees. In addition, many County departments will hold department-wide office recognition events for their staff during this week.

Human Resources recommends the Board of Supervisors adopt a Gold Resolution proclaiming the week of May 6 – May 12, 2018 as Public Service Recognition Week in Sonoma County recognizing all the contributions of the County’s more than 4,000 employees.

Prior Board Actions:

The Board has approved a similar resolution in all prior years since Public Service Recognition Week was first recognized in Sonoma County in 1997.

Strategic Plan Alignment Goal 4: Civic Services and Engagement

Public Service Recognition Week recognizes the value of public service and the contributions of County employees in the community.

Title: National Nurses Week 2018

Recommended Actions:

Adopt a resolution proclaiming the Week of May 6 through May 12, 2018 as National Nurses Week in Sonoma County.

Executive Summary:

Since 1974, May 6 through May 12 has been recognized in the United States as National Nurses Week, acknowledging all nurses and honoring Florence Nightingale who was born on May 12. When the Sonoma County Board of Supervisors designates this time as National Nurses Week in Sonoma County, it emphasizes the importance of County nursing staff who are integral to assessing the health of communities and leading some of the most vulnerable populations to improved physical and mental health.

Discussion:

The theme for National Nurses Week in 2018 is *Nurses: Inspire, Innovate, Influence*. Nurses within the Department of Health Services provide health assessment, counseling, referral, and medication service to a diverse population of clients with varied health, social and economic strengths and needs. They serve in a variety of community settings including: homes, offices, behavioral health sites, human services facilities, and correctional facilities for youth. Nurses are an integral part of how the County cares for, and gains essential knowledge and insight about, its residents. Nurses care for individuals and families and provide their expertise to numerous community groups and providers to assure breadth and depth to services. In a 2016 Gallup Poll the public rated nurses as the most honorable and ethical of all healthcare professionals with 84 percent rating them as "high" or "very high."

Currently, approximately 70 Nurses are employed by the County of Sonoma within the Department of Health Services. Nurses use their education, professional experience, personal commitment and special skill set to provide assessment, counseling, advocacy and referral to necessary services for the most vulnerable populations, especially pregnant women, infants, children, youth and vulnerable seniors. They serve in homes to improve families' parenting skills, support the practice of healthier behaviors,

provide access and support for continued use of physical and mental health care resources to improve health outcomes in their lives. Nurses help identify, investigate and control communicable diseases; working closely with medical offices, schools, institutions and challenged populations. They monitor and improve access to well care, immunizations and provide case management to children suffering major medical disabilities. Nurses help identify health issues and provide needed mental and physical health care for incarcerated youth, and vulnerable seniors at risk of abuse and neglect.

Each year the nation takes the opportunity to recognize the efforts, dedication and hard work of Nurses. Sonoma County values their contribution and recognizes the exemplary service of the professionally trained Nurses who serve within this community.

Prior Board Actions:

Most recently, on May 8, 2012 the Board recognized May 6 – 12, 2012 as National Nurses Week in Sonoma County.

Strategic Plan Alignment Goal 4: Civic Services and Engagement

This resolution acknowledges the importance of the nursing services being provided by County entities in support of individuals and families in Sonoma County.

Resolution Of The Board Of Directors Of The Sonoma County Water Agency, hereby honors the life and accomplishments of Mr. Carl Morrison.

Whereas, In Memory of Carleton Henry Morrison, JR.

The Sonoma County Water Agency Board of Directors hereby honors the life and accomplishments of Mr. Carl Morrison whom passed away tragically in Petaluma, CA on April 6, 2018 from a plane crash as he was flying his private plane home from the North Bay Watershed Association conference.

On April 30, 2004, the Sonoma County Water Agency entered into an agreement with Morrison & Associates, Inc. to provide technical assistance, coordination, and consulting services related to the development of the San Francisco Bay Area Integrated Regional Water Management Plan. The San Francisco Bay Area Integrated Regional Water Management Plan is a nine-county Bay Area coalition which has generated millions of dollars in state grant funding for projects ranging from water conservation to extreme weather forecasting.

Mr. Morrison led the development and implementation of the governing process for the San Francisco Bay Area Integrated Regional Water Management Coordinating Committee, which oversaw funding recommendations and approvals. The Coordinating Committee has been hailed by the California Department of Water Resources as a model for other regions to follow due to its success in developing stakeholders and projects in support of state funding opportunities.

Most recently, Mr. Morrison helped secure \$19 million in Proposition 84 funds to support the Advanced Quantitative Precipitation Information Program, also known as AQPI. This program will install new radar units throughout the San Francisco Bay Area to better forecast extreme weather conditions, such as atmospheric rivers. Mr. Morrison secured a diverse coalition to support this initiative including local, state and federal agencies.

Resolution #

Mr. Morrison also assisted with the development of the Applied Solutions Coalition, a program in which the Sonoma County Water Agency started as a part of its sustainability program to generate local government support for sustainability public policies. Mr. Morrison drafted the coalition's bylaws and governing system.

Mr. Morrison worked with the Sonoma County Water Agency and National Marine Fisheries Service to bring in other agencies to collaborate on the steelhead portion of the Multispecies Recovery Plan. Mr. Morrison drafted and assisted in working with NMFS, Zone 7 Water Agency, and other agencies to become signatories to Statements of Understandings setting forth the process for the collaboration of the Recovery Plan.

Mr. Morrison retired as a Lt. Colonel serving 20 years in the Marine Corps as a judge advocate, a veteran of the Vietnam War, and a Vice Commander of the Pacific Region in the Civil Air Patrol.

Mr. Morrison graduated from Brigham Young University in 1966 before obtaining a law degree from DePaul University in Chicago in 1976. He earned two master's degrees, from Loyola University and George Washington University.

Mr. Morrison will be remembered for his strategic coalition building skills and ability to build relationships with diverse stakeholders. He was a valued member of the Sonoma County Water Agency team and will be missed by our community.

Title: Foster Parent Recognition Month

Recommended Actions:

Adopt Gold Resolution declaring May 2018 Foster Parent Recognition Month in Sonoma County

Executive Summary:

The month of May has been designated as National Foster Parent Recognition Month. The Board of Supervisors is requested to recognize all Sonoma County caregivers who have taken on the invaluable role of caring for infants, children, and teens that are separated from their families due to abuse or neglect.

Discussion:

Foster Parent Month acknowledges the dedicated caregivers in Sonoma County who provide around the clock love and care to children. Specifically, in January of this year 43 County approved foster homes had 59 children placed in their care. 55 Foster Family Agency homes had 101 children in their care. 128 relatives and non-related extended family members provided 166 children with nurturing homes. An additional 37 children were adopted and 64 children were in a guardianship home in 2017.

In order to thrive, all children and youth need excellent parenting. When parents are unable to care for their children, foster parents or relative caregivers step in to provide loving and committed care to meet a child's needs in partnership with the child welfare system. The most important intervention provided for children and youth during this very difficult and traumatic time in their lives is a stable, caring home. Children become part of the family for as long as they need out-of-home care. When possible, caregivers partner with the biological parents to provide support and mentorship. When children cannot be returned home safely, caregivers may provide permanency, including adoption or guardianship. Foster parenting requires patience, dedication, flexibility, and a sense of humor.

A foster parent's work is difficult and challenging, but their dedication has changed the lives of many in our community. This was especially evident during the wild fires Sonoma County experienced last

October. Sonoma County foster and relative caregivers made the safety and well-being of the children and youth in their homes a priority. This included going to extensive lengths to ensure the health of medically fragile children when the air quality was not good and welcoming additional children into their homes when Valley of the Moon Children’s Center was evacuated. Because foster parents understood this disaster was even more traumatic for children who had already experienced significant trauma, they took special care in addressing the emotional needs and sense of safety of each child.

The Human Services Department values the role of local community partners to help support and develop new caregivers. To that end the Family, Youth & Children’s Division, in partnership with the Family Finding Collaboration, has been leading a dynamic public campaign to raise community awareness of the urgent need for foster and adoptive families, including relative caregivers, and in 2017 recruited 41 new families which is a 40% increase from the year before. The Family Finding Collaboration includes TLC Children’s Services, Alternative Family Services, Seneca, Family, Youth and Children’s Services, Juvenile Probation and Lilliput Children’s Services. The partnership offers a coordinated response to recruiting more families as well as strengthening training and support programs for current families. The Collaboration also understands the important role that relative caregivers play in caring for children and with the expertise of Lilliput, we are building support programs that address their unique needs and circumstances. This has included the development of the Kinship Center and the emergency support program that provides bedding, furniture and other basic needs to assist relatives who take in children on a moment’s notice.

The Board of Supervisors appreciates the generosity of the community members who are willing to take on the very important role of opening their homes to care for Sonoma County children and youth. The Board is grateful for the compassionate care foster parents provide to the community’s most vulnerable children.

Prior Board Actions:

May 2, 2017: Each year the Board of Supervisors has expressed appreciation for the outstanding contributions our caregivers make in caring for our dependent children by declaring the month of May Foster Parent Recognition Month in Sonoma County.

Strategic Plan Alignment Goal 4: Civic Services and Engagement

Foster parents are important members of the child protection community. Recognition of foster parents by the Board of Supervisors honors and expresses appreciation for improving the lives of children who have been abused or neglected.

Title: 2018 Wildfire Awareness Week

Recommended Actions:

Adopt a Gold Resolution proclaiming the week of May 6-12, 2018 as "Wildfire Awareness Week"

Executive Summary:

May 6-12, 2018, is Wildfire Awareness Week in the State of California. The goal of Wildfire Awareness Week is to expand public awareness of wildfires and promote actions to reduce the risk from wildfire to homes and communities. This year's theme is "Fire Defense is Self Defense, Get Ready, We Are". As evidenced by the Firestorm in Sonoma County in October 2017, awareness of the wildfire risks and taking preventative measures is paramount to reducing future risks. Approximately 95 percent of wildfires in California are human-caused and preventable.

Discussion:

Sonoma County Fire and Emergency Services, CAL FIRE, and local partner fire agencies, join together in requesting the residents of Sonoma County be mindful of actions and activities which may increase the risk of wildfires as we enter into wildfire season. Despite recent rains, moving forward into the long, dry summer months, fuel moisture will decrease, increasing the threat of wildfires.

With public support through heightened community awareness, we can all do our part in preventing and minimizing the impact of damaging wildfires in our county and throughout the state.

State Responsibility Areas are generally the unincorporated, rural, grass, brush and timber covered lands.

In addition to coordination with Fire and Emergency Services, the CAL FIRE, Sonoma-Lake-Napa Unit has taken action in preparation of wildland fire season through the following actions:

1. February 12, 2018 - Defensible Space Inspector (DSI) positions staffed to educate and advise homeowners on creating and maintaining a 100ft. of defensible space around their structures;
2. April 16, 2018 - One engine staffed per battalion (3.0 staffing). Additional 16 firefighters to conduct defensible space inspections (8 to Sonoma County, 4 to Napa County and 4 to Lake County);
3. May 1, 2018 - CAL FIRE burn permit (LE-5) required for any outdoor open burning in the State Responsibility Area (SRA) within the counties of Sonoma, Lake, Napa, Colusa, Yolo and Solano;

4. May 14, 2018 - One engine staffed per station Unit wide (3.0 staffing);
5. No later than June 15, 2018 - Sonoma Air Attack Base opens (one air attack- two tankers);
6. June 18, 2018 - All seasonal personnel hired for peak staffing. Firefighters conducting Defensible Space Inspections will be going back to engines for peak staffing.

Additionally, CAL FIRE launched a campaign aimed to educate homeowners on the steps they should take to prepare themselves, their homes, and families for wildfire with information available at www.ReadyForWildfire.org.

In the upcoming months Sonoma County Fire and Emergency Services will:

1. Continue encouraging and promoting fire safe practices and the distribution of fire safe educational materials to the general public, permit applicants, and local planning agencies.
2. Offer chipping services to county residents to assist them with the creation of their defensible space and fuel reduction.
3. Continue to discuss potential opportunities with fire districts to partner on fuel reduction concepts.
4. Encourage and promote fire safe practices and the distribution of fire safe educational materials to the general public, permit applicants, and local planning agencies.

Prior Board Actions:

This Gold Resolution has been approved by the Board annually in years past.

Strategic Plan Alignment Goal 1: Safe, Healthy, and Caring Community

Wildfire Awareness Week serves as a reminder to homeowners to adopt fire safety practices and procedures that prevent fires and save lives and property.

Gold Resolution Of The Board Of Supervisors Of The County Of Sonoma, State Of California, Proclaiming The Week Of May 6 – May 12, 2018, As Wildfire Awareness Week.

Whereas, the Sonoma Complex Fires of October 2017 severely affected the County of Sonoma, its residents, and damaged critical infrastructure and dwellings; and

Whereas, California’s dry Mediterranean climate naturally lends the County of Sonoma to be particularly prone to wildfires; and

Whereas, despite recent rains, the lasting effects of the dead and dying trees in the State of California and County of Sonoma will create a significant fuel load; and

Whereas, climate change in California has magnified California’s wildfire problem leading to larger and more damaging wildfires; and

Whereas, wildfires can impact how watersheds provide clean, reliable water supplies that are critical to California’s people, environment and economy; and

Whereas, the men and women of Sonoma County Fire and Emergency Services, alongside CAL FIRE and local fire agencies are poised to respond to wildfires; and

Whereas, living in Sonoma County means residents need to be aware of the serious threat these wildfires can pose and prepare accordingly; and

Whereas, all residents of Sonoma County must do their part to prepare for wildfires by maintaining 100 feet of Defensible Space around their homes as well as implementing strategies to fire-harden homes; and

Whereas, approximately ninety-five percent of wildfires in California are caused by the activity of people, and therefore the public plays a critical role in preventing wildfires; and

Whereas, an overall goal of fire agencies within Sonoma County is to reduce the total costs and losses from wildfire by protecting assets at risk through focused public education efforts such as CAL FIRE’s potentially lifesaving public education campaign “Ready, Set, Go!”; and

WHEREAS, CAL FIRE is conducting 250,000 defensible space inspections due to heightened wildfire risk; and

WHEREAS, each year the State of California declares Wildfire Awareness Week as an important opportunity for California’s communities and fire service agencies to reduce the risk of wildfire and increase public safety and awareness through education on fire safety, preparation, and prevention; and

WHEREAS, this year’s Wildfire Awareness week theme is, “Fire Defense is Self Defense, Get Ready, We Are.”

Now, Therefore, Be It Resolved in an effort to promote fire safe practices within the County of Sonoma, the Sonoma County Board of Supervisor’s hereby declare May 6 through May 12, 2018, as Wildfire Awareness Week throughout this county, and we urge all the people of Sonoma County to take measures to prevent the outbreak and spread of wildfire within our County.

Title: Long Term Financing for Airport Parking Lot and Terminal Expansion Projects

Recommended Actions:

Adopt a Resolution authorizing the Director of Transportation and Public Works to submit and approve loan applications to the California Infrastructure and Economic Development Bank for up to \$17,000,000 to finance capital improvement projects at the Charles M. Schulz – Sonoma County Airport. The loan applications are intended to secure long term, fixed rate financing for capital improvements to long term parking and pedestrian walkways (\$5,101,005), as well as the expansion of the commercial passenger terminal (\$11,676,756) for a total of \$16,777,761.

Executive Summary:

On February 9, 2016, Airport staff presented a status report to the Board of Supervisors which included proposed capital improvement projects at the Airport over the next five years. Among the projects identified in the report were the construction of a new long term parking lot and enhancement of the passenger terminal facility. Both of these projects are intended to accommodate increased commercial air service following the completion of a major runway upgrade in 2015. Based on the results of this meeting, Airport staff returned the Board of Supervisors on September 13, 2016 for approval to move forward with the design and construction of both a new long parking lot and terminal expansion. In addition to approving the request to proceed with design, the Board of Supervisors adopted a Reimbursement Resolution allowing the Airport to borrow up to \$20,000,000 to finance these two projects. Based on construction to date and anticipated future capital needs, the Airport is requesting approval to secure two loans totaling approximately \$16,778,000 with the California Infrastructure and Economic Development Bank. The requested loans will provide long term (25-30 years), fixed rate financing at historically low rates (3.625%).

Discussion:

In September 2013 the Charles M. Schulz – Sonoma County Airport began construction on a new primary runway which increased the length of the existing runway by 885 feet and allowed the Airport to accommodate regional jet traffic. After completing runway construction in 2015, Airport staff

recognized the need to initiate additional capital improvement projects in anticipation of serving an extra 250,000 passengers by 2025. The two primary components of the capital improvement plan included construction of a new long term parking lot, and expansion/enhancement of the passenger terminal. On February 9, 2016 as part of a comprehensive update of operations, finances, and future planning Airport staff requested and received Board approval to begin researching design and financing options for these projects.

On September 13, 2016 Airport staff returned to the Board of Supervisors with a request to allow the Airport Enterprise to borrow up to \$20,000,000 to build a new long term parking lot and expand the existing passenger terminal. The \$20,000,000 request was based on initial design and construction estimates provided by the Airport's primary engineering firm, Mead & Hunt. In addition, the County's Debt Advisory Committee and KNN Public Finance assessed the financial viability of the Airport to ensure adequate operating cash flow was available to support the long term debt. As part of the same September 13th meeting, the Board of Supervisors also approved a terminal design contract with Mead & Hunt/C&S Engineers (\$1,426,516), a parking lot design contract with BKF Engineers (\$226,905), and issuance of \$2,200,000 in County Treasury Notes to finance design and bid package preparation activities.

In October 2016, American Airlines announced plans to begin providing service from the Sonoma County Airport to Phoenix, AZ, prompting the need for immediate construction of a 1,400 square foot passenger ticketing facility. Utilizing the General Services Department Job Order Contracting (JOC) program the Airport designed, procured, and installed a ticketing trailer in approximately 120 days in order to accommodate the American Airlines launch on February 16, 2017. The cost to construct this facility on an expedited timeline was \$660,193, including \$67,967 for design and \$592,226 for purchase and configuration.

On February 21, 2017 the Airport received approval from the Board of Supervisors to build a 4,230 square foot temporary passenger hold room utilizing a high strength, tensile structure. The tensile structure was intended to serve two purposes: The first was to accommodate extra passenger traffic related to the addition of American Airlines service to Phoenix and United Airlines service to San Francisco. The second was to create flexible space in order to expedite construction activities associated with the expansion of the existing passenger terminal. In order to meet both goals, the Airport once again utilized the Job Order Contracting (JOC) program to meet the June 8, 2017 launch of United Airlines service. Total cost for construction of the tensile structure was \$1,774,777 including \$115,268 for design, \$318,103 for purchase of the structure, and \$1,341,406 for site work, construction and installation.

On August 22, 2017 the Airport returned to the Board of Supervisors to request approval of design specifications and construction contracts for the 450-stall long term parking lot and pedestrian walkways. Both design proposals were approved and contracts were awarded to Ghilotti Construction (long term parking - \$3,743,814), and California Highway Construction Group (sidewalks -\$332,845). In addition, the Board of Supervisors approved issuance of a \$4,000,000 Treasury Note to finance construction of these two projects. Construction for both projects was initiated in the Fall of 2017 and are nearing completion with a final total construction cost including: design, construction, change orders, contingencies, and construction management of \$5,067,116.

After completion of the first phase of the temporary hold room it was determined that incorporating the tensile structure as a long term feature (12-15 years) of the Airport expansion would be beneficial in

future phases of terminal design and construction. The Airport is in the process of completing the second phase of design requirements with a goal of beginning construction by August 2018. The second phase will consist of expanding the tensile structure by 3,880 square feet, as well as adding permanent bathroom facilities and an automatic fire suppression system for the entire structure. Costs for these improvements include: \$200,000 for design, \$395,000 for purchase of the tensile structure, \$915,000 for tensile structure construction, \$125,000 for water/sewer hookup, \$420,000 for permanent bathroom construction, and \$150,000 for installation of fire sprinklers. In addition, the Airport is budgeting for installation of an Automated Secure Exit Lane (\$175,000), and redesign/reconfiguration of the airline Ground Support Electrical system (\$400,000). Total cost of this phase of construction is estimated to be \$3,058,275.

In conjunction with the second phase of tensile structure construction this summer, the Airport is continuing to move forward with the design and feasibility elements of a major terminal remodel and expansion. However, since the initial Board approval of the new terminal design in September 2016 the Airport has added three additional carriers (American, United, and Sun Country). Based on the rapid acquisition of these carriers, it was determined that increasing the terminal expansion project from 19,000 square feet to 29,000 would better serve the community. As a result the terminal design contracts awarded in September 2016 will need to be increased from \$1,426,516 to \$2,415,000 (Mead and Hunt/C&S Engineers). In addition, the Airport is currently in negotiations with the Federal Aviation Administration to secure up to \$20,000,000 in grant funding for the project. Timing of the grant award is subject to availability of funds but Airport staff believes having a "shovel ready" terminal project creates the most favorable scenario for securing these funds.

In order to complete the capital projects outlined above the Airport has utilized a combination of Treasury Notes (\$6,200,000) and Fund Balance. Treasury Notes are legally intended to provide bridge funding until long term financing can be secured, and the Airport lacks cash reserves (Fund Balance) for projects of this magnitude. Based on these constraints, the Airport and Debt Advisory Committee originally contemplated issuing a General Fund backed Certificate of Participation (COP). However, based on scope, timing, and complexity of the capital projects a COP became a less than ideal financing option. As a result, Airport staff engaged the California Infrastructure and Economic Development Bank (IBank) in January 2018 to secure long term financing. The IBank is part of the California Governor's Office of Business and Economic Development, and specializes in financing public agencies for a wide variety of infrastructure and economic development projects. Projects range in amounts from \$50,000 to \$25,000,000, with loan terms up to a maximum of 30 years.

