Day of Caring – Wednesday, September 13, 2017

Project Application – Due July 7, 2017

Return completed application to Sylvia Lemus at sylvia.lemus@sonoma-county.org or fax (707) 565-3770
Projects will be reviewed and you will be notified by July 20, 2017 if your project is accepted.

Submitted by County City

Project Name/Organization: _____

Primary Contact/Project Coordinator: _____

Phone: _____ **Email:** _____

Special client contact notes:

Project Address: _____

City/Zip: _____

Nearest Cross Street: _____

Project Description: *(See project objectives, next page)*

Estimated number of volunteers needed: _____

Time/Hours needed: *(max 6 hours)* _____

Materials needed: *[Please indicate which will be provided by customer/client]*

Tools and equipment needed: *[Please specify tools, including any special or powered tools]*

Other information: *[Identify if dumpsters, green waste, pick-ups are required; or any safety concerns]*

Day of Caring Project Objectives

Projects should be well defined, including maps to locations, list of items needed, scope of work and an assigned project coordinator who is familiar with the project. It is recommended to schedule a meeting two to one week before starting your Day of Caring Project with the assigned team leader(s) so they have an opportunity to visit their assigned site. **Note: Project recipients must be connected to the County of Sonoma or City of Santa Rosa programs as service providers, recipients, or non-profits that have a funding relationship or partnership to be eligible. Non-profits without this connection may be suggested to United Way directly as potential projects.**

Project Should Include:

- Be complete in 6 hours
- Clearly defined scope of work
- Easy to reach area
- Projects reachable by Transit Bus
- Lower level skilled – manual labor
- Average person can complete work
- Journeyman for leadership & guidance when possible
- Leaders who understand scope of work
- Team building activity, requiring lots of individuals
- Social worker or other responsible person on site
- Bring all tools & equipment necessary to complete work
- Rent dumpster if necessary or haul away debris
- Social interaction/communications with owner or provide social benefit for community
- Have paint on site or other selected material
- All materials and supplies to complete work on site (paid by others and not Day of Caring volunteers)
- Low cost but lots of manual labor
- Simple, no permit type work

Project Should Avoid:

- Multi-day project
- Ambiguous or too broad of scope
- Difficult or potentially dangerous work (Roofs, gutter replacement, etc.)
- Projects requiring many vehicle miles
- Journeyman level skill (electrical re-wiring)
- Requires licensed professional or journeyman level expertise
- Sent without leader or without a pre-meetings
- Only one person needed
- No leadership, just sent out to do work
- Using owner's tools and/or equipment
- Leave debris at site for others to remove
- No contact with owner or other community benefit
- Run around trying to locate materials
- Out of pocket expenses or use of personal credit cards
- Expensive with little manual labor
- Require permit or engineering

Types of Good Projects:

- Landscaping, trimming, clearing brush
- Moving earth, sawdust, and bark chips
- Painting exteriors (less than 6 hours total)
- Painting one room (furniture already moved)
- Trash disposal and general clean up
- General house cleaning
- Clean creek of trash and brush
- Graffiti removal
- Wipe down and clean old Library books
- Gardening and weeding
- Stocking shelves at the Food Bank
- Trail work (Shiloh Park/Spring Lake)

Projects to Avoid:

- Projects that can't be completed in 6 hours
- Physical limitations – Workers Comp
- Painting complete residential homes
- Moving of furniture or other personal items
- Hazardous material removal (lead, asbestos, chemicals)
- Avoid poison oak, bees and other hazardous
- Sand blasting or other specialty equipment use not associated with average individual's ability to use equipment safely
- High elevation stocking, high reaching
- Heavily lifting (worker's comp. claims)

Note:

Some individuals prefer to complete work in residential homes, such as cleaning kitchens, removing trash, landscaping, trimming brush, weeding. These projects require individual attention and similar effort as larger projects like cleaning the creeks, graffiti removal, and painting commercial exteriors. Often projects are completed quicker than anticipated and other back-up projects or re-assigning individuals to larger projects become necessary. We should try to line up as many projects possible, as early as possible, to work with logistics (transportation, tools, materials, team assignments, etc.)
