SUMMARY

Applicant: Dimensions 4 Engineering, Attn: Doug Donmon
Owner: Lenor Fowler
Location: 4555 Mountain Home Ranch Road, Calistoga
APNs: APN 120-200-056
Subject: Approval of a Conditional Certificate of Compliance for an 8.82 acre designated remainder created by PM 4316 but was never officially recorded.

Environmental Determination: CEQA Exemption Section 15305 because it is a minor alteration in land use limitations in areas with an average slope of less than 20% and will not result in any changes in land use or density.

BACKGROUND: On January 10, 1974, EAC (Engineering Advisory Committee) approved a minor subdivision (Lot Split 4316) of a 26.74 +/- acre parcel creating a 16.74 acre parcel and 10 acre designated remainder. The conditions of approval are attached to this memo. The parcel map was never recorded but the dedication of the county road was recorded on May 24, 1974 (Book 2866 of Records, Page 703) which fulfilled the conditions set by the EAC. A subsequent EAC meeting on February 14, 1974 amended the conditions of approval by stating “If dedication is made by deed to County prior to validation, no parcel map will be required.” The property owner at the time, May Schellenger, thought they had met all the requirements and never filed a Parcel Map with the County Recorder. The subject parcel stayed in the same ownership until 2001 when the current owner took possession.

Beginning last year, the current property owner has filed for the following development permits which been accepted and/or issued for the project site:

</tbody>
</table>
STAFF RECOMMENDATION

Find that under California Subdivision Map Act (SMA) Section 66499.34 the site has been approved for development and approve a Conditional Certificate of Compliance subject to conditions attached as Exhibit “A”.

FINDINGS FOR RECOMMENDED ACTION

The California Subdivision Map Act (SMA) regulates division of land and recognition of parcels for the purpose of lease, sale, or finance. Section 66499.34 of the SMA states:

“The issuance of a permit or grant of approval for development of real property, or with respect to improvements that have been completed prior to the time a permit or grant of approval for development was required by local ordinances in effect at the time of the improvement... shall constitute “real property which has been approved for development,” for the purposes of subdivision (c) of Section 66499.35, and upon request by the person owning the real property or a vendee of such person pursuant to a contract of sale, the local agency shall issue a certificate of compliance for the affected real property.”

Section of the SMA 66499.35(c) states:

“A certificate of compliance shall be issued for any real property that has been approved for development pursuant to Section 66499.34.”

By issuing well and septic permits, and accepting an application to construct a single family home, the subject parcel has been approved for development and issuance of a certificate of compliance is required by the Subdivision Map Act.

Draft Conditions of Approval as Exhibit “A”
Validated Lot Split Map 4316
EAC Conditions dated January 10, 1974
Amended EAC Conditions dated February 14, 1974
Recorded Document Book 2866 of Records, Page 703 dedicating road to County of Sonoma
**Project Description:** Request for a Conditional Certificate of Compliance to recognize an 8.82 acre parcel which was created by subdivision map MS 4316 that was never officially recorded.

**NOTE:** Amendments and changes to approved Certificate of Compliance conditions may be considered by the Board of Supervisors at a later date if additional information justifies the changes and does not increase the intensity of use approved by the original approval. The Director of the Permit and Resource Management Department will determine if a public hearing is necessary and if additional fees are required.

**NOTE:** Certificate of Compliance must record within two (2) years of issuance of conditions of approval.

**PLANNING:**

1. A Conditional Certificate of Compliance shall be recorded and a copy filed with the Permit and Resource Management Department.

2. Subject portion of the parcel shall meet all current pertinent zoning and density regulations together with the California State Subdivision Map Act law and Sonoma County Subdivision Ordinance.

3. All conditions of approval concerning the designated remainder as stated for and also shown on the MS(LS) 4316 shall be met to the satisfaction of the County Surveyor and Permit Resources Management Department (PRMD)/Permit Sonoma staff prior to any issuance of development permit for said Minor Subdivision (Lot Split) 4316

4. The following note shall be placed on the Certificate of Compliance (CCC) document that will be recorded with the Sonoma County Recorder’s Office:

   “This certificate relates only to issues of compliance or noncompliance with the Subdivision Map Act and local ordinances enacted pursuant thereto. The parcel described herein may be sold, leased, or financed without further compliance with the Subdivision Map Act or any local ordinance enacted pursuant thereto. Development of the parcel may require issuance of a permit or permits, or other grant or grants of approval.” (Subdivision Map Act Section 66499.35(f)(1)(E))

5. The applicant shall include these Conditions of Approval on a separate sheet(s) of blueprint plan sets to be submitted for building and grading permit applications.

