Measles: it isn't just a little rash

Measles can be dangerous, especially for babies and young children.

Measles symptoms typically include:

- High fever (may spike to more than 104° F)
- Cough
- Runny nose
- Red, watery eyes
- Rash breaks out 3-5 days after symptoms begin

Measles Can Be Serious.

About 1 out of 4 people who get measles will be hospitalized.

1 out of every 1,000 people with measles will develop brain swelling due to infection (encephalitis), which may lead to brain damage. 1 or 2 out of 1,000 people with measles will die, even with the best care.

You have the power to protect your child.

Provide your children with safe and long-lasting protection against measles by making sure they get the measles-mumps-rubella (MMR) vaccine according to CDC's recommended immunization schedule.

www.cdc.gov/measles

Sarampión: no es simplemente un sarpullido leve

El Sarampión puede ser peligroso, sobre todo en los bebés y niño pequeños.

Los síntomas del sarampión incluyen por lo general los siguientes:

- Fiebre alta (puede subir hasta más de 104 °F)
- Tos
- Moqueo
- Ojos enrojecidos y llorosos
- Sarpullido que aparece 3 a 5 días después de que empiezan los síntomas

El Sarampión puede ser grave.

Cerca de 1 de cada 4 personas que contraen el sarampión será hospitaliza. 1 de cada 1000 personas con sarampión presentara inflamación del cerebro por la infección (encefalitis), lo cual puede causar daño cerebral.

1 o 2 de cada 1000 personas con sarampión morirán, aun cuando reciban la mejor atención.

Usted tiene el poder de proteger a su hijo.

Dele a su hijo una protección segura y duradera contra el sarampión al asegurarse de que recibe la vacuna contra el sarampión, las paperas y la rubeola (MMR), según el calendario de vacunación recomendado por los CDC.