Based on discussions with the IBank underwriting team as well as consultation with Auditor-Controller Treasurer-Tax Collector (ACTTC) staff, County Counsel, and the county's financial advisor, KNN Public Finance, Airport staff initiated the underwriting process in February 2018. As part of the underwriting and financial review process the Airport wishes to refinance an existing loan with the California Department of Transportation (DOT) in order to improve annual cash flow. The DOT loan was funded as part of the runway extension project in 2012 and has an annual debt service payment of \$422,905. By refinancing the DOT loan into the IBank loan the Airport will improve annual cash flow by approximately \$185,000 per year.

Subject to Board approval, the Airport has submitted two loan applications to the IBank. One loan will finance the long term parking lot/sidewalks, and a second will fund terminal improvements and refinance DOT loan referenced above. The primary reason for two loans is to segregate Passenger Facility Charge (PFC) eligible projects from non-PFC eligible projects. Terminal expansion projects and the

refinancing of the primary runway are PFC eligible, while the parking lot and sidewalk loan will be paid from Airport operating income. The table below provides is an overview of both loans and detailed amortization schedules are attached.

Loan	Amount	Rate	Term	Org Fee (1%)	Annual Fee	Payment
Terminal	11,676,756	3.63	25 yrs.	115,534	.30% of Principal	766,452
Parking Lot	5,101,005	3.63	30 yrs.	50,671	.30% of Principal	300,781

A sample of IBank terms and conditions are attached, however final terms, conditions, and interest rates are being negotiated by County Counsel and will be approved by the IBank Board on May 22, 2018.

The Airport will use proceeds from the IBank loans to consolidate several short and intermediate term debt instruments which will provide long term, stable financing at historically low interest rates. In addition to retiring \$6,200,000 of County issued Treasury Notes (\$124,000 of annual interest payments), the Airport will be refinancing the DOT loan (\$423,000 principal and interest payment), and eliminating a building acquisition loan (\$155,000 principal and interest payment). The net result will be an increase in long term annual debt service payments from \$702,000 in FY 2017-18 to \$1,067,235 in FY 2019-20. Due to the timing of IBank loan payments the Airport will only make one interest payment on each loan in FY 2018-19. The result will be a decrease in annual debt service in FY 2018-19 from \$702,000 to \$406,000 for a savings of \$296,000.

As of this report the Airport Enterprise has approximately \$5,000,000 cash and equivalents on hand as well as an additional \$1,125,000 in cash in the Passenger Facility Charge (PFC) Fund. The PFC Fund has been accumulating an average of \$71,500 per month over the past 12 months and has a loan payable due in May of \$423,000. Based on these projections the PFC fund will end FY 2017-18 with a cash balance of \$988,000. In addition to the \$5,000,000 of cash the Airport Enterprise is scheduled to receive a \$1,500,000 grant reimbursement from the FAA and \$16,600,000 in IBank loan proceeds. Based on these assumptions the table below identifies sources of cash and use of funds with a projected surplus of \$940,000. The combined PFC and Operations surpluses enable the Airport to enter FY 2018-19 with \$1,928,000 in cash reserves.

On April 20, 2018 the Airport presented the IBank loan proposal to the Debt Advisory Committee and in addition to the information contained in this Board report the Committee requested a “stress test” contemplating a 20% decline in commercial passenger volume related revenues (see attachment). For FY 2018-19 the Airport is projecting 225,000 enplaned passengers with a 20% decrease equating to approximately 180,000 enplaned passengers per year. The financial impact of this decline would be an estimated decrease in revenue of \$952,000 from \$6,443,348 to \$5,490,950. In the above outlined scenario the Airport believes it could reduce expenditures by approximately \$723,000 by reducing employee headcount by two and decreasing Service and Supply expenditures by 7%. The net result would be a decrease of income available for debt service of \$427,700 to \$825,500. In this scenario the Airport would have to utilize approximately \$250,000 per year in cash reserves outlined in the prior paragraph to meet loan servicing obligations.

Based on a thorough analysis of all the information provided the Debt Advisory Committee approved the proposed transactions with the following conditions:

1. The ability of the Airport to meet an IBank mandated 1.20 Debt Service Coverage Ratio (DSCR) by maintaining a cash reserve acceptable to the IBank. The IBank has tentatively accepted that cash held in the PFC Fund can be used to meet the 1.20 DSCR and Debt Advisory recommends the Airport make a good faith effort to maintain a minimum cash balance of \$750,000 in the Fund.
2. Final review and approval of loan terms and conditions by County Counsel.

Assuming these conditions are met, the Debt Advisory Committee believes the direct financing of Airport Enterprise capital improvements preserves the County’s credit capacity and provides a reasonable margin of safety to the General Fund in the event of an economic downturn.

The requested loans are currently scheduled for review and approval by the IBank Board on May 22, 2018. If approved the loans would fund prior to June 30, 2018 and payments would begin in February 2019.

Prior Board Actions:

- 2/9/2016 Item 42 – Airport Study Session including proposed capital improvements to parking & terminal
- 9/13/2016 Item 41/Resolution 16-0346 – Authorize issuance of a \$2,200,000 Treasury Note to fund parking lot and terminal design
- 9/13/2016 Item 41/Resolution 16-0347 – Adopt a \$20,000,000 Reimbursement Resolution for parking lot and terminal design/construction
- 9/13/2016 Item 42 – Approve contracts for parking lot (BKF) and terminal (Mead & Hunt) design
- 2/21/2017 Item 21/Resolution 17-0090 – Approve Phase I Tent Lease (Sprung Structures)
- 8/22/2017 Item 24/Resolution 17-0310 – Authorize issuance of a \$4,000,000 Treasury Note to fund parking lot and sidewalk construction

8/22/2017 Items 26 & 27 – Approve construction contracts for long term parking lot and sidewalk construction

Strategic Plan Alignment Goal 3: Invest in the Future

Securing long term, fixed rate financing for capital improvement projects at the Airport facilitates economic activity across multiple industries (construction, wine, tourism, and manufacturing) while improving the financial position of the Airport Enterprise.

Narrative Explanation of Fiscal Impacts:

The Airport will use the requested IBank loans to consolidate several short to intermediate term debt instruments which will provide long term, stable financing at historically low interest rates. In addition to retiring \$6,200,000 of County issued Treasury Notes (\$200,000 of annual interest payments), the Airport will be refinancing a \$5,000,000 State Department of Transportation loan (\$423,000 principal and interest payment), and eliminating a building acquisition loan (\$155,000 principal and interest payment) with these loans. The net result will be an increase in annual debt service payments from \$778,000 to \$1,067,235 (\$289,235) which has been reviewed and approved by Transportation and Public Works staff, the County’s Debt Advisory Committee, and IBank Underwriting.

The FY 18-19 Airport budget was submitted prior to finalizing the requested IBank loans, however, the budget includes \$1,079,620 in principal and interest payments including: the DOT loan referenced in the previous paragraph (\$423,000), and placeholder amount for a long term debt instrument of \$656,620. The net result is a decrease in principal and interest payments due next year of \$673,595 from the submitted budget.

STAFF RECOMMENDATION

Staff recommends approval of Resolution No. 18-02 authorizing a financing not to exceed \$18,500,000 to the 22nd District Agricultural Association for the Project, consisting of the Concert Venue Project and the Environmental Remediation Project, subject to the conditions contained herein:

1. **Applicant/Borrower:** 22nd District Agricultural Association (District)
2. **Project:** Concert Venue Project and Environmental Remediation Project (collectively, the Project)
3. **Amount of ISRF Program Financing:** \$18,500,000
4. **Maturity:** Twenty (20) years
5. **Repayment/Security:** All "IBank Pledged Revenues," consisting of "Pledged Fair Revenues" minus "Fair Operating Expenses". Pledged Fair Revenues are all revenues generated by District operations, except for the first \$4 Million of "Food and Beverage Net Revenues." Fair Operating Expenses are the District's operating expenses, as determined by generally acceptable accounting principles.
6. **Interest Rate:** 3.00%
7. **Fees:** District will finance an origination fee of 1.00%, \$184,982, included in the loan amount, and shall pay annually a fee of 0.30% of the outstanding principal balance.
8. **Not an Unconditional Commitment:** IBank's resolution shall not be construed as unconditional commitment to finance the Project, but rather IBank's approval pursuant to the Resolution is conditioned upon entry by IBank and the District into a Financing Agreement, in form and substance satisfactory to IBank.
9. **Limited Time:** The Board's approval expires 60 days from the date of its adoption. Thus, the District and IBank must enter into the Financing Agreement no later than 60 days from such date. Once the approval has expired, there can be no assurances that IBank would be able to provide the ISRF Program financing to the District or consider extending the approval period.
10. **ISRF Program Financing Agreement Covenants and Conditions:** The Financing Agreement shall include, among other things, the following covenants:
 - a. District shall adjust as necessary its rates, charges, and expenses in an amount sufficient to ensure that the sum of IBank Pledged Revenues produce a minimum 1.30 times aggregate annual debt service coverage ratio for the sum of actual annual debt service on the Financing and any obligations on parity with the Financing.
 - b. The District will be prohibited from issuing future debt payable from IBank Pledged Revenues senior to the Financing.
 - c. Parity debt will be allowed if IBank Pledged Revenues amount to at least 1.30 times the Maximum Annual Debt Service (MADS) taking into consideration the MADS payable in any Fiscal Year on all existing debt payable from IBank Pledged Revenues and the proposed parity debt.
 - d. Subordinate debt will be allowed if IBank Pledged Revenues are at least 1.15 times the sum of the MADS on all outstanding debt, payable from the IBank Pledged Revenues, including the proposed Subordinate Debt.
 - e. District to comply with the requirements of the Criteria and all applicable laws, regulations, and permitting requirements associated with public works projects.
 - f. District to provide to IBank annually within 180 days of the end of each of District's fiscal year a copy of its audited financial statements that report each enterprise fund separately, together with an annual certificate demonstrating compliance with the foregoing covenants, as well as other information as IBank may request from time to time.

- g. Closing will be conditioned on the Department of General Services' (DGS) approval of the District's pledge of revenues.
 - h. District shall notify the Departments of Finance and the Department of Food & Agriculture when seeking final Project approval from DGS.
 - i. Hard cost disbursement will be conditioned on the District obtaining all necessary permits and approvals to commence construction.
11. **Criteria Waiver:** IBank's Criteria provides that ISRF Program Financing applicants must demonstrate project readiness and feasibility to complete construction within 2 years after IBank's financing approval. The District is not able to complete the environmental remediation component of the Project within a two-year time frame. Accordingly, the District seeks a waiver of this aspect of the Criteria and instead requests that it be allowed 51 months from entering into the Financing Agreement, to complete the Project.

Discussion:

Sonoma County Tourism Business Improvement Area Background

On November 2, 2004, the Sonoma County Board of Supervisors adopted the ordinance creating the Sonoma County Tourism Business Improvement Area (Business Improvement Area) in various cities and in the unincorporated areas of the county. Under the ordinance, lodging establishments generating annual room revenue of \$350,000 or more must pay an assessment equal to 2% of such revenue.

Pursuant to Streets and Highways Code section 36535(d), the levy of the assessment and program to promote tourism has continued without change in the Business Improvement Area since 2004.

In January 2005, the Board appointed five members to the Sonoma County Tourism Business Improvement Area Advisory Board which is charged with advising the Board of Supervisors on the amount of the Area's Assessments and on the services, programs and activities to be funded by the Assessments, and in February 2005, appointed eight (8) of the 22-member body to the Sonoma County Tourism Bureau (Tourism Bureau) Board of Directors. The Tourism Bureau is a private, non-profit organization dedicated to increasing overnight stays in Sonoma County.

In June 2005, the Sonoma County Board of Supervisors executed an agreement with the Tourism Bureau to carry out services, activities, and programs promoting tourism to Sonoma County, funded by assessments from within the Business Improvement Area.

In 2011, the Sonoma County Board of Supervisors amended the ordinance that formed the Business Improvement Area, appointing Tourism Bureaus board of directors to also serve as the advisory board for the Business Improvement Area. This decision was based on recommendations of the 2010 County audit of the organization.

As it has done every year since 2004, the Tourism Bureau again has submitted its Annual Report which contains information on the activities and corresponding expenditures to carry out in Fiscal Year 2018-19. The Report also contains a budget showing projected revenue from assessments and all other sources sufficient to carry out the services, programs, and activities set forth in the plan. The Tourism Bureau has also submitted its audited financial statements and independent auditor's report which provides a detailed description of the organization's revenue and expenses and the special benefit provided to the lodging establishments within the Business Improvement Area.

Collection of Tourism Assessment and Transient Occupancy Tax

The Sonoma County Treasurer-Tax Collector collects the BIA assessment from all qualifying entities in the unincorporated areas of the County and also remittances from member cities, which include the Cities of Santa Rosa, Rohnert Park, Petaluma, Cloverdale, Cotati, and Sebastopol, and the Town of Windsor. The City of Sonoma and the City of Healdsburg have not approved consent resolutions to join the BIA.

In addition to BIA funds, the Sonoma County Tourism Bureau receives funding from the County of Sonoma's Transient Occupancy Tax (TOT) through the Advertising Program. TOT is authorized under State Revenue and Taxation Code Section 7280, as an additional source of non-property tax revenue to local government. This tax is levied in Sonoma County at a rate of 12% for accommodations at lodging and camping facilities in the unincorporated areas of the County. TOT funds are discretionary, in that the Board of Supervisors may direct use of these funds for any legitimate county expense and may grant funds that benefit the community in accordance with Government Code section 26100(a)(2) and Government Code section 26227 .

Findings and Recommendations

The Tourism Bureau, in its capacity as the Advisory Board, recommends that the Board accept and confirm this Annual Report and continue the assessments as levied without change for the Business Improvement Area in Fiscal Year 2018-2019 pursuant to the Parking and Business Improvement Area Law of 1989 (California Streets and Highways Code section 36535(d) et seq.), subject to the following findings and recommendations:

- 1) That the boundaries of the Business Improvement Area should remain the same, with the recognition that the cities of Santa Rosa, Petaluma, Rohnert Park, Sebastopol, Cloverdale and Cotati, and the Town of Windsor, have not withdrawn their consent to be included within the boundaries of the Business Improvement Area.
- 2) That Tourism Bureau continue to serve as the Advisory Board for the Business Improvement Area.
- 3) That the method and basis of levying the assessment remain unchanged and continue in Fiscal Year 2018-2019.
- 4) That the revenues generated by the assessment be used in accordance with the requirements of Sonoma County Code section 33-4 to conduct marketing activities including funding of programs, services, and activities outside of the County designed to increase the number of overnight visits to the County.
- 5) That Tourism Bureau has retained the services of Dillwood & Burkle, LLP, an independent certified public accounting firm, to audit the Tourism Bureau's finances and it concluded in its Independent Auditor's Report that there were no material weaknesses or significant audit findings in relation to Business Improvement Area program (Attachment 3).
- 6) The Tourism Bureau will provide an annual audit of travel and meal expenses per their most recent updated travel and meal reimbursement policy.

Activities, Marketing, Advertising, and Public Relations Program Expenditures

The type of activities intended to be funded by the Tourism Bureau's Business Improvement Area assessment and Transient Occupancy Tax revenues include:

- (1) advertising; (2) marketing materials and distribution; (3) tradeshow and sales missions; (4) sales and marketing promotions; (5) destination development; (6) research and development; (7) public relations; (8) sales and marketing tools; (9) labor; and (10) administrative expenses.

Purpose and Specific Benefit

Business Improvement Districts are important to California's economy and provide a number of tourism-related services to California's tourism industry, including marketing of assessed businesses, tourism promotion, and special events to attract tourists. Sonoma County Code section 33-4 requires that revenues from Business Improvement Area assessments must be used to conduct marketing activities designed to increase overnight visits to the area. The term "area" is defined as the territory within the boundaries of the Business Improvement Area, and the term "marketing activities" is defined as activities designed to market the area as a tourist destination, including the expenditure of funds to place advertising in any media, conduct public relations campaigns, perform marketing research, promote conventions and trade shows, and foster improved contacts within the travel industry, for the purpose of promoting tourism within the area. Revenues from assessments may be used for programs, services, and activities outside the area, if such programs, services, and activities are designed to

promote and encourage overnight visits to the area. Revenues from assessments may also be used to pay the ongoing reasonable administrative costs associated with the marketing activities.

The focus on increasing overnight visits to the area constitutes a specific benefit to the lodging establishments that pay the assessments. The fact that others may receive incidental benefits from the expenditure of assessments, such as restaurants serving more patrons, does not change the characterization of assessments as a specific benefit to lodging establishments because no additional cost is imposed on the lodging establishments to provide those incidental benefits.

Written and Oral Protests

In advance of this public hearing, written protests may be submitted to Clerk of the Board, County of Sonoma, 575 Administrative Drive, Room 100A, Santa Rosa, CA 95403 by 5:00 p.m. on May 7, 2018. At the public hearing, the Board will consider all protests, both written and oral, presented to the Board prior to the close of the hearing. Staff has published notice in the newspaper as directed by the Board and as required by Streets and Highways Code section 36535(d).

Staff recommends the Board accept the Annual Assessment Report for Fiscal Year 2018-19, and adopt the resolution supporting the continuation of the tourism assessment without change. In addition, staff will work with Sonoma County Tourism to amend the Agreement for Services with the Sonoma County Tourism Bureau to carry out the services, activities and programs promoting tourism funded by the assessments for the special benefit of the lodging establishments within the Sonoma County Tourism Business Improvement Area. The current Agreement for Services will remain in place until the amendments are brought back to the Board of Supervisors for approval within 60 days of this hearing.

Prior Board Actions:

4/10/18- The Board adopted a resolution declaring its intention of continuing without change the levy of the Tourism Assessment on the lodging businesses located within the Sonoma County Business Improvement Area and accepted the its FY18-19 Annual Assessment Report.

Strategic Plan Alignment Goal 2: Economic and Environmental Stewardship

The Sonoma County Tourism Bureau is a private nonprofit organization that strives to enhance the value of local, domestic, and international demand for Sonoma County produced goods and to promote tourism and growth in Sonoma County.

SONOMA COUNTY TOURISM FISCAL YEAR 2018-2019 ANNUAL REPORT

TO BE FILED WITH THE OFFICE OF THE CLERK OF SONOMA COUNTY
PURSUANT TO STREETS AND HIGHWAYS CODE SECTION 36533

I. **BACKGROUND**

A. Sonoma County Tourism Business Improvement Area

On November 2, 2004, the Sonoma County Board of Supervisors ("Board") adopted Ordinance No. 5525 ("Ordinance") creating the Sonoma County Tourism Business Improvement Area ("SCTBIA"). Under the Ordinance, lodging establishments generating annual room revenue of \$350,000 or more during the preceding fiscal year must pay an assessment equal to 2% of such revenue. Proceeds from assessments are used to pay for activities designed to increase the number of overnight visitors to the area.

In January 2005, the Board appointed five members to the Sonoma County Tourism Business Improvement Area Advisory Board ("Advisory Board"), a body established pursuant to the Parking and Business Improvement Area Law of 1989 (Streets & Highways Code section 36500 et seq., the "Act") which is charged with advising the Board on the amount of the SCTBIA assessments and on the services, programs and activities to be funded by the assessments. In 2011, the Board amended the Ordinance, appointing the board of directors of Sonoma County Tourism Bureau, Inc. ("SCTB") to serve as the Advisory Board for the SCTBIA. This decision was based on recommendations of a 2010 County audit of the organization.

B. Sonoma County Tourism Bureau, Inc.

The Ordinance authorized the County to contract with a contractor to carry out the services, activities, and programs to be funded from the assessments, and designated SCTB to serve as the initial contractor. In June of 2005, the Board executed an agreement with SCTB to carry out services, activities and programs promoting tourism to Sonoma County, with funding from both SCTBIA assessments and from transient occupant tax (TOT) revenue allocated to SCTB by the Board. As noted above, in 2011, the SCTB Board of Directors was also appointed to serve as the Advisory Board.

The Ordinance requires a 22-member Board of Directors for SCTB, the composition of which must comply with a matrix that provides representation from each supervisorial district, and from each size category of lodging establishment. Appointments to the SCTB board are made on a pro rata basis in accordance with the respective contributions made to the SCTB budget by SCTBIA assessments and by County TOT allocations. The Sonoma lodging industry appoints the number of directors resulting from SCTBIA assessments, and the Board appoints the number of directors resulting from TOT allocations.

C. Boundaries

SCTBIA was the first county wide tourism business improvement area formed in California. For assessments to be collected from lodging establishments within the incorporated cities in the County, the councils of each City had to consent to formation of the SCTBIA. Consent was given by the Cities of Santa Rosa,

Petaluma, Rohnert Park, Sebastopol, Cloverdale and Cotati, and the Town of Windsor. Accordingly, the boundaries of the SCTBIA include the territory within the boundaries of those seven cities plus all of the unincorporated territory within the County. These boundaries have remained unchanged since the SCTBIA was formed, and SCTB does not recommend any changes to the boundaries in the upcoming year.

D. Assessment

Lodging establishments within the boundaries of the SCTBIA generating annual room revenue of \$350,000 or more during the preceding fiscal year must pay an assessment equal to 2% of such revenue. Lodging establishments in the unincorporated territory of the County pay the assessment to the County tax collector. Lodging establishments in the municipalities that consented to formation of the SCTBIA pay the assessments to the collecting entities within their respective municipalities. Those collecting entities, in turn, remit the collected assessments to the County in accordance with written agreements between the County and each municipality. This method and basis of levying and collecting the assessment has been unchanged since the SCTBIA was formed, and SCTB does not recommend any changes in the upcoming year.