6. All grading and building permits plans involving ground disturbing activities shall include the following notes:

   "If paleontological resources or prehistoric, historic or tribal cultural resources are encountered during ground-disturbing work, all work in the immediate vicinity shall be halted and the operator must immediately notify Permit Sonoma – Project Review staff of the find. The operator shall be responsible for the cost to have a qualified paleontologist, archaeologist or tribal cultural resource specialist under contract to evaluate the find and make recommendations to protect the resource in a report to Permit Sonoma. Paleontological resources include fossils of animals, plants or other organisms. Prehistoric resources include humanly modified stone, shell, or bones, hearths, fire pits, obsidian and chert flaked-stone tools (e.g., projectile points, knives, choppers), midden (culturally darkened soil containing heat-affected rock, artifacts, animal bone, or shellfish..."
remains), stone milling equipment, such as mortars and pestles, and certain sites features, places, cultural landscapes, sacred places and objects with cultural value to a California Native American tribe. Historic resources include all by-products of human use greater than fifty (50) years of age including, backfilled privies, wells, and refuse pits; concrete, stone, or wood structural elements or foundations; and concentrations of metal, glass, and ceramic refuse.

If human remains are encountered, work in the immediate vicinity shall be halted and the operator shall notify Permit Sonoma and the Sonoma County Coroner immediately. At the same time, the operator shall be responsible for the cost to have a qualified archaeologist under contract to evaluate the discovery. If the human remains are determined to be of Native American origin, the Coroner must notify the Native American Heritage Commission within 24 hours of this identification so that a Most Likely Descendant can be designated and the appropriate measures implemented in compliance with the California Government Code and Public Resources Code.”

Building/grading permits shall not be approved for issuance by Permit Sonoma Project Review staff until the above notes are printed on the building, grading and improvement plans.

7. All grading and development on site shall be done in compliance with the County Tree Protection Ordinance, including protection of trees during construction with a chain link fence at the dropline, and replacement of damaged or removed trees. The projects grading and landscape plans shall detail all tree protection implementation measures.

Permit Sonoma shall not sign off the grading or building permit for issuance until the project grading and landscape construction documents clearly show all tree protection measures (as required in the County Tree Protection Ordinance). Permit Sonoma Project Review staff shall not sign off the grading or building permit for occupancy until a site inspection has been conducted, and the applicant has provided written verification from the project’s landscape architect or contractor, that the tree protection measures were complied with.

8. The Director of Permit Sonoma is hereby authorized to modify these conditions for minor adjustments to respond to unforeseen field constraints provided that the goals of these conditions can be safely achieved in some other manner. The applicant must submit a written request to Permit Sonoma demonstrating that the conditions is infeasible due to specific constraints (e.g. lack of property rights) and shall include a proposed alternative measure or option to meet the goal or purpose of the condition. Permit Sonoma shall consult with affected departments and agencies and may require an application for modification of the approved Tentative Map. Changes to conditions that may be authorized by Permit Sonoma are limited to those items that are not adopted standards or were not adopted as mitigation measures or that were not at issue during the public hearing process. Any modification of the permit conditions shall be documented with an approval letter from Permit Sonoma, and shall not affect the original permit approval date or the term for expiration of the permit.

The owner/operator and all successors in interest, shall comply with all applicable provisions of the Sonoma County Code and all other applicable local, state and federal regulations.

Engineering Advisory Committee Report on

LOT SPLIT # 4016 MAX BELLINGER

Approved Unconditionally __ __
Approved w/conditions (see below) X ___
Denied because ___

CONDITIONS:

1. Applicant must provide evidence of suitable soil characteristics for subsurface sewage disposal purposes substantiated by soils percolation tests and an evaluation of soils and water table to a depth of 8 feet certified by a civil engineer on each lot. The percolation report must refer to this lot split number.

2. A Parcel Map, as defined in the State Subdivision Map Act and prepared by a licensed land surveyor or civil engineer showing lot, dedication and building setback line shall be filed with the Sonoma County Surveyor's Office. Upon recordation of the map, the lot split is valid.

Applicant shall retain a registered civil engineer to prepare road construction plans for the private road. After plan approval by the County Surveyor, applicant shall construct any necessary drainage facilities and the base portion of the road, followed by paving or an oil and rock surfacing.

3. A strip of land, 30 ft. in width, measured from the centerline of Mountain Home Ranch Road and lying across lots 1 shall be offered to the County of Sonoma.

Each lot shall be a minimum ______________ exclusive of rights of way and easements.

4. A building setback line shall be established along the creek on lot 2 measured from the toe of the bank outward at a slope of 2:1 plus 30 ft. or 30 ft. outward from the top of the bank, whichever is greater.