E. Purpose and Specific Benefit

The Ordinance requires that revenues from assessments must be used to conduct marketing activities designed to increase overnight visits to the area. The term "area" is defined as the territory within the boundaries of the SCTBIA, and the term "marketing activities" is defined as activities designed to market the area as a tourist destination, including the expenditure of funds to place advertising in any media, conduct public relations campaigns, perform marketing research, promote conventions and trade shows, and foster improved contacts within the travel industry, for the purpose of promoting tourism within the area. Revenues from assessments may be used for programs, services, and activities outside the area, if such programs, services, and activities are designed to promote and encourage overnight visits to the area. Revenues from assessments may also be used to pay the ongoing administrative costs associated with the marketing activities.

The focus on increasing overnight visits to the area constitutes a specific benefit to the lodging establishments that pay the assessments. This specific benefit is what distinguishes the assessments from taxes that are subject to voter approval requirements. The fact that others may receive incidental benefits from the expenditure of assessments, such as restaurants serving more patrons, does not change the characterization of assessments as a specific benefit to lodging establishments because no additional cost is imposed on the lodging establishments to provide those incidental benefits.

F. Annual Report

Pursuant to Ordinance, and in accordance with section 36533 of the Act, SCTB must present an Annual Report to the Board for its approval that includes a program of activities intended to be implemented within the SCTBIA during the upcoming fiscal year, together with an estimate of related expenditures. SCTB must also include in the Annual Report an outline of the previous year's revenues and how those revenues were spent. SCTB obtains annual audits from independent auditors each year. The most recent annual audit is submitted as part of this Annual Report, providing a detailed analysis of the sources and uses of funds. Looking forward, the annual budget for the upcoming year submitted herewith describes the anticipated revenues and expenditures. The balance of this Annual Report will provide additional information concerning programs and activities completed in the prior year, as well as those planned for the upcoming year. The Board's consideration and requested approval of this Annual Report is the act which constitutes the levy of the assessment for the upcoming year.

II. **ANTICIPATED USE OF REVENUE**

A. Fiscal Year 2018-2019 BIA Revenue

For Fiscal Year 2018-2019 (July 1, 2018 through June 30, 2019), BIA assessment revenue is projected to be \$5,297,870.

B. Fiscal Year 2018-2019 TOT Revenue

For Fiscal Year 2018-2019 (July 1, 2018 through June 30, 2019), TOT revenue to be allocated to SCTB is projected to be \$2,107,840 based on County estimates as of March 8, 2018.

C. Recommendation

SCTB, in its capacity as the Advisory Board, recommends that the Board confirm this Annual Report and continue to levy the SCTBIA annual assessment for Fiscal Year 2018-2019 pursuant to the Parking and Business Improvement Area Law of 1989 (California Streets and Highways Code section 36500 et seq.), subject to the following findings and recommendations:

- 1) That the boundaries of the SCTBIA should remain the same, with the recognition that the cities of Santa Rosa, Petaluma, Rohnert Park, Sebastopol, Cloverdale and Cotati, and the Town of Windsor, have not withdrawn their consent to be included within the boundaries of the SCTBIA.
- 2) That SCTB continue to serve as the Advisory Board for the SCTBIA.
- 3) That the method and basis of levying the assessment remain unchanged, and in accordance with the terms of the Ordinance in fiscal year 2018 – 2019.
- 4) That the revenues generated by the assessment be used in accordance with the requirements of the Ordinance to conduct marketing activities designed to increase the number of overnight visits to the County.
- 5) That SCTB retained the services of Dillwood Burkel & Millar, LLP, an independent certified public accounting firm, to audit the SCTB financial statements for the periods of January 1, 2016 to December 31, 2016 and January 1, 2017 to June 30, 2017. Their findings were that there were no material weaknesses or significant audit findings in relation to SCTB's books and records. As part of SCTB's three-year auditor rotation policy, a new independent certified public accounting firm will be selected to audit the fiscal year July 1, 2017 to June 30, 2018.

D. Activities, Marketing, Advertising, and Public Relations Program Expenditures

The type of activities intended to be funded by the SCT BIA/TOT revenues include:

(1) advertising; (2) marketing materials and distribution; (3) tradeshow and sales missions; (4) sales and marketing promotions; (5) destination development; (6) research and development; (7) public relations; (8) sales and marketing tools; (9) labor; and (10) administrative expenses to align with SCT's five key initiatives: 1) Drive Overnight Visitation, 2) Create and Convey Value, 3) Engage Partners, 4) Spearhead Long-term Destination Planning, 5) Run an Effective Business.

Because of the October 2017 fires, Sonoma County Tourism's Board of Directors approved up to \$750,000 of funds from the catastrophic reserves to be used in to promote travel to Sonoma County, raise awareness

of Sonoma County as a destination and combat negative perceptions related to the fire. These funds will be used throughout FY17/18 as well as FY18/19.

D. Activities, Marketing, Advertising, and Public Relations Program Expenditures (cont.)

1. Advertising

SCT advertises in markets likely to yield overnight visits, driving consumers to trackable channels to increase marketing opt-ins. Strategy is to place a mix of paid content modules along with traditional ads, increase engagement with social media platforms and increase alignment with key advertising partners. A newly refreshed campaign, aligned with a brand refresh, will showcase the diversity of the area (coast, redwoods and rivers, vineyards and valleys) and experiences to extend visitor stays. Ad messaging will encourage visitors to see more of the total county during their stay.

Ad campaigns will be divided among brand advertising that runs year-round, and concentrated campaigns to yield overnight visitation during Oct-Dec and Jan-April, as well as mid-week.

2. Marketing Materials and Distribution

To promote the diversity of Sonoma County visitor experiences and encourage overnight visitation, SCT uses fresh imagery and advertising customized to the audience to inspire travelers. An online strategy that stresses deep content as well as an offline strategy that includes a combined run of 500,000 annual maps and guides serve to influence potential visitors to choose Sonoma County. Additional materials include sales brochures and collateral for use promoting mid-week, off-season visitation to meeting planners, weddings and travel trade.

3. Tradeshows and Sales Missions

Assessments will assist the DMO with funding tradeshows, sales missions and client events. These events will include attendance by qualified meeting planners from across the United States and Canada. These activities are intended to help generate room nights and qualified meeting and tour and travel leads. It is expected that Travel Industry Sales will generate qualified lodging and service business leads from Tour Operators for those hospitality/tourist related businesses within Sonoma County. Assessments will assist with funding the operation of satellite sales offices in Southern California, Washington DC, Chicago, Sacramento and Texas with the objective of specifically targeting meeting and group business.

4. Sales and Marketing Promotions

The activities to market and sell Sonoma County to our three core segments (leisure travel, meetings and groups, and tourism trade) are funded through these assessments. Funds are used for representation in target markets, education and awareness building among clients, incentives to bring group business in during need periods, marketing partnerships to raise awareness and gather information from future visitors, social media and email marketing, memberships in industry groups for leads and exposure and short-term promotions to take advantage of ad-hoc opportunities.

5. Destination Development

To sustain the tourism economy, which accounts for almost 20,000 local jobs, SCT provides programs that develop the hospitality workforce (like the Certified Tourism Ambassador program) as well as engages in community listening through the community engagement program. This

year SCT goal is to certify the 2,500th Certified Tourism Ambassador, ensuring that all visitor interactions are a positive one.

6. Research and Development

To maintain competitiveness and gauge effectiveness of programs, SCT conducts ongoing research, including contracting with the Sonoma County Economic Development Board for a Tourism Research Fellow as well as purchasing customized reports from tourism researchers. SCT also conducts brand and message audits and modifies marketing and sales activities based on findings. The EDB Research Fellow also manages Sonoma County Restaurant Week with the material assistance of SCT. SCT seeks to grow the research program in the coming year to complement new brand initiatives, maintain competitiveness and report on key performance indicators.

7. Public Relations

SCT assists thousands of journalists from around the world with stories about Sonoma County each year. Activities include visiting media to educate them, hosting qualified journalists in Sonoma County, attending events with partners like Visit California and representation in national and international markets likely to yield visitation.

8. Sales and Marketing Tools

Funds for sales and marketing tools are used to subscribe to programs that produce sales leads as well as to maintain the customer relationship management systems that track clients, partners and leads.

9. Labor

Labor expenses for marketing and group meeting sales activities will be funded by BIA Assessments. Labor costs for administrative personnel will be funded by TOT revenues.

10. Administrative Expenses

Administrative expenses will be funded by TOT revenues. At 10.6% of total expenditures, the administrative expenses are below average for a destination marketing organization according to the Destination Marketing Association International (DMAI) annual study.

11. Capital Expenditures

SCTB will replace outdated computers based on its 4-year replacement schedule.

11. Reserves

SCTB maintains reserves to provide funds for significant future cash demands arising from both planned and unplanned events or circumstances. \$1.3 million of reserves will be used during the fiscal year to forestall the impact of TOT funding reductions.

**Resolution of the Board of Supervisors of the County Of Sonoma, State of California,
Confirming the Sonoma County Tourism Bureau's Annual Report and Continuing Without
Change the Levy of the Tourism Assessment for the Sonoma County Tourism Business
Improvement Area for Fiscal Year 2018-19**

Whereas, on September 14, 2004 and October 12, 2004, the Board of Supervisors adopted Resolution Nos. 04-0850 and 04-0984 establishing the Sonoma County Improvement Area pursuant to the Parking and Business Improvement Area Law of 1989, California Streets and Highway Code Section 36500 et seq. to levy an assessment with the primary purpose to promote tourism activities to benefit the lodging establishments in the Tourism Business Improvement District (Business Improvement District); and

Whereas, in compliance with the California Constitution, Streets and Highway Code section 36535(d) and Sonoma County Code Chapter 33, since the creation of the Business Improvement District and the levy of the tourism assessment in 2004, the nonprofit organization Sonoma County Tourism Bureau (Tourism Bureau) has submitted an annual assessment report to document its marketing, promotional and other activities to promote tourism in the Business Improvement District (Annual Report); and

Whereas, pursuant to Streets and Highways Code section 36535(d), the levy of the assessment and program to promote tourism has continued without change in the Business Improvement District since its establishment in 2004 (Tourism Assessment);

Whereas, in April 10, 2018, the Tourism Bureau submitted its Annual Report for fiscal year 2018-19 which has been available for public review at the Clerk of the Board; and

Whereas, on April 10, 2018, the Board of Supervisors passed a Resolution Declaring Its Intention of Continuing Without Change the Levy of the Tourism Assessment on the Lodging Businesses Located within the Business Improvement District, scheduled the public hearing and published the Resolution of Intent in a newspaper of general circulation seven days prior to the date of the hearing;

Whereas, the Tourism Bureau presented its Annual Report to the Board of Supervisors at the public hearing on May 8, 2018 to demonstrate the marketing, promotion and special services that have been and will continue to be provided for the lodging establishments subject to the Tourism Assessment within the Business Improvement District and support the continuation of the levy of the Tourism Assessment without change in fiscal year 2018-19; and

Whereas, the Tourism Bureau's presentation and the Annual Report establish that the Tourism Assessment complies with Sonoma County Code Chapter 33 and Streets and Highways Code section 36535(d); and

Whereas, the Tourism Bureau's presentation and the Annual Report further establish above and beyond the requirements of Sonoma County Code Chapter 33 and Streets and Highways Code section 36535(d) that the advertising, development of marketing materials and distribution, tradeshow and sales missions, sales and marketing promotions and destination development, research and development, public relations, sales and marketing tools, and labor, technology upgrades and administrative expenses to operate the program have specifically benefitted the lodging establishments that pay the Tourism Assessment by increasing overnight visits to those establishments and the amount of the assessment is no more than necessary to cover the reasonable cost in providing the specific benefits and services in a manner that bears a fair and reasonable relationship to the considerable benefits received by the payors; and

Now, Therefore, Be It Resolved, the Sonoma County Board of Supervisors confirms the Tourism Bureau's Annual Report and hereby continues without change the levy of the Tourism Assessment for fiscal year 2018-19.

Independent Auditors' Report

To the Board of Directors of
Sonoma County Tourism Bureau
Santa Rosa, California

We have audited the accompanying financial statements of Sonoma County Tourism Bureau, which comprise the statements of financial position as of June 30, 2017 and December 31, 2016, and the related statements of activities, functional expenses and cash flows for the six-month period ended June 30, 2017 and the year ended December 31, 2016, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Sonoma County Tourism Bureau as of June 30, 2017 and December 31, 2016, and the changes in its net assets and its cash flows for the six-month period and the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The Statements of Activities by Source and related notes on pages S1 to S3 are presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

For the Six-Month Period Ended June 30, 2017
and the Year Ended December 31, 2016

Note 1. Organization

The Sonoma County Tourism Bureau (the "Organization" or the "SCTB"), formed on January 4, 2005, is a Nonprofit Mutual Benefit Corporation formed under the Corporation Laws of the State of California. The Organization's mission is to promote Sonoma County as a premier overnight destination with unique and diverse experiences. SCTB has contracts with the county and receives funding from the Sonoma County Tourism Business Improvement Area (BIA) and the County of Sonoma Transient Occupancy Tax (TOT). Sonoma County Tourism Bureau facilitates the services, activities, and programs funded by BIA revenues, which covers all unincorporated areas of Sonoma County, as well as the cities of Cloverdale, Cotati, Petaluma, Rohnert Park, Santa Rosa, Sebastopol, and Windsor. The Organization's revenues received from TOT must be spent to promote tourism throughout Sonoma County.

During 2017, the Organization elected to change its reporting period from calendar year to fiscal year ended June 30. The accompanying financial statements includes the financial statement information for the calendar year ended December 31, 2016 and the six-month period ended June 30, 2017.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Net assets, revenues, expenses, gains and losses are classified based on the existence or absence of donor-imposed restrictions.

Classification of Net Assets

Accounting principles generally accepted in the United States of America require that SCTB report information regarding its financial position and activities according to three classes of net assets: unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets. SCTB had no temporarily or permanently restricted net assets as of June 30, 2017 and December 31, 2016. The Organization maintains Board designated funds within unrestricted net assets for various purposes, which are further discussed in Note 6.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires Management to make estimates and assumptions based on Management's knowledge and experience. Those estimates affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported amounts of revenue, support and expenses. The use of Management's estimates primarily relate to the collectability of accounts receivable, valuation reserve on inventory, and depreciable lives of property and equipment. Actual results could differ from these estimates.

Note 2. Summary of Significant Accounting Policies, *continued*

Cash and Cash Equivalents

SCTB considers all highly liquid investments with an initial maturity of three months or less to be cash equivalents, except when a restriction is imposed, which limits the investment's use to long-term.

Cash is held in demand accounts at banks, and cash balances may exceed the federally insured amounts during the year. The Organization has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

Fair Value Measurements

Fair value of an investment is the amount that would be received to sell the investment in an orderly transaction between market participants at the measurement date. Market price observability is impacted by a number of factors, including the type of investment and the characteristics specific to the investment. Investments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. Investments measured and reported at fair value are classified and disclosed in one of the following categories:

- Level 1: Valuation based on quoted market prices in active markets for identical assets or liabilities that the Organization has the ability to access.
- Level 2: Valuations based on pricing inputs that are other than quoted prices in active markets which are either directly or indirectly observable.
- Level 3: Valuations are derived from other valuation methodologies, including pricing models, discounted cash flow models, and similar techniques.

The categorization of an investment within the hierarchy is based on the pricing transparency of the investment and does not necessarily correspond to the Organization's perceived risk of that investment.

All investments held by the Organization as of June 30, 2017 and December 31, 2016 were measured as Level 1 category.

Investments

Investments are comprised of certified deposits, carried at fair value. Interest income is included as an increase in unrestricted net assets since its use is unrestricted.

Investments are held at various banks with varying degrees of insurance. The Organization has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on investments.

For the Six-Month Period Ended June 30, 2017
and the Year Ended December 31, 2016

Note 2. Summary of Significant Accounting Policies, *continued*

Accounts Receivable

Accounts receivable at June 30, 2017 and December 31, 2016 consist of amounts due in the course of conducting business. Based on historical experience, management considered these receivables fully collectible and therefore, no allowance for doubtful accounts has been established. Receivables are written off when management considers them uncollectible.

Inventory

Inventory consists of promotional items used primarily at trade shows. Inventory is valued on the first-in, first-out method and is stated at the lower of cost or net realizable value.

Prepaid Expenses

Prepaid expenses consist primarily of insurance, rent and trade show fees paid currently for future events.

Property and Equipment

Acquisitions of property and equipment are recorded at cost. Improvements and replacements of property and equipment are capitalized. Maintenance and repairs that do not improve or extend the lives of the property and equipment are charged to expense as incurred. When assets are sold or retired, their costs and related accumulated depreciation are removed from the accounts and any gain or loss is reported in the statements of activities. Depreciation is provided over the estimate useful life of each class, ranging from 2 to 10 years or the life of the lease, when applicable, of depreciable assets and is computed using the straight-line method. SCTB capitalizes all expenditures for property and equipment in excess of \$1,000.

SCTB routinely evaluates the carrying value of its long-lived assets for impairment using standard valuation techniques. When the carrying value of an asset exceeds estimated recoverability, asset impairment is recognized. No asset impairment charges were recorded during the six-month period ended June 30, 2017 and the year ended December 31, 2016, respectively.

Other Assets

Other assets consist primarily of website design costs. Website design costs in the amount of \$186,125 were initially capitalized in 2013. The costs are to be amortized over the estimated useful life of the current website design, or four years. Other assets at December 31, 2016 are reported net of accumulated amortization in the amount of \$7,756. The website design costs were fully amortized as of June 30, 2017. Amortization expense totaled \$7,756 and \$46,531 for the six-month period ended June 30, 2017 and the year ended December 31, 2016, respectively.

Advertising Costs

Advertising costs are charged to operations when incurred. Advertising expenses for the six-month period ended June 30, 2017 and the year ended December 31, 2016 totaled \$300,420 and \$978,981, respectively.

Income Taxes

In letters to SCTB, the Internal Revenue Service and California Franchise Tax Board stated that SCTB is exempt from federal income tax under Section 501(c)(6) of the Internal Revenue Code (IRC) and from California bank and corporation taxes under Section 23701(e) of the California Revenue and Taxation Code, respectively. However, the Organization is subject to income taxes on any net income that is derived from a trade or business, regularly carried on, and not in furtherance of the purposes for which it was granted exemption, commonly referred to as unrelated business income.

The Organization determines whether its tax positions are "more-likely-than-not" to be sustained upon examination by the applicable taxing authority based on the technical merits of the positions. As of June 30, 2017, the Organization has reviewed its tax positions and has concluded no reserve for uncertain tax positions is required. The Organization's exempt organization information returns are subject to review through three years after the date of filing for federal and four years after the date of filing for California.

Functional Allocation of Expenses

The costs of providing the various programs and other activities have been summarized on a functional basis in the statements of activities and changes in net assets. Accordingly, certain costs have been allocated among the programs and supporting services based on staff time incurred by employees for various activities. The remaining costs are charged directly to the appropriate functional category.

Concentrations of Credit Risk

At various times during the six-month period ended June of 2017 and the year ended December 31, 2016, the Organization had deposit amounts with financial institutions in excess of the \$250,000 Federal Deposit Insurance Corporation ("FDIC") insurance limit. SCTB had approximately \$855,000 and \$208,000 on deposit in excess of the FDIC insured amount as of June 30, 2017 and December 31, 2016, respectively.

	<u>\$ 4,127,275</u>	<u>\$ 3,966,915</u>

Note 7. Operating Leases

In March 2015, the Organization entered into a lease agreement for a new office space commencing April 1, 2016 and terminating March 31, 2021, with a 5 year option to extend. Under the agreement monthly rent is \$34,407. SCTB is also responsible for utilities costs which are paid monthly based on estimates and adjusted to actual annually by the landlord. Upon lease termination, SCTB is responsible for disposal costs of all leasehold improvements in the form of cabling, the costs of which are not estimable as of June 30, 2017.

The Organization has two sub-lease agreements with similar not-for-profit organizations, expiring March 31, 2021. The income from sub-lease is included as a reduction to occupancy expense in the statements of functional expenses. Sublease income will account for approximately 38% of total annual rent and utilities under these agreements.

Future minimum rental payments and income are as follows for years ending June 30:

	<u>Rental Payment</u>	<u>Sublease Income</u>	<u>Net Future Rent</u>
2018	\$ 412,881	\$ 156,895	\$ 255,986

For the Six-Month Period Ended June 30, 2017
and the Year Ended December 31, 2016

Note 8. Defined Contribution Plan

SCTB has a 401(k) defined contribution plan that covers all employees and includes safe harbor matching contributions and non-elective contributions. Safe Harbor matching contribution eligibility starts after the third month of employment, and equals 100% of the employee's salary deferral up to 3% of the employee's compensation, and 50% of the employee's salary deferral between 3-5% of the employee's compensation. The non-elective contribution eligibility starts after one year of employment, given the employee has reached 21 years in age. The Organization's management, at its sole discretion, determines the amount of non-elective contributions to the plan annually. In the event that a participant terminates his employment with the Organization prior to the completion of the vesting periods, the non-vested amount attributed to non-elective contributions accumulated in the participant's account is forfeited. Retirement plan expenses for the six month period ended June 30, 2017 and for the year ended December 31, 2016 were \$35,391 and \$101,430, respectively.

Note 9. Concentration of Income

SCTB is funded by an ordinance dated November 2, 2004, which created the Business Improvement Area (BIA) of Sonoma County. These revenues are a self-assessment of lodging properties within the BIA area. If the ordinance were discontinued the Organization would be significantly impacted. The risk of loss of support is low, as the ordinance is supported by the lodging industry itself.

The Organization also receives funds from Transient Occupancy Tax (TOT), which is assessed and collected by the County of Sonoma. Each year, the County Board of Supervisors decides how much of the total TOT to allocate to SCTB, to be used specifically to promote tourism within Sonoma County. Should the tax levy cease to exist, the Organization would be significantly impacted.

Note 10. Subsequent Events

Management has evaluated subsequent events through February 28, 2018, the date that the financial statements were available to be issued, and determined that there are no material subsequent events that required recognition or additional disclosure in these financial statements.

At the public hearing, the Board will consider all protests, both written and oral, presented to the Board prior to the close of the hearing. Each written protest shall contain a description of the business, property address, and if a person submitting the protest is not shown on the official records as the owner of the business, the protest shall contain or be accompanied by written evidence that the person submitting the protest is the owner of the business. A written protest which does not comply with this section shall not be counted in determining a majority protest. If written protests are received from the owners of businesses in the District which will pay 50 percent or more of the assessments proposed to be levied and protests are not withdrawn so as to reduce the protests to less than 50 percent, no further proceedings to continue the tourism assessment shall be taken for a period of one year from the date of the finding by the Board of Supervisors that a majority protest exists. If the majority protest is only against the furnishing of a specific type of tourism activity within the District, that type of tourism activity shall be eliminated. If there is not a majority protest as described herein, the tourism assessment shall continue without change pursuant to Streets and Highway Code Section 36535(d).

Be It Further Resolved, the Clerk of the Board shall cause a copy of this Resolution to be published once in a newspaper of general circulation at least seven days prior to the date of the hearing.

Only a small portion portion of [Sonoma County](#) was damaged by the recent fires - mainly along the eastern county border where most visitors don't go. While two hotels were lost - the Hilton Sonoma Wine Country and Fountain Grove Inn in Santa Rosa - three new properties have opened: Holiday Inn Windsor, Oxford Inn & Suites and the boutique Astro Hotel. The number of hotel rooms available remains the same at about 6,300.

"Come back soon and find that resilient [Sonoma County](#) is back doing what we do best - greeting guests with a world class welcome and unforgettable experiences" says Chyrl Collins, Sonoma County Tourism's tour and travel sales manager.

Title: County Government Center Facility Planning

Recommended Actions:

Authorize the Director of General Services to issue a Request for Interest seeking feedback on the feasibility of a public-private partnership to address inadequate County Government Center office buildings that have exceeded their useful life and are costing more to maintain and repair than they are worth.

Executive Summary:

The current 1950's based, sprawling County campus no longer serves the needs of our community nor does it represent the highest and best use of valuable property assets. The County campus property was developed over the last 60 years with 10,000 square feet of building area per acre where less than one quarter of the available land is used for buildings. This inefficient land use prioritizes vehicle parking over the efficient delivery of services, thereby underutilizing land that could be put to a higher purpose such as providing housing, and revenue generating mixed-use office and retail space.

Your Board's 2017 Strategic Plan described the dual priorities of investment to reduce long term operating costs associated with aging County facility infrastructure, and identifying under-utilized County government properties for housing in order to address Sonoma County's housing affordability crisis. The plan presented to your Board today describes in concept how the County Government Center properties could be better utilized to meet these goals. Today's presentation expands upon prior planning efforts and various design concepts presented to the Board in 2007 and 2013. Options are presented to obtain Board approval to explore feasibility through a Request for Interest process. A Request for Interest will help the County assess the level of private sector interest in a public-private partnership, will help us evaluate possible locations for new administrative offices, and will provide important input towards structuring a competitive Request for Qualifications and Proposals. The Request for Interest may assist the Board in considering four possible campus location alternatives; the existing campus, downtown Santa Rosa, airport business park, or an unknown build to suit location. It is

anticipated that the City of Santa Rosa will join the County in the Request for Interest given possible opportunities to co-locate in downtown Santa Rosa. There may also be opportunities to partner with the local Court to address deferred maintenance in the Hall of Justice.

The County's real estate portfolio is diverse with over 2 million square feet of owned and leased facilities and over 170 structures. The County campus represents 470,456 square feet of office space, not including the detention facility and the Sheriff's buildings. The cost of operating the property portfolio has grown as facilities have aged, as deferred maintenance obligations increase, as owned properties have no room for expansion, and therefore as department needs for space are met through commercial office leases.

The need for campus revitalization is driven by the desire to consolidate operations, and to reduce the growing deferred maintenance and leased property expenses. Furthermore there is an opportunity to advance your Board's strategic priority of Housing for All.

Discussion:

Business Case for Campus Replacement

The County campus buildings are aging and in need of a significant investment in deferred maintenance or alternatively complete replacement. The current model of funding capital investments in the County government facilities is not sufficient to meet the rate of facility structural and building systems failure.

Facilities continue to age and the demands for services continue to grow. The resulting insufficient operating budget has created a growing backlog of \$258 million deferred maintenance on the County government center campus alone and the condition of "running to fail" whereby major structural or building systems completely fail and must be replaced at significant cost often on an emergency basis. This is not a facilities operations best management practice. Your Board took steps toward addressing this situation by adopting a Capital Funding Policy during the FY 17-18 budget deliberations. A long term solution must be found that addresses the fiscal implications of deteriorating infrastructure.

Besides the deteriorating state of the County buildings, the facilities are seismically deficient, potentially compromising the ability of the County to effectively respond in the event of a disaster. Buildings built prior to the mid 1970's, particularly concrete and masonry structures, which comprise a significant portion of the Sonoma County portfolio, are considered at a high risk of significant damage.

The County campus property was developed at a time when land use zoning encouraged the separation of office, retail and residential buildings. Office complexes in Sonoma County were designed with the assumption that employees would primarily drive to work from residential communities. Building density was low and floor area ratios prioritized parking availability. As a consequence, the County campus was designed with primarily single story buildings and lots of surface parking. This inefficient land use today compromises the County's ability to achieve the highest and best use of the property asset. An opportunity exists to move administrative functions currently in leased space back to a centralized campus, and simultaneously develop a portion of the campus for housing and mixed use office or retail.

See Attachment 1 – Report on Solutions Options for Addressing the Growing County Government Center Administrative Building Maintenance Costs (Maintenance Costs Report) for more detailed information.

Prior Efforts

Over the past ten years the Board has invested in a number of studies and analysis of options for revitalizing the County government campus. On January 15, 2013, the Board accepted *the Sonoma County Real Estate and Financial Vision – Comprehensive County Facilities Plan*. Interviews were conducted with all departments to determine space needs, growth factors and appropriate adjacencies. Much of this information is still current today.

The FY 13/14 Comprehensive County Facilities Plan determined that three quarters of the County's facilities on the main campus were beyond useful life, that space standards were lacking, and that average workstation sizes were significantly above industry standards. In addition, the Comprehensive County Facilities Plan concluded that 62% of the county's real estate costs were a result of lease expenditures and that these costs were increasing as a result of campus space constraints. The Real Estate Master Plan portion of the Comprehensive County Facilities Plan recommended expanding neighborhood based Health and Human services but consolidating these department's administrative functions. In general, approximately 85% of the lease expenditures for Health and Human Service's programs are reimbursable to State and Federal program fund sources. Space constraints on the County Government Center campus have prevented consolidation of administrative functions.

Since FY 13/14, staff have implemented the Comprehensive County Facilities Plan recommendation to reduce lease costs per square foot through new or renewed leases approved by the Board. In addition, staff obtained Board approval to increase neighborhood based services. As a result of these efforts over the last two years, General Services Department Real Estate staff have saved over \$5 million in annual lease expenses through renegotiating leases to below commercial market rates.

Staff Analysis and Recommendation for Next Steps

In the current report, four options are studied to determine how best to mitigate the growing deferred maintenance obligation:

- Continuing as is with the status quo.
- Catching up on deferred maintenance.
- New construction either on the County property or elsewhere.
- Leasing buildings.

To evaluate the four different options it was necessary to estimate demolition, design and construction costs and financing costs, where applicable. In order to obtain a rough estimate of the costs of demolition, design and construction, staff requested Kitchell Construction Management provide cost estimates. The Kitchell analysis used an estimated cost range of \$826.00 – \$942.00 per square foot for the scenarios studied. In addition, financing options were prepared by the County's financial advisor, KNN Public Finance LLC. The financing options include: issuing bonds, leasing or building to suit, and using a performance based infrastructure approach (also called public-private-partnership). All of this analysis is included in the Maintenance Costs Report.

The Kitchell and KNN analyses have considered the opportunities for property sale proceeds, ground lease revenues and the cost of rental swing space during construction. In addition, staff obtained historical information on lease trends and vacancy rates throughout the County. Staff evaluated the potential for revenues from the sale or ground lease of the 21 – 29 acre property that might result from

a consolidated campus plan. The possible one-time or ongoing revenues could be used to offset the costs of the financing approach selected. The Request for Interest will enable the County to narrow down the financial approaches to best address the deteriorating existing campus building infrastructure.

Finally, staff considered the opportunities for consolidation and partnerships with the City of Santa Rosa, the Superior Court, and others. The City of Santa Rosa is also considering options to replace their aging facilities. The County and Court share the desire to upgrade the Hall of Justice facility. There may be economies of scale advantages to the County, City of Santa Rosa, and the Court collaborating on a Request for Interest, and a Request for Qualifications and Proposals.

Staff is requesting authority to prepare a Request for Interest which would be released later this year to developers in order to competitively assess initial financial viability and the new construction and lease options presented in the Staff Report. The Request for Interest will assist in narrowing down the scope of a Request for Qualifications and Proposals. There are other considerations that can be explored in a Request for Interest including the possibility of collaborating with the City of Santa Rosa and the Superior Court as described above. Staff will return to the Board with a summary of the responses received from the Request for Interest in late 2018. If responses are favorable, next steps would include obtaining consulting and counsel services to assist in preparing a request for qualifications and request for proposals.

EXECUTIVE SUMMARY

The current 1950s-based sprawling County Government Center no longer serves the needs of our community, nor does it represent the highest and best use of valuable property assets. The campus was developed over the last 60 years with 10,000 square feet of building area per acre where less than one quarter of the available land is used for office space. This inefficient land use prioritizes vehicle parking over the efficient delivery of services, thereby underutilizing land that could be put to a higher purpose such as providing housing or generating revenue through mixed-use office and retail space.

The County's real estate portfolio is diverse, with over 2 million square feet of owned and leased facilities and over 170 structures. The County Government Center represents 470,456 square feet of office space, not including the detention facility and the Sheriff's buildings.

The cost of operating the property portfolio has grown as facilities have aged, and deferred maintenance obligations also have increased over time. Owned properties have no room for expansion and department needs for space are therefore met through market-rate commercial office leases. The opportunities for more efficient management of the County's real estate portfolio were studied by HOK Architects in 2007, and Gensler Architects in 2013. VFA was then tasked in 2014 to evaluate the condition of the County's facilities. These prior studies recommended either significant ongoing investment in maintenance or the replacement of the aging County campus buildings.

This report provides updated information on maintenance costs, and options for mitigating the growing financial liability of operating buildings beyond their useful life. This report provides information describing the cost to repair and replace buildings and demonstrates that it is more cost effective to construct new buildings. It also provides options for new construction, and analyzes possible locations and financing methods. This report is a companion document to a Board of Supervisors memo and presentation anticipated for the May 8, 2018 Board meeting.

BACKGROUND

The General Services Department's annual operating budget funds the maintenance needed to keep all County buildings and facilities in acceptable condition and compliance with State and Federal laws and regulations.¹

There are three types of maintenance that are discussed in this report:

- **Preventative maintenance** is performed while the building, equipment or systems are still operating to lessen the likelihood of failures. Preventative maintenance should be performed regularly on all building components. If preventative maintenance is not done it becomes deferred maintenance.
- **Corrective maintenance** is the task of rectifying failed equipment or building systems such that these can be restored to operational condition. Corrective maintenance can include the complete replacement of equipment or building components.
- **Deferred maintenance** is the postponement of preventative and corrective maintenance. The lack of funding to cover all maintenance on time can cause more severe conditions that require a greater level of investment than the cost of the original maintenance.

COUNTY GOVERNMENT CENTER

The County Government Center makes up a quarter of the County's entire property asset portfolio and is the most expensive asset for the County to maintain. Over 80% of the County Government Center is 50-60 years old and experiences heavy use by the public and county employees – resulting in frequent and costly repairs or replacements. Compounding the age of the buildings, the County's investments in preventative maintenance have fallen behind and create an ever growing deferred maintenance obligation. The County's investment in maintenance has not met industry standard levels for more than ten years, a situation that has resulted in progressive building systems failures. Addressing deferred maintenance by either repairing or replacing the most expensive portion of the property portfolio will reduce the long-term financial risk to the County. Recognizing these trends in 2014 the General Services Department recommended and obtained a Comprehensive Facilities Condition Assessment.

KEY TAKEAWAYS

Over 80% of the County Government Center is 50-60 years old and experiences heavy use by the public and county employees – resulting in frequent and costly repairs or replacements.

The Board of Supervisors appropriated funds in 2014 for a Comprehensive Facilities Condition Assessment to help guide the County's asset management strategy.

The Comprehensive Facilities Condition Assessment conducted by VFA found that on the County Government Center, only the Family Justice Center, Main Adult Detention Facility, and the Sheriff's building warranted further investment based on the condition of the facilities.

¹ Such laws include the Title 24; Americans with Disabilities Act; Cal OSHA Regulations; Labor Codes; various Building and Fire codes, and Health and Safety Codes.

2014 COMPREHENSIVE FACILITIES CONDITION ASSESSMENT

The Board of Supervisors appropriated funds for a Comprehensive Facilities Condition Assessment to help guide the County's asset management strategy. VFA, now Accruent, conducted the study and used an industry standard benchmark known as the Facility Condition Index (FCI) to measure the current condition of the County's facilities. The FCI is calculated as a ratio by dividing the total estimated cost of completing all maintenance projects by a building's estimated replacement value. The higher the FCI, the higher the need for funding relative to the facility's value. A building with a good FCI would have a value under 0.05. A building with an FCI of between 0.05 and 0.10 would be considered in fair condition. And a building with an FCI of over 0.10 would be considered in poor condition. Buildings with an FCI of 0.3 or higher would be considered in critical condition.

An FCI of 0.3 is typically considered the point beyond which the remaining low facility value outweighs further investments. The Comprehensive Facilities Condition Assessment found that the average FCI was 0.34 for all of the buildings analyzed in the report throughout the County property portfolio. The County Government Center buildings had an average FCI of 0.36. The La Plaza B (0.53), La Plaza A (0.47), Law Library (0.47), Human Services (0.46), Child Care Center (0.41) and Administration (0.38) buildings are well beyond their useful life. The FCI values for the buildings described above indicate that continued investment in these buildings will have diminishing returns for the County.

Table 1 summarizes the essential county services and full-time employees that depend on the aging County Government Center buildings along with the FCI and replacement value for each building determined by VFA in the Comprehensive Facilities Condition Assessment. The replacement value is the cost to rebuild the existing structure in the same location, the same size, same quality of original construction, and original code at current costs. Replacement value does not equal the cost of building new construction to today's code, or market price.

The FCIs in the table above illustrate that only the Family Justice Center warrants further investment. All the other buildings have FCI where further expenditures in maintenance are considered a poor investment. The table also indicates that the replacement value per square foot is over \$1,351. This cost to replace per square foot is higher than new construction as we

will describe later in this report and does not represent bringing the buildings up to current code. The current practice of repairing systems as they fail is replacement. Systems are fixed, like for like, but these are not wise investments and do not represent industry best practices.

INDUSTRY BENCHMARKS FOR FACILITY MAINTENANCE

The International Facilities Management Association (IFMA) reports industry-wide benchmarks allowing Facility Managers to see how their operation ranks against other organizations. If facilities fall significantly above or below the median, IFMA recommends examining cost or procedures.

IFMA's 2017 Benchmarking Report surveyed Facility Managers throughout the United States and Canada, analyzing more than 2,000 responses and 98,000 buildings about their maintenance costs for external building maintenance and interior systems maintenance. These costs included all repair, preventive, materials, direct-labor and contract costs for the following building components: foundations, structure, exterior closure (including doors, windows, walls, roof, and sealants), interior finishes, heating, ventilation and air conditioning systems, plumbing and building electrical distribution.

Average maintenance costs by region - The report determined that on-average, Facility Managers on the Pacific Coast spend \$4.07 per square foot for building maintenance.

Average maintenance costs by facility age – The report also determined that on-average, Facility Managers nationwide spend \$4.83 per square foot to maintain buildings that are 31-50 years and dedicate 44% of their expenditures to preventative maintenance.

Overall maintenance costs increased by \$1.59 per square foot (72%) from the previous benchmark report completed in 2013.

The next section describes how the County's operation and investment in facility maintenance contrasts with industry benchmarks.

KEY TAKEAWAYS

The IFMA standard for building maintenance on the Pacific Coast is \$4.07 per square foot.

Facility Managers nationwide spend \$4.83 per square foot to maintain buildings that are 31-50 years and dedicate 44% of their expenditures to preventative maintenance.

The County is funding building maintenance below IFMA standards by \$0.71 per square foot and \$2,980,561 annually for the entire asset portfolio.

The County Government Center itself falls short of IFMA benchmarks by \$752,330 a year.

Since 2012, the General Services Department has expended over 80% of its annual operating budget on unplanned building repairs and replacement of parts and systems instead of the preventative maintenance needed to extend the useful life of the County Government buildings.

MAINTENANCE EXPENDITURE TRENDS

The County funds building maintenance through the General Service Department Facility Operation division budget. As described above the IFMA standard is \$4.07 per square foot. If the County funded building maintenance based on IFMA benchmarks at \$4.07 per square foot, its annual maintenance budget would be \$8,108,714. The County is currently budgeting \$5,128,153 annually on building maintenance for all county buildings – a difference of \$2,980,561 annually. As Table 2 illustrates, funding for the County Government Center itself falls short of IFMA benchmarks by \$752,330 a year.

HOW DID WE GET HERE?

The County's maintenance budget has wavered year to year and resulted in irregular maintenance. Table 3 shows that from the early 2000's to 2007 maintenance budgets and expenditures rose year over year as square footage was increasing. Then from 2007 to 2011, the County's maintenance budget was reduced by 47%, down to \$1.90 per square foot in 2011 even with continued square footage increases. Budget cuts resulted in postponing regular preventative maintenance for several years, increasing the County's deferred maintenance backlog and causing county buildings and systems to deteriorate. Although the annual maintenance budget has gradually increased since 2012, the budget has not kept pace with the increase in square footage and with the backlog of maintenance needed to restore neglected buildings and systems. Table 3 also shows that the General Services Operations division's actual costs for maintenance have exceeded the available budget every year since 2010 as more expensive repairs and system replacements are needed. The General Services Department has used salary savings and revenues from within the department to offset maintenance budget deficits.

*Fiscal year estimate only

Even with the increase in budgeted maintenance in FY 17/18, the County is below IFMA standards by \$0.71 per square foot or \$2,980,561 annually for the entire asset portfolio. Not only is the county below IFMA benchmarks, it is far below the investment needed to address the growing deferred maintenance backlog described below.

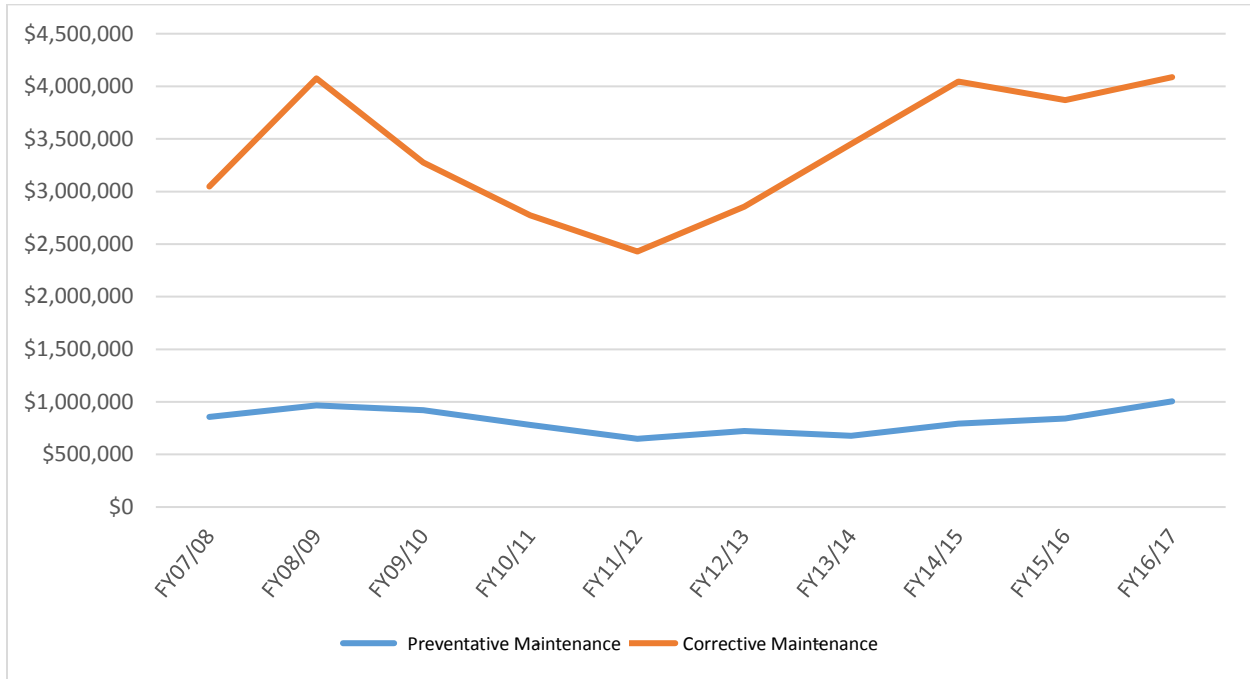

GROWING CORRECTIVE MAINTENANCE

Since 2012, the General Services Department has expended over 80% of its annual maintenance operating budget on unplanned building repairs and replacement of parts and systems instead of the preventative maintenance needed to extend the useful life of the County Government buildings. As systems fail, the County must choose between replacing the system, finding an interim solution, or deferring maintenance. Replacement of systems is often cost-prohibitive, so the County frequently relies on interim solutions to keep facilities operating. Such repairs will restore system functionality but will not last as long as a system replacement or extend the useful life of the system. This type of corrective maintenance does not reduce the County's growing deferred maintenance. In some situations, the County has no option but to replace the entire system.

In the last two years alone, the County spent \$781,000 on emergency system replacements including: the gas line to the Main Adult Detention Facility (\$97,000), heating ventilation and air conditioning systems at the La Plaza A building (\$229,000) and at the Family Justice Center (\$110,000), new roof at Permit Sonoma (\$340,000), structural failures of the Permit Sonoma trailer and the Information Technology department building roof, walls and foundation. Given that over 80% of the County Government Center is 50-60 years old, such failures are likely to

continue and the cost to repair will increase with construction cost escalation. Chart 1 below shows the increasing trend of corrective maintenance expenditures as preventative maintenance expenditures stay low.

CHART 1 –ACTUAL PREVENTATIVE VS. CORRECTIVE MAINTENANCE COSTS

GROWING DEFERRED MAINTENANCE

Postponing both preventative and corrective maintenance results in a backlog of deferred maintenance. Deferred maintenance results in major structural or building systems failure and therefore systems must be replaced at significant cost and often on an emergency basis.

In 2014, the Comprehensive Facilities Condition Assessment conducted by VFA determined that the County Government Center alone had a backlog of \$236 million in deferred maintenance. VFA based this evaluation on the condition of County facilities given their age, construction type, maintenance performed and overall condition of each building’s systems. The assessment evaluated building closures (exterior walls, roofing, doors, windows, and sealants), foundations and structure, heating ventilation and air conditioning, electrical distribution systems, plumbing, interior doors and hardware and fire protection systems. In subsequent years, with escalating construction costs the County Government Center’s deferred maintenance backlog has increased to \$258 million.

ADDRESSING DEFERRED MAINTENANCE THROUGH THE CAPITAL IMPROVEMENT PLAN

In FY 16/17, the General Services Department developed a five-year deferred maintenance plan to address the highest priority deferred maintenance projects in five annual phases. Projects in the five-year plan totaled \$64 million and included air handler replacement and auger grinder maintenance at the Main Adult Detention Facility, ISD switchgear replacement, County complex transformer repair, central mechanical plant generator replacement. The five-year plan was introduced in the 2016/2021 Capital Improvement Plan and was not funded. It has been included in all Capital Improvement Plans since and remains unfunded.

In FY 17/18, the Board authorized capital funding to address failing systems including roof replacements at the Permit Sonoma building (\$340,000) and the Santa Rosa Veterans Memorial Hall (\$1,456,956).

Critical repairs and maintenance costs have increased since the development of the original five-year plan. The updated five-year plan included in the 2018/2023 Capital Improvement Plan identifies over \$70 million in deferred maintenance projects. The updated plan identifies \$14 million “must do” deferred maintenance projects to be completed in FY 18/19 to preserve property assets.

In addition, over \$131 million in capital improvements requested by departments and \$21 million in Americans with Disability barrier removal projects on the County campus are described in the Capital Improvement Plan. These department requests could be met by replacing buildings.

As of FY 17/18, the Capital Improvement Plan identified total deferred maintenance investment needs of \$665 million for all County owned facilities. The County Government Center portion of the total \$665 million is \$258 million, representing over 39% of the total liability. Other properties such as Los Guilicos, the North County Detention facility, Main Adult Detention Facility and Veteran’s Buildings represent the remaining \$407 million. Although the focus of this report is on the County Government Center, a plan is also needed for appropriately funding maintenance on the other County owned properties described above.

KEY TAKEAWAYS

In 2014, the Comprehensive Facilities Condition Assessment conducted by VFA determined that the County Government Center alone had a backlog of \$236 million in deferred maintenance.

Overall \$131 million in capital improvements and \$21 million in Americans with Disability barrier removal projects on the County campus are described in the Capital Improvement Plan. These department requests could be met by replacing buildings.

Projected out twenty years, deferred maintenance at the County Government Center grows from \$258 million to over \$650 million assuming a 6% construction cost escalation.

PROJECTED MAINTENANCE COSTS

Corrective maintenance needs are expected to increase significantly over the next twenty years. Currently, cost escalation is at four percent and expected to grow to six percent over the next year due to market conditions including increased labor and material costs. The chart below describes projected corrective maintenance and deferred maintenance costs for the next twenty years, based on current operating and inflation trends.

Based upon actual costs and past practice, Chart 2 below shows the trend of increasing corrective maintenance as preventative maintenance investment remains low. Projecting forward with cost escalation affecting the price of materials and labor, a flat investment means the buying power of a dollar invested decreases.

CHART 2 – PROJECTED INCREASES IN PREVENTATIVE AND CORRECTIVE MAINTENANCE FOR ENTIRE ASSET PORTFOLIO

In the absence of significant changes, the long-term financial liability of deferred maintenance backlog will increase with annual cost escalation.

Chart 3 below illustrates how the lack of investment in preventative maintenance contributes to the growth of deferred maintenance. Projected out twenty years, deferred maintenance at the County Government Center grows from \$258 million to over \$650 million assuming a 6% construction cost escalation.² Although the chart illustrates the Consumer Price Index (CPI)

² The State of California requires project cost estimates to apply the California Construction Cost Index (CCCI) to budgets and estimates. The CCCI is based on Building Cost Index (BCI) cost indices produced by Engineering News Record (ENR). The CCCI has been at 0.42% per month. With locality adjustments for specific California markets, the annual construction cost escalation rate is about 6%. The professional construction estimating company RS Means also publishes historical indexes and cost trends, and their data is consistent with the CCCI.

average of 3%, it is not a valid indicator of construction cost escalation. Whereas CPI has increased annually by 3%, construction cost has escalated by 6% in the past year. Construction costs include the price of skilled labor and building materials such as steel, lumber, and concrete and are expected to continue growing.

CHART 3 – PROJECTED DEFERRED MAINTENANCE WITH CPI VS CONSTRUCTION COST ESCALATION

As illustrated, the deferred maintenance costs will continue to increase over time as shown unless buildings are replaced or significant investments are made to address deferred maintenance.

The remainder of this report describes possible solutions and financing methods to address these issues.

SOLUTIONS

Staff studied four options and developed cost estimates to determine how best to mitigate the growing deferred maintenance obligation; 1) continuing as-is with the status quo, 2) catching up on deferred maintenance, 3) new construction either on the county owned property or elsewhere, and 4) leasing existing buildings. Staff examined various factors during the development of these solutions including reports and analysis provided by subject matter experts on construction costs, bond financing, and real estate market conditions.

In order to obtain a rough estimate of the costs of demolition, design and construction, staff requested a master service agreement vendor, Kitchell Construction Management, provide cost estimates. Summaries of these cost estimates are attached to this report.

Also, the County’s financial advisor, KNN Public Finance LLC. prepared financing options that included issuing bonds to finance deferred maintenance and new construction. The analysis studied opportunities for potential revenues from the sale or ground lease of the 21 – 29 acre County property that might result from a consolidated campus. The possible one-time or ongoing revenues could be used to offset the costs of the financing approach selected. See attachments at the end of this report.

The feasibility of constructing on land not owned by the County requires additional market research and input from the development community through market soundings and request for information. Further study will examine other variables such as potential mitigations mandated by CEQA as a result of a site’s location and the equitability of site exchanges.

1) STATUS QUO

If the County continues the status quo of investing approximately \$5 million a year in total maintenance, it will never catch up given the rate of structural and building systems failure. As previously described the \$5 million budget includes preventative maintenance, corrective maintenance, and interim solutions that may not extend the useful life of County assets or reduce its deferred maintenance.

Even if the County directed \$5 million a year to deferred maintenance, it would address less than 2% of the \$258 million backlog each year. Since the annual CPI inflation rate is 3% and the construction cost inflation rate is 6%, the County would continue to spend millions a year and still face unplanned repairs and emergency system replacements.

Additionally, the status quo results in continued seismic and other code deficiencies, additional costs and liabilities associated with accessibility requirements under the American Disabilities Act, the loss of workspace functionality, higher utility costs due to poor energy efficiency, and higher insurance costs. As Department functions change, space needs cannot be accommodated within existing buildings without expensive interior redesign projects. To address additional space needs, the County is forced to lease space. The cost of County leased facilities have increased from annual rents of \$7.9 million for 328,667 square feet in

KEY TAKEAWAYS

If the County continues the status quo of investing \$5 million a year in total maintenance costs, it will never catch up given the rate of structural and building systems failure.

An annual investment of \$15 million per year, starting in 2019 will never pay off because the rate of escalation exceeds the amount of investment and would not be able to eliminate the deferred maintenance.

An aggressive investment of \$20 million a year starting in 2019, would eventually pay off in 2056.

By consolidating County department administrative functions on the County Government Center campus, land utilization would improve to where approximately 29 acres could be made available for mixed use office, retail and housing development.

General Services’ staff surveyed the Sonoma county market to identify potential opportunities to lease up to 500,000 square feet of office space in existing properties and did not identify a single property in the market that could accommodate this requirement.

FY12/13 to an annual rent of \$9.7 million for 438,691 square feet in FY17/18.

Continuing with the status quo means spending more money on costly corrective maintenance and systems replacements each year without extending the useful life of the County Government Center buildings.

2) CATCH UP ON DEFERRED MAINTENANCE

To effectively extend the useful life of all County buildings, the County would need to adequately address its growing deferred maintenance across the entire asset portfolio. This approach would require the County to dedicate a fixed annual amount of funding that outpaces the rate(s) of inflation and should include sufficient funding for preventative maintenance to protect newly replaced systems.

\$15 Million Per Year - Chart 4 below shows that an annual investment of \$15 million per year, starting in 2019 will never pay off because the rate of escalation exceeds the amount of investment and would not be able to eliminate the deferred maintenance. Deferred maintenance would continue to increase. An annual investment of \$15 million per year is similar to making minimum payments on a credit card balance.

CHART 4 – DEFERRED MAINTENANCE PROGRAM AT \$15M ANNUALLY

\$20 Million Per Year - Chart 5 below shows that a more aggressive investment of \$20 million per year starting in 2019. Investing \$20 million a year addresses work at a rate that is not overcome by escalation and would eventually pay off in 2056. However, this would be a

continuous program because system replacements have a 50 year lifecycle. So starting in 2069, all systems would need to be replaced again.

CHART 5 – DEFERRED MAINTENANCE PROGRAM AT \$20M ANNUALLY

Twenty Year Plan - Chart 6 below shows that to address the County's backlog of deferred maintenance within the next 20 years, it would need to invest \$25.3 million annually just to catch up with deferred maintenance.

CHART 6 – 20 YEAR DEFERRED MAINTENANCE PROGRAM

Staff do not consider the option of catching up on deferred maintenance via a \$25 million annual investment as viable.

3) NEW CONSTRUCTION

Another option would be to demolish the County Government Center's oldest buildings and replace them with a new 500,000 square foot building(s) and a parking garage. While the Main Adult Detention Facility, Hall of Justice, Sheriff Buildings, new Fleet building, and Family Justice Center would remain, the rest of the land would be reimagined.

Consolidating County department administrative functions on the County Government Center campus would improve land utilization allowing approximately 29 acres to be made available for mixed-use office, retail, and housing development. Consolidation would also enable the sale of the La Plaza and County Government Center Information Technology building properties as these functions would be able to move back onto campus.

A 500,000 square foot building(s) would accommodate current County Government Center staffing levels plus the additional staff returning from leased space to the administration center. As of 2016, the County has 2,004 full-time employees who would occupy the new building(s) with an expected 3% increase in staff totaling 2,064 by 2021. The new building(s) would provide full-time employees 170 square feet of workspace, which is the Federal Government workspace standard. Additionally, fifteen percent of the new building space would be used for common use areas, and 10% would be for future expansion.

Building new could accommodate a long-term ground lease for Human Service and Health Services and a separate structure for the Public Health and the Morgue, which would be relocated from the Chanate Campus. Replacing the Hall of Justice is not factored in costs estimate as needs and plans for continued use by the Superior Court have not been finalized with the Judicial Council. If the need for the Hall of Justice continues, seismic deficiencies should be addressed by demolishing and building new.

The replacement option considers the State of California's plans to proceed with the new courthouse and related parking improvements. Plans also include the construction of smaller mechanical plants to replace the central mechanical plant. The central mechanical plant currently serves the MADF and Sheriffs Building. Finally, the new construction option considers the need to replace the Public Health Laboratory and County Morgue that must be relocated due to the sale and disposition of the property on Chanate Road.

NEW CONSTRUCTION ON OTHER SITES

Other possible locations for the new County Campus could be in the Sonoma County Airport area or a co-located facility with the City of Santa Rosa in the downtown area.

- **Sonoma Airport** - The Sonoma County Airport could provide opportunities for development of new County Administrative offices. Although county owned property is limited, property may be available in an exchange with other property owners. The benefit of the airport location would be the ability to construct new facilities without disruption to current operations or the need to find swing space. However, height limitations required of the Federal Aviation Administration in the vicinity of flight operations could restrict building heights.
- **Downtown Santa Rosa** - The City of Santa Rosa has also expressed an interest in building a new civic building and investigating possibilities for new development. In addition to the City Hall property the City owns two parcels in the downtown area of approximately two acres each. The City and County could potentially share a building, or build two separate buildings in the downtown area. The benefits of co-locating could include maximizing shared facilities including public meeting rooms, conference facilities and transactional spaces with the public.

COST ESTIMATE AND METHODOLOGY

As previously mentioned Kitchell, Inc. was contracted to perform a rough order of magnitude cost estimate of the various new construction options. The cost estimates consider site improvements, building type, structure, HVAC, plumbing, electrical distribution, California Building Code provisions including seismic, accessibility, energy and sustainability to a “Net Zero Standard” for waste, water and energy needs.

The Kitchell estimate utilized historical databases from recognized estimating standards for similar construction and projected escalation factors. Escalation, as an industry practice, was calculated to the midpoint of construction which was projected to occur in 2023. Associated soft costs were included for architects design fees, construction management, permitting and County staff. Kitchell was tasked to provide estimates for two models:

- **Single Building Concept** – All County Administrative functions could be consolidated into a single building. The benefit of a single building is that it supports a more efficient service delivery model by locating all administrative functions under one roof with appropriate adjacencies. Site development is more efficient as well with a smaller footprint. A single building of mid to high rise construction would be of similar scale to the new proposed 120 foot State Court house. The Cost estimate assumed construction would be of steel and concrete with glass and solid panel cladding. The cost for the single building concept was estimated to be \$349.9 million.

- **Multi-Building Concept** – Consolidation of all County Administrative functions was also studied in a phased approach with new construction of multiple buildings. Phasing construction minimizes the amount of temporary space (referred to as swing space) required to house departments as the sites are demolished and cleared for new construction. For the purpose of cost estimating, assumptions were made about the design, which included steel and concrete construction with a glass and solid panel cladding. The cost of designing and constructing multiple buildings was estimated at \$375.5 million. See Attachment 2 for more details.

4) LEASE EXISTING BUILDINGS

Another option for consideration is to lease an existing building. In cooperation with the local brokerage community General Services' staff surveyed the Sonoma County market to identify potential opportunities to lease up to 500,000 square feet of office space in existing properties. The survey did not identify a single property in the market that could accommodate this requirement. While square footage in larger office complexes in the Sonoma county market can range up to 300,000 square feet, increased commercial office activity has reduced the county's office vacancy rate from 20.1 % in 2017 to a current vacancy rate of 17.5%. Local brokers attribute some of the increased activity in the Sonoma market to spillover from the San Francisco market. While an assemblage strategy to lease proximate space as current tenants' leases expire in a targeted Sonoma county submarket may be possible, execution of the this strategy would require planning and cooperative relationships with a number of landlords over a period of years.

SUMMARY OF SOLUTIONS

Staff have considered various options for constructing and financing new facilities or catching up on deferred maintenance. As table 4 illustrates, new construction would be the most effective way to address the County's growing backlog of deferred maintenance and provide long-term value to the public.

CONCLUSION

The current 1950s-based sprawling County Government Center no longer serves the needs of our community, nor does it represent the highest and best use of valuable property assets. This inefficient land use prioritizes vehicle parking over the efficient delivery of services, thereby underutilizing land that could be put to a higher purpose such as providing housing or generating revenue through mixed-use office and retail space. Over 80% of the County

Government Center is 50-60 years old and experiences heavy use by the public and county employees – resulting in frequent and costly repairs or replacements. The County Government Center buildings had an average FCI of 0.36. The La Plaza B (0.53), La Plaza A (0.47), Law Library (0.47), Human Services (0.46), Child Care Center (0.41) and Administration (0.38) buildings are well beyond their useful life. The FCI values for the buildings described above indicate that continued investment in these buildings will have diminishing returns for the County.

The cost of operating the property portfolio has grown as facilities have aged, and deferred maintenance obligations also have increased over time. Corrective maintenance needs are expected to increase significantly over the next twenty years. In the absence of significant changes, the long-term financial liability of deferred maintenance backlog will increase with annual cost escalation. To address the County's backlog of deferred maintenance within the next 20 years, it would need to invest \$25.3 million annually just to catch up with deferred maintenance.

The County has an opportunity and responsibility to invest taxpayer dollars in solutions that provide long-term value. Spending millions of dollars a year on short-term repairs that do not extend the life of the County Government Center's buildings, address seismic safety, or reduce the County's financial liability is ineffective. A new approach is needed to reduce risks to the County that result from over \$258 million in deferred maintenance.

APPENDIX A – FINANCING OPTIONS

In 2014, when the Comprehensive Facilities Master Plan was presented to the Board, staff were directed to further analyze financing options. This Appendix expands upon financing options that were described in the 2014 Board Report. In order to understand the feasibility of replacing buildings, staff reviewed debt financing, Performance Based Infrastructure and build-to-suit options.

DEBT FINANCING BONDING

With the assistance of the Auditor Controller Treasurer Tax Collector (ACTTC), finance options for debt financing were studied. Using the estimates for the Single Building Concept and the Multi-Building Concept, ACTTC obtained the services of KNN Public Finance LLC to perform debt financing scenarios. Financing of deferred maintenance was studied in addition to the new construction scenarios. The analysis assumed that bonds would be issued as Certificates of Participation or Lease Revenue Bonds backed by the General Fund. Currently the County's credit ratings is Standard & Poor's AA (stable). The credit structure requires the pledge of a County asset for bondholder security approximately equal to the par amount of the bonds. The justice related County Center buildings could possibly serve as the pledge assets for the bonds, which also requires the use of capitalized interest through the point of beneficial use and occupancy of the new buildings. KNN also assumed a "net funding" of the project cost requirements where the project fund would earn interest at 1.21% (the 2-year U.S. treasury rate at the time of the analysis) during the estimated term of construction.

Although the County has sufficient debt capacity, bonding may not be considered a favorable option as pledged assets may not be sufficient to back the bonds, and capitalized interest drives the overall cost of the option out of the likely range of feasibility.

PERFORMANCE BASED INFRASTRUCTURE

Performance Based Infrastructure (PBI) is an approach to capital projects in which the investment, risk, responsibility, and rewards of the project are shared between government and private-sector participants. PBI's origins are from Public Private Partnerships (P3) that were well suited to transportation and water infrastructure projects. In recent years the need for performance based requirements for vertical construction led to the development of PBI. Under the PBI model, design, construction, financing, operations, and maintenance are bundled together into a single program with a contracted entity. The development team is the single point of contact for procurement and delivery of all services under the contract. Shifting both the financial risk and responsibility for long-term maintenance to the private partner creates a compelling incentive to ensure high levels of performance: both high-quality construction and the proactive upkeep of the finished building. The government entity continues to own the land

through the duration of the term.

PBI benefits taxpayers by bringing additional discipline to the costs and timeline of a project. The cost to the government entity can be distributed over a longer period of time than with bonding – typically 35-40 years vs 25 years, and payments can be linked to operational performance. At the same time, PBI arrangements can streamline and shorten the design and construction phases of the project compared with those of typical public building projects. Shortening the timeline of design and construction saves money because of avoided construction cost escalation. Taxpayers also benefit from the competitive solicitation of bundled design, construction, and facility operation services, which gives the government entity more economic advantage than it might have with traditional procurement.

A PBI on County land would entail a lease-leaseback contractual arrangement where the PBI contracted entity would lease the property from the County for a specified period and the newly constructed building would then be leased back to the County (leased to own) at a rate that recovers the PBI entity's development financing, operating and maintenance costs. At the end of the term, the building would revert to the County's ownership and the maintenance provisions of the PBI would specify the condition of the building when it is returned. There is an opportunity with development on the County campus, where lease costs could be reduced through revenue generating housing or commercial uses on the balance of the campus. For example, in the City of Long Beach's PBI contract, annual lease payments were capped at a set amount and the developer was able to recoup costs through revenue generated from the sale of land for a new hotel, residential, and commercial real estate development.

Alternatively, a PBI executed on non-county property would have to consider the cost of acquiring land and either performing tenant improvements to an existing building or building new. In this scenario, a PBI would likely take the form of a lease with an operating agreement and a potential option for acquisition.

Other jurisdictions have embarked upon similar development programs. The California State Courts and the City of Long Beach has used the Performance Based Infrastructure method to revitalize public buildings and build housing. The City of Napa is also proceeding under this model to replace their City Hall. Santa Clara County has been working on a Civic Center Campus master plan of approximately 1.15 million square feet of government offices. The City of Santa Rosa is also considering a Performance Based Infrastructure model for redevelopment of several city properties downtown. A number of other jurisdictions nationwide are using the Performance Infrastructure model to revitalize their downtowns, expand educational facilities, or create centers of innovation and entrepreneurship, whereas others have used the Build-to-Suit or debt financing model as described in Attachment 3 Project Delivery Comparisons.

The annual debt service for the bond financing of the single building concept is projected by the KNN financial analysis to be \$28.2 million. The annual debt service for the bond financing of the multi building concept is projected by the KNN financial analysis to be \$30.5 million. Based on our analysis of other jurisdictions, using the PBI financing option could result in an annual debt service in the range of \$10 to \$15 million. Refer to Attachment 3 for more information.

BUILD-TO-SUIT

Another strategic option would be establishing a contractual relationship with a real estate development firm to construct a new facility or campus to County specifications. The completed facility would be leased to the County for County use. Similar to the Performance Based Infrastructure alternative described earlier, construction costs incurred by the Performance Based Infrastructure builder would likely be similar to construction costs that would be incurred by the County. Annual lessor debt service costs would be similar to County financed bond finance costs. However, there is potential that builder costs would also include administration and overhead costs in addition to financing costs.

Overview of Financial Analysis

- Based on information and guidance provided by the County, KNN prepared preliminary bond sizing analyses for the alternatives under consideration.
 - Single Building Concept: \$349.9 million.
 - Multiple Building Concept: \$375.5 million.
 - Deferred Maintenance Needs: \$312.6 million.
 - Amounts represent escalated figures from 2017 value.

- Our analysis assumes that the bonds will be issued as Certificates of Participation or Lease Revenue Bonds backed by the General Fund.
 - Current credit ratings: Standard & Poor's AA (stable).
 - Credit structure requires the pledge of a County asset for bondholder security approximately equal to the par amount of the bonds.
 - County Center buildings will serve as the pledge assets for the bonds, which requires the use of capitalized interest through establishing beneficial use and occupancy of the new buildings.
 - No voter approval required.

Financial Analysis Assumptions

- **Debt Repayment Structure**

- Level debt service (principal and interest) payment structure.
- Final term of bonds is 30 years from issuance date for new building construction and 20 years from issuance date for deferred maintenance capital.

- **Bondholder Security Features**

- Capitalized interest fund sized through the estimated construction period (County does not make net debt service payments during construction).
- Debt service reserve fund sized at 50% of maximum annual debt service (provides additional bondholder security and supports strong credit ratings).

- **Project Tax Status**

- Bonds are issued on a tax-exempt basis (subject to bond counsel review) and buildings are assumed to be for 100% governmental use.
- Projects that have predominantly private use are assumed to be financed through vehicles other than tax-exempt bonds.

- **Borrowing Costs**

- Interest cost is assumed at 5% for planning/budgeting purposes (current market rates are lower but subject to increases and volatility between now and Q1 2019).
- Proceeds from the sale of County properties are applied to FY 2019 financings to reduce borrowed amounts.

Financing Considerations

- The pledge of the new buildings and use of capitalized interest during construction is costly.
 - Approximately 25% of the County's average annual debt service payment is attributable to the cost of capitalized interest.
 - Thus, without capitalized interest, the County's annual debt payments would be reduced by approximately 25% - under the Single Building Concept average annual debt service is \$27.5 million, a 25% reduction equates to approximately \$20.6 million.
- Explore strategies to help minimize amount of capitalized interest.
 - Research availability of existing County facilities for asset pledge, reducing or eliminating the need for capitalized interest.
 - Explore interim financing solutions to help minimize capitalize interest (ie. Bond Anticipation Notes, Commercial Paper program, etc.) during construction period.
- Explore other forms of non-General Fund financing.

Executive Summary:

This Board item requests consideration of CHSC's request to modify the terms of the County Fund for Housing award made in November 2016 to allow for the entire award of \$1,868,851 to be used on Phase I of the project. The original funding award contemplated creating twelve "tiny homes" for veterans in the first phase on a parcel within the County Administration Center at a cost of \$1 million, with phase 2 involving site preparation (at a cost of \$839,000) of a parcel owned by the developer on West Hearn Avenue. Phase 3 of this project was – and still is – anticipated to encompass more units and additional outside funding. Changes to the scope of the project since initial award, including the addition of two more units to the project, have increased costs.

Discussion:

In 2016, the Sonoma County Department of General Services conducted a solicitation to offer a parcel of land within the County Administration Center to a developer or housing provider for the provision of "tiny homes" as a pilot project. The concept assumed that the County would lease the land to a developer for two years, and that the homes would be easily moved to an alternate site after lease expiration. The winning proposer was Community Housing Sonoma County (CHSC), which proposed to serve formerly homeless veterans, and already owned a site to which the homes could be relocated.

This solicitation was followed closely by the Commission’s County Fund for Housing competitive process, in which CHSC was awarded \$1.8 million in funds to pay for the initial siting of twelve homes on the identified parcel, plus site work and predevelopment expenses associated with the eventual move to the permanent site on West Hearn Avenue. This was identified as a three phase project, with CFH funding covering the full costs of the first two phases, and the third phase being funded through other state resources.

In the intervening months, several modifications to the project have happened. First was the recognition that the costs to connect to utilities as originally estimated at the original site were unrealistically low. Second was a renegotiation of the lease between the developer and General Services, aided by the Commission, to site the project on land still within the Administration Center but on Russell Avenue, near other single family homes being rented to veterans and managed by the Commission. The term of the lease was also extended from two years to three. The most recent changes requested by the developer involve using the entire loan amount for the first phase.

Multiple other approaches have been analyzed for this project to keep costs within the original budget while staying true to the original intent of this important pilot project. Leadership staff from General Services, the Commission, and Permit Sonoma have worked together and with the developer to conduct due diligence and test alternative approaches that might place this badly needed housing in service quickly.

Executive Summary:

The fire disaster exacerbated an already severe shortage of housing in Sonoma County. The fires destroyed 5,283 houses countywide, including over 2,200 residences in the unincorporated County. The fires affected thousands of community members, leaving many homeless, struggling to recover and rebuild. Given the state of the countywide post-fire housing landscape, the Board of Supervisors is

considering adopting a sub-regional housing production goal of 30,000 units countywide by 2023 as part of an emerging collaboration with the nine cities. The goal will encompass 3,375 new units on County-owned land within the city limits, rebuilding 2,000 units destroyed by the fires, and building 1,000 new accessory dwelling units in the unincorporated area within the next five years.

Your Board has been working closely with elected officials from the nine cities and other community leaders on ways to address the housing problem, and has directed staff toward new and more effective approaches to facilitate the development of substantially greater numbers of homes at all income levels over the next five years.

As a part of these efforts, Permit Sonoma will be introducing a number of housing initiatives this year to further the housing objectives. The current package of recommended Zoning Code amendments is designed to reduce constraints to housing production, and to provide broader options for permanent housing solutions. An additional ordinance to rezone qualified parcels countywide to remove the Z (Accessory Dwelling Unit Exclusion) Zone is scheduled for consideration by the Planning Commission next month. Additional housing initiatives as directed by your Board will come forward this year to further expand housing opportunities and encourage new types of housing in appropriate areas. Finally, two Specific Plans currently underway-- in the Airport SMART station area and the Sonoma Springs area-- are anticipated to increase allowable residential uses and densities near employment and transit.

On 12 April 2018, the Sonoma County Planning Commission held a public hearing to review and consider changes to the Zoning Code to reduce constraints and provide additional opportunities for housing. The Commission's recommendations are summarized in Table 1 below, followed by a summary of the issues discussed at the Planning Commission hearing. Changes recommended by the Planning Commission include: increasing the maximum size of accessory dwelling units from 1,000 square feet to 1,200 square feet; reducing the minimum parcel size for 1-bedroom accessory dwelling units served by public water or a community well from 1.5 acres to 1.0 acre; and, reducing development fees for accessory dwelling units on a graduated size-based scale. Other recommended changes include delaying the collection of development fees until near occupancy; allowing a larger percentage of residential floor space in mixed use projects; and providing density bonuses for projects that include units for foster youth, veterans and homeless residents. A more detailed analysis of the policy options is provided in the Planning Commission staff report, attached.

Discussion:

Like many other counties in California, Sonoma County is known for its high cost of living and lack of affordable, available housing. Home prices in the county have doubled in the last six years, with a median cost of a single-family home reaching \$670,000 in January 2018.¹ Rents have increased 9.5 percent in 2017, to an average of \$1,980 per month for a two-bedroom apartment. To afford this average apartment, a family of three must have an income of \$90,204, significantly more than the county median income of \$75,500.

Housing affordability affects the entire community—residents, businesses, the environment, and the economy:

- A lack of affordable or available housing increases homelessness;
- Extremely cost-burdened households (those spending more than 50 percent of income on housing) have little left over to pay for other necessary expenses—food, transportation, health care, education and retirement—and suffer lower health outcomes as a result;
- A lack of affordable housing in urban centers forces people to commute long distances and move outside of the County, resulting in increased traffic and wear-and-tear on aging roads, lower quality of life, and lost economic output;²
- Slow housing growth results in slower job growth and reduced economic prosperity.³

The Sonoma County Board of Supervisors adopted the Building HOMES Toolbox in 2016, focusing on ending homelessness by providing more permanent housing, including set-asides in affordable housing developments, housing for homeless youth, rental subsidies, and use of the Housing First approach. All of these solutions require the development of a significant number of rental housing units in areas like cities and urban unincorporated communities where services are available.

In 2017, the Board of Supervisors adopted a strategic priority of “Housing for All”⁴—an effort to facilitate the development of housing for households of all income levels, focused in urban centers. Under this strategic priority, the Board of Supervisors set a goal of creating 675 new housing units per year until 2022, and included strategies such as updating and simplifying regulations for land use entitlements, deferring the collection of impact fees, and enacting housing code amendments for workforce housing.

The Sonoma Complex Fires had a devastating impact on the sub-region’s housing crisis. On 9 October 2017, the most destructive wildfires in California history began in Napa County and quickly spread to Sonoma County and into the City of Santa Rosa. The fires ultimately destroyed 5,283 homes countywide, including over 2,200 homes in the unincorporated County. The fires impacted thousands of community

members, leaving many homeless, struggling to recover and rebuild.

Before the fire, the rental vacancy rate in Sonoma County hovered below 1.5 percent⁵ (considered full occupancy) and has only decreased further after the fire. The vacancy rate for homeownership (the percent of houses for sale) is around 1.5 percent, compared to about two percent nationwide.⁶

As noted above, the Board of Supervisors is considering adopting a sub-regional housing production goal of 30,000 units countywide by 2023, including 3,375 new units on County-owned land. The Board's sub-regional goal was informed by research by Beacon Economics, and accounts for historic unmet housing needs countywide, housing units lost in the fires, and anticipated employment growth and economic forecasts. In the unincorporated County, the Board has a goal of rebuilding 2,000 destroyed units and building 1,000 new accessory dwelling units within the next five years.

The County permitted approximately 716 new units in the five-year period between 2013-2017, including approximately 50 accessory dwelling units per year. Meeting your Board's ambitious housing goal will require innovative new funding and policy mechanisms. According to Beacon Economics, *"the local economy has become severely constrained by little or no growth in the County labor force, partly because of the high cost of living."* Failure to meet housing goals will impact the County's ability to grow its economy and recovery fully from the disaster, according to the Beacon study.

Permit Sonoma, together with its partners, is introducing several initiatives designed to provide increased opportunity and certainty for housing developers. This current package of recommended code amendments to reduce constraints to housing production (summarized in Table 1, above) is the first in a series of three Permit Sonoma initiatives designed to provide broader options for permanent housing solutions. A second ordinance that would rezone qualifying parcels countywide to remove the Z (Accessory Dwelling Unit Exclusion) Combining Zone will be considered by the Planning Commission next month. Together, these proposed changes for accessory dwelling units will assist the county in achieving the goal of building 1,000 accessory units within the next 5 years. Accelerating and encouraging ADU's will also be aided by new financing tools currently under development by the Community Development Commission and others, and by an "ADU Calculator" tool being created by MTC/ABAG for the region.

Additional initiatives for housing coming forward later this year will include possible rezoning of sites near employment and transit for housing, and a package of code amendments to allow and encourage new types of housing in appropriate locations. Finally, two Specific Plans currently underway-- in the Airport SMART station area and the Sonoma Springs area—have the potential to increase allowable residential uses and densities near employment and transit.

ISSUES DISCUSSED AT PLANNING COMMISSION

I. Reducing the minimum parcel size for an accessory dwelling unit from 1.5 acres to 1.0 acre for properties served by public or community water.

The County has required historically a minimum parcel size for rural accessory dwelling units served by septic to protect groundwater quality. The Well and Septic Division of Permit Sonoma determined that 2 acres was the minimum size that is large enough to accommodate the development of a single family home, an accessory unit, a standard or nonstandard septic system with the required expansion area and other site improvements such as driveways, while also maintaining the minimum required setbacks from wells, streams, property lines, roads, and other homes. Where parcel sizes are small and multiple properties develop housing units served by wells and septic systems, there is potential for groundwater contamination to occur, as happened in the Canon Manor neighborhood.

Your Board recently reduced the minimum lot size to 1.5 acres for small accessory dwelling units if a well test confirms a potable water supply or if the parcel is connected to community or public water. The current parcel size requirements and accessory dwelling unit size limitations are shown in *Table 2*, below.

Table 2: Current Minimum Parcel Size and Unit Size for Accessory Dwellings

Water and Sanitation Facilities	Minimum Parcel Size	Maximum Unit Size (sq. ft.)
Well and Septic	2.0 acres	1,000
Septic and Public or Community Water or Potable Well Test	1.5 acres	640 +1-bdrm
Public Sewer (in Urban Service Areas)	5,000 square feet	1,000

For parcels served by a community water system or public water, the concern about well water contamination from septic fields is significantly reduced because private water wells are generally not present in these areas. Limiting the size of accessory dwelling units in these situations reduces the septic system size and increases the potential to meet septic requirements. At the hearing, staff will present a graphic representation of the land area necessary to develop a home and accessory unit on a rural parcel with septic.

Planning Commission Discussion & Recommendation: The Commission was split on the minimum rural parcel size, with one Commissioner opining that minimum parcel sizes should not be further reduced and another opining that there should not be a minimum parcel size because septic regulations would determine capacity. The Commission was also concerned that lowering the minimum parcel size would create an expectation for landowners that may not be feasible. The Commission majority noted that cumulative impacts could not be known if the minimum parcel size is further reduced. The Commission majority was only comfortable with a reduced parcel size of one acre if the parcel is served by public water or a community well to avoid the potential impacts to groundwater. The Commission voted 3-2 to recommend a reduction of the current minimum parcel size for rural parcels to 1.0 acres for a small (up to 640 square feet) one-bedroom accessory unit when the parcel is served with public or community water.

II. Increasing the Maximum Unit Size for Accessory Dwelling Units from 1,000 to 1,200 square feet.

During the public process for the Board’s 2017 accessory dwelling unit ordinance, some members of the public, members of the Planning Commission, and members of your Board expressed a desire to increase the size limit for accessory dwelling units to 1,200 square feet (the maximum allowed in state law). This increase would be consistent with the City of Santa Rosa’s recently increased size limit for accessory dwelling units.

Since the fires, a number of displaced families have indicated a need for larger accessory dwelling

units. An accessory unit of 1,200 square feet is large enough to accommodate three or four bedrooms. On the other hand, it is important to encourage smaller rental dwelling units that have lower rents.

Planning Commission Discussion & Recommendation: The Commission voted 5-0 to recommend an increase in the maximum accessory dwelling unit size from 1,000 square feet to 1,200 square feet, but also recommended that the development fees be graduated in order to incentivize the construction of units of smaller units of 1,000 square feet or less (see Section III, following).

Table 3: Planning Commission Recommended Parcel Sizes Minimums and Unit Size Maximums

Water and Sanitation Facilities	Minimum Parcel Size	Maximum Unit Size (sq. ft.)
Well and Septic	2.0 acres	1,200
Septic and Public or Community Water, or on-site well ¹	1.5-1.99 acres	640/1-bdrm
Septic and Public or Community Water	1.0-1.49 acres ²	640/1-bdrm
Public Sewer (in Urban Service Area)	5,000 square feet	1,200

III. Countywide Development Impact Fees for ADUs and Previously Approved ADU Waivers

Local governments charge development fees (also known as impact fees) to mitigate the impacts of new development on capital facilities and infrastructure, such as roads and parks. Sonoma County imposes development fees on new residential and commercial uses. Currently, Parks and Traffic Development Fees combined amount to about \$7,400 per accessory dwelling unit. The Planning Commission recommended that a graduated fee schedule be adopted countywide to encourage construction of accessory dwellings and to incentivize property owners to build smaller, more affordable accessory dwelling units. The Board recognized the value of these type of incentives when it approved the waiver of ADU development impact fees as well as permit fees in the fire areas as part of the slate of emergency measures approved on October 24, 2017.

Attachment A, Summary of Accessory Dwelling Unit Fee Waivers, summarizes the estimated number of fee waivers and their associated costs for both the existing ADU fee waivers in the fire areas, as well as the proposed countywide development fee waivers. County Counsel confirmed that an alternative source of funds must be identified to protect those who are charged development fees from subsidizing fee reductions, and that delaying any mitigations would not adequately prevent fee payers from subsidizing fee waivers. Therefore, the County must backfill any waived and reduced fees with other funding sources. In total, staff estimates \$280,000 would be needed to backfill the proposed countywide ADU development fee waiver, which is in addition to the \$680,000 estimate to backfill the development and permit fee waivers for ADUs in the fire area through December 2019. Thus far, staff have processed **four applications eligible for ADU waivers** totaling approximately

\$60,000. Staff estimates there are sufficient appropriations to cover any waived costs for FY 2017-18.

However, it should be noted these are estimates and the actual number of waiver requests to be received is unknown for FY 2018-19, therefore, staff is recommending that we seek necessary appropriations authority via quarterly consolidated budget hearings based on the actual number of waivers requested during each quarter for both waiver programs.

Both Regional Parks and Transportation and Public Works have reviewed the Planning Commission recommendation and note that a park and traffic mitigation fee study is about to begin, and therefore it's possible that additional code changes may be required as a result of the study. Your Board may review and modify the fee reductions when the fee study is completed and a new fee schedule is proposed.

Planning Commission Recommendation: The Commission voted 5-0 to recommend the reduced and graduated fee structure shown in Table 4 below for accessory dwelling units countywide. The Planning Commission agreed that units less than 1,000 square feet would be more affordable due to their smaller size and should be incentivized by the fee reductions.

Table 4: Planning Commission Recommended Fee Reductions for Accessory Dwelling Units Countywide

Size of Unit	% of applicable development fees
<750 sq. ft.	0
751-1,000 sq. ft.	50%
1001-1200 sq. ft.	100%

IV. Other Planning Commission Recommended Changes for Housing. The Planning Commission voted 5-0 to recommend the following additional changes to the Zoning Code for housing:

Mixed Use Projects. Increase the allowable residential floor area in mixed use projects from 50% to 80%; make mixed use projects that meet the affordable housing requirements on site permitted uses (not subject to use permit) with design review. These allowances are for urban areas only where public services and sewer are available. The vast majority of urban sites zoned for mixed uses are less than 1 acre in size, so the resulting mixed use development would consist of small retail or neighborhood commercial uses with a few residential units. Design review approval would still be required.

Single Room Occupancy Facilities. The Commission voted to allow small SRO facilities (10 or less rooms) as a permitted use (without need for a use permit) in the commercial zones (LC, C2), and medium and high density residential zones (R2, R3, and PC); and, to remove the cap on larger SRO projects that require a use permit.

Timing of Collection of Affordable Housing Fees. The Commission recommended a Code change to change the timing of collection of affordable housing development fees (“affordable housing fees”) until closer to the final inspection, near project occupancy. This practice lowers housing costs by reducing out-of-pocket expenses during most of the construction phase that can amount to millions of dollars.

Approval of Alternative Equivalents. Article 89 (Affordable Housing Program) of the Zoning Code requires that all development participate in the County’s Affordable Housing Program in some way, and includes a provision allowing innovative proposals that provide an alternative that is equivalent to the statutory requirement (an “Alternative Equivalent Proposal”). While the Code includes the criteria by which Alternative Equivalent Proposals must be approved, it provides that only the Board of Supervisors may approve Alternative Equivalent Proposals. This requirement can result in significant delays and additional expense, particularly for smaller projects that would not otherwise require Board action. The Planning Commission recommended that the Code be amended to authorize the Director to approve Alternative Equivalent Proposals that meet Code criteria.

Transitional and Supportive Housing. The Planning Commission also recommends that the Zoning Code be amended to clarify that transitional and supportive housing is permitted in any zone district where residential uses are allowed, and is not subject to any additional standards other than those applied to other residential uses. These changes are consistent with recent changes in state law and with the General Plan Housing Element.

Density Bonus for Foster Youth, Disabled Veterans, and Homeless. The Planning Commission also recommended changes to allow density bonuses for housing for foster youth, disabled veterans, and homeless persons to be consistent with new state mandated requirements (codified as Government Code section 65915). The proposed new density bonus program allows a 20% density bonus for affordable housing projects that provide at least 10% of the project units for foster youth, disabled veterans, or homeless persons.

Please see the attached Planning Commission staff report for additional information and a discussion of policy options.

Prior Board Actions:

In October, November and December of 2017, the Board adopted numerous temporary provisions for housing, including a fee waiver for building and zoning permit fees in the burn areas and a reduced fee schedule for development impact fees for Parks and Traffic.

ORDINANCE NO

AN ORDINANCE OF THE BOARD OF SUPERVISORS, COUNTY OF SONOMA, STATE OF CALIFORNIA, AMENDING CHAPTER 26 OF THE SONOMA COUNTY CODE TO REDUCE CONSTRAINTS ON HOUSING BY ALLOWING A HIGHER PERCENTAGE OF RESIDENTIAL USE WITHIN MIXED USE DEVELOPMENTS, PROVIDING THAT MIXED USE DEVELOPMENTS THAT MEET AFFORDABILITY REQUIREMENTS ON-SITE ARE PERMITTED USES IN CERTAIN ZONES, REMOVING THE LIMITATION ON MAXIMUM NUMBER OF ROOMS IN SINGLE ROOM OCCUPANCY (SINGLE ROOM OCCUPANCY) PROJECTS, EXPANDING THE DENSITY BONUS PROGRAM, ALLOWING TRANSITIONAL AND SUPPORTIVE HOUSING UNITS IN ALL ZONES WHERE RESIDENTIAL USES ARE ALLOWED, DECREASING THE MINIMUM PARCEL SIZE FOR ACCESSORY DWELLING UNITS WHEN ON PUBLIC OR COMMUNITY WATER, INCREASING THE MAXIMUM SIZE OF ACCESSORY DWELLING UNITS FROM 1,000 SQUARE FEET TO 1,200 SQUARE FEET, AND MAKING OTHER MINOR CHANGES

The Board of Supervisors of the County of Sonoma, State of California, ordains as follows:

SECTION I. The Board finds and declares that the adoption of this Ordinance is necessary to expand opportunities for development of additional housing in unincorporated areas of Sonoma County. The Board finds that the following facts support the adoption of this ordinance:

1. The proposed amendments to Chapter 26 (Zoning Code) are consistent with the Sonoma County General Plan and all applicable specific plans and further the goals, objectives, and policies of the General Plan; and
2. There is a continuing and demonstrated need for the County's Affordable Housing Program;; and
3. Sonoma County's current rental vacancy rate is less than 1.5%, further exacerbating the difficulty of providing safe and secure housing that is affordable for lower-income families and for people who are homeless; and,
4. Sonoma County as a whole needs more than 17,144 homes that are affordable to low-income individuals and families. Median rents have increased over 16% since 2000, while median renter household incomes have decreased 6%. Sonoma County's lowest-income renters spend an average of 68% of their income on rent and utilities.
5. Government Code section 65852.2 authorizes local governments, including the County, to adopt zoning ordinances that provide for accessory dwelling units up to 1,200 square feet in size, and further

provides that an ADU that conforms to section 65852.2 shall not be considered to exceed the allowable density for the lot upon which it is located, and shall be deemed to be a residential use that is consistent with the existing general plan and zoning designations for the lot.

SECTION II. Section 26-88-060 (Accessory Dwelling Units) is replaced to read as set forth in the attached Exhibit A.

SECTION III. Section 26-88-123 (Mixed use developments) is replaced to read as set forth in the attached Exhibit B.

- (a) Purpose. This section implements the requirements of Government Code Section 65852.2 and the provisions of the general plan housing element that encourage the production of affordable housing by means of accessory dwelling units.
- (b) Applicability. Except as otherwise provided by this section, accessory dwelling units shall be ministerially permitted only in compliance with the requirements of this section, and all other requirements of the applicable zoning district in the following agricultural and residential zoning districts: LIA (Land Intensive Agriculture), LEA (Land Extensive Agriculture), DA (Diverse Agriculture), RRD (Rural Resources and Development), AR (Agricultural Residential), RR (Rural Residential), R1 (Low Density Residential), R2 (Medium Density Residential), and R3 (High Density Residential). Accessory dwelling units are prohibited in the Z (accessory dwelling unit exclusion) combining district.
- (c) Permit Requirements. A ministerial zoning permit (Section 26-92-170) shall be required for an accessory dwelling unit. Additionally, accessory dwelling units must comply with all other applicable building codes, fire codes, and requirements, including evidence of adequate septic capacity and water yield.
- (d) Appeals. Notwithstanding the provisions of Article 92 or any other provision of this Chapter, decisions to approve an application for an accessory dwelling unit that meets all applicable standards set forth in this article, and decisions to deny an application for failure to meet all applicable standards, are final and not subject to appeal.
- (e) Time Limits. Unless a longer timeframe is voluntarily requested by the applicant, the required zoning and building permits for an accessory dwelling unit shall be approved or denied within 120 days from submittal of an application that includes all materials required to process the permits.
- (f) Use. Accessory dwelling units may not be sold separately from the main unit or separated by subdivision, but may be rented separately. Occupant(s) need not be related to the property owner. Accessory dwelling units may not be rented on a transient occupancy basis (periods less than thirty (30) days). These requirements shall be included in a recorded deed restriction.
- (g) Unit Type. An accessory dwelling unit may be attached or detached from the primary dwelling on the site. A detached accessory dwelling unit may also be a manufactured home on a permanent foundation, in compliance with Section 26-02-140.
- (h) Timing. An accessory dwelling unit allowed by this section may be constructed prior to, concurrently with, or after construction of the primary dwelling.
- (i) Density. As provided by Government Code Section 65852.2(a)(1)(C), accessory dwelling units are exempt from the density limitations of the general plan, provided that no more than one (1) accessory dwelling unit may be located on any parcel. An accessory dwelling unit may not be located on any parcel already containing a dwelling unit that is non-conforming with respect to land use or density, or developed with a duplex, triplex, apartment or condominium.
- (j) Site Requirements.
 - (1) Water Availability.
 - (i) Except as provided in subsection (b) of this section, an accessory dwelling unit shall be permitted only in designated groundwater availability classification areas 1 or 2, or where public water is available.

- (iii) Accessory dwelling units shall not be established within designated Class 4 groundwater availability classification areas except where both requirements for Class 3 areas, above, are met and a groundwater report prepared by a qualified professional ~~determines-certifies~~ that the accessory dwelling unit would not result in a net increase in water use. On site water reduction may occur through implementation of water conservation measures, rainwater catchment or recycled water reuse system, water recharge project, or participation in a local groundwater management project.

(2) Minimum Parcel Size.

- (i) An accessory dwelling unit shall be permitted only on parcels with a minimum ~~gross~~-lot area as follows:

- (3) Size. An accessory unit shall not exceed one thousand ~~two hundred (1,200) 000~~ square feet in floor area ~~and shall not be larger than the single-family dwelling.~~
- (i) Calculating the Size of Accessory Dwelling Units. Floor area shall be calculated by measuring the exterior perimeter of the accessory dwelling unit and the length of any common walls. In the case of straw bale or similar construction, floor area may be calculated using interior dimensions. Any storage space or other enclosed areas attached to the accessory dwelling unit shall be included in the size calculation, except: a) an attached garage, as described in subsection (i)(3)(ii) of this section; or b) where the accessory dwelling unit is constructed over or attached to an unconditioned accessory structure, as described in subsection (i)(3)(iii) of this section.

No conditioned space shall be allowed within the garage area. An access door between the attached garage and the accessory dwelling unit may be provided. A deed restriction shall be recorded limiting the floor area of the accessory dwelling unit to the allowable floor area of the accessory unit for the parcel ~~one thousand (1,000) square feet~~, and declaring that no portion of the attached garage is to be utilized as a part of the conditioned residential space.
- (iii) Units Attached to Accessory Structures. Notwithstanding subsection (i)(3)(ii) above, an accessory dwelling unit may be located above or attached to a garage of more than four hundred (400) square feet, or a barn or other unconditioned accessory structure only where the garage or accessory structure clearly serves the primary residential or agricultural use of the property. In such cases, access to the accessory dwelling unit from the garage or accessory structure shall be provided by an exterior entrance only. Access doors between the attached structure and the accessory dwelling unit are prohibited. ~~Accessory dwelling units located above unconditioned accessory structures and garages of greater than four hundred (400) square feet shall be accessed through an exterior staircase only. Wherever an accessory dwelling unit is located above an unconditioned accessory structure or garage of greater than four hundred (400) square feet, the total enclosed floor area of the second floor may not exceed one thousand~~

~~(1,000) square feet. A deed restriction shall be recorded limiting the floor area of the accessory dwelling unit to one thousand (1,000) square feet, and declaring that no additional portion of the structure may be enclosed, converted, or utilized as conditioned or habitable space.~~

- (4) Lot Coverage Limitation. The total lot coverage for parcels developed with an accessory dwelling unit shall not exceed that allowed within the applicable zoning district in which the parcel is located.

 - (B) The accessory dwelling unit is located within the HD (Historic District) combining zone; or
 - (C) The accessory dwelling unit is part of the existing single-family dwelling or an existing accessory structure; or
 - (D) On-street parking permits are required but not offered to the occupant of the accessory dwelling unit; or
 - (E) A car share vehicle is located within one block of the property in which the accessory dwelling unit is located.

An accessory dwelling unit that is not approved under 26-88-060(k) may be required to connect separately and directly to water or sewer systems and may be subject to connection fees or capacity charges proportionate to the burden placed by the accessory dwelling unit on the utilities. Nothing in this subsection shall be construed to transfer responsibility for water and sewer services to the County from any utility district or zone or supersede the regulatory authority of any utility district or zone.

(8) Standards for Accessory Dwelling Units Used to Meet the Affordable Housing Program Requirement. Article 89 –Affordable Housing Program **Requirements and Incentives**

Sec. 26-89-040 Affordable Housing Requirements for Residential Development

A. Applicability and requirements. Unless otherwise exempt under Subsection 26-89-040.B., any person who constructs or develops one or more residential units, whether a single-family home, units in multi-family dwellings, or by condominium conversions or otherwise, shall provide affordable housing through one or more of the following three methods:

1. **On-site construction of the required affordable units.** Provide the required affordable unit(s) on-site, in compliance with the Section 26-89-040.C.;
2. **Payment of affordable housing fee.** Pay an affordable housing fee in compliance with Subsection 26-89-040.F.; or
3. **Alternative equivalent actions.** Perform an alternative equivalent action in compliance with Subsection 26-89-040.G.; which may be allowed to fulfill the affordable housing requirements of this Section if approved by the [Board/Director](#), at [its-his or her](#) sole discretion.

B. Exempt projects. The affordable housing requirements of this Section shall not apply to the following exempt projects and unit types:

1. **Project with vested rights.** A project that demonstrates a vested right to proceed without complying with this Section.
2. **Affordable units.** Affordable units which are subject to an Affordable Housing Agreement.
3. **Small Accessory dwellings.** ~~Accessory dwelling units and junior accessory dwelling units. Small housing units of no more than 1,000 square feet in gross living area, second dwelling units, and single room occupancy units.~~
4. **Agricultural related housing.** Farm family units of up to 1,200 square feet, agricultural employee units of up to 1,200 square feet, and seasonal, year-round, and extended seasonal farmworker housing.
5. **Alternative housing.** Homeless shelters, transitional housing, [supportive housing, single room occupancy facilities](#), community care facilities, group homes, and similar State licensed care facilities.
6. **Dwelling unit destroyed by fire or natural catastrophe.** Repair, reconstruction, or replacement of a legal dwelling unit that is destroyed by fire or natural catastrophe, provided that a Building Permit for repair, reconstruction, or replacement has been issued and construction begun within 10 years of destruction.
7. **Residential remodels and minor additions that add no more than 1,000 square feet.** Remodels and additions that add no more than 1,000 square feet to existing, legal dwelling units that do not result in the creation of an additional unit.
8. **Replacements.** Replacement of an existing, legal dwelling unit where the total living area within the replacement unit is no more than 1,000 square feet greater than the living area within the unit being replaced.
9. **Parcels with existing affordable units.** The construction or establishment of one new home on one single parcel, when the subject parcel contains an existing second dwelling unit, or a farm family unit or an employee unit of 1,000 square feet or less.
10. **General exemption.** Residential projects that can demonstrate that they will not contribute to the demand for affordable housing in the County or adversely impact the County's ability to meet its affordable housing needs.

C. Minimum Requirements for Construction of Affordable Units On-Site. To satisfy the requirements of this Article through the construction of affordable units on-site, the following minimum standards must be met:

1. **Number of Units: Ownership projects.** To meet the requirements of this Article through construction of affordable units on-site within an ownership housing project, at least 20

percent of all new dwelling units shall be affordable, and shall be constructed and completed at the same time as the market rate units in the same project.

a. Level of affordability required. At least one-half of the total number of required affordable units shall be provided as affordable to low-income households.

b. Remaining affordable units. The remaining affordable units may be provided as affordable to households with moderate or low incomes.

c. When number of units is an odd number. If the number of required affordable units is an odd number, the number of units affordable to moderate income households may be one greater than the number affordable to low-income households, so long as at least one low-income unit is provided.

2. Number of Units: Condominium or timeshare conversion projects. To meet the requirements of this Article through the provision of affordable units on-site within a project converting existing rental units or airspace parcels to condominium ownership, including common interest or timeshare projects, at least 30 percent of the converted units shall be offered for sale as affordable to low and very-low income households, as required by Housing Element Policy HE-1e or its subsequent equivalent.

3. Number of Units: Rental projects. To meet the requirements of this Article through construction of affordable units on-site within a rental housing project at least 15 percent of all new rental units shall be affordable to low- and very low-income households; or, at least 10 percent of all new rental units shall be affordable to very low- and extremely low-income households, as follows:

a. Allocation of Units - 15 percent option. If the person constructing or developing a rental housing project proposes to satisfy the requirements of this Article by providing 15% of the units as affordable rental units, at least one-half of the total number of required affordable units shall be provided as affordable to very low-income households. The remaining affordable units may be provided as affordable to low- or very low-income households. If the number of required affordable units is an odd number, the number of units affordable to low-income households may be one greater than the number affordable to very low-income households.

b. Allocation of Units - 10 percent option. If the person constructing or developing a rental housing project proposes to satisfy the requirements of this Article by providing 10% of the units as affordable rental units, at least one-half of the total number of affordable units shall be provided as affordable to extremely low-income households. The remaining affordable units may be provided as affordable to very low-income or extremely low-income households. If the number of required affordable units is an odd number, the number of units affordable to very low-income households may be one greater than the number affordable to extremely low-income households.

c. Timing. All affordable units provided pursuant to this subsection shall be constructed and made available for rent at the same time as the market-rate units within the remainder of the residential development.

4. Affordable Housing Agreement. Upon approval of any project proposing to provide affordable units on-site in compliance with this Section, and before any further action by the County concerning the project, including the recording of a final map, or the issuance of a Building Permit, the property owner shall execute an affordable housing agreement in compliance with [Section 26-89-100](#) (Affordable Housing Agreements). The affordable housing agreement shall be recorded concurrently with the final map, or before the issuance of a Building Permit, whichever occurs first.

5. Fractional calculations. If calculating the number of units required by Subsection C. results in a fractional unit requirement, the applicant may satisfy that fractional requirement by:

a. Construction of an additional affordable unit;

b. On qualifying agricultural parcels, construction or conversion of a unit to a farm family or agricultural employee unit containing not more than 1,000 square feet of living area, or a farmworker bunkhouse containing at least two bunks for unaccompanied workers in compliance with Subparagraphs ~~26-88-060-010~~ (I) (Seasonal Farmworker Housing) or ~~(or)~~ Year-Round or Extended Farmworker Housing. Farm family and agricultural employee units may be constructed to satisfy a fractional requirement under this Subparagraph only, and shall not otherwise be considered an affordable unit for the purposes of meeting the affordable unit requirements of this article; or,

c. On parcels eligible for a ~~second~~ accessory dwelling unit, construction or conversion of an existing unit to a ~~second~~ accessory dwelling unit pursuant to ~~26-88-060~~ (Accessory Dwelling Units). ~~Second-Accessory~~ Second-Accessory dwelling units may be constructed to defer payment of the affordable housing fee that would otherwise be due for the construction of one new single-family home on one single parcel only, provided that an Affordable Housing Fee Deferral Agreement, in a form acceptable to County Counsel, is signed by the property owner and recorded to ensure that the unit will remain available for rent to a qualified low-income household at an affordable rent. The fee will be automatically deferred in each year that the second dwelling unit continues to be made available for rent under the terms of the Affordable Housing Fee Deferral Agreement. Should the property owner cease renting the unit, or otherwise fail to comply with the terms of the Fee Deferral Agreement, then the affordable housing fee in effect at the time will be immediately due and payable to County and a Notice of Cancellation of the Affordable Housing Fee Deferral Agreement shall be recorded. In this case, credit shall be given for each year that the unit has been rented to a low income household at an affordable rent in compliance with the Agreement, with the term for being 30 years. Any remaining portion of the term may be met through payment of the remaining pro-rated affordable housing fee, using the fee amount in effect at the time that the owner ceases renting the unit. Provision of a ~~second~~ accessory dwelling unit shall not otherwise be considered as meeting the affordable unit requirements of this Article. In cases involving the subdivision of property, provision of a separate ~~second-accessory~~ second-accessory dwelling unit on each parcel may meet the affordable unit requirement of this article only for each parcel upon which a ~~second~~ accessory dwelling unit is placed and a covenant recorded to ensure that the unit will remain available for rent.

D. Affordable housing fee. When the requirements of this Article are met through the payment of an affordable housing fee, payment shall be made in accordance with the following:

1. Determination of fee. The amount and calculation of affordable housing fees shall be established by resolution of the Board. Thereafter, the affordable housing fees shall be increased or decreased annually by the percentage change in the Construction Cost Index for the San Francisco Bay Area for the prior year, as reflected in the third quarter Engineering News Record. The affordable housing fee shall be automatically adjusted, and a new schedule published by the Director effective on January 1st of each year. This adjustment will offset the effects of inflation related to construction cost increases or deflation-related cost decreases. If the Construction Cost index is discontinued, the Director shall use a comparable index for determining the changes in the median home costs for the County. The fee shall be periodically reviewed and updated at least every five years.

2. Timing of payment. The affordable housing fees shall be calculated at the time of Building Permit application. The fee shall be paid at the time of the wallboard inspection issuance of the Building Permit for each non-exempt residential unit, unless proof is provided that the required affordable housing units will be constructed on site; ~~or~~ that an alternative equivalent action was previously approved in compliance with Subsection 26-89-040.G; or that a fee deferral agreement in compliance with Section 26-89-040 (C) (5) pursuant to Sonoma County Code Section 26-8-800 has been granted.

3. Affordable Housing Fee Trust Fund Guidelines. There shall be established a separate account for affordable housing fees within the County Fund for Housing (CFH) as may be necessary to avoid commingling as required by law, or as deemed appropriate to further the purposes of the affordable housing fees. The County's use of the affordable housing fees, along with any interest earnings, shall comply with all of the following requirements.

a. Affordable housing fees deposited in the CFH, along with any interest earnings, shall be allocated for uses that increase and improve the supply of housing affordable to households of extremely low-, very low-, low-, and moderate incomes, including:

- (1) The acquisition of property and property rights; and
- (2) The cost of construction including costs associated with planning, administration, and design, building or installation, development fees, on- and off-site improvements, and any other costs associated with the planning, predevelopment, permitting, construction and financing of affordable housing.

b. Monies may also be used to cover administrative expenses incurred by the Department or the CDC in connection with affordable housing and not otherwise reimbursed through processing and other fees, including:

- (1) Reasonable consultant and legal expenses related to the establishment and/or administration of the affordable housing fee account;
- (2) Reasonable expenses for administering the process of calculating, collecting, and accounting for affordable housing fees authorized by this Section; and
- (3) County and CDC administrative costs for project development, permitting, post Development Code compliance, and the ongoing monitoring of affordable housing projects constructed with affordable housing fee trust funds.

c. Adequate cost accounting procedures shall be utilized and documented for all of the expenditures.

d. No portion of the collected affordable housing fees shall be diverted to other purposes by way of loan or otherwise.

G. Alternative equivalent actions. The ~~Board-Director~~ may, at ~~its~~-his or her sole discretion, approve an alternative equivalent action to the provision of the affordable units on-site or payment of the affordable housing fee, as follows.

1. Scope of alternative proposals. Proposals for an alternative equivalent action may include:

- a. The dedication of vacant land (see Subparagraph G.5., below, Standards for land dedications);
- b. The construction of affordable rental or ownership units on another site within the unincorporated area of the County; or
- c. The acquisition and enforcement of rental or sales price restrictions on existing market rate dwelling units in compliance with this Article.

2. Content of proposal. A proposal for an equivalent alternative action shall show how the requested alternative action will further affordable housing opportunities in the County to an equal or greater extent than the provision of the affordable housing units on-site in compliance with Subsection C. (Number of affordable units required), or payment of the affordable housing fee in compliance with Subsection F. (Affordable housing fee).

3. Review and approval. Only the ~~Board-Director~~ can approve an alternative equivalent action under this Section. A proposal for an alternative equivalent action may be approved by the ~~Board-Director~~ only if the ~~Board-Director~~ finds that the alternative action will further affordable housing opportunities in the County to an equal or greater extent than the construction of the required affordable units as part of the project or payment of the affordable housing fee, as applicable.

4. Performance of alternative action. After approval by the ~~Board~~ Director of a proposal for an alternative action, entitlements for that alternative action shall be processed concurrent with the market-rate project. If the alternative action includes construction of affordable units on another site or the acquisition and enforcement of rental/sales price restrictions on existing market rate units, an Affordable Housing Agreement in compliance with Section 26.89.100 shall be recorded for each of those units before recordation of any final map for, or issuance of any Building Permit within, the market-rate project, and the affordable units shall be constructed or acquired concurrent with, or before, the construction of the market rate units.

5. Standards for land dedications.

a. Offers of dedication. An applicant who proposes to dedicate land located within the unincorporated area of the County as a means of satisfying the requirements of this Article shall offer the land dedication as a part of the initial application for project approval. The applicant's offer shall describe the site, shall offer it for dedication at no cost to the County, and shall include a site plan illustrating the feasibility of locating and constructing the number of affordable units for which the applicant is requesting credit.

b. Site suitability and appraisal.

(1) The applicant shall provide a site suitability analysis which demonstrates that the land proposed for dedication is suitable for the development of affordable housing in terms of size, location, General Plan land use designation, availability of services, proximity to public transit, adjacent land uses, access, physical characteristics and configuration, and other relevant planning criteria. Department staff shall evaluate the site suitability analysis, identify the site's projected unit capacity, and recommend to the review authority whether the site should be accepted or conditionally accepted. An environmental evaluation may be required as a part of the site suitability analysis.

(2) The applicant shall provide an appraisal of the land proposed for dedication. The appraisal shall be prepared by a qualified land appraiser and shall conform to the Uniform Standards of Professional Appraisal Practice as adopted by the Appraisal Standards Board of the Appraisal Foundation.

(3) All County staff costs associated with the determination of site suitability, and all expenses incurred to determine legal status of the site, to perform environmental assessments and to obtain an appraisal, shall be borne by the applicant.

c. Calculation of credit for dedication of land. Following review of the appraisal and site suitability analysis, the County shall determine the extent to which the dedication shall satisfy the requirements of this Article as follows:

(1) The County shall offer to credit the applicant for the land dedication only to the extent that the appraised value of the land to be dedicated equals the full development cost of providing the required affordable units under Subsection 26-89-040.C.1 (Ownership projects) or Subsection 26-89-040.C.2 (Rental projects) , including both land costs and construction costs.

(2) If the appraised value of the land is less than the total projected development cost for the number of affordable units required under Subsection 26-89-040.C.1 (Ownership projects) or Subsection 26-89-040.C.2 (Rental projects), the applicant will be credited with only the number of affordable units for which development costs are covered by the value of the land.

(3) The applicant shall agree to satisfy any remaining obligations under this Article by providing additional affordable units on the project site, or paying applicable affordable housing fees.

d. Procedure for acceptance of site. The County shall not accept an offer of dedication nor approve the proposed residential project until all of the conditions of acceptance of the land, if any, have been completed by the applicant. The County's formal acceptance of the offer of dedication shall take place concurrently with its approval of the residential project. The grant deed dedicating the site to the County, or to a developer of affordable housing approved by the County, shall be recorded before issuance of any Building Permit within the market rate project.

Sec. 26-89-045 - Workforce Housing Program Requirements

A. Applicability and requirements. Unless otherwise exempt under Subsection 26-89-045.B., any person who constructs new or expanded nonresidential development, shall contribute to the County's affordable housing program through one or more of the following three methods:

2. **Payment of workforce housing fee.** Pay the workforce housing fee in compliance with Subsection 26-89-045.E; or
3. **Alternative equivalent actions.** Perform an alternative equivalent action in compliance with Subsection 26-89-045.F; which may be allowed to fulfill the affordable housing requirements of this Section if approved by the **Board/Director**, at its sole discretion.

B. Exempt projects. The affordable housing requirements of this Section shall not apply to the following exempt projects:

1. **Project with vested rights.** A project that demonstrates a vested right to proceed without complying with this Section.
2. **Public and nonprofit projects.** Public projects and nonprofit projects which provide a public benefit to the community.
3. **Small projects and additions.** Projects and additions of less than 2,000 square feet in total gross floor area.
4. **Floor area discount.** The requirements of this Section shall not apply to the first 2,000 square feet of nonresidential floor area in all new developments.
5. **Structures destroyed by fire or natural catastrophe.** Repair, reconstruction, or replacement of a legal nonresidential structure that is destroyed by fire or natural catastrophe, provided that a Building Permit for repair, reconstruction, or replacement has been issued and construction begun within 10 years of destruction.
6. **Nonresidential replacements or remodels.** Remodels or replacements to existing, legal structures that do not result in the creation of additional floor area.
7. **Do not contribute to the demand for affordable housing.** Projects that clearly do not contribute to the demand for affordable housing (e.g., unmanned utility structures, parking garages, and agricultural exempt structures).

C. On-Site Construction of Units. To satisfy the requirements of this Section through the construction of affordable units on-site, the following minimum standards must be met:

1. **Number of affordable units required.** To satisfy the requirements of this Section through on-site construction, affordable housing units must be constructed on-site in compliance with the Table 1 (Number of affordable units required), below:
2. **Level of affordability required.** At least one-half of the total number of required affordable units shall be provided as affordable to very low-income households. The remaining affordable units may be provided as affordable to households with low incomes. If the number of required affordable units is an odd number, the number of units affordable

to low-income households may be one greater than the number affordable to very low-income households, so long as at least one very low-income unit is provided.

2. All fractional units shall be rounded up to the nearest whole number.
3. **Affordable Housing Agreement.** Upon approval of any nonresidential project proposing to provide affordable units on-site in compliance with this Section, and before any further action by the County concerning the project, including the recording of a final map, or the issuance of a Building Permit, the property owner shall execute an affordable housing agreement in compliance with Section 26-89-100 (Affordable Housing Agreements). The affordable housing agreement shall be recorded concurrently with the final map, or before the issuance of a Building Permit within the project, whichever occurs first.
4. **Timing of Construction of Units.** Proposed affordable units shall be constructed on site concurrent with, or before, the construction of the nonresidential project. No occupancy of any portion of the nonresidential project shall be granted until occupancy of the affordable residential units is granted.
5. **Fractional units.** If calculating the number of units required by this Section results in a fractional unit requirement, the applicant may satisfy that fractional unit requirement by:
 - a. Constructing an additional affordable unit;
 - b. Paying an fee in compliance with Subsection E. (Workforce Housing Fee); or,
 - c. Performing an alternative equivalent action approved by the Board-Director in compliance with Subsection G. (Alternative Equivalent Actions).
- E. **Workforce housing fee.** To satisfy the requirements of this Section through the payment of a fee, payment shall be made in accordance with the following:

 - (2) If the appraised value of the land is less than the total projected development cost for the number of affordable units required, the applicant will be credited with only the

number of affordable units for which development costs are covered by the value of the land.

The grant deed dedicating the site to the County, or to a developer of affordable housing approved by the County, shall be recorded before issuance of any Building Permit within the nonresidential project.

Sec. 26-89-050 Density Bonus Program

A. Applicability.

1. A project that is proposed to provide affordable housing units or to provide land for the affordable housing units, and which meets or exceeds the minimum thresholds of affordability specified below, may request a density bonus in compliance with one of the applicable density bonus programs provided by this Section.

2. Only one density bonus program may be applied to each project.

3. Density bonus programs shall not be applied to General Plan and Zoning Database amendments, but rather may be approved only in conjunction with a development permit (i.e., tentative map, parcel map, Conditional Use Permit, or Design Review).

B. Application requirements. The density bonuses provided by this Section shall be granted by the County only after the filing and approval of an application, as follows.

1. Application filing. The applicant shall file with the Department an application for a density bonus and other incentives in compliance with this Section either before, or concurrent with, the submittal of an application for discretionary project approval (for example, a tentative map, parcel map, conditional use permit or design review). Modifications to an existing application for a density bonus shall be considered a new application.

2. Application requirements. An application shall include all of the following information:

a. A detailed development plan and description of the proposed project, including a Housing Proposal in compliance with Subsection 26-89-030.G. (Housing Proposal Required) outlining the number, type, size, tenure, number of bedrooms and proposed affordability level for each and every unit within the development;

b. The density bonus program under which the application is filed (e.g., State density bonus program, Supplemental density bonus program, Mixed use project density bonus, ~~Type A~~Rental Housing Opportunity Area Program, or ~~Type C~~Ownership Housing Opportunity Program);

c. The type of density bonus incentive requested, of those listed in Section 26-89-060 (Affordable Housing Incentives);

d. If more than one incentive is requested in compliance with Subsection 26-89-060.B. (Affordable Housing Incentives: Additional Incentives), a statement of why the project is eligible for the additional

incentives. Eligibility for the additional incentive may be shown by establishing that the project will provide affordable housing in the percentages specified in Subsection 26-89-060.B.1., that the project meets other Housing Element goals (e.g., provision of housing for seniors, special housing needs individuals, and/or other goals), and/or that the additional incentive is necessary to improve the financial feasibility of the development and to allow the applicant to provide additional affordability or affordability for a longer term;

e. Any alternative incentive being requested in compliance with Subsection 26-89-060.D. (Request for Alternative Incentive), together with a statement as to why, due to the particular characteristics of the project site, the alternative incentive is necessary to provide for affordable housing costs; and

f. Any other information deemed necessary by the Director to allow a complete evaluation of the application.

3. Consideration of application. An application for a density bonus shall be considered and approved only as an integral part of the County's approval of a discretionary development permit for the project (i.e., at the time of approval of a subdivision, Conditional Use Permit, Design Review, or other required land use permit). The project approval shall identify the density bonus and other incentive(s) that the County has granted the applicant, and any waiver or modification of standards that may have been approved for the project.

C. State density bonus program. In addition to the incentives provided by Section 26-89-060 (Affordable Housing Incentives), a residential project of five or more base units that provides affordable or senior housing, or that provides land for construction of affordable housing, or that provides affordable housing along with child care facilities, or that provides ten percent (10%) of total housing units for transitional foster youth as defined in Section 66025.9 of the Education Code, disabled veterans as defined in Government Code Section 18542, or homeless persons as defined in the federal McKinney-Vento Homeless Assistance Act all as specified below, shall be eligible for a density bonus to allow more dwelling units than otherwise allowed on the site by the applicable General Plan Land Use Map and zone district, in compliance with the following:

1. Density bonus for on-site construction of very low-income housing.

a. A 20 percent density bonus shall be granted to any housing project of five or more base units that is constructed to provide at least five percent of the base units for very low-income households.

b. For each one percent increase in the number of base units provided as affordable to very low-income households above the five percent specified in Subparagraph C.1.a., above, the density bonus shall be increased by two and one-half percent, up to a maximum of 35 percent above the maximum density allowed by the General Plan and zone district, as shown in Table 2.

2. Density bonus for on-site construction of low-income housing.

a. A 20 percent density bonus shall be granted to any housing project of five or more base units that is constructed to provide at least ~~10~~ten percent ~~(10%)~~ of the base units for low-income households.

* The density bonus units shall not be included when determining the number of affordable units required.

** All density calculations resulting in fractional units shall be rounded up to the next whole number.

b. For each one percent increase in the number of base units provided as affordable for low-income households above the 10 percent specified in Subparagraph C.2.a., above, the density bonus shall be increased by one and one-half percent, up to a maximum of 35 percent above the maximum density allowed by the General Plan and zone district, as shown in Table 2, above.

3. Density bonus for on-site construction of senior housing. A 20 percent density bonus shall be granted to any housing project that is constructed to provide at least 35 dwelling units for senior households.

4. Density bonus for construction of moderate income housing in condominium and planned development construction projects.

a. A five percent density bonus shall be granted to any condominium project or planned development of five or more base units that is constructed to provide at least 10 percent of the base units for moderate-income households.

b. For each one percent increase in the number of base units provided as affordable to moderate income households above the 10 percent specified in Subparagraph C. 4. a., above, the density bonus shall be increased by one percent up to a maximum of 35 percent above the maximum density allowed by the General Plan and zone district, as shown in Table 3, above.

c. Modifications or waivers of development standards that are approved as part of the condominium or planned development project shall be considered additional incentives in compliance with Subsection 26-89-060.B.

5. Density bonus for provision of affordable housing in condominium conversion projects.

a. In the case of a condominium conversion, a 25 percent density bonus shall be granted, or other incentives of equivalent financial value shall be offered, if the project is constructed to provide at least: (1) 33 percent of the base units to low- or moderate-income households; or

(2) 15 percent of the base units to lower-income households.

b. An applicant shall be ineligible for a density bonus or other incentives in compliance with this Subparagraph if the apartments proposed for conversion constitute a housing development for which a density bonus or other financial incentives were previously provided.

6. Density bonus for donation of land for affordable housing.

a. A 15 percent density bonus shall be granted to a residential project of five or more base units if the project applicant donates land to the County for development of affordable housing in compliance with all of the following:

(1) The applicant shall donate and transfer the land no later than the date of approval of the final map, parcel map, or other residential project application, whichever comes first;

(2) The developable acreage and zoning classification of the land shall be sufficient to allow construction of units affordable to very low-income households in an amount not less than 10 percent of the number of residential units of the proposed project;

(3) The transferred land shall:

(a) Be at least one acre in size or of sufficient size to allow development of at least 40 units;

(b) Have appropriate General Plan and zone district designation for development of affordable housing;

(c) Be served by adequate public facilities and infrastructure; and

(d) Have appropriate zoning and development standards to make the development of the affordable units feasible.

(4) Before transfer of the land, the applicant shall obtain all permits and approvals, except Building Permits, necessary for development of very low-income housing units in compliance with this Subparagraph. At the County's discretion, Design Review may be delayed until after transfer of the land;

(5) The transferred land and the affordable units constructed upon it shall be subject to a deed restriction ensuring continued affordability in compliance with Section 26-89-090;

(6) The land shall be transferred to the County or to a developer of affordable housing approved by the County. The County may, at its discretion, require the applicant to identify and transfer the land to an approved developer; and

(7) The transferred land shall be within the boundary of the proposed project or, with the approval of the County, within one-quarter mile of the boundary of the proposed development.

(8) A proposed source of funding for the very-low income units shall be identified no later than the date of approval of final subdivision map, parcel map or residential development application.

b. For each one percent increase above the 10 percent land donation described in Subparagraph C.6.a., above, the density bonus shall be increased by one percent up to a maximum of 35 percent above the maximum density allowed by the General Plan and zone district.

7. Childcare facilities.

a. If a residential project that meets the minimum State density bonus requirements specified in Subparagraphs C.1 through C.4., above, includes a child care facility on the premises of or adjacent to the project, then the County shall grant either of the following:

(1) An additional density bonus that is an amount of square feet of residential space that is equal to or greater than the amount of square feet in the child care facility; or

(2) An additional incentive that contributes significantly to the economic feasibility of the construction of the childcare facility.

b. If a density bonus or additional incentive is granted in compliance with this Subparagraph, the child care facility shall be required:

(1) To remain in operation for a period of time that is equal to or longer than the period of time during which the density bonus units are required to remain affordable under this Section; and

(2) To ensure that, of the children who attend the child care facility, the percentage of children of very low-income households, low-income households, or moderate-income households equals the percentage of dwelling units required for each of those income categories in compliance with Subparagraphs C.1, C.2, or C.4., above, as applicable.

c. For purposes of this Subparagraph, a "child care facility" means a child care facility other than a family day care home, including, but not limited to, infant centers, preschools, extended day care facilities, and school age child care centers.

8. Combining density bonuses. The density bonuses specified in Subparagraphs C.1 through C.7., above, may be combined, but shall in no case, except as otherwise provided in this Section, result in an increase in density for the residential project above 35 percent above the maximum density allowed by the General Plan and zone district.

D. County supplemental density bonus program.

1. In addition to the incentives provided by Section 26-89-060 (Affordable Housing Incentives), a residential project of five or more base units shall be eligible for a density bonus of up to 50 percent above the maximum density allowed by the General Plan and zone district, if the project provides a total of:

g. A state density bonus program-qualifying project for very-low or low-income households that also provides 33 percent or more of the total project units as powered by on-site renewable energy systems capable of generating at least 70 percent of the projected electrical energy demand of the units or results in an equivalent reduction in utility costs; or

h. 30 percent or more of the base units for low-income households, with 100 percent of the total project units providing at least the 3 basic tenants of universal design (stepless entry and thresholds, complete single floor living area with 32-inch doorways, and environmental controls at accessible heights).

Table 5
DWELLING SIZE

Average Parcel Size	2,000	2,500	3,000	3,500	4,000	4,500	5,000	5,500	6,000
Average House Size	1,000	1,100	1,200	1,300	1,400	1,500	1,600	1,700	1,800

Note: All quantities are in square feet of floor area (can be interpolated).

How to Use the Table. First, determine the average parcel size of the single-family parcels in the proposed development. Next, determine the allowable average dwelling size of the single-family dwellings in the proposed development. The average dwelling size shall not be greater than shown in the table.

(3) Subsequent expansions or additions. Subsequent expansions or additions to dwelling units, if not shown on the development plan, may be allowed in the future only where the proposed expansion is within a designated building envelope shown on the development plan.

(4) Setback/yard requirements. Setbacks and yards shall be provided in compliance with the standards of the R-3 zone district.

(a) Setbacks for all proposed and possible future structures or additions shall be designated on the development plan.

(b) Front yard setbacks shall be varied.

(c) A garage or carport with a vehicle entrance facing the street shall be set back a minimum of 20 feet from the rear of the public sidewalk, or 20 feet from the property or adopted street plan line, whichever is greater.

(5) Private open space requirement. Each dwelling unit or parcel shall be designed to provide a minimum of 400 square feet of usable private open space.

(6) Maximum structure height. The maximum height of structures is 35 feet.

(7) Maximum coverage. Maximum allowable structure coverage is 65 percent. The use of alternative permeable surfaces is strongly encouraged for driveways, walkways, and patios wherever feasible in order to maintain or enhance groundwater absorption and recharge.

d. Alternatives to development standards. An applicant for an Ownership Housing Opportunity ~~Type-C~~ project may propose alternatives to the development standards in Subparagraph F.2., above, provided that in no case shall the residential density exceed eleven (11) units per acre. ~~C~~conditional use permit approval shall be required to authorize alternative development standards. A conditional use permit application for alternative standards shall be processed concurrently with the required design review and subdivision applications. (Ord. No. 6085, § IV(Exh. C), 10-7-2014)

To: Board of Supervisors of Sonoma County

Board Agenda Date: May 8, 2018

Vote Requirement: Majority

Department or Agency Name(s): Department of Health Services

Staff Name and Phone Number:

Barbie Robinson, 565-4774

Supervisorial District(s):

Title: Authorization to Implement Layoff Procedures within the Department of Health Services

Recommended Actions:

Authorize the Department of Health Services, in coordination with and oversight by the Human Resources Department, to administer layoff proceedings and to mitigate layoffs to the extent possible in accordance with Civil Service Rule 11: Layoffs.

Executive Summary:

Reduced revenue projections for fiscal year 2018-2019 combined with an anticipated reduction in state and federal funding have made it necessary for the Department of Health Services to develop a fiscal year 2018-2019 budget that includes a reduction of 107.32 allocated positions, resulting in up to 30 layoffs. The Department of Health Services is requesting Board approval to implement the Layoff Provisions of the Rules of the Sonoma County Civil Service Commission, specifically Rule 11: Layoffs. This agenda item does not request authority to delete position allocations. The Department will return to the Board in June 2018, during scheduled budget hearings, to request authority to delete specific position allocations with the fiscal year 2018-2019 budget.

Discussion:

The Department of Health Services fiscal year 2017-2018 mid-year projections indicated a budget deficit of \$8.6 million in the Department's Behavioral Health Division. This deficit was primarily the result of an over-projection of funding from the Federal Financial Participation program, the federal program that enables the Department to claim reimbursement for Medi-Cal services. Through a number of mitigation strategies, primarily the use of one-time funds, the Department was able to avoid staff reductions during fiscal year 2017-2018.

The fiscal year 2018-2019 projection for Federal Financial Participation is approximately \$10 million less than the projection included in the fiscal year 2017-2018 budget. This reduced projection requires the Department to reduce expenditures to achieve a balanced budget. In addition, 1991 Realignment funding, a significant source of funding for the Department, including Administration, the Public Health

Division, and the Behavioral Health Division, is anticipated to remain at fiscal year 2017-2018 levels for several years.

To align expenditures to available revenues, Health Services expects to recommend to the Board at the June budget hearings a reduction to salaries and benefits of nearly \$8.4 million for fiscal year 2018-2019. This includes the elimination of 107.32 full-time equivalent positions, including approximately 78 vacant positions and up to 30 filled positions subject to layoff. This will result in a reduction of the Department's permanent full-time equivalent positions from 650.70 to 543.38. In addition, the Department plans to reduce the total amount of funding for community services contracts in fiscal year 2018-2019 by approximately \$7.3 million, impacting approximately 50 providers.

The Department is also implementing a number of revenue enhancement strategies in the Behavioral Health Division, including the implementation of the behavioral health electronic health record that will support improved documentation and reimbursement. The Department will also be implementing a number of enhanced internal controls to provide a check and balance on revenue projections that includes continuous monitoring of the revenues and expenditures for all cost centers with monthly benchmarks and mid-course adjustments as necessary. These controls include improved staff reporting structures and role delineation; the development of key reports and other tools for staff and leadership to better inform fiscal operations; and the creation of staff and management partnerships that are designed to promote high performance, high productivity, and a high quality system of care.

With respect to the provision of behavioral health services, planned budget reductions require a redesign of the entire system of care to focus on core services including state mandates for operating a county mental health managed care plan. The redesigned model maintains compliance with these state requirements by focusing on the most vulnerable, chronically mentally ill individuals, as this population is at the core of the mandates for the county mental health plan. Services outside the core will be provided within available resources.

If approved, the Board's action today will authorize the Department, in coordination with the Human Resources Department, to develop a timeline, create and audit seniority lists and layoff notices, and engage employee organizations in the meet and confer process. Timely action is critical to ensure the Department meets the requirement to provide formal notice of 21 calendar days to affected employees in conjunction with the adoption of the fiscal year 2018-2019 budget. If the Board does not authorize the Department to implement the administration of layoff proceedings, it will delay the effective date of position deletions which may require deeper cuts to maintain a balanced budget.

Due to anticipated attrition through retirements, resignations, and promotions, the Department expects fewer than 30 employees will be laid off from County service. With the Board's action today, over the next several weeks and until adoption of the fiscal year 2018-2019 budget, the Department, in coordination with Human Resources, plans to continue monitoring vacancies closely for opportunities to mitigate layoffs to the maximum extent possible. On April 17th the Board approved layoff mitigation strategies put forth by the Human Resources Department. These strategies provide enhanced opportunities for employees affected by the layoffs. Strategies include the Human Resources Department maintaining a county-wide list of position reductions and impacted employees which will be used to match eligible candidates with position requisitions prior to opening a recruitment.

Should nothing change between now and when the Board adopts the budget in June, and the Board takes the recommended actions to approve the proposed reduction of 107.32 full-time equivalent positions, the following positions will be deleted from the fiscal year 2018-2019 budget:
